BARCLAYS OFFICIAL CALIFORNIA CODE OF REGULATIONS

REVISED EDITION

This edition of *Barclays Official California Code of Regulations*, revised on April 1, 1990, has been published under the direction of the California Office of Administrative Law which is solely responsible for its contents. Comments or questions regarding regulations published in this edition should be addressed to the State of California, Office of Administrative Law, 300 Capitol Mall, Suite 1250, Sacramento, CA 95814, (916) 323–6225. Errors reported will be promptly corrected in subsequent supplements.

OFFICIAL PUBLICATION

Courts are required to take judicial notice of contents of regulations published in the *Official California Code of Regulations* (Gov. Code, § 11344.6). *Barclays Official California Code of Regulations*, as revised April 1, 1990, has been certified by the Office of Administrative Law as the official publication of the State of California for this purpose pursuant to title 1, *California Code of Regulations*, section 190.

CODE SUPPLEMENTS

Amendments to the official Code are certified weekly by the Office of Administrative Law for publication by Barclays. These amendments, when certified and published, become part of the *Official California Code of Regulations*, beginning with Register 90, No. 14, dated April 7, 1990, and include all regulations filed with the Secretary of State on or after April 1, 1990. Amendment subscriptions to the entire revised Code, or to parts of it, are available from the publisher. For a descriptive brochure and order form, write Barclays Official California Code of Regulations, P.O. Box 2008, San Francisco, CA 94126 or telephone 800–888–3600.

CODE CITATION

Cite all materials in the *Official California Code of Regulations* by title number and section number. Example: Title 3, *California Code of Regulations*, section 432 (Short form: Cal. Code Regs., tit. 3, § 432).

TITLE 3. FOOD AND AGRICULTURE

Division 1. Administration

Chapter 1. General

§ 1. Service of Notices.

For the purpose of subdivision (c) of Section 11505 of the Government Code, notices which are required to be served by registered mail may be served by certified mail pursuant to Section 8311 of the Government Code, and shall be mailed to the licensee at the premise for which his license is issued. Any licensee who desires to have such notices mailed to him at an address other than his licensed premise shall file with the department a specific request for that purpose, and in such case notices shall be sent to the licensee at such address. Such licensee shall notify the department of a change in address, and specifically request the department to mail notices to the changed address.

NOTE: Authority cited for Subchapter 1: Section 16 (renumbered 407, 1967 Stats. C. 15), Food and Agricultural Code. Reference: Section 11505, Government Code.

HISTORY

- 1. New section filed 12–5–62; effective thirtieth day thereafter (Register 62, No. 25).
- Amendment filed 6–9–71 as procedural; effective upon filing (Register 71, No. 24).

§ 1.1. Conflict of Interest Prohibition: Pesticides.

- (a) Each officer and employee of the Department of Pesticide Regulation whose duties involve enforcement or execution of the pesticide provisions of the Food and Agricultural Code shall comply with the Conflict of Interest Code provisions applicable to all Department employees. In addition, no such officer or employee shall hold any direct or indirect interest in the sale, manufacture, or distribution of any pesticide, as provided in this section.
- (b) This section prohibits ownership of a financial interest in any business entity holding any of the following licenses or certificates:
- (1) Certificate of Pesticide Registration, Food and Agricultural Code Section 12815;
- (2) Pest Control Business License, Food and Agricultural Code Section 11701:
- (3) Pest Control Dealer License, Food and Agricultural Code Section 12101;
- (4) Agricultural Pest Control Adviser License, Food and Agricultural Code Section 12001;
- (5) Pest Control Aircraft Pilot's Certificate, Food and Agricultural Code Section 11901;
- (6) Structural Pest Control Company Registration, Business and Professions Code Section 8610.
- (c) This section does not prohibit ownership of an interest in or securities of:
- (1) A mutual fund or other investment company regulated pursuant to the Securities Act of 1933, the Investment Company Act of 1940, or comparable state or federal law, provided no interest is held as an officer or manager of the investment company or its adviser, and provided further the investment company does not specialize in securities of chemical companies.
- (2) A business not included in subsection (b) that may sell pesticides incidental to the sale of general merchandise, such as food markets, variety stores, department stores, and hardware stores, provided no interest is held as an officer or manager of the business.
- (d) This section does not prohibit the ownership of bank accounts, annuities and similar interests in commercial banks, insurance companies

and other state or federally regulated financial institutions that may hold or manage investments, provided the Department officer or employee has no direct authority over the investments.

(e) Lists of business entities regulated with regard to pesticides, as designated in subsection (b)(1)–(6), shall be available in the Division licensing the business entities. Since the list of regulated companies is subject to change and security holdings may be affected by acquisitions, mergers and entry into new fields, Department officers and employees should review their holdings at least annually and at other times as circumstances require.

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Section 12783, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–16–78; effective thirtieth day thereafter (Register 78, No. 3).
- 2. Renumbering of former Section 2 (Subchapter 1) to Section 1.1 filed 6–15–83; effective thirtieth day thereafter (Register 83, No. 25).
- 3. Change without regulatory effect amending section heading, section and Note filed 6-5-2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 23).

Chapter 1.1. Department of Food and Agriculture—Conflict of Interest Code

NOTE: Pursuant to a regulation of the Fair Political Practices Commission (Title 2, CCR, section 18750(k)(2)), an agency adopting a conflict of interest code has the options of requesting that the code either be (1) printed in the CCR in its entirety or (2) incorporated by reference into the CCR. Here, the adopting agency has requested incorporation by reference. However, the full text of the regulations is available to the public for review or purchase at cost at the following locations:

NOTE: Authority cited: Section 12781, Food and Agricultural Code. Reference: Sections 87300 and 87311, Government Code.

HISTORY

- New chapter 1.2 (section 3 and Appendix) filed 9–16–92; operative 10–16–92.
 Approved by Fair Political Practices Commission 7–28–92 (Register 92, No. 38).
- Amendment of address filed 4-11-94; operative 5-11-94. Submitted to OAL for printing only (Register 94, No. 15).
- 3. Amendment of address and Appendix filed 5–23–97; operative 6–22–97. Approved by Fair Political Practices Commission 3–15–97 (Register 97, No. 21).

Chapter 2. Examination for County Officers/Employees

Article 1. Qualifications

§ 101. General Qualifications.

All candidates shall possess the general qualification of integrity, honesty, sobriety, dependability, industry, thoroughness, accuracy, good judgment, initiative, resourcefulness, courtesy, ability to work cooperatively with others, willingness and ability to assume the responsibilities and to conform to the conditions of work characteristic of the employment, and shall be able to perform the essential functions of the job as defined in any county specifications for the position. The foregoing general qualifications shall be deemed to be a part of the minimum qualifications of each classification and need not be specifically set forth therein.

NOTE: Authority cited: Sections 407 and 2101, Food and Agricultural Code; and Sections 12027 and 12202, Business and Professions Code. Reference: Sections 2101 and 2102, Food and Agricultural Code; and Section 12202, Business and Professions Code.

HISTORY

1. Repealer of Subchapter 2 (Sections 101 through 285) and new Subchapter 2 (Sections 101 through 173) filed 7–24–67; effective thirtieth day thereafter (Register 67, No. 30). For prior history, see Registers 53, No. 1; 57, No. 1; 57, No. 12 and 65, No. 17.

2. Amendment of section and Note filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 102. Citizenship and Age.

NOTE: Authority cited: Secs. 407, Food and Agricultural Code; 12027, Business and Professions Code. Reference: 2101 and 2102, Food and Agricultural Code, and 12202, Business and Professions Code.

HISTORY

- 1. Repealer filed 7–28–70 as an emergency; effective upon filing (Register 70, No. 31).
- 2. Certificate of Compliance—Sec. 11422.1, Gov. Code, filed 9–8–70 (Register 70, No. 36).

§ 103. Minimum Qualifications—County Agricultural Commissioner.

The following are the minimum qualifications for admission to the license examination for County Agricultural Commissioner:

- (1) Possession of a valid statewide Deputy County Agricultural Commissioner license; and
- (2) Four years of experience in the enforcement of agricultural or weights and measures laws; at least two years of which shall have included management, supervisory, or program responsibility experience; and
- (3) A minimum of 80 hours of instruction in management and/or supervisory practices, obtained through organized classroom training, inservice training, or accredited correspondence courses.

The scope of the licensing may include the following:

Knowledge of: all laws relating to the office of County Agricultural Commissioner; agriculture; the structure and function of county government; Department of Food and Agriculture and Department of Pesticide Regulation policies and County Agricultural Commissioners' policy statements; principles of administration including program planning, personnel management, budgeting, training, supervision, public relations, office procedures, and records management; legal processes involved in County Agricultural Commissioner responsibilities; those California Code of Regulations provisions dealing with work directly related to the duties of the County Agricultural Commissioner and any rules and regulations of a similar nature.

Ability to: lead others; demonstrate initiative to improve supervisory and management skills; head a county department; handle the funds of the office in an economical manner; effectively evaluate the qualifications of and demonstrate good judgment in selecting assistants; organize and direct a staff of inspectors; analyze situations and people accurately; make independent decisions quickly on matters of importance; get along well with others; handle difficult situations accurately; take effective action; make decisions on controversial matters; speak and write effectively.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 2101–2103, Food and Agricultural Code.

HISTORY

- Amendment of Sections 103 through 105 filed 1–20–69; effective thirtieth day thereafter (Register 69, No. 4).
- 2. Amendment filed 1–30–73; effective thirtieth day thereafter (Register 73, No. 5)
- 3. Amendment filed 2–4–74; effective thirtieth day thereafter (Register 74, No. 6).
- 4. Amendment of subsection (1) filed 8–11–77; effective upon filing (Register 77, No. 33).
- Amendment filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 104. Minimum Qualifications—Deputy County Agricultural Commissioner.

The following are minimum qualifications for admission to the licensing examination for Deputy County Agricultural Commissioner:

- (1) Possession of valid statewide County Agricultural Inspector/Biologist licenses in all categories for which licenses are issued; and
- (2) Two years of experience in the enforcement of agricultural or weights and measures laws or in agricultural pest control or in the production, processing, or marketing of agricultural commodities. This experience must have been at a level comparable to county agricultural or weights and measures inspector; and

(3) Education: Possession of a bachelor's degree from an accredited four-year college with specialization in one or more appropriate disciplines in agricultural or biological sciences as determined by the Secretary of the Department of Food and Agriculture. This requirement does not apply to any person holding a valid certificate of qualification prior to January 1, 1985.

The scope of the licensing examination may include the following:

Knowledge of: all laws relating to the office of County Agricultural Commissioner; agriculture; the structure and function of county government; Department of Food and Agriculture and Department of Pesticide Regulation policies and County Agricultural Commissioners' policy statements; principles of administration including program planning, personnel management, budgeting, training, supervision, public relations, office procedures, and records management; legal processes involved in County Agricultural Commissioner responsibilities; those California Code of Regulations provisions dealing with work directly related to the duties of the County Agricultural Commissioner and any rules and regulations of a similar nature.

Ability to: lead others; demonstrate initiative to improve supervisory and management skills; demonstrate potential as a first line supervisor; handle the funds of the office in an economical manner; effectively evaluate the qualifications of and demonstrate good judgment in selecting assistants; organize and direct a staff of inspectors; analyze situations and people accurately; make independent decisions quickly on matters of importance; get along well with others; handle difficult situations accurately; take effective action; make decisions on controversial matters; speak and write effectively.

NOTE: Authority cited: Sections 407 and 2101, Food and Agricultural Code. Reference: Section 2106, Food and Agricultural Code.

HISTORY

- Amendment filed 1–30–73; effective thirtieth day thereafter (Register 73, No. 5).
- 2. Amendment filed 2-4-74; effective thirtieth day thereafter (Register 74, No. 6).
- 3. Amendment of subsection (1) filed 8-11-77; effective thirtieth day thereafter (Register 77, No. 33).
- Amendment of section and new Note filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 105. Minimum Qualifications—County Agricultural Inspector/Biologist.

The following are the minimum qualifications for admission to the licensing examination for County Agricultural Inspector/Biologist:

Either I

Possession of one or more valid statewide specific category licenses as a County Agricultural Inspector/Biologist;

Or II

Education:

Possession of a Bachelor's degree from an accredited four-year college with specialization in one or more appropriate disciplines in agricultural or biological sciences as determined by the Secretary.

The scope of the licensing examination may include the following: Wide knowledge of: provisions of the Food and Agricultural Code, California Code of Regulations, and related Federal laws and regulations pertaining to the following specific categories for which the candidate elects to qualify:

- 1. Pesticide Regulation
- 2. Investigation and Environmental Monitoring
- 3. Integrated Pest Management
- a. Insect and Disease Pest Management
- b. Vertebrate Pest Management
- c. Weed Control
- d. Apiary Regulation
- 4. Commodity Regulation
- 5. Pest Prevention and Plant Regulation
- a. Plant Quarantine and Pest Detection
- b. Nursery and Seed Regulation

General knowledge of: laws, regulations and functions relating to the office of County Agricultural Commissioner; the agricultural industry in California.

Ability to: interpret and apply the provisions of laws and regulations relating to the office of the County Agricultural Commissioner; deal tactfully and effectively with persons contacted on enforcement matters; establish and maintain cooperative relations with others; analyze situations accurately and take effective action; speak and write effectively.

Persons holding certificates in all of the former categories of Insect and Disease Pest Management, Vertebrate Pest Management, Weed Control and Apiary Regulation shall receive an Integrated Pest Management license. Persons holding certificates in only one, two or three of these former categories shall receive an Integrated Pest Management license limited to the respective subcategory(ies) in which previously certified. Such limited licenses shall remain valid subject to renewal requirements specified in Sections 152 and 153. Persons issued such limited licenses shall be allowed to qualify for the full license by successfully participating in an examination for the unlicensed subcategory(ies) as determined appropriate by the Secretary.

Persons holding a certificate in the former Fruit, Vegetable and Egg Quality Control category shall receive a Commodity Regulation license.

Persons holding certificates for the former categories of Plant Quarantine and Pest Inspection and Nursery and Seed Regulation shall be issued a Pest Prevention and Plant Regulation license. Persons holding one of these two certificates shall receive a Pest Prevention and Plant Regulation license limited to the respective subcategory in which previously certified. Such limited licenses remain valid subject to renewal requirements specified in Sections 152 and 153. Persons issued such limited licenses shall be allowed to qualify for the full license by successfully participating in an examination for the unlicensed subcategory as determined appropriate by the Secretary.

Persons holding a certificate in the former Pesticide Use Enforcement category shall receive a Pesticide Regulation license and an Investigation and Environmental Monitoring license.

NOTE: Authority cited: Sections 407 and 2101, Food and Agricultural Code. Reference: Sections 2102 and 2106, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33). For prior history, see Register 74, No. 6.
- Amendment filed 12–11–84 as an emergency; effective upon filing (Register 84, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–10–85.
- 3. Reinstatement of section as it existed prior to emergency amendment filed 12–11–84 by operation of Government Code Section 11346.1(f) (Register 85, No. 16)
- 4. Amendment of section and Note filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 105.1. Student Qualifications.

NOTE: Authority cited: Sec. 407, Food and Agricultural Code. Reference: Sec. 2102, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–16–71; effective thirtieth day thereafter (Register 71, No. 47). For history of former section see Register 71, No. 1.
- Repealer filed 2-4-74; effective thirtieth day thereafter (Register 74, No. 6).
 Note: Through error, repealer first printed in Register 74, No. 35.

§ 106. Minimum Qualifications—County Sealer of Weights and Measures.

The following are the minimum qualifications for admission to the licensing examination for County Sealer of Weights and Measures:

- (1) Possession of a valid statewide Deputy County Sealer of Weights and Measures license; and
- (2) Four years of experience in the enforcement of weights and measures or agricultural laws; at least two years of which shall have included management, supervisory, or program responsibility experience; and
- (3) A minimum of 80 hours of instruction in management and/or supervisory practices, obtained through organized classroom training, inservice training, or accredited correspondence courses.

The scope of the licensing examination may include the following:

Knowledge of: all laws relating to the office of County Sealer of Weights and Measures; Department of Food and Agriculture policies; the structure and function of county government; principles of administration including program planning, personnel management, budgeting, training, supervision, public relations, office procedures, and records management; legal processes involved in County Sealer of Weights and Measures responsibilities; those California Code of Regulations provisions dealing with work directly related to the duties of the County Sealer of Weights and Measures and any rules and regulations of a similar nature.

Ability to: lead others; demonstrate initiative to improve supervisory and management skills; head a county department; handle the funds of the office in an economical manner; effectively evaluate the qualifications of and demonstrate good judgment in selecting assistants; organize and direct a staff of inspectors; analyze situations and people accurately; make independent decisions quickly on matters of importance; get along well with others; handle difficult situations accurately; take effective action; make decisions on controversial matters; speak and write effective-ly

NOTE: Authority cited: Section 12027, Business and Professions Code. Reference: Section 12202, Business and Professions Code.

HISTORY

- Amendment of Sections 106, 107 and 108 filed 1-20-69; effective thirtieth day thereafter (Register 69, No. 4).
- 2. Amendment filed 2-4-74; effective thirtieth day thereafter (Register 74, No. 6).
- Amendment filed 8-11-77; effective thirtieth day thereafter (Register 77, No. 33).
- 4. Amendment of section and Note filed 10–4–95; operative 10–4–95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 107. Minimum Qualifications—Deputy County Sealer of Weights and Measures.

The following are the minimum qualifications for admission to the licensing examination for Deputy County Sealer of Weights and Measures:

- (1) Possession of valid County Weights and Measures Inspector licenses in all categories for which licenses are issued; and
- (2) Two years of experience in the enforcement of weights and measures or agricultural laws or in the inspection, maintenance, repair or installation of weighing or measuring instruments or equipment; consumer protection or resolution of consumer complaints in a public or private consumer affairs agency; law enforcement or investigation work in a federal, state, or local jurisdiction; responsible quality control or quantity control work in the production of consumer commodities. This experience must have been at a level comparable to county weights and measures or agricultural inspector/biologist; and
- (3) Education equivalent to graduation from college with major work in chemistry, physics, mathematics, engineering, or other job related majors such as law enforcement, commerce and marketing. (Additional qualifying experience may be substituted for up to two years of the required college education on a year–for–year basis. Persons applying under this pattern must have a minimum of 15 semester units of college training in one or more of the qualifying majors). Persons holding the required valid licenses and permanently employed as a deputy commissioner, or weights and measures or agricultural inspector/biologist shall be deemed to meet the educational requirements of this section.

The scope of the licensing examination may include the following: Knowledge of: all laws relating to the office of County Sealer of Weights and Measures; Department of Food and Agriculture policies; the structure and function of county government; principles of administration including program planning, personnel management, budgeting, supervision, training, public relations, office procedures, and records management; legal processes involved in County Sealer of Weights and Measures responsibilities; those California Code of Regulations provisions dealing with work directly related to the duties of the County Sealer of Weights and Measures and any rules and regulations of a similar nature.

Ability to: lead others; demonstrate initiative to improve supervisory and management skills; demonstrate potential as a first line supervisor; handle the funds of the office in an economical manner; effectively evaluate the qualifications of and demonstrate good judgment in selecting assistants; organize and direct a staff of inspectors; analyze situations and people accurately; make independent decisions quickly on matters of importance; get along well with others; handle difficult situations accurately; take effective action; make decisions on controversial matters; speak and write effectively.

NOTE: Authority cited: Section 12027, Business and Professions Code. Reference: Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment filed 2-4-74; effective thirtieth day thereafter (Register 74, No. 6).
- 2. Amendment filed 12–26–74; effective thirtieth day thereafter (Register 74, No. 52)
- 3. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).
- 4. Amendment of section and new Note filed 10–4–95; operative 10–4–95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 108. Minimum Qualifications—County Weights and Measures Inspector.

The following are the minimum qualifications for admission to the licensing examination for County Weights and Measures Inspector:

Either I

Possession of one or more valid statewide specific category licenses as a County Weights and Measures Inspector or County Agricultural Inspector/Biologist and permanently employed as a County Weights and Measures Inspector or County Agricultural Inspector/Biologist.

Or II

Education:

(1) Equivalent to graduation from college with major work in chemistry, physics, mathematics, engineering, or other job related majors such as law enforcement, commerce and marketing. (Registration in a recognized college as a senior majoring in one of these fields will admit applicants to the examination but a certificate will not be issued until graduation.)

Or

(2) Experience in one or more of the following may be substituted for up to two years of the required college education on a year–for–year basis: (1) enforcement of weights and measures or agricultural laws; (2) the inspection, maintenance, repair or installation of weighing or measuring instruments or equipment; (3) consumer protection or resolution of consumer complaints in a public or private consumer affairs agency; (4) law enforcement or investigation work in a federal, state or local jurisdiction; (5) responsible quality control or quantity control work in the production of consumer commodities. This experience must have been at a level comparable to county weights and measures or agricultural inspector/biologist. (Persons applying under this pattern must have a minimum of 15 semester units in job related courses. Applicants with a college major other than those listed who have the minimum 15 semester units of job related courses and two years of qualifying experience may qualify for the examination.)

Or III

- (1) Possession of an Associate in Science Degree in Measurement Science with a Weights and Measures Option granted by a California community college; and
- (2) One year of experience in the enforcement of weights and measures laws or in the inspection, maintenance, repair or installation of weighing or measuring instruments or equipment. This experience must have been at a level comparable to County Weights and Measures Inspector.

Persons who have attained the Associate in Science Degree as stated in (1) above will be permitted to apply for and take the examination but must provide evidence of one year of experience described in (2) above before a license will be issued.

Page 4 Register 95, No. 40; 10-6-95

The scope of the licensing examination may include the following:

Wide knowledge of: weights and measures provisions of the California Business and Professions Code, California Code of Regulations, and related Federal laws and regulations pertaining to the following specific categories for which the candidate elects to qualify:

- 1. Weight Verification
- a. Weighing Devices
- b. Weighmaster and Petroleum Products
- 2. Measurement Verification
- a. Measuring Devices
- b. Electric Measuring Devices
- c. Compressed Gases
- 3. Transaction and Product Verification
- a. Quantity Control of Packaged Commodities
- b. Weighmaster and Petroleum Products

Persons holding certificates in all of the former categories of Measuring Devices, Electric Measuring Devices and Compressed Gases shall receive a Measurement Verification license. Persons holding only one or two of these certificates shall receive a Measurement Verification license limited to the respective subcategory(ies) in which previously certified. Such limited licenses shall remain valid subject to renewal requirements specified in Sections 152 and 153. Persons issued such limited licenses shall be allowed to qualify for the full license by successfully participating in an examination for the unlicensed subcategory(ies) as determined appropriate by the Secretary.

Persons holding certificates for the former categories of Weighing Devices and Weighmaster and Petroleum Products shall be issued a Weight Verification license. Persons holding only one of these two certificates shall receive a Weight Verification license limited to the respective subcategory in which previously certified. Such limited licenses shall remain valid subject to renewal requirements specified in Sections 152 and 153. Persons issued such limited licenses shall be allowed to qualify for the full license by successfully participating in an examination for the unlicensed subcategory as determined appropriate by the Secretary.

Persons holding certificates for the former categories of Quantity Control of Packaged Commodities and Weighmaster and Petroleum Products shall be issued a Transaction and Product Verification license. Persons holding only one of these two certificates shall receive a Transaction and Product Verification license limited to the respective subcategory in which previously certified. Such limited licenses shall remain valid subject to renewal requirements specified in Sections 152 and 153. Persons issued such limited licenses shall be allowed to qualify for the full license by successfully participating in an examination for the unlicensed subcategory as determined appropriate by the Secretary.

General knowledge of: laws, regulations, and functions relating to the office of the County Sealer of Weights and Measures; measuring and weighing devices and standards.

Ability to: interpret and apply the provisions of laws and regulations relating to weights and measures; deal tactfully and effectively with persons contacted on enforcement matters, including investigative and testing procedures; establish and maintain cooperative relations with others; analyze situations accurately and take effective action; speak and write effectively.

NOTE: Authority cite: Section 12027, Business and Professions Code. Reference: Section 12202, Business and Professions Code.

HISTORY

- Amendment filed 12–10–76; effective thirtieth day thereafter (Register 76, No. 50). For prior history, see Register 74, No. 52.
 Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 50).
- Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No 33).
- 3. Amendment of section and Note filed 10–4–95; operative 10–4–95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 108.1. Special Examination for County Weights and Measures Inspector.

HISTORY

 New section filed 6-24-69 as an emergency; effective upon filing (Register 69, No. 26). Certificate of Non-compliance (repealer by operation of Section 11422.1, Gov. Code) filed 7–8–69 (Register 71, No. 1).

§ 109. Inspector Qualifications Limitations.

A county agricultural inspector/biologist or weights and measures inspector shall not be directed to perform duties in those categories in which not licensed except under qualified supervision.

NOTE: Authority cited: Section 407, Food and Agricultural Code and Section 12027, Business and Professions Code. Reference: Sections 2101–2103, Food and Agricultural Code and Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment filed 1–20–69; effective thirtieth day thereafter (Register 69, No. 4).
- Amendment filed 8-11-77; effective thirtieth day thereafter (Register 77, No. 33).
- Amendment filed 10–4–95; operative 10–4–95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

Article 2. Examination

§ 121. Examinations.

Examinations shall be of such character as fairly to test and determine the qualifications, fitness and ability of competitors actually to perform the duties of the classification for which they seek licenses. Examinations may be assembled or unassembled, written or oral, or in the form of a demonstration of skill, or any combination of these; and any investigation of character, personality, education and experience and any tests of intelligence, capacity, technical knowledge, manual skill, or physical fitness which the Secretary deems are appropriate, may be employed.

A candidate who holds a valid commissioner or sealer license may qualify for the other license by obtaining the appropriate deputy license and passing an oral examination.

NOTE: Authority cited: Section 407, Food and Agricultural Code and Section 12027, Business and Professions Code. Reference: Sections 2101–2103, Food and Agricultural Code and Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment filed 1–20–69; effective thirtieth day thereafter (Register 69, No. 4).
- 2. Amendment filed 2-4-74; effective thirtieth day thereafter (Register 74, No. 6).
- 3. Amendment filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 122. Confidential Records.

Applications when filed and all other examination materials, including examination questions and booklets, are the property of the Department and are confidential records open to inspection only if and when determined by the Director.

§ 123. Minimum Rating Required.

In order to qualify for a license of eligibility, a candidate must receive a grade of not less than 70 percent in the written examination; or the written or oral score shall be expressed as qualified or eliminated without the assignment of percentage ratings.

NOTE: Authority cited: Section 407, Food and Agricultural Code and Section 12027, Business and Professions Code. Reference: Sections 2101–2103, Food and Agricultural Code and Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment filed 1–20–69; effective thirtieth day thereafter (Register 69, No. 4).
- Amendment filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 124. Qualifying for Lower Class.

When examinations are held for a higher and a lower classification in the same series, it shall be within the discretion of the Secretary to pass a candidate for the lower classification if the candidate attains a passing score for the examination for the lower classification but does not receive a passing score in the examination applied for.

HISTORY

1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).

2. Change without regulatory effect amending section filed 3–17–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 12).

§ 125. Announcement.

Examinations shall be held at such times and places as the Secretary may determine.

HISTORY

 Change without regulatory effect amending section filed 3-17-97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 12).

§ 126. Fee.

The Secretary may charge each candidate a fee to cover the actual cost of providing the license examinations. The fees for the County Agricultural Commissioner, the Deputy County Agricultural Commissioner, the County Agricultural Inspector/Biologist, the County Sealer of Weights and Measures, the Deputy County Sealer of Weights and Measures, and the County Weights and Measures Inspector examinations are seventy—five dollars (\$75) each.

NOTE: Authority cited: Sections 407 and 2101, Food and Agricultural Code; and Sections 12027 and 12202, Business and Professions Code. Reference: Section 2101, Food and Agricultural Code; and Section 12202, Business and Professions Code.

HISTORY

1. Repealer and new section filed 10–4–95; operative 10–4–95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 127. Explanations.

All necessary explanations will be made to the whole group taking the written examination and no question will be explained to any individual candidate. Examiners shall not make any comment that may assist any candidate to answer any question.

§ 128. Prohibited Acts.

Communication between candidates during examination is strictly forbidden; and candidates are forbidden to receive any unauthorized assistance in the examination. Before the commencement of an examination, candidates will be required to hand to examiner any unauthorized printed or written matter in their possession that might serve to aid them in the examination. Evidence of copying or collusion or deception or fraud in connection with any examination, application or request to be examined, may result in the cancellation of his examination and the debarment of the candidate from future examinations. Copies of the questions in the examination may not be made or taken from the examination room.

§ 129. Prohibited Marks.

Any candidate in any written examination who places any identifying mark upon examination papers, other than his identification number, may be deprived of all benefits under such examination.

HISTORY

1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).

§ 130. Rating of Written Examinations.

All examination papers shall be marked and graded under the direction of the Secretary and in accordance with the examination announcement.

HISTORY

1. Change without regulatory effect amending section filed 3–17–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 12).

§ 131. Rating by Interview.

The oral examination will deal with the candidate's general fitness and also with the category or categories for which the candidate has qualified in the written examination. In connection with any oral examination, a field or laboratory demonstration may be required.

HISTORY

1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).

§ 132. Notice of Examination Result.

As soon as the scoring of an examination has been completed, each candidate shall be notified in writing of the examination results.

HISTORY

1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).

§ 133. Appeals and Protests.

Any candidate may appeal to the Department to have examination papers reviewed on the ground of errors committed in the rating, if such appeal is made in writing within 30 days after the notice of the result of written examination has been mailed to the candidate. Upon a review of the candidate's examination papers, the rating may be changed in accordance with such review. When such review discloses errors which affect the examination papers of all candidates, then all the examination papers shall be reviewed. Except for protested items, examination material shall not be made available for review by candidates. Any candidate may appeal to the Department to have the decision of the oral examining board reviewed if such appeal is made in writing within 30 days after the notice of the result of the oral examination has been mailed to the candidate.

HISTORY

1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33)

Article 3. License of Eligibility

§ 151. License of Eligibility.

A successful candidate shall be given a statewide license of eligibility which shall be valid for five years unless revoked. An inspector/biologist's and inspector's license may also specify in which category or categories the candidate has qualified.

Upon expiration of a license, only the highest license for which the holder has eligibility in a series will be issued. When a lower license in a series expires, a renewal license will no longer be issued while a higher license is in effect. The holder shall retain eligibility in the lower classification as long as the higher license remains valid. If a State or county employee fails to renew the higher license at its expiration, a lower license will be renewed and issued for the classification in which he/she is employed and only for those categories in which he/she had eligibility. NOTE: Authority cited: Section 407, Food and Agricultural Code and Section 12027, Business and Professions Code. Reference: Sections 2101–2103, Food and Agricultural Code and Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment of Sections 151, 152 and 153 filed 1–20–69; effective thirtieth day thereafter (Register 69, No. 4).
- 2. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).
- 3. Amendment of article 3 heading, repealer of paragraph following article 3 heading, and amendment of section heading and section filed 10–4–95; operative 10–4–95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 152. Renewal of Eligibility for Incumbents.

Upon request, a license of eligibility shall be renewed without further examination, provided the holder is employed at the time of its expiration, in a County Agricultural or Weights and Measures position or in the California Department of Food and Agriculture or in the Department of Pesticide Regulation. The renewal privilege in this section shall not prohibit the Secretary, whenever it is deemed necessary, from requiring a non–incumbent holder of a valid license to pass a requalifying examination for the renewal of such license.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 12027, Business and Professions Code. Reference: Section 2123, Food and Agricultural Code; and Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).
- Amendment of section and new Note filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 153. Renewal of Eligibility for Non-Incumbents.

Upon request, a holder of a license of eligibility who is not employed by a County Agricultural or Weights and Measures office or by the California Department of Food and Agriculture or by the Department of Pes-

Page 6 Register 97, No. 12; 3–21–97

ticide Regulation, but who otherwise meets the minimum qualifications for the class, or has served as an incumbent in the class, may renew his/her license at the time of its expiration upon successful completion of requalifying examinations.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 12027, Business and Professions Code. Reference: Section 2123, Food and Agricultural Code; and Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).
- 2. Amendment of section and new Note filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 154. Extension of Eligibility for Servicepersons.

Licenses of eligibility for any person who enters or enlists in the recognized military service of the United States which were valid upon the date of his entering such service shall be extended by the period of military service plus six (6) months upon application to the Department within ninety (90) days after the termination of such military service, including rehabilitation afforded by the United States or the State following recognized military service.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 12027, Business and Professions Code. Reference: Section 2123, Food and Agricultural Code; and Section 12202, Business and Professions Code.

HISTORY

- 1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).
- 2. Amendment of section and new Note filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

§ 155. Charter County Licenses.

A license issued on the basis of Section 2103 of the Food and Agricultural Code or Section 12204 of the Business and Professions Code shall be valid only in the county for which issued.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 12027, Business and Professions Code. Reference: Section 2123, Food and Agricultural Code; and Section 12204, Business and Professions Code.

HISTORY

- 1. New section filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33).
- Amendment of section heading and section and new Note filed 10-4-95; operative 10-4-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 40).

Article 4. Seasonal County Standardization Inspector

§ 171. Seasonal County Standardization Inspectors.

The Secretary may conduct special qualifying examinations for persons to be seasonally engaged in standardization enforcement work.

HISTORY

1. Change without regulatory effect amending section filed 3–17–97 pursuant to section 100, title 1, California Code of Regulations (Register 97, No. 12).

§ 172. Qualifying Examinations.

Qualifying examinations for persons to be engaged in seasonal standardization enforcement work shall be both written and oral and shall be directed to qualifying seasonal employees either in terms of commodities or groups of commodities.

§ 173. Period of Employment Eligibility.

Employment eligibility for persons in seasonal standardization enforcement work by commodities or groups of commodities shall be valid only for the normal inspection season following the qualifying examinations.

Upon request by a county, the Department may renew the employment eligibility of a person for a succeeding season, provided employment has been for a duration of at least twenty (20) working days in the preceding season in the commodity or group of commodities for which the employee has been qualified, and the employee had been separated from his position without fault or delinquency on his part.

Verification of employment for renewal must be confirmed by the county.

HISTORY

1. Amendment filed 8–11–77; effective thirtieth day thereafter (Register 77, No. 33)

Chapter 3. Regulation for Implementation of the California Environmental Quality Act of 1970

Article 1. Incorporation by Reference

§ 200. Objectives, Criteria and Procedures.

The Guidelines for Implementation of the California Environmental Quality Act of 1970 (CEQA) in effect on November 1, 1982 are herein incorporated by reference: Title 14, California Administrative Code, Section 15000 and following, Guidelines for Implementation of the California Environmental Quality Act of 1970.

NOTE: Authority cited: Section 21082, Public Resources Code; and Section 407, Food and Agricultural Code. Reference: Sections 21000–21003, 21080–21082.1, 21083.6, 21083.7, 21086, 21092, 21100–21108 and 21160–21166, Public Resources Code; and Section 15050(f), Title 14, California Administrative Code.

HISTORY

1. Repealer of Subchapter 3 (Articles 1–8, Sections 200–208.05) and new Subchapter 3 (Article 1, Sections 200–203) filed 12–8–82; effective thirtieth day thereafter (Register 82, No. 50). For prior history, see Registers 73, No. 28 and 73, No. 14.

§ 201. Responsible Official.

The director shall be responsible for determining the need for and preparation of environmental documents on specific actions in accordance with the Title 14 CEQA Guidelines. All divisions, bureaus, units and programs of the department shall be responsible for complying with the CEQA according to the Title 14 CEQA Guidelines.

NOTE: Authority cited: Section 21082, Public Resources Code; and Section 407, Food and Agricultural Code. Reference: Sections 21000–21003, 21080–21082.1, 21083.6, 21083.7, 21086, 21092, 21100–21108 and 21160–21166, Public Resources Code; and Section 15050(f), Title 14, California Administrative Code.

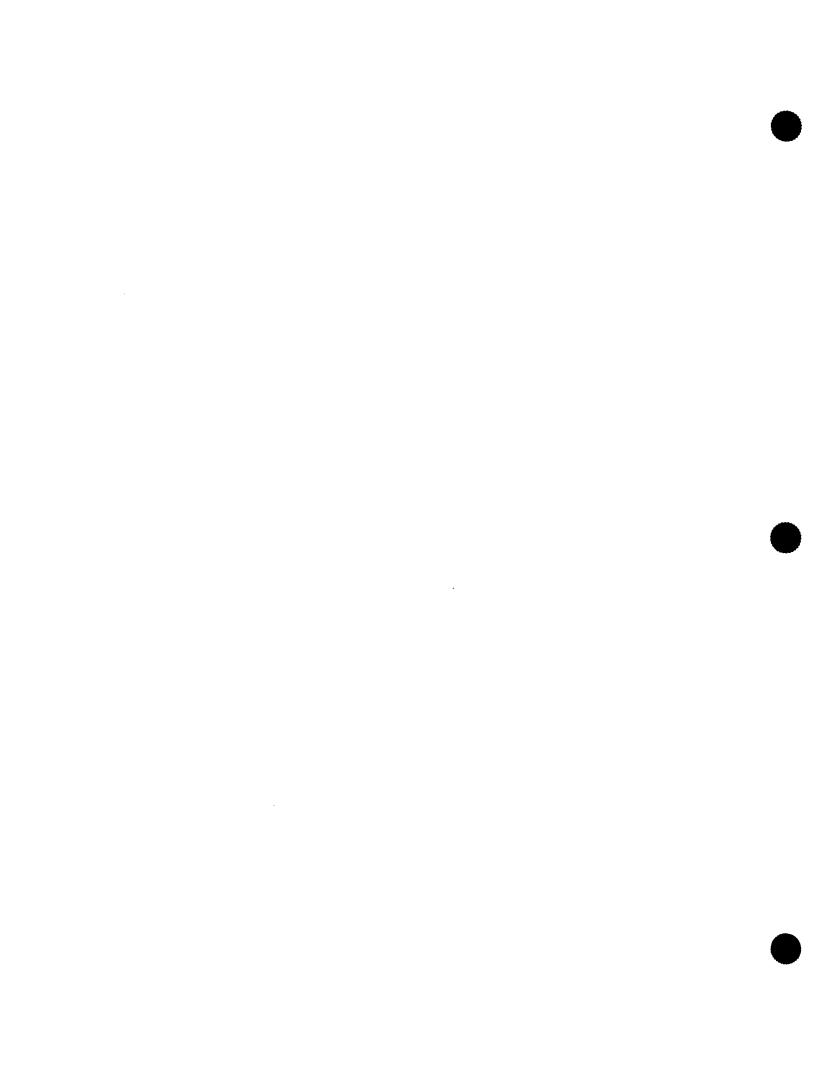

§ 202. Review.

The director shall have responsibility for providing expertise in categories specified in the Title 14 CEQA Guidelines for the review or preparation of environmental documents. Department officials acting in such a capacity shall focus on the sufficiency of environmental documents in discussing possible impacts on the environment and feasible alternatives or feasible mitigation measures that would significantly reduce adverse environmental impacts of the action. The director shall review environmental documents and approve or disapprove projects.

NOTE: Authority cited: Section 21082, Public Resources Code; and Section 407, Food and Agricultural Code. Reference: Sections 21000–21003, 21080–21082.1, 21083.6, 21083.7, 21086, 21092, 21100–21108 and 21160–21166, Public Resources Code; and Section 15050(f), Title 14, California Administrative Code.

§ 203. Lead Responsibility.

When two or more divisions, bureaus, units or programs are involved in an action, the director shall designate principal responsibility among divisions, bureaus, units and programs for compliance with the Title 14 CEQA Guidelines.

NOTE: Authority cited: Section 21082, Public Resources Code; and Section 407, Food and Agricultural Code. Reference: Sections 21000–21003, 21080–21082.1, 21083.6, 21083.7, 21086, 21092, 21100–21108 and 21160–21166, Public Resources Code; and Section 15050(f). Title 14, California Administrative Code.

Chapter 4. Permit Reform Act

Article 1. Department of Food and Agriculture—Permit Reform Act

§ 300. Permit Processing Times (Including Licenses, Permits, Registrations and Certificates).

(a) Within the number of calendar days of receipt of an application for

a permit shown in column A of subsection (c), the Department shall inform the applicant in writing that the application is either complete and accepted for filing, or that it is deficient, and what specific information or documentation is required to complete the application. An application is considered complete if all necessary fees and information required by the application form have been submitted.

(b) Within the number of calendar days after receipt of a complete application, as shown in column B of subsection (c), the Department shall approve or disapprove the application.

(c) The Department's minimum, median, and maximum time periods, in calendar days, for processing an application from the receipt of the initial application to the final decision, based on the Department's actual performance during the two years immediately preceding the proposal of this section, are shown in columns C, D, and E of the chart which follows:

	A	В	С	D	E

HISTORY

- 1. New section filed 11-28-89; operative 1-1-90 (Register 89, No. 49).
- 2. Change without regulatory effect pursuant to section 100, title 1, California Code of Regulations filed 5–2–90; operative 5–2–90 (Register 90, No. 24).
- 3. Amendment of subsection (c) filed 6–4–90; operative 7–4–90 (Register 90, No. 29).
- 4. Editorial correction of printing error duplicating subsections (a)–(c) (Register 90, No. 46).
- Amendment of subsection (c) filed 2-25-91; operative 3-27-91 (Register 91, No. 13).
- Change without regulatory effect amending article heading and subsection (c) filed 9-2-93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 36).
- 7. Amendment of subsection (c)(4) filed 3-4-99 as an emergency; operative 3-4-99 (Register 99, No. 10). A Certificate of Compliance must be transmitted to OAL by 7-2-99 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 3-4-99 order transmitted to OAL 6-16-99 and filed 7-27-99 (Register 99, No. 31).
- Amendment of subsection (c)(1) filed 10–25–2001 as an emergency; operative 10–25–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–22–2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10-25-2001 order transmitted to OAL 2-15-2002 and filed 4-2-2002 (Register 2002, No. 14).
- 11. Amendment of subsection (c)(1) filed 7–1–2002; operative 7–31–2002 (Register 2002, No. 27).
- 12. Amendment of subsection (c)(1) filed 4–3–2003; operative 5–3–2003 (Register 2003, No. 14).

§ 301. Appeal Procedure.

(a) The following information shall be included on application forms for all Department permits subject to Government Code Sections 15374–15378:

"The Department of Food and Agriculture has established time periods for the processing of permit applications, in compliance with Government Code Sections 15374–15378. Failure to comply with these time periods may be appealed to the Director of Food and Agriculture, 1220 N Street, P.O. Box 942871, Sacramento, CA 94271–0001, pursuant to regulations set forth in Title 3, California Code of Regulations, Section 301. Under certain circumstances, the Director may order that the applicant receive a reimbursement of filing fees."

- (b) An applicant whose application for a permit has not been processed by the Department within the time periods established by Section 300 may appeal in writing to the Director of the Department of Food and Agriculture. The appeal shall set forth a concise statement of facts and chronology of events regarding the application. An appeal concerning a permit application on which a final decision has been made must be filed within 30 days of the date the applicant was notified of the decision.
- (c) The Director shall promptly review an appeal filed under this section and shall issue a decision within 30 days after conducting any investigation of the matter which the Director deems appropriate.
- (d) If the Director finds that a program exceeded the time limit for informing the permit applicant that an application is complete or is deficient and requires additional information to be processed, the Director shall direct the program to make its determination by a specified date and so inform the applicant.
- (e) The time period within which the Department must make a decision to issue or deny the permit commences with the date the complete application is received. If the Director finds that the Department exceeded the time period for acting on a completed application without the good

cause defined by Government Code Section 15376(h), all filing fees paid by the permit applicant will be refunded.

NOTE: Authority cited: Sections 15376 and 15378, Government Code; and Section 407, Food and Agricultural Code. Reference: Sections 15376 and 15378, Government Code.

Article 2. Department of Pesticide Regulation—Permit Reform Act

§ 305. Permit Processing Times (Including Licenses, Permits, Registrations and Certificates).

NOTE: Authority cited: Section 15376, Government Code; and Section 11456, Food and Agricultural Code. Reference: Section 15376, Government Code.

HISTORY

- 1. Change without regulatory effect adopting new article 2 (sections 305–306) filed 9–2–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 36).
- 2. Editorial correction of table (Register 97, No. 21).
- 3. Amendment of subsection (c) chart filed 11–3–2003 as an emergency; operative 1–1–2004 (Register 2003, No. 45). This action is a permanent emergency change for which no Certificate Compliance is needed pursuant to Food and Agricultural Code section 11502.5.
- 4. Editorial correction of HISTORY 3 (Register 2004, No. 37).
- 5. Change without regulatory effect repealing article 2 and section filed 12-20-2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 52).

§ 306. Appeal Procedures.

NOTE: Authority cited: Section 15376, Government Code; and Section 11456, Food and Agricultural Code. Reference: Section 15376, Government Code.

HISTORY

- 1. Change without regulatory effect adopting new section filed 9–2–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 36).
- 2. Change without regulatory effect amending subsection (a) filed 3–8–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 10)
- 3. Change without regulatory effect repealing section filed 12–20–2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 52).

§ 307. Limitations on Licensure of Aliens.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 263, 2101, 2102, 2103, 6721, 9212, 10981, 12591, 14321, 14591, 18990, 19000, 19010, 19240, 19260, 19280, 19300, 19320, 24741, 25051, 33112, 33112.1, 33222, 33226, 33227, 35011, 35041, 35071, 35101, 35131, 35132, 35134, 35161, 35163, 35167, 35168, 35169, 38931, 55481, 55521, 56181, 57131, 61492 and 62143, Food and Agricultural Code; and 8 U.S.C.S. §§ 1621, 1641 and 1642

HISTORY

- 1. New section and appendix A filed 3-23-98 as an emergency; operative 4-7-98 (Register 98, No. 13). A Certificate of Compliance must be transmitted to OAL by 8-5-98 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 98, No. 32).
- New section filed 8-7-98 as an emergency; operative 8-7-98 (Register 98, No. 32). A Certificate of Compliance must be transmitted to OAL by 12-7-98 or emergency language will be repealed by operation of law on the following day.
- 4. New section refiled 12–8–98 as an emergency, including amendment of subsection (a); operative 12–8–98 (Register 98, No. 50). A Certificate of Compliance must be transmitted to OAL by 3–8–99 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2000, No. 8).
- 6. New chapter 5 (section 307) and section filed 2-22-2000 as an emergency; operative 2-22-2000 (Register 2000, No. 8). A Certificate of Compliance must be transmitted to OAL by 6-21-2000 or emergency language will be repealed by operation of law on the following day.
- 7. Repealer of section and appendix A by operation of Government Code section 11346.1(g) (Register 2001, No. 48).

Division 2. Animal Industry

Chapter 1. **Dairies**

Article 1. Wholesome Feeds

§ 400. Wholesome Feeds.

The phrase "properly fed and kept," as used in Section 35602 of the Food and Agricultural Code, is construed to mean that milk must be produced from animals fed only such feeds as will not impart strong disagreeable flavors or odors to the milk or the products thereof. (The intentional or willful feeding of mustard, purple-top turnips, rape, onions, etc., is specially prohibited and the use of pastures where such feeds as mustard, turnips, rape, onion, etc., are growing to such an extent that the quality of milk from cows grazing on such pastures is injured thereby (tainted) does not constitute proper feeding, whereas most natural grasses, alfalfa, clover, vetch, peas, ensilage, beets, carrots, coconut meal, grains, etc., which are not moldy or decayed are entirely suitable for feeding animals producing milk.) All feeds must be wholesome and fed in such quantities as will nourish and not impair the health of the animals. Milk-producing animals must not be subject to undue exposure so that their health is injured thereby.

NOTE: Authority cited for Subchapter 1: Section 16, and Chapters 1 to 10, inclusive, of Division 4, Agricultural Code (renumbered 407 and 35602, 1967 Stats. C. 15, Food and Agricultural Code).

HISTORY

- 1. Subchapter 1 originally printed 7-25-45 (Title 3).
- 2. Revision of Subchapter 1 filed 8-22-47; effective 10-1-47 (Register 9).

§ 401. Identification of Dairy Animals Carrying Pesticide Residue.

Whenever the Director has issued an order under Section 32741 of the Food and Agricultural Code determining that a female dairy animal is carrying pesticide residue in its body or has been fed feeds containing amounts of pesticide residue which will cause the milk produced from the animal to be adulterated with pesticide residues, the Director may identify such animal by use of a sealed chain, ear tag, band or other means deemed appropriate, or may require the owner or agent responsible for the animal to so identify it in accordance with the Director's instructions. No identification tag or device placed on such animal pursuant to this section shall be removed or altered without written permission of the Director or when such animal is consigned to slaughter by a representative of the United States Department of Agriculture, Meat Inspection Division. NOTE: Authority cited: Sections 16 and 442, Agricultural Code (renumbered 407 and 32741, 1967 Stats. C. 15, Food and Agricultural Code).

HISTORY

1. New section filed 6-11-64; designated effective thirtieth day thereafter (Register 64, No. 13).

Article 2. Market Cream

NOTE: Authority cited: Section 36637, Food and Agricultural Code. HISTORY

- 1. New Sections 407 and 407.1 through 407.11 filed 2-4-66; effective thirtieth day thereafter (Register 66, No. 4). For history of former Article 2, see Register 65,
- 2. Repealer of Sections 407 and 407.1-407.11 filed 4-25-75; effective thirtieth day thereafter (Register 75, No. 17).
- 3. Repealer of Sections 407.12–407.14 filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17). For prior history, see Register 70, No. 17.
- 4. Repealer of Sections 407.15-407.23 filed 6-18-84; effective thirtieth day thereafter (Register 84, No. 25). For prior history, see Registers 77, No. 9; 76, No. 29, 76; No. 12; 76, No. 1; 67, No. 36; 73, No. 32; 73, No. 21; and 72, No. 39.

Article 3. Neutralization of Cream for Butter

§ 410. Neutralization of Cream for Butter.

NOTE: Authority cited: Section 32909(b), Food and Agricultural Code. HISTORY

- 1. Amendment filed 4-25-75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

Special Varieties of Cheese Article 4.

§ 415. Varieties.

(a) In accordance with the requirements of Section 37402 of the Food and Agricultural Code, standards of composition, aging periods and labeling requirements are hereby established for special varieties of cheese as follows:

PRO- modust basis			

- On product basis.
 Label must show fat content on a product basis. The declaration to be accurate within the limits of good manufacturing practice.
 - The term shall be preceded by or followed by a common, or usual name or an arbitrary or fanciful name which is not false or misleading in any particular.
- (b) Panella, Queso Blanco, Queso Fresco, and Jalapeno may be labeled skim cheese, part skim cheese, or whole milk cheese, as the case may be, in letters of the same size, style, and color of the varietal name. The moisture content shall not exceed 55 percent.
- (c) The special varieties of cheese listed herein shall be labeled with the varietal name and subject to standards of composition and method of

manufacture for the variety indicated. When no varietal name has been established, the fat and moisture standards should determine into what general classification the cheese falls, and such classification shall appear on the label preceded or followed by the specific or common name of such cheese; or if no specific or common name has become generally recognized therefor, an arbitrary or fanciful name which is not false or misleading in any particular.

- (d) All special varieties of cheese shall be made from pasteurized milk or held 60 days before offered for sale with the exception of those cheeses which require a holding time as part of the cheese–making process. In such cases, the minimum age shown in the above table shall apply. Pasteurized milk only shall be used for Muenster, Munster and Cook or Koch cheese. Caciocavallo cheese or Mozzarella cheese when sold fresh or uncured shall be made from pasteurized milk and/or pasteurized skim milk.
- (e) The labeling provisions of Sections 37971–37976 of the Food and Agricultural Code are applicable to all special varieties of cheese.
- (f) When milk other than cow's milk is used in whole or part, the label shall include the statement, "made from ______," the blank being filled in with the name or names of the milk used in the order of predominance by weight.
- (g) The following cheeses in the form of slices or cuts in consumer-sized packages may contain not more than 0.2 percent by weight of sorbic acid and shall be labeled "sorbic acid added to retard mold growth" or "sorbic acid added as a preservative," if such cheese contains sorbic acid: Cheddar cheese, cheese; washed curd cheese, soaked curd cheese; colby cheese; granular cheese; Swiss cheese, Emmentaler cheese; Gruyere cheese; brick cheese; Muenster cheese, Munster cheese; Monterey cheese, Monterey jack cheese; provolone cheese, pasta filata cheese; caciocavallo siciliano cheese; Asiago fresh cheese, Asiago soft cheese; Asiago medium cheese; Asiago old cheese; Mozzarella cheese; semisoft cheeses; semisoft part–skim cheeses; pasteurized process cheese with fruits, vegetables, or meats; pasteurized process cheese food with fruits, vegetables, or meats.
- (h) The following cheeses in the form of slices or cuts in consumer-sized packages may contain not more than 0.3 percent by weight of so-dium propionate, calcium propionate, or a combination of sodium propionate and calcium propionate and the label shall bear the statement "______ added to retard mold growth" or "_____ added as a preservative," the blank being filled in with the names of the substance or substances used, if the cheese contains either or both of the substances:

Pasteurized process cheese; pasteurized blended cheese; pasteurized process cheese with fruits, vegetables or meats; pasteurized process pimento cheese; pasteurized blended cheese with fruits, vegetables, or meats; pasteurized cheese food; pasteurized process cheese food with fruits, vegetables or meats.

NOTE: Authority cited: Sections 407 and 37402, Food and Agricultural Code. Reference: Sections 37402, 37971–37976, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) filed 10–19–67; effective thirtieth day thereafter (Register 67, No. 42). For prior history, see Register 64, No. 13.
- 2. Repealer and new section filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).
- 3. Amendment of subsection (a) filed 8–12–80; effective thirtieth day thereafter (Register 80, No. 33).

§ 415.01. Hoop Cheese.

Hoop cheese is the product prepared by pressing into forms dry curd cottage cheese as defined by Section 37641 of the Food and Agricultural Code. It shall contain not more than 80 percent of moisture by weight when sold to the consumer.

NOTE: Authority cited: Sections 407 and 37402, Food and Agricultural Code. Reference: Sections 37402, 37971–37976, Food and Agricultural Code.

HISTORY

1. New section filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 415.02. Kefir Cheese.

Kefir cheese is a soft, uncured cheese made from one or more of the following pasteurized market milk products: milk, cream, concentrated milk, dried milk, skim milk, concentrated skim milk, or nonfat dry milk, cultured with Lactobacillus caucasicus bacteria to the desired acidity. Kefir cheese shall have a maximum moisture of 70 percent and a minimum milk fat of 5 percent on a product basis, and shall be labeled in accordance with the labeling provisions of Sections 37971 and 37976. NOTE: Authority cited: Sections 407 and 37402, Food and Agricultural Code. Ref-

HISTORY

erence: Sections 37402, 37971-37976, Food and Agricultural Code.

New section filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 415.03. Ricotta Cheese with Fruit Added.

Fruit may be added to Ricotta cheese or part skim Ricotta cheese. Whether the fruit is a single variety or a combination of two or more varieties, the amount which is added shall not be less than 10 percent and not more than 25 percent by weight of the finished product. Any fruit which is added shall be clean, mature and sound. The fruit shall be frozen, canned, or dried, or have been heated to pasteurization temperature.

The standards for moisture and fat for Ricotta cheese or part skim Ricotta cheese with fruit added shall be the same as those for Ricotta cheese and part skim Ricotta cheese without such additions.

The label must include the variety of fruit in the title.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 37402, Food and Agricultural Code.

HISTORY

1. New section filed 8–12–80; effective thirtieth day thereafter (Register 80, No. 33).

§ 415.04. Goat Cheese.

Goat cheese is made from goat's milk. It shall contain not less than 40 percent of milk fat on a dry basis and contain not more than 50 percent of moisture when sold to the consumer. Goat cheese may contain spices which shall be identified on the principal display panel of the retail package. The cheese shall be labeled as "goat cheese" or "goat's milk cheese." The name may be preceded by an appropriate ethnic name if no cheese is equivalent to or closely resembles the name referred to.

NOTE: Authority cited: Sections 407 and 37402, Food and Agricultural Code. Reference: Section 37402, Food and Agricultural Code.

HISTORY

1. New section filed 2–26–82; effective thirtieth day thereafter (Register 82, No. 9)

§ 415.1. Grated Cheese and Shredded Cheese; Composition and Labeling.

(Section 37402, Food and Agricultural Code.)

- (a) (1) This section shall apply only to grated and shredded varieties of hard cheese specifically described and enumerated in the California Administrative Code. These are the following: Romano, Parmesan, Reggiano, Asiago Old and Hard Grating Cheese.
- (2) The grated or shredded cheeses for which definitions and standards of identity are prescribed by this section are foods prepared by grating, grinding, shredding or otherwise comminuting and mixing one or more cheeses of the same variety or cheeses of two or more varieties.
- (3) No ingredient other than the cheeses specifically mentioned and enumerated in this section shall be permitted in grated cheese or shredded cheese except:
- (A) A mold-inhibiting ingredient consisting of sorbic acid, potassium sorbate, sodium sorbate, or any combination of two or more of these in a total amount not to exceed 0.3 percent by weight of the finished product.
- (B) An anticaking agent consisting of silicon dioxide, calcium silicate, sodium silicoaluminate, or any combination of two or more of these in a total amount not to exceed 2 percent by weight of the finished product.

(((ز	1	he	label	shall	bear	the	sta	tement	
----	----	---	----	-------	-------	------	-----	-----	--------	--

1. "_____ added to retard mold growth" or "____ added as preservative" if a mold inhibitor is used, and

- 2. "_____ added as an anticaking agent" if an anticaking agent is used, (the blank(s) to be filled in with the name of the substance(s) used.)
- (4) Any cheese used as a component of grated cheese or shredded cheese shall be made from pasteurized milk or be held at a temperature of not less than 35 degrees Fahrenheit for not less than 60 days before it is used in preparing grated cheese and shredded cheese.
- (5) In the manufacture of grated cheese or shredded cheese, moisture may be removed from the cheese ingredients, but no moisture may be added.
- (6) If the final product is made from only one variety of cheese, the minimum milk fat shall not be less than that specified in the California Administrative Code for that variety of cheese. If the final product is made from two or more varieties of cheese, the minimum milk fat of the finished product shall not be less than the arithmetic average of the minimum milk fat of those types of cheese.
- (7) (A) In the case of grated cheese or shredded cheese made from two varieties of cheese, the weight of a single variety shall not be less than 25 percent of the total weight of both.
- (B) In the case of a grated or shredded cheese made from three or more varieties of cheese, the weight of each of any two varieties used therein shall not be less than one—third of the total weight of all cheese, and if Romano or Parmesan cheese is included, or both Romano and Parmesan are included therein, the weight of each of said varieties of Romano or Parmesan shall not be less than 25 percent of the total weight of all cheese.
- (b) The names specified for the grated cheeses or shredded cheeses for which definitions and standards of identity are prescribed by this section are as follows:
- (1) The name of the grated cheese or shredded cheese made from one variety of cheese shall be "Grated _____ Cheese" or "Shredded ____ Cheese," the blank to be filled in with the name of the cheese which is grated or shredded.
- (2) The name of a grated cheese or shredded cheese made from two or more varieties of cheese shall be "Grated _____ and ____ Cheese," the blanks to be filled in with the names of the cheeses which are grated or shredded in order of preponderance.

NOTE: Authority cited: Section 37402, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–12–60; effective thirtieth day thereafter (Register 60, No. 2).
- 2. Amendment of subsection (a)(3) filed 3–22–74; effective thirtieth day thereafter (Register 74, No. 12).
- (Register 74, No. 12).

 3. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 415.2. Grated Cheese and Shredded Cheese (Other Varieties); Composition and Labeling.

- (a) (1) This section shall apply to all varieties of grated and shredded cheese or grated cheese foods except those specified in Section 415.1 of this article.
- (2) The grated or shredded cheese for which definitions and standards of identity are prescribed by this section are foods prepared by grating, grinding, shredding or otherwise comminuting and mixing one or more cheeses of the same variety or cheeses of two or more varieties.
- (3) No variety of cheese may be used in grated or shredded cheese described in this section except natural cheese for which the California Food and Agricultural Code or the California Administrative Code prescribes a maximum moisture of 52 percent or less. No other ingredients shall be permitted except substances defined in Section 415.1 (a)(3)(A), (B), and (C).
- (4) Any cheese used as a component of grated cheese or shredded cheese shall be made from pasteurized milk or be held at a temperature of not less than 35 degrees Fahrenheit for not less than 60 days before it is used in preparing grated cheese or shredded cheese.
- (5) In the manufacture of grated cheese or shredded cheese, moisture may be removed from the cheese ingredients, but no moisture may be added.

- (6) If the final product is made from only one variety of cheese, the minimum milk fat shall not be less than that specified in the California Food and Agricultural Code and this subchapter for that variety of cheese. If the final product is made from two or more varieties of cheese, the minimum milk fat of the finished product shall not be less than the weighted average of the minimum milk fat for those varieties of cheese in the California Food and Agricultural Code or California Administrative Code. In no case shall the minimum milk fat be less than 30 percent on a dry basis.
- (7) When grated or shredded cheese is made from three or more varieties of cheese, each cheese ingredient used must be present at a level of not less than two percent by weight of the finished product. If a grated or shredded cheese is made from three or more varieties of cheese and the weight of any two varieties used is less than one—third of the total weight of the cheese, the percent by weight of each cheese used shall be declared on the label.
- (b) The names specified for the grated cheeses or shredded cheeses for which definitions and standards of identity are prescribed by this section are as follows:
- (1) The name of the grated cheese or shredded cheese made from one variety of cheese shall be "Grated ______ Cheese" or "Shredded _____ Cheese," the blank to be filled in with the name of the cheese which is grated or shredded.
- (2) The name of the grated cheese or shredded cheese made from two or more varieties of cheese shall be "Grated ______ and _____ Cheese" or "Shredded _____ and ____ Cheese," the blanks to be filled in with the names of the cheeses which are grated or shredded in order of predominance.

NOTE: Authority cited: Sections 407 and 37402, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–11–64; effective thirtieth day thereafter (Register 64, No. 13).
- 2. Amendment filed 3–29–65; effective thirtieth day thereafter (Register 65, No. 5)
- 3. Amendment of subsection (a) (6) and (a) (7) filed 7–19–72; effective thirtieth day thereafter (Register 72, No. 30).
- 4. Amendment of subsection (a)(3) filed 3–22–74; effective thirtieth day thereafter (Register 74, No. 12).

§ 415.3. Grated American Cheese Food; Composition and Labeling.

- (a) (1) Grated American cheese food is the food prepared by mixing, with or without the aid of heat, one or more of the optional cheese ingredients prescribed in paragraph (b) of this section, with one or more of the optional ingredients prescribed in paragraph (c) of this section, into a uniformly blended, partially dehydrated, powdered or granular mixture.
- (2) Grated American cheese food contains not less than 23 percent of milk fat.
- (b) The optional cheese ingredients referred to in paragraph (a) of this section are cheddar cheese, washed curd cheese, Colby cheese, and granular cheese.
- (c) The other optional ingredients referred to in paragraph (a) of this section are:
 - (1) Nonfat dry milk.
 - (2) Dried whey.
- (3) An emulsifying agent consisting of one or any mixture of two or more of the following: monosodium phosphate, disodium phosphate, dipotassium phosphate, trisodium phosphate, sodium metaphosphate (sodium hexametaphosphate), sodium acid pyrophosphate, tetrasodium pyrophosphate, sodium citrate, potassium citrate, calcium citrate, sodium tartrate, sodium potassium tartrate and sodium aluminum phosphate, in such quantity that the weight of the solids of such emulsifying agent is not more than 3 percent of the weight of the grated American cheese food.
- (4) An acidifying agent consisting of one or more of the following: A vinegar, lactic acid, citric acid, acetic acid or phosphoric acid.
 - (5) Substances defined in Section 415.1 (a)(3)(A), (B), and (C).
 - (6) Salt.
 - (7) Artificial coloring.

- (d) (1) The label of grated American cheese food shall bear the common name of the optional ingredients used as prescribed in paragraphs (b) and (c)(1), (2), (3), (4) and (5) of this section, except that the cheese ingredient may be designated as "American cheese."
- (2) If artificial coloring is used, the label shall bear the statement "artificially colored" or "contains artificial color."
- (e) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the words and statements specified in this section, showing the optional ingredients used, shall immediately and conspicuously precede or follow such name, without intervening written, printed or graphic matter.

NOTE: Authority cited: Sections 407 and 37402, Food and Agricultural Code.

- 1. New section filed 6–11–64; effective thirtieth day thereafter (Register 64, No. 13).
- Amendment of subsection (c) filed 3-22-74; effective thirtieth day thereafter (Register 74, No. 12).

§ 415.4. Blended Grated Cheese and Blended Shredded Cheese; Composition and Labeling.

- (a) (1) This section shall apply to all varieties of grated or shredded cheese which consists of one or more varieties of grated or shredded cheese described in Section 415.1 combined with one or more varieties of grated or shredded cheese described in Section 415.2 of this article.
- (2) The minimum milk fat of a grated or shredded cheese described in this section shall be not less than the arithmetic average of the minimum milk fat specified in the California Food and Agricultural Code or California Administrative Code for the varieties of cheese used, but in no case shall the minimum milk fat be less than 30 percent on a dry basis.
- (b) (1) The name specified for the grated or shredded cheeses for which definitions and standards of identity are prescribed by this section is "Blended Grated Cheese" or "Blended Shredded Cheese." All words in the name shall appear in the same size, style and color or type and on the same background, without intervening written, printed or graphic matter, and without preceding words, in the same size, style and color or type.
- (2) The name of each variety of cheese used in a grated or shredded cheese described in this section shall be included in order of preponderance in an ingredients clause which shall immediately and conspicuously precede or follow the name "blended grated cheese" or "blended shredded cheese" wherever the name appears on the label, so conspicuously as to be seen under customary conditions of purchase; provided that the ingredients clause shall appear in letters not more than one—half the height of the letters in the name of the product.

NOTE: Authority cited: Sections 407 and 37402, Food and Agricultural Code.

HISTORY

1. New section filed 6–11–64; effective thirtieth day thereafter (Register 64, No. 13).

§ 416. Pasteurized Process Cheese.

In accordance with the provisions of Sections 37822–37823 of the Food and Agricultural Code, the standards of composition and labeling requirements for products defined in Sections 37821, 37851, to 37854, 37881 to 37884, 37911 to 37913, 37941 to 37944, inclusive, of the Food and Agricultural Code are as contained in Sections 416 to 427, inclusive, of the California Administrative Code.

- (a) The moisture content of a pasteurized process cheese made from a single variety is not more than 1 percent greater than the maximum moisture prescribed for the variety of cheese used, but in no case more than 43 percent, except that the moisture content of pasteurized process wash curd cheese or pasteurized process colby cheese is not more than 40 percent; the moisture content of pasteurized process Swiss cheese, or pasteurized process Gruyere cheese is not more than 44 percent; and the moisture content of pasteurized process Limburger cheese is not more than 51 percent.
- (b) The moisture content of a pasteurized process cheese made from two or more varieties of cheese shall not be more than 1 percent greater than the arithmetical average of the maximum moisture content pre-

- scribed for the varieties of cheese used, but in no case is the moisture content more than 43 percent, except that the moisture content of the pasteurized process cheese made from two or more varieties of cheddar cheese, wash curd cheese, colby cheese, and granular cheese is not more than 40 percent, and the moisture content of a mixture of Swiss cheese and Gruyere cheese is not more than 44 percent.
- (c) The fat content of the solids of a pasteurized process cheese made from a single variety of cheese is not less than the minimum prescribed for the variety of cheese used, but in no case is less than 47 percent, except that the fat content of the solids of pasteurized process Swiss cheese is not less than 43 percent and the fat content of the solids of pasteurized process Gruyere cheese is not less than 45 percent.
- (d) The fat content of the solids of a pasteurized process cheese made from two or more varieties of cheese is not less than the arithmetical average of the minimum fat content prescribed for the varieties of cheese used, but in no case less than 47 percent, except that the fat content of the solids of a pasteurized processed Gruyere cheese made from a mixture of Swiss cheese and Gruyere cheese is not less than 45 percent.

NOTE: Authority cited: Sections 37821, 37822, 37823, 37851–37854, 37881–37884, 37911–37913, 37941–37944, Food and Agricultural Code.

HISTORY

1. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 416.5. Pasteurized Process Cheese Product.

- (a) (1) Pasteurized process cheese product is the food prepared by comminuting and mixing, with the aid of heat, one or more of the optional cheese ingredients prescribed in paragraph (b) of this section, with or without one or more of the optional dairy ingredients prescribed in paragraph (c) of this section, with one or more of the optional ingredients prescribed by paragraph (d) of this section, into a homogeneous plastic mass
- (2) Pasteurized process cheese product shall have a moisture content of not more than 60 percent and a fat content of not less than 4 percent nor more than 17 percent.
- (3) The weight of the cheese ingredient referred to in paragraph (a) (1) of this section shall constitute not less than 51 percent of the weight of the pasteurized process cheese product.
- (4) Pasteurized process cheese product may be smoked, or the cheese from which it is made may be smoked before comminuting and mixing, or it may contain substances prepared by condensing or precipitating wood smoke.
- (5) The flavor and body of any optional cheese ingredients used may be modified by the addition of safe and suitable enzymes. For the purpose of this section, the common name of each enzyme-modified cheese ingredient shall be "enzyme-modified ______ cheese," the blank being filled in with the varietal name of the cheese so modified.
- (b) The optional cheese ingredients referred to in paragraph (a) of this section include all natural cheese varieties for which there is a specific definition and standard of identity including the special varieties described in Section 415 (a) of this article.
- (c) The optional dairy ingredients referred to in paragraph (a) of this section are milk or any safe and suitable product of milk.
- (d) The other optional ingredients referred to in paragraph (a) of this section are any of the following safe and suitable ingredients:
- (1) Emulsifying agents (such as phosphates, citrates, and tartrates) in such quantity that the weight of the solids of such emulsifying agents is not more than 3 percent of the weight of the finished food calculated as the anhydrous substance.
- (2) (A) Stabilizers consisting of one or any mixture of two or more vegetable gums, gelatin, algin (sodium alginate), propylene glycol alginate, or xanthan gum. The total weight of such substances is not more than 0.8 percent of the weight of the finished food.
- (B) When one or more of the optional ingredients listed in paragraph (d) (2) (A) of this section is used, dioctyl sodium sulfosuccinate may be used in a quantity not in excess of 0.5 percent of the weight of such ingredients.
 - (3) Acidifying agents.

Page 12 Register 97, No. 29; 7–18–97

- (4) Nutritive carbohydrate sweeteners.
- (5) Water.
- (6) Salt.
- (7) Coloring.
- (8) Spices and/or flavorings, none of which singly or in combination with other ingredients simulate the flavor of a cheese of any age or variety.
- (9) Mold–inhibiting ingredients on cuts or slices of pasteurized process cheese product in consumer sized packages.
- (10) Lecithin on cuts or slices of pasteurized process cheese product in consumer sized packages as an antisticking agent in an amount not to exceed 0.03 percent by weight of the finished food.
 - (11) Enzyme-modified cheese.
- (12) Any properly prepared cooked, canned or dried fruit, vegetable, meat, fish or poultry for flavoring purposes.
- (e) If the optional ingredients described in paragraph (d) (12) of this section are utilized, the name of the food is "pasteurized process cheese product with ______," the blank being filled in with the common or usual name or names of the fruits, vegetables, meat, fish or poultry used, in order of predominance by weight.
- (f) The name of the food is "pasteurized process cheese product" and its label shall bear a list of ingredients by common or usual name. Each of the ingredients used in the food shall be declared on the label in descending order of predominance except that if the cheese ingredient contains cheddar cheese, washed curd cheese, colby cheese, granular cheese, monterey cheese, or any mixture of two or more of these, such cheese or such mixture may be designated as "American cheese."
- (g) Whenever any word or statement emphasizing the name of any ingredient appears on the label (other than in an ingredient statement) so conspicuously as to be easily seen under customary conditions of purchase:
- (1) The full name of the food shall immediately and conspicuously precede or follow such word or statement in a type of at least the size as the type used in such word or statement, and
- (2) When a label featured cheese is less than 50 percent of the total cheese ingredients, the word "flavored" shall also immediately follow the word or statement in a type of the same size and style used in such word or statement.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 37402, Food and Agricultural Code.

HISTORY

- New section filed 8-10-73; effective thirtieth day thereafter (Register 73, No. 32).
- 2. Amendment filed 8–12–80; effective thirtieth day thereafter (Register 80, No. 33).

§ 417. Pasteurized Blended Cheese.

- (a) The milk fat standard and the moisture standard for pasteurized blended cheese are those prescribed for pasteurized process cheese.
- (b) Pasteurized blended cheese shall not contain any emulsifying agent or acidifying agent. In a mixture of two or more cheeses, cream cheese or Neufchatel cheese may be used. In a mixture of two or more cheeses containing cream cheese or Neufchatel cheese, the moisture content shall not be more than the arithmetical average of the maximum moisture standard prescribed for the varieties of cheese used and the fat content of the solids shall not be less than 47 percent.

§ 418. Pasteurized Process Cheese with Other Ingredients.

Pasteurized process cheese with fruits, vegetables, or meats or mixtures thereof, except as otherwise provided, may have a moisture content of 1 percent more and a milk fat content of 1 percent less than that prescribed for the corresponding pasteurized process cheese.

§ 419. Pasteurized Process Pimento Cheese.

Pasteurized process pimento cheese is the food which conforms to definition and standard of identity for pasteurized process cheese with fruits, vegetables or meats except that its moisture content is not more than 41

percent and the fat content of its solids is not less than 49 percent. The cheese ingredient is American cheese. The only flavoring material is pimento in such quantity that the weight of the solids thereof is not less than 0.2 percent of the weight of the finished product.

§ 420. Pasteurized Blended Cheese with Other Ingredients.

Pasteurized blended cheese with fruits, vegetables, or meats may have a moisture content of 1 percent more and a milk fat content of the solids may be 1 percent less than the limits prescribed for pasteurized blended cheese.

§ 421. Pasteurized Process Cheese Food.

- (a) Pasteurized process cheese food shall have a moisture content of not more than 44 percent and a milk fat content of not less than 23 percent.
- (b) Pasteurized process cheese food with fruit, vegetables, or meat shall have a milk fat content of not less than 22 percent and not more than 44 percent of moisture.

§ 422. Pasteurized Process Cheese Spread.

- (a) Pasteurized process cheese spread shall have a moisture content of more than 44 percent but not more than 60 percent and the milk fat content shall not be less than 20 percent.
- (b) Pasteurized cheese spreads shall conform to the standard of composition prescribed for pasteurized process cheese spread, except that no emulsifying agent is used.
- (c) Pasteurized process cheese spread with fruits, vegetables, or meats shall have a milk fat content and a moisture content prescribed for pasteurized process cheese spread, except that it may contain properly prepared, cooked, canned, or dried fruit, vegetables and prepared, cooked, or canned meat.
- (d) Pasteurized cheese spread with fruits, vegetables, and meats shall conform to the moisture and milk fat standard prescribed for pasteurized cheese spread, except that it may contain one or any mixture of properly prepared, cooked, canned, or dried fruit, vegetables, or meat.
- (e) The weight of the cheese ingredients used in the manufacture of pasteurized process cheese foods and pasteurized process cheese spreads shall not be less than 51 percent of the weight of the finished pasteurized process cheese food.

§ 422.5. Pasteurized Low-Fat Cheese Spread.

Pasteurized low-fat cheese spread shall meet all of the standards and requirements of pasteurized cheese spread, except that moisture content shall not be more than 60 percent, and the milk fat content shall be not less than 2 percent, nor more than 4 percent.

HISTORY

1. New Sections 422.5 through 422.9 filed 5–9–72; effective thirtieth day thereafter (Register 72, No. 20).

§ 422.6. Pasteurized Lowfat Cheese Spread with Fruits, Vegetables, Spices, or Meats.

Pasteurized lowfat cheese spread with fruits, vegetables, spices, or meats may have a moisture content of 1 percent more than the limits prescribed for pasteurized lowfat cheese spread.

HISTORY

1. Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 422.7. Pasteurized Skim Milk Cheese Spread.

Pasteurized skim milk cheese spread shall meet all of the standards and requirements of pasteurized cheese spread, except that the moisture content shall not be more than 60 percent, and the milk fat content not more than 1 percent. "Pasteurized Skim Milk Cheese Spread" may be sold as "Pasteurized Soft Skim Milk Cheese Spread" provided that the moisture content of the product is not more than 70 percent and the fat content not more than 1 percent.

HISTORY

1. Amendment filed 7–20–73; effective thirtieth day thereafter (Register 73, No. 20)

§ 422.8. Pasteurized Skim Milk Cheese Spread with Fruits, Vegetables, Spices, or Meats.

Pasteurized skim milk cheese spread with fruits, vegetables, spices, or meats may have a moisture content of 1 percent more than the limits prescribed for pasteurized skim milk cheese spread. "Pasteurized Skim Milk Cheese Spread with Fruits, Vegetables, Spices, or Meats" may be sold as "Pasteurized Soft Skim Milk Cheese Spread with Fruits, Vegetables, Spices, or Meats" provided that the moisture content of the product is not more than 70 percent and the fat content not more than 1 percent.

HISTORY

1. Amendment filed 7–20–73; effective thirtieth day thereafter (Register 73, No. 29)

§ 422.9. Labeling Limitations.

The products provided for in Sections 422.5 to 422.8, inclusive, may not be labeled as imitation cheese products.

§ 423. Cold Pack Cheese.

- (a) Cold pack cheese, club cheese, or comminuted cheese if made from a single variety of cheese shall have a moisture content of not more than the maximum moisture content prescribed for the variety of cheese used; and if made from two or more varieties the moisture standard shall be the arithmetical average of the maximum moisture content prescribed for the varieties of cheese used, but shall not be greater than 42 percent, except that the moisture content of a cold pack cheese made from two or more of the varieties of cheddar cheese, wash curd cheese, colby cheese, and granular cheese shall not be more than 39 percent.
- (b) The fat content of the solids of a cold pack cheese made from a single variety of cheese shall not be less than the minimum prescribed for the variety of cheese used, but in no case is less than 47 percent, except that the fat content of the solids of cold pack Swiss cheese is not less than 43 percent and the fat content of solids of cold pack Gruyere cheese is not less than 45 percent.
- (c) The fat content of the solids of a cold pack cheese made from two or more varieties of cheese shall not be less than the arithmetical average of the minimum percent of fat prescribed for the varieties of cheese, but in no case less than 47 percent, except that the fat content of the solids of the cold pack cheese made from Swiss cheese and Gruyere cheese shall not be less than 45 percent. Cold pack cheese food shall have a moisture content of not more than 44 percent and a milk fat content of not less than 23 percent.
- (d) Cold pack cheese food with fruits, vegetables, and meats shall have a moisture content of not more than 44 percent and a milk fat content of not less than 22 percent.

§ 424. Prohibited Ingredients.

- (a) Cream cheese, Neufchatel cheese, dry curd cottage cheese, cottage cheese, lowfat cottage cheese, hoop cheese, baker's cheese, kefir cheese, and cook cheese shall not be used in the manufacture of pasteurized process cheese food nor in cold pack cheese food. Hard grating cheese, semisoft part skim cheese and part skim spiced cheese shall not be used alone or in combination with each other as the cheese ingredient for any cheese food.
- (b) Cream cheese, Neufchatel cheese, dry curd cottage cheese, cottage cheese, lowfat cottage cheese, cook cheese, baker's cheese, kefir cheese, hard grating cheese, semisoft part skim cheese, part skim spiced cheese, and skim milk cheese for manufacturing shall not be used in the manufacture of pasteurized process cheese nor in cold pack cheese.
- (c) Cream cheese, Neufchatel, dry curd cottage cheese, cottage cheese, low fat cottage cheese, cook cheese, hoop cheese, hard grating cheese, semisoft part skim cheese, and part skim spiced cheese shall not be used alone or in combination with each other in the manufacture of pasteurized process cheese spreads.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17)

§ 425. Emulsifying Agents.

One or any mixture of two or more emulsifying agents as follows: monosodium phosphate, disodium phosphate, dipotassium phosphate, trisodium phosphate, sodium metaphosphate (sodium hexametaphosphate), sodium acid pyrophosphate, tetrasodium pyrophosphate, sodium citrate, potassium citrate, calcium citrate, sodium tartrate, sodium potassium tartrate, or other emulsifying agents approved by the director may be used in pasteurized process cheese, pasteurized process cheese food, and pasteurized process cheese spread in such quantity that the weight of the solids of such emulsifying agents is not more than 3 percent by weight of the product.

§ 426. Acidifying Agents.

(a) An acidifying agent consisting of one or any mixture of two or more of the following: a vinegar, lactic acid, citric acid, acetic acid, phosphoric acid, or other acidifying agents approved by the director may be used in pasteurized process cheese in such quantity that the pH of the pasteurized process cheese is not below 5.3; and in pasteurized process cheese food in such quantity that the pH of the pasteurized process cheese food is not below 5.0; and in pasteurized process cheese spread in such quantity that the pH of the pasteurized process cheese spread is not below 4.0; and in cold pack cheese and cold pack cheese food in such quantity that the pH of the finished product is not below 4.5. When acidifying agents are used in cold pack cheese, such cheese shall be labeled with the name of the acidifying agent followed with the statement "added as a chemical preservative." Pasteurized process cheese spread and cold pack cheese food acidified below the pH 5.0 shall be labeled with the name of the acidifying agents other than vinegar followed with the statement "chemical preservative added."

§ 427. Labeling.

- (a) The name of a pasteurized process cheese is as follows: (1) if made from a single variety of cheese, its name is "pasteurized process cheese"; (2) if made from two or more varieties of cheese its name is "pasteurized process ____ _ and _____ ___ cheese" or "pas-___ blended with ____ __ cheese" or "pasteurteurized process _ cheese," the blanks being ized process blend of _ _ and ___ filled in with the names of the varieties of cheese used, in order of predominance by weight; except that: if made from Gruyere cheese and Swiss cheese and the weight of Gruyere cheese is not less than 25 percent of the weight of both, it may be designated "pasteurized process Gruyere cheese"; if made of cheddar cheese, washed curd cheese, colby cheese, or granular cheese, or any mixture of two or more, it may be designated "pasteurized process American cheese"; or when cheddar cheese, washed curd cheese, colby cheese, or granular cheese, or any mixture thereof, is combined with other varieties of cheese in the cheese ingredient, any of such cheeses of such mixtures may be designated as "Ameri-
- (b) If the pasteurized process cheese is smoked or made from cheeses which have been smoked, the word "smoked" shall precede or follow the name of the pasteurized process cheese or name of the cheese ingredient which was smoked. If it contains a substance prepared by condensing or precipitating wood smoke, the label shall bear the term "with added ______," the blank being filled in with the common or usual name of such ingredient. If it contains spice, the label shall bear the term "spiced" or "spice added" or "with added spice," or in lieu of the word "spice" the common or usual name of the spice. If it contains added flavoring, the label shall bear the term "flavoring added," "with added flavoring," or "flavored with ______," the blank being filled in with the common or usual name of the flavoring; if the flavoring is artificial, the word "artificial" shall precede the word "flavoring" or the word "artificially" shall precede the term "flavored with _____."
- (c) The labeling provisions for pasteurized process cheese shall also apply to pasteurized blended cheese, except that the word "blended" is used in place of the word "process."
- (d) The labeling provisions for pasteurized process cheese shall also apply to pasteurized process cheese with fruits, vegetables or meats but

followed by the term "with ______," the blank being filled in with the common or usual name or names of the fruit, vegetable, or meats used, in order of predominance by weight.

- (e) The labeling provisions for pasteurized process cheese with fruits, vegetables, or meats shall also apply to pasteurized blended cheese with fruits, vegetables, or meats, except that the word "blended" is used instead of the word "process."
- (f) The label of a pasteurized process cheese food shall bear the common or usual names of the cheese ingredient used. If the product is smoked or made from cheeses which have been smoked, the word "smoked" shall precede or follow the name of the pasteurized process cheese food or the name of the cheese ingredient which was smoked. If the product contains spice, the label shall bear the statement "spiced" or "spice added" or "with added spice," or in lieu of the word "spice" the common or usual name of the spice used. If it contains flavoring, the label shall bear the statement "flavoring added," "with added flavoring" or "flavored with _ ___," the blank being filled in with the common or usual name of the flavoring used. If the flavoring is artificial, the word "artificial" shall precede the word "flavoring," or the word "artificially" shall precede the statement "flavored with _____." If it contains added artificial coloring, the label shall bear the statement "artificially colored" or "contains artificial color."
- (g) The labeling provisions for pasteurized process cheese food shall also apply to pasteurized process cheese food with fruits, vegetables or meats, except that the name of the product is "pasteurized process cheese food with ______," the blank being filled in with the common or usual names of the fruits, vegetables, or meats used, in order of predominance by weight. If the only vegetable used is pimento without any fruits or meats, the name of the product shall be "pimento pasteurized process cheese food" or "pasteurized process pimento cheese food."
- (h) The labeling provisions for pasteurized process cheese food shall also apply to pasteurized process cheese spreads, except that the product shall be labeled "pasteurized process cheese spread."
- When carob bean gum, gum karaya, gum tragacanth, sugar gum, gelatin, carboxymethyl cellulose, carrageen, oat gum, algin (sodium alginate), and algin derivative (propylene glycol ester of alginic acid) are used, the amount used shall not exceed eight-tenths of 1 percent by weight. A sweetening agent consisting of one or any mixture of two or more of the following may be used: sugar, dextrose, corn sugar, corn sirup, corn sirup solids, maltose, malt sirup, and hydrolyzed lactose, in a quantity necessary for seasoning. Any of these ingredients when used must be declared on the label, except that carob bean gum, gum karaya, gum tragacanth, guar gum, and oat gum may be designated as "vegetable gum."
- (i) The labeling and standards for pasteurized cheese spread are those prescribed for pasteurized process cheese spreads, except that no emulsifying agent is used.
- (j) The labeling for pasteurized process cheese spread with fruits, vegetables, or meats and for pasteurized cheese spread with fruits, vegetables or meats shall be those prescribed for pasteurized process cheese food with fruits, vegetables, or meats, except in the name of the product.
- (k) The labelings for cold pack cheese, club cheese, and comminuted cheese shall be those prescribed for pasteurized process cheese, except that the name of the product is "cold pack _______ cheese" or "_____ club cheese" or "comminuted ______ cheese," the blanks being filled in with the name or names of the varieties of cheese used, in order of predominance by weight; and if made of cheddar cheese, washed curd cheese, colby cheese, or granular cheese, or any mixture thereof, it may be designated "cold pack American cheese"; or when cheddar cheese, washed curd cheese, colby cheese, or granular cheese, or a mixture thereof, is combined with other varieties of cheese in the cheese ingredient, any of such cheese or such mixture may be designated as "American cheese."

(*l*) Cold pack cheese food shall be labeled in accordance with the labeling requirements for pasteurized process cheese food, except that the name shall be "cold pack cheese food."

Cold pack cheese food with fruits, vegetables, or meats shall conform to the labeling requirements for cold pack cheese food, except that the name of the cold pack cheese food with fruits, vegetables, or meats is "cold pack cheese food with ______," the blank being filled in with the common or usual name or names of the fruits, vegetables, or meats used, in order of predominance by weight.

(m) Pasteurized process cheese; pasteurized blended cheese; pasteurized process cheese with fruits, vegetables, or meats; pasteurized process pimento cheese; pasteurized blended cheese with fruits, vegetables or meats; pasteurized process cheese food; pasteurized process cheese food with fruits, vegetables, or meats; pasteurized process cheese spread; pasteurized cheese spread; pasteurized process cheese spread with fruits, vegetables, or meats; pasteurized cheese spread with fruits, vegetables, or meats; cold pack cheese; club cheese; comminuted cheese; cold pack cheese food; cold pack cheese food with fruits, vegetables, or meats shall also be labeled with the name and address of the manufacturer or distributor, the name of the product, the word "pasteurized," if pasteurized, unless the word "pasteurized" is included in the name of the product.

§ 428. Hard Grating Cheese.

In the process of making hard grating cheese, rice flour may be sprinkled along the surfaces. The cheese surface may be rubbed with vegetable oil or any other ingredient approved by the director.

HISTORY

1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).

§ 428.1. Cottage Cheese Labels.

In addition to the labeling provisions of Section 37975 of the Food and Agricultural Code, containers or packages for dry curd cottage cheese, lowat cottage cheese, lowat cottage cheese, lowfat cottage cheese with added chives, fruits or vegetables, cottage cheese, cottage cheese with added chives, fruits or vegetables, shall comply with the following:

- (a) The name or any part of the name of the product must be easily seen or understood under customary conditions of purchase.
- (b) The type shall be of suitable size and style, with sufficient background contrast, with no obscuring design or vignette, and shall not be crowded with other written, printed or graphic matter.
- (c) If the name and address differs from the name and address of the plant where the product was packaged, the words "manufactured by" or "packaged by plant 06—____" (the blank to be filled in with the plant number of the manufacturer or packager; "06" is the Federal Information Processing Standards (FIPS) designation for California, and manufacturers or packagers located outside of California should use the applicable FIPS number for their state) shall be included.

§ 428.3. Pasteurized Neufchatel Cheese Spread with (and) Other Foods: Identity, Label Statement of Optional Ingredients.

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Repealer filed 2-23-62; effective thirtieth day thereafter (Register 62, No. 4).

Article 5. Frozen Dairy Products

§ 429. Frozen Dairy Products; Weight.

HISTORY

1. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 430. Weight of Fresh Egg Yolks.

NOTE: Authority cited: Section 3891, Food and Agricultural Code.

HISTORY

- Amendment filed 4-25-75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 431. Optional Dairy Ingredients.

NOTE: Authority cited: Sections 407 and 36807, Food and Agricultural Code. Reference: Section 36807, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–13–76; effective thirtieth day thereafter (Register 76, No. 16). For former history, see Register 56, No. 18.
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 432. Chocolate Ice Cream.

HISTORY

1. Repealer filed 2-23-62; effective thirtieth day thereafter (Register 62, No. 4).

§ 433. Trade Name Products.

HISTORY

1. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 434. "Ice Cream," "Ice Milk," "Sherbet."

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 435. "Package" Construed.

The term "package" as used in Section 36805 of the Food and Agricultural Code is construed to include any carton, cup, bag, case, box, or any receptacle or container coming in contact with ice milk or ice cream. This provision does not apply to containers commonly known as "ice cream cones" except when such containers are prefilled or prepackaged for sale.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 436. Sherbet.

NOTE: Authority cited: Section 36953, Food and Agricultural Code

HISTORY

- Amendment filed 4-25-75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 437. Stabilizers.

NOTE: Authority cited: Sections 36864, 36923 and 36952.

HISTORY

- 1. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 438. Temperature.

- (a) All ice cream mix and ice milk mix, after pasteurization, shall be maintained at a temperature below 50 degrees Fahrenheit until frozen. If the mix is a sterile product it shall be maintained below 50 degrees Fahrenheit after being opened.
- (b) Milk drink mix as defined by Section 38451 of the Food and Agricultural Code, after pasteurization, shall be maintained below 50 degrees Fahrenheit until frozen. If the mix is a sterile product it shall be maintained below 50 degrees Fahrenheit after being opened.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- 2. Amendment of subsection (b) filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 439. Yami Yogurt Sherbet.

NOTE: Additional authority cited: Section 441, Agricultural Code.

HISTORY

- 1. New section filed 7–1–52; effective thirtieth day thereafter (Register 29, No. 2).
- 2. Repealer filed 9-21-56; effective thirtieth day thereafter (Register 56, No. 18).

§ 440. Frozen Milk Products Returns.

- (a) All returned open containers of frozen milk products and all crushed frozen milk product novelties shall be considered prima facie unacceptable for reprocessing.
- (b) All materials or products deemed suitable for reprocessing must be stored in a sanitary place.

HISTORY

1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)

§ 440.1. Diabetic or Dietetic Ice Cream and Diabetic or Dietetic Ice Milk.

NOTE: Authority cited: Section 36926, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-9-60; effective thirtieth day thereafter (Register 60, No. 5).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 3. Repealer filed 7-15-97, operative 8-14-97 (Register 97, No. 29).

§ 441. Frozen Yogurt Mix—Fruits and Flavorings.

(a) Frozen Yogurt Mix or Lowfat Frozen Yogurt Mix, when used by manufacturers operating under the provisions of Section 33704 of the Food and Agricultural Code, shall be obtained in preflavored form from a licensed mix manufacturer, unless fruits or flavoring are added to mixes by the soft–serve operator directly from factory–filled containers labeled in compliance with the Code of Federal Regulations. The addition of any ingredient other than fruits and flavorings, including water, to a mix by the semi–frozen milk products plant operator shall constitute adulteration.

NOTE: Authority cited: Sections 407 and 36994, Food and Agricultural Code. Reference: Sections 33704, 33704.5 and 36994, Food and Agricultural Code.

HISTORY

1. New section filed 1–7–77; effective thirtieth day thereafter (Register 77, No. 2).

§ 441.1. Frozen Yogurt Mix and Lowfat Frozen Yogurt Mix Temperature Requirements and Approved Sweeteners.

- (a) Frozen Yogurt Mix and Lowfat Frozen Yogurt Mix, after pasteurization and the fermentation process, shall be cooled immediately to a temperature below 50°F. and maintained at, or below, that temperature until frozen
- (b) The mix may be sweetened by the use of sweetening ingredients specified in the Code of Federal Regulations, Title 21, Part 20, Section 20.1(d).

NOTE: Authority cited: Sections 407 and 36994, Food and Agricultural Code. Reference: Sections 33704, 33704.5 and 36994, Food and Agricultural Code.

HISTORY

1. New section filed 1–7–77; effective thirtieth day thereafter (Register 77, No. 2)

Page 16 Register 97, No. 29; 7–18–97

§ 441.2. Frozen Yogurt Dessert and Lowfat Frozen Yogurt Dessert Ingredient Listing.

The ingredient list referred to in Section 33704.5 of the Food and Agricultural Code shall list the common or usual name of each ingredient as required by Section 32912 for retail ingredient labeling.

NOTE: Authority cited: Sections 407 and 36994, Food and Agricultural Code. Reference: Sections 33704, 33704.5 and 36994, Food and Agricultural Code.

HISTORY

1. New section filed 1-7-77; effective thirtieth day thereafter (Register 77, No. 2).

§ 441.3. Frozen Yogurt Dessert, Lowfat Frozen Yogurt Dessert—Dietary Labeling.

The signs required by section 33704.5 of the Food and Agricultural Code shall also include the dietary information, specified in Section 32912.7, when any claim, beyond product identification, is made that the product is for dietary management.

NOTE: Authority cited: Sections 407 and 36994, Food and Agricultural Code. Reference: Sections 33704, 33704.5 and 36994, Food and Agricultural Code.

HISTORY

1. New section filed 1-7-77; effective thirtieth day thereafter (Register 77, No. 2.).

Article 6. Neutralization of Ice Cream Mix

§ 443. Neutralization of Ice Cream Mix.

The use of neutralizer for the adjustment of ice cream mix or ice milk mix shall not be practiced when the milk and/or cream used exceeds 0.2 percent acidity or when the acidity of the entire mix exceeds 0.25 percent acidity.

Article 7. Acidophilus or Modified Milk

§ 448. Modified Milk Products.

Plants desiring to secure a license for the manufacture of modified milk, modified sterilized milk, or modified sterilized cream, as provided for in Sections 38347 and 38531 of the Food and Agricultural Code shall do so by letter, indicating therein the qualifications of the technician who is to be employed and under whose supervision these products will be produced. The Department of Food and Agriculture will, at its discretion, examine into the qualifications of such technician as an essential consid-

eration in determining whether or not the license for manufacture shall be issued. Each application for a license to manufacture modified milk, modified sterilized milk, or modified sterilized cream, must be accompanied by a statement describing the method and manner by which the product is made.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 35071, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).
- Amendment filed 4-25-75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- Amendment filed 5–30–80; effective thirtieth day thereafter (Register 80, No. 22).

§ 449. Eggnog.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 38791.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 5–30–80; effective thirtieth day thereafter (Register 80, No. 22). For prior history, see Registers 26, No. 7 and 75, No. 17.
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

Article 8. Imitation Ice Cream and Imitation Ice Milk

§ 455. Stabilizers.

Stabilizers as provided for in Section 39183 of the Food and Agricultural Code are construed to be stabilizers or emulsifiers which help to maintain a desirable body or texture in imitation ice cream and imitation ice milk by functioning in any or all of the following ways:

- (a) By combining with a portion of the water normally present in the frozen product to form a jell structure in said product;
- (b) By assisting in the maintenance of a stable fat emulsion in the frozen product.

NOTE: Additional authority cited: Section 39183, Food and Agricultural Code.
HISTORY

- 1. Revision of Article 8 (§§ 455–466, incl.) filed 7–9–53; effective thirtieth day thereafter (Register 53, No. 11).
- 2. Amendment filed 4–25–75 as procedural and organizational (Register 75, No. 17)

[The next page is 19.]

§ 456. Edible Oil or Fat.

The term edible oil or fat as used in Sections 39182 and 39183 of the Food and Agricultural Code is construed to be edible oil or fat derived from vegetable or animal sources.

NOTE: Authority cited: Sections 39182–39183, Food and Agricultural Code.
HISTORY

 Amendment filed 4-25-75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 457. Milk Solids Not Fat.

Milk solids not fat shall mean and include skim milk, concentrated (evaporated or condensed) skim milk, superheated condensed skim milk, sweetened condensed skim milk, nonfat dry milk solids, edible dry whey, cheese whey, sweet cream buttermilk (whether fluid, condensed or dried), and any of the foregoing products from which all or a portion of the lactose has been removed after crystallization, or the lactose has been converted to simple sugars by hydrolysis.

§ 458. Fruit Imitation Ice Cream and Ice Milk.

- (a) Fruit imitation ice cream is imitation ice cream containing not less than 3 percent by weight of clean, mature, sound fruit or the juice thereof.
- (b) Fruit imitation ice milk is imitation ice milk containing not less than 3 percent by weight of clean, mature, sound fruit or the juice thereof.

§ 459. Nut or Candy Imitation Ice Cream and Imitation Ice Milk.

- (a) Nut or candy imitation ice cream is imitation ice cream containing not less than 1 percent by weight of sound, nonrancid nut meats or candy.
- (b) Nut or candy imitation ice milk is imitation ice milk containing not less than 1 percent by weight of sound, nonrancid nut meats or candy.

HISTORY

 Amendment filed 9-21-56; effective thirtieth day thereafter (Register 56, No. 18).

§ 460. Labeling.

- (a) All square, rectangular or other flat-sided containers other than pails, of imitation ice cream or imitation ice milk shall be conspicuously labeled on at least three sides and on each end of the container with the words "imitation ice cream" or "imitation ice milk," as the case may be, in bold face type distinctly contrasting in color with the background color of the container, and in no event smaller than one-half the size of the largest lettering appearing on that side or end of the container. The name of each of the ingredients of the imitation ice cream or imitation ice milk, as the case may be, shall be printed on one side of the container.
- (b) All round or cylindrical containers of imitation ice cream or imitation ice milk shall be conspicuously labeled on the top lid and at least two times on the side, at equidistant points, with the words "imitation ice cream" or "imitation ice milk," as the case may be, in bold face type distinctly contrasting in color with the background color on the container, and in no event smaller than one—half the size of the largest lettering appearing on the top lid or that side, as the case may be, of the container. The name of each of the ingredients of the imitation ice cream or imitation ice milk, as the case may be, shall be printed on the side of the container.
- (c) All containers of imitation ice cream or imitation ice milk in the shape of a pail shall be conspicuously labeled on at least three sides and on top of the container with the words "imitation ice cream" and "imitation ice milk," as the case may be, in bold face type distinctly contrasting in color with the background color of the container, and in no event smaller than one—half of the size of the largest lettering appearing on that side or the top of the container. The name of each of the ingredients of the imitation ice cream or imitation ice milk, as the case may be, shall be printed on one side of the container.
- (d) All coated (dipped), plain (undipped) bars, cakes, pies, suckers, lollipops, and similar products, composed wholly or partially of imitation ice cream or imitation ice milk shall be sold in paper, cellophane, cardboard, foil or other similar wrapping, which wrapping shall be conspicuously labeled on any side on which the trade–name of the product appears, with the words "imitation ice cream" or "imitation ice milk," as the

case may be, in bold face type, distinctly contrasting in color with the background color on the wrapping, and in no event smaller than one—half the size of the largest lettering appearing on that side of the wrapping. The name of each of the ingredients of the imitation ice cream or imitation ice milk, as the case may be, shall also be printed on the same side of the wrapping.

§ 461. "Container" Construed.

The term "container" as used in Section 39211 of the Food and Agricultural Code, and in these regulations, is construed to include any carton, cup, bag, case, box, wrapping, or any receptacle, package or container coming in contact with coated or uncoated imitation ice cream or imitation ice milk.

NOTE: Authority cited: Section 39211, Food and Agricultural Code.

HISTORY

 Amendment filed 4-25-75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 462. "Bulk" Construed.

"Bulk" imitation ice cream or imitation ice milk, as the term "bulk" is used in Section 39153 of the Food and Agricultural Code, is construed to mean imitation ice cream or imitation ice milk in factory-filled packages containing more than one-half gallon.

NOTE: Authority cited: Section 39153, Food and Agricultural Code.

HISTORY

 Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 463. Reports.

All manufacturers of imitation ice cream or imitation ice milk shall prepare and file with the director once each month such report as the director may require of the amount of edible oil or fat received, and of the amount of such edible oil or fat used, during the month, and the source thereof, together with an accurate report of the amount of imitation ice cream and imitation ice milk manufactured during the month.

§ 464. Weight.

Imitation ice cream shall contain a minimum of one and six-tenths pounds of food solids per gallon and shall weigh not less than 4.5 pounds per gallon. Imitation ice milk shall contain a minimum of one and threetenths pounds of total food solids per gallon and shall weigh not less than 4.5 pounds per gallon. The determination of the weight of total food solids per gallon, and method of sampling, shall be the same as that set forth in Section 429, Article 5, subchapter 1, Title 3, Administrative Code.

HISTORY

 Amendment filed 2-23-62; effective thirtieth day thereafter (Register 62, No. 4).

§ 465. Artificial Color and Flavor.

Imitation ice cream and imitation ice milk may be made with the use of artificial color and artificial flavor, provided the labeling and sale of such products shall be in accordance with the provisions set forth in Title 17, California Administrative Code Sections 26466(2) and 10845.

HISTORY

 Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 466. Labeling.

All containers of imitation ice cream and imitation ice milk shall be labeled with the name of the product and with the name and address of the manufacturer or the wholesale distributor or the retailer. The words "manufactured by" shall appear above the name when the name of the manufacturer is given; the words "distributed by" shall appear above the name when the name of the wholesale distributor is given; and the words "put up for" or "put up by," as the case may be, shall appear above the name when the name of the retailer is given.

§ 467. Advertising and Labeling.

Where any trade name, word, or phrase is used in connection with the advertising, labeling, sale, and distribution of imitation ice cream or imitation ice milk, there must also appear in connection with such trade

Page 19 (4-1-90)

name, word, or phrase, the words "imitation ice cream" or "imitation ice milk," as the case may be, in a conspicuous manner.

HISTORY

1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)

Article 9. Products Resembling Milk Products

§ 468. Definitions.

The definitions for "products resembling milk products," "filled products," "imitation milk products," "nondairy products," and "trade products" stated in sections 38911–38916 are applicable to this article.

NOTE: Authority cited: Sections 407, 36601, 36602, 38924, 38952, 38953, 38972, 38982 and 38985, Food and Agricultural Code. Reference: Sections 32915, 38911–38985, Agricultural Code.

HISTORY

1. New Article 9 (Sections 468 through 476) filed 2–5–69; effective thirtieth day thereafter (Register 69, No. 6).

§ 469. Healthfulness and Purity.

- (a) All ingredients of imitation milk products and filled products, except for flavorings, shall be pasteurized in accordance with the provisions of sections 34001 and 35168 of the Food and Agricultural Code.
- (b) Every trade product, except those which are acidified, having a fat or oil content of not more than 10 percent, shall have a Standard Plate Count of not more than 15,000 per milliliter if fluid, or per gram if semisolid or solid, at the time of delivery to the consumer.
- (c) Every trade product, except those which are acidified, having a fat or oil content in excess of 10 percent, shall have a Standard Plate Count of not more than 30,000 per milliliter if fluid, or per gram if semi-solid or solid, at the time of delivery to the consumer.
- (d) Every trade product, including those which are acidified, regardless of whether the acidity is increased by bacterial culturing or by the addition of a food grade acid, shall have a coliform count of not more than 10 per milliliter if fluid, or per gram if semi–solid or solid, at any time the product is within the control of the processor.
- (e) Every trade product which is sold in the frozen state shall have a Standard Plate Count of not more than 75,000 per gram at the time of delivery to the consumer.
- (f) Procedures for the collection of samples provided for pursuant to section 32731 and analytical procedures shall be in substantial compliance with Standard Methods for the Examination of Dairy Products of the American Public Health Association and the Official Methods of Analyses of the Association of Official Analytical Chemists.

§ 470. Labeling—Location.

Once on each container of products resembling milk products, all required information shall appear conspicuously on a panel without obscuring designs, vignettes or information which is not required. The location of the required information panel shall be in the case of:

- (a) Gable top rectangular cartons—the vertical front panel below the pour spout
 - (b) Flat top rectangular cartons—any one vertical side panel
 - (c) Glass bottles—the cap or outer closure
- (d) Cylindrical or nearly cylindrical cartons (straight side walls or nested) and cups—the lid or side wall
 - (e) Tetrahedral containers—any two sides
- (f) Plastic containers—any single placement as noted above or combination with (c)

§ 471. Labeling—Required Information.

HISTORY

- 1. Amendment of subsection (d) filed 4-25-75; effective thirtieth day thereafter (Register 75, No. 17).
- 2. Repealer filed 8-22-78; effective thirtieth day thereafter (Register 78, No. 34).

§ 472. Out-of-State Nondairy Products.

A nondairy product may be transported into and sold in California provided such product complies with standards of healthfulness and purity specified in section 469 above and registration of the product in accordance with the requirements of sections 38941–38946 of the Food and Agricultural Code.

§ 473. Sale Outside of California.

A product resembling a milk product may be processed in California for sale outside of California, even though it may not meet all California requirements, provided the following conditions are complied with:

- (a) The product is registered in accordance with sections 38941–38946 of the Food and Agricultural Code. The registration shall state the intent for sale outside of California and the reason why the product fails to meet the requirements of section 38901 et seq. of the Food and Agricultural Code.
- (b) Products manufactured for sale outside of California shall be kept physically segregated from products manufactured for sale in California. If individual containers are packaged in cartons, the carton shall be identified on the top or side with the statement in letters not less than one–half inch in height "FOR SALE OUTSIDE OF CALIFORNIA."

If individual containers are transported in single service or multi-use open cases, each individual container shall be identified in a manner acceptable to the director.

§ 474. Serving as Beverages.

Products resembling milk products which are to be served as beverages shall meet the requirements for market milk as provided for in sections 34591–34628 of the Food and Agricultural Code.

§ 475. Bottling and Packaging.

Products resembling milk products when sold as beverages shall be bottled or packaged at the plant where pasteurized.

§ 476. Origin of Market Milk Constituents.

"Market Milk," as used in section 38925 of the Food and Agricultural Code, means the product defined in section 32510 of the Food and Agricultural Code provided, however, when law or ordinance of another state or market milk jurisdiction within a state is substantially equivalent to the legal requirements for production, processing and enforcement relating to market milk in California, the products from such state or jurisdiction within a state may be accepted as market milk for purposes of section 38925.

Any processor of products resembling milk products wishing to establish such substantial equivalence may petition the director for and provide the necessary expenses of an investigation.

If the laws or ordinances and their application in the other states are found to provide market milk and market milk products substantially equivalent to those in California, such products may be used in the manufacture of products resembling milk products under the following conditions:

- (a) The market milk or market milk products are certified by the responsible inspection agency in the state of origin as being market milk or of market milk origin within their own laws or ordinances.
- (b) The producer, processor, and inspection rating of the market milk or market milk products are listed in the current Interstate Milk Shippers List as published by the United States Public Health Service.
- (c) The market milk or market milk products shall meet all the standards of composition and purity required for market milk and market milk products in California.

Article 10. Sterilization and Handling Practices

§ 479. Sterilization and Handling Practices. Definition.

HISTORY

1. Repealer filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).

Page 20 (4-1-90)

§ 480. Sterilization Process.

The following chemical sterilization processes are hereby established in reference to Sections 33519 and 33763 of the Food and Agricultural Code:

- (a) Only the following methods of application are acceptable:
- (1) Flowing of a continuous unbroken film of the sterilizing solution in contact with all surfaces to be sterilized for a period of at least two consecutive minutes.
- (2) Completely immersing the entire piece or pieces of equipment into the sterilizing solution for a period of at least two consecutive minutes.
- (3) Fogging, spraying or swabbing a sterilizing solution in such a manner that all surfaces to be sterilized are exposed to an unbroken film of the sterilizing solution for a period of at least five consecutive minutes.
- (4) Applying a paste of the sterilizing agent in a manner which completely covers the equipment surface to be sterilized for at least five consecutive minutes before being rinsed.
 - (5) Any other method of application must be approved by the director.
- (b) In addition to heat sterilization as provided for by Sections 33519 and 33763 of the Food and Agricultural Code, the following brands or classes of sterilizing compounds have been approved for use on dairy farms, milk products plants, and imitation milk products plants.
 - (1) Chlorine compounds.
 - (2) Quaternary ammonium compounds.
 - (3) Iodine compounds.
 - (4) Caustic solutions (sodium hydroxide).
- (c) Chlorine solutions when used by the flowing or immersion method must always have a strength in excess of 50 p.p.m. (parts per million) of active or available chlorine. When used as a fogging or paste method of application the concentration of active or available chlorine in the sterilizing solution must exceed 250 p.p.m. (parts per million).
- (d) Quaternary ammonium compounds when used by the flowing or immersion method must always have a concentration i excess of 200 p.p.m. (parts per million). If used as a fogging spray, the concentration must always be in excess of 500 p.p.m. (parts per million).
- (e) Iodine compounds when used by the flowing or immersion method must always have a concentration of active ingredient in excess of 12.5 p.p.m. (parts per million). If used as a fogging method, the concentration of the active ingredient must always be in excess of 25 p.p.m. (parts per million). Iodine compounds used as a combination detergent sterilizer must have the concentration of the active sterilizing ingredient doubled over the amount when used as a sterilizing agent.
- (f) In a soaker type bottle washer or any other apparatus where sterilization depends upon the causticity of the washing solution, the caustic strength for a given soaking time and temperature must be in conformance with the following table:

Temperature (Farenheit)

	170°	160°	150°	140°	130°	120°	110°
Time in minu	tes	C	oncentr	ation of l	NaOH, pe	ercent	
3	.57	.86	1.28	1.91	2.86	4.27	6.39
5	.43	.64	.96	1.43	2.16	3.22	4.80
7	.36	.53	.80	1.19	1.78	2.66	3.98

Milking machine rubber parts may be sterilized by filling with or completely immersing in a 0.5 percent caustic (lye) solution and so kept between milkings. Before the rubber parts are used the lye solution must be drained and the rubber parts rinsed.

(g) All equipment to be treated with solutions of any sterilizing agent must first be thoroughly cleaned and rinsed before sterilizing except when such sterilizing agent is used in combination with a detergent as a detergent sterilizer. After sterilizing with a detergent sterilizer, the equipment must be allowed to drain and be rinsed with water, treated by heat or a chemical sterilizing agent to assure freedom from viable pathogenic or otherwise harmful microorganisms before use.

- (h) All solutions, except lye, used for the sterilization of equipment must be freshly prepared and used immediately after preparation.
- (i) The bacterial standards for sterility for all equipment are those specified in the current edition of "Standard Methods for the Examination of Dairy Products."

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- 2. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4)
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 480.5. Pipeline Milking Machine Installations.

All pipeline milking machine installations must comply with the following conditions and must have a satisfactory circulating system for washing and sterilizing which has been approved by the director; or such system must be disassembled, washed and sterilized after each time used, except that deviations from the minimum requirements and specifications may be made after approval in writing by the director:

- (a) All equipment having any surface in contact with the milk and all solution lines, wash tanks, fittings, vacuum lines from air separator to moisture trap shall be constructed of stainless steel, nickel alloy, heat–resistant glass or equally corrosion–resistant material that is nontoxic and nonabsorbent.
- (b) All milk contact surfaces, whether a ground or bright annealed finish, shall be finished to an equivalent of not less than 120–grit finish, properly applied, and shall be free from pits, cracks, and crevices.
- (c) The milk pipeline system shall be installed in a manner to permit being disassembled for inspection.
- (d) Sanitary milk pipes which are not washed in place shall be no longer than the washing and sterilizing facilities will accommodate.
- (e) The entire milk line shall be installed so as to have a positive slope and be completely drained. It must be supported by permanent hangers or other means to prevent sagging and to maintain alignment.
- (f) The vacuum line from the air separator to the moisture trap must have at least one-half inch downward slope in the first foot.
- (g) The vacuum line from the air separator shall not extend in a vertical position above the separator more than six inches including the elbow.
- (h) The entire milk pipeline and solution pipeline must be of the same inside diameter when a pressure circulating system of clean-up is used.

When a vacuum system of circulation is used, the inside diameter of the pipelines and appurtenances may vary in size if sufficient turbulence is created during circulation of the solutions to contact and clean and sanitize all surfaces. Injection of pulses of air is one method of increasing turbulence.

(i) Solution lines must be disconnected from milk pipelines during milking unless (1) the solution or wash line is disconnected from any solution or wash tank for the entire milking, and (2) all solution or wash lines are drained before milking begins.

Vacuum lines may be connected to milk pipelines only when areas not properly cleaned and sanitized are effectively isolated from milk contact areas.

Water lines must be disconnected from milk lines during milking.

(j) All milk pumps and attachments shall be protected from possible contamination. If legs are used, they shall be smooth with rounded ends and no exposed threads. Legs made of hollow stock shall be sealed. On pumps with legs designed to be fixed to the floor, the minimum clearance between the lowest part of the base and the floor shall be four inches. Readily portable pumps not permanently attached may have leg heights of two inches. (Readily portable pumps are defined as those having a base area of not more than one square foot, or, in the case of motor–mounted pumps, an area encompassed by the legs that does not exceed one square foot.) Bases when used shall be constructed without ribs or flanges and shall have a smooth top and bottom surface. Pumps which because of their size and type cannot be mounted on legs, shall be mounted on a base

designed for grouting and sealing. All milk pumps and attachments must be a sufficient distance from walls to permit proper cleaning.

- (k) (Section 33481 Food and Agricultural Code.) When a dump tank is used in the milking barn, it must be located in accordance with Section 481.5 of the Administrative Code and must be kept covered except when milk is being poured. Milk on test days and strippings shall enter the milk pipeline through the dump tank. If dump tank is located next to the barn wall between milkhouse and barn, the barn wall must be at least six feet high.
- (*l*) The Cleaned-in-Place (CIP) wash tank shall be located in the milk-house; any other location must be approved by the director.
- (m) A thermometer must be installed on the discharge end of the circulating system and the washing solution temperature during circulation cleaning maintained at 115°F, or above.
- (n) Milk tanks, dump tanks, releasers, when located in passageway shall be constructed so as to protect milk from flies, dust and contamination.
- (o) Ends of milk lines, stall cocks and other pipeline openings subject to contamination shall be capped or otherwise protected.
- (p) Sight glasses shall not be permitted on milk pipelines when such milk pipelines are cleaned by circulation.
- (q) The circulating pump shall be of a size sufficient to fill the pipelines and cause enough turbulence to insure adequate cleaning and shall deliver not less than 25 gallons of solution per minute at discharge end of 1 1/2—inch lines and corresponding volumes for other size pipes when pressure system of circulation is used.
- (r) Air line from moisture trap to milk releaser or air separator shall be washed and sterilized after each time used.
 - (s) The outside of milk pipelines and equipment shall be kept clean.
- (t) Vacuum pumps, motors, or any machinery that may emit oil, fumes, grease, odors, or any objectionable material shall not be located over or near milk equipment.
- (u) Milk pipelines connected by the so-called slip joint method, with or without an "O" ring gasket must be disassembled for cleaning after each use.
- (v) Gaskets, when used, must be made of a low-absorbent material which is smooth and nontoxic. Paper and fiberlike gaskets are not acceptable. Gaskets must be self-positioning and of such design to form a substantially flush interior joint.
- (w) Openings for inspection must be provided on welded metal pipeline installations in order to provide access to determine the cleaning efficiency of Cleaned-in-Place systems.
- (x) Milk pumps, pipelines, and air separators which are a part of an enclosed pipeline system may be installed in the passageway or an area approved by the Director, in the milking barn, provided, that all of the equipment is protected from contamination at all times. Plate type or internal tubular coolers may be installed in the milkhouse or passageway.
- (y) Milking machine claws and milker units may be cleaned in place in the milking barn, provided, they are effectively cleaned, sanitized, and drained by the CIP system, and subsequently protected from dust, flies, contact with animals, or other contamination until the next milking is begun.

Whenever units are dismantled for hand cleaning, such cleaning shall be done in the milkhouse.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 33519–33522, Food and Agricultural Code.

HISTORY

- 1. New section filed 11-1-51; effective thirtieth day thereafter (Register 26, No. 3).
- 2. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 3. Amendment filed 2–24–59; effective thirtieth day thereafter (Register 59, No. 4).
- 4. Amendment filed 3–22–74; effective thirtieth day thereafter (Register 74, No. 12).
- 5. Amendment of subsection (k) filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 480.5-1. In-Place Cleaning in Plants.

Unless a satisfactory circulating system for washing and sterilization for milk product plant pipeline in–place cleaning is provided, all lines and equipment must be disassembled for washing after each time used. Any circulating system must comply with the following, unless otherwise approved by the director.

- (a) All cleaned—in—place pipelines in milk products plants must comply with the subsections (a), (b), (c), (e), (j), (m), (s), (u), (v), and (w) of Section 480.5 of the Administrative Code.
- (b) To prevent adulteration and contamination, solution lines and water lines must be disconnected from the milk or milk product lines during the processing periods. Equipment not being cleaned in place must be disconnected from the system during the time CIP (cleaned-in-place) is operating.
- (c) Each milk products plant using the CIP method must have in its possession a plan of the system identifying the sanitary piping and equipment to be cleaned, or shall identify all lines cleaned in place in a manner that will distinguish them from lines which are to be disassembled for cleaning.
- (d) Each cleaned—in—place (CIP) system must be equipped with a control to maintain the wash solution at an effective temperature.
- (e) The circulating pump must be of a size to insure proper cleaning and provide a velocity of at least five feet per second.
- (f) Surface coming in contact with milk or milk products must be of corrosion-resistant material, smooth, free from open seams, cracks, and cravices
- (g) All caps, plugs, valve seats, tee ends, cross ends, special fittings, and the like must be removed and cleaned, each time the CIP system is operated.

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).

§ 480.6. Suitable Milk House.

A "suitable milk house or room" as used in Section 33518 of the Food and Agricultural Code is construed to be one which is sound, readily cleanable, of sanitary construction, provided with adequate working space and so constructed as to provide sufficient light and ventilation. Floors must be of impervious material and have a positive drainage of at least one–fourth inch per foot, to carry liquids to a point at least 100 feet from the milk house or room. Junctions of floor and walls must be coved. No equipment shall be so located as to interfere with cleaning under, over, or around the equipment. Boilers or heaters which emit smoke, soot, oil or odors must not be installed in the milk house or room.

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 480.7. Dairy Farm Tank Installations.

Where milk is held at the dairy in farm tanks or transferred to tankers for delivery, the following conditions must be complied with:

- (a) A plan or diagram with dimensions for each installation must be submitted to the inspection service or inspector in advance and be approved before the installation is made.
- (b) Farm tanks must be installed at least two feet, measured from any piece of equipment or accessory that may protrude from the tank, from the walls of the milk room on all sides. When a surface cooler is used, the distance between the tank wall and the building wall must be at least three feet six inches on the side where cooler is installed. When the pump for transferring milk from the farm tank is installed or located in the milk room, the distance between the tank wall and the wall of the building must be at least three feet at the outlet end.

These distances may be modified only by written permission of the director. A clearance of at least six inches must be provided between the bottom of the farm tank or pipe under the farm tank and the floor. The farm tank must not be located over a floor drain.

- (c) Farm tanks must be provided with accurate thermometers.
- (d) A sanitary stainless steel pipeline or rubber or plastic hose must be used for conveying milk from the farm tank. Any line or hose used must be in lengths which can be readily cleaned and sterilized by approved methods. Hoses must be capped and contained in a dustproof compartment on the truck or trailer while in transit. Sanitary caps must be used for tank outlets.
- (e) Sanitary milk pumps provided by the dairy must be protected at all times.
- (f) The loading area or ramp must be kept in a sanitary condition and be graded, or graded and paved to provide good drainage.
- (g) The farm tank must be constructed of acceptable materials and in such a manner that it may be cleaned, sanitized, and drained. The measuring device must be made of stainless steel or other acceptable material.
- (h) When used as a farm storage tank, all openings to the truck tank must be protected with dustproof covers. For loading and unloading, tight, protected connections must be made. All valves and fittings of farm tanks and truck tanks must be easily disassembled for cleaning.
- (i) Sufficient light, properly located, must be available to assure proper cleaning of the interior and exterior of farm tanks.
- (j) Transfer of milk from the farm tank must be made only through conductor pipe openings in the milk house wall or stationary door; such openings must be provided with closures.

 \bar{N} OTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 33519–33522, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).
- Amendment of subsections (e) and (g)–(i), repealer of subsections (j) and (l), subsection relettering, amendment of newly designated subsection (j) and new NOTE filed 4–2–2002; operative 4–2–2002 (Register 2002, No. 14).

§ 480.8. Sanitary Milk Pumps.

Sanitary milk pumps at milk products plants for unloading or loading tankers may be installed outside of plant, provided: the tank truck for loading or unloading is on a concrete platform that is curbed, if necessary, and sloped to a drain; that this area be provided with overhead protection; that the pump be installed at least one foot above surrounding area; that all openings to pump be protected when not in use; and that provisions be made for washing and sterilizing of the pump and appurtenances.

HISTORY

 New section filed 9-21-56; effective thirtieth day thereafter (Register 56, No. 18).

§ 480.9. Inspection and Permitting of Bulk Milk Tankers.

The following requirements for inspection and permitting of bulk milk tankers shall be met. The term "milk tanker" as used in Section 33227 of the Food and Agricultural Code is construed to mean a vehicle, including the tank and appurtenances necessary for its use, or an intermodal portable tank, used to transport bulk raw market milk from a dairy farm; bulk market milk or milk products from a milk plant, receiving station or transfer station to a milk plant, receiving station or transfer station.

- (a) Permitting. Any person desiring to obtain a bulk milk tanker permit as required by Section 33227 of the Food and Agricultural Code shall apply in writing to the Department. The permit shall be issued for each milk tanker that has been inspected by a representative of the Department and found to be in compliance with the requirements set forth in (d) below.
- (1) The "Application for a Bulk Milk Tanker Permit" (Appendix A, Form 72–273) shall be available to interested parties from the Milk and Dairy Foods Control Branch at 1220 N Street, room A–170, Sacramento, CA 95814.
- (2) After receipt of the above application by the Secretary, applicants will be contacted to schedule an inspection of the milk tanker.

- (3) A fee will be charged for the milk tanker inspection. The fee shall be billed to the operator (lessee or owner), of the milk tanker after the inspection is completed based on the actual cost of the inspection.
- (4) The permit shall be dated, signed and affixed to the milk tanker by a representative of the Department.
- (5) The permit is valid for 1 year from the date of issue and may be renewed upon payment of an annual inspection fee, and re–inspection of the milk tanker by a representative of the Department finding it to meet requirements set forth in (d) below.
- (b) Reciprocity. The Department will recognize permits issued by other state regulatory agencies pursuant to reciprocal agreements of the National Conference on Interstate Milk Shipments.
- (c) Inspection. Each milk tanker shall be inspected annually. Representatives of the Department shall use FDA Form 2399B, 1999 revision, (2399B) to conduct inspections of milk tankers based on the standards set forth in (d) below. A copy of a current 2399B, or an affixed label near the outlet valve identifying the regulatory authority with the month and year of inspection, shall accompany the tanker at all times.
- (1) The milk tanker inspection shall be conducted in a suitable location, i.e., dairy plant, milk receiving or transfer station, milk tanker cleaning facility or tanker yard. When construction or repair defects are observed that require entry of confined spaces as defined by the Occupational Health and Safety Administration standards the milk tanker shall be removed from service until proper confined entry safety requirements can be satisfied to determine repairs needed; and if repairs are needed, they are completed. Repairs shall be verified by a representative of the Department prior to returning the milk tanker to service.
- (2) When defects or violations are noted, a copy of the 2399B shall be carried on the milk tanker until corrections are made. If the noted defect or violation could contaminate or otherwise affect the safety of the product a representative of the Department may require that corrections are completed and verified by a representative of the Department prior to returning the milk tanker to service.
- (d) Milk Tanker Standards. The milk tanker inspection criteria are listed below:
 - (1) Samples and Sampling Equipment.
 - (A) Sample containers shall be stored to preclude contamination.
 - (B) Sample box shall be in good repair and kept clean.
 - (C) Sample transfer instrument shall be cleaned and sanitized.
- (D) Sample transfer instrument container shall be provided and adequate means for maintaining sanitizer solutions shall be on hand.
 - (E) Samples are properly stored to preclude contamination.
 - (F) Sample storage compartment shall be clean.
- (G) Samples are maintained at an acceptable temperature (32°F to 40°F) and a temperature control sample shall be provided.
- (H) A thermometer accurate within $1^{o}C(2^{o}F)$ shall be available for use by the sampler. The accuracy of the thermometer shall be checked each six months against a thermometer traceable to a National Institute of Standards and Testing certified thermometer. The date of the check and the correction factor shall be recorded on a tag attached to its carrying case.
 - (2) Product Temperature 45°F or Less.
- (A) Product temperature shall meet requirements of Section 35782 of the Food and Agricultural Code.
- (B) Product exceeding 45°F that remains in external transfer systems shall be discarded.
 - (3) Equipment Construction, Sanitizing and Repair.
 - (A) Construction and repair requirements.
- 1. The milk tanker interior and all appurtenances, including hoses, pumps, piping, fittings and connections which are exposed to milk or milk products or from which liquids may drip, drain or be drawn into milk or milk products, shall consist of material which is approved for food contact surfaces and meets requirements of Section 33520 of the Food and Agricultural Code.

- 2. Where flexibility is required, the fluid transfer system shall be free draining and so supported to maintain uniform slope and alignment. It shall be easily disassembled and accessible for inspection.
- 3. Cabinet(s) of the milk tanker used for storage of appurtenances and sampling equipment shall be clean, dustproof and in good repair.
- 4. All openings to the milk tanker must be protected with dustproof covers. For loading and unloading, tight, protected connections must be made. All valves and fittings of milk tankers must be easily disassembled for cleaning.
 - (B) Cleaning and Sanitizing Requirements.
- 1. The milk tanker and its appurtenances shall have an effective cleaning and sanitizing regimen meeting requirements of Section 33519 of the Food and Agricultural Code.
- 2. The milk tanker shall be cleaned and sanitized prior to first use. When time elapsed after cleaning and sanitizing before first use exceeds 72 hours, the tank must be resanitized.
- 3. The milk tanker and its pumps, hoses and fittings must be cleaned and sanitized after each load is hauled, whenever the following load is to go to a different plant. A farm pickup milk tanker may make several trips to the same plant before complete washing and sanitizing, provided satisfactory results are obtained and the inspection service involved has approved the system. If milk products other than market milk or market milk products are transported, there must be a complete cleaning and sanitizing of the milk tanker before it is used for transporting market milk or market milk products.
- (4) Exterior Condition of Tank. The exterior of the milk tanker shall be constructed to protect the products contained therein from contamination and be in good repair. Defects and damage that could contaminate or adversely affect products contained in the milk tanker shall be noted during the inspection and corrected. Cleanliness of the milk tanker exterior shall be adequate to protect the contents from contamination. The weather and environmental conditions shall be considered in determining compliance with these requirements.
 - (5) Wash and Sanitize Record.
- (A) The licensed sampler and weigher shall be responsible for assuring that the milk tanker has been properly cleaned and sanitized. A milk tanker without a cleaning and sanitizing tag shall not be loaded or unloaded until verification of cleaning and sanitizing is obtained.
- (B) Each tank on the milk tanker after being washed and sanitized must be identified by a tag attached to the outlet valve, bearing the following information: plant and specific location where cleaned, date and time of day of washing and name of person who washed and sanitized the tank. This tag must not be removed until the milk tanker, after being used for reception of milk or milk products is again washed and sanitized and shall include identification of the milk tanker. When a milk tanker is washed, the previous cleaning and sanitizing tag shall be removed and stored at the location where the milk tanker was washed for a period of no less than 15 days.
- (C) The licensed sampler and weigher or the milk tanker operator (lessee or owner) shall be responsible for assuring that all information on the cleaning and sanitizing tag is noted by the person conducting the cleaning and sanitization of the tanker.

- (6) Location of last cleaning. The location of the last cleaning shall be verified by the regulatory agency during the milk tanker inspection and noted on the 2399B.
- (7) Labeling. The licensed sampler and weigher shall be responsible for assuring that all shipping invoices, bills of lading or weight tickets contain the information listed below. A milk tanker transporting raw, heat–treated or pasteurized milk and milk products to a milk plant from another milk plant, receiving or transfer station is required to be marked with the name and address of the milk plant or hauler and the milk tanker shall be under a proper seal. Shipping documents shall contain the following information:
- (A) Shipper's name, address and permit number. Each tanker load of milk shall include the IMS Bulk Tank Unit (BTU) identification number(s) or the IMS listed Plant Number (for farm groups listed with a plant) on the weight ticket or manifest.
- (B) License number of the Sampler & Weigher, if not an employee of the shipper.
 - (C) Point of origin of shipment.
 - (D) Tanker identification number.
 - (E) Name of product.
 - (F) Weight of product.
 - (G) Temperature of product when loaded.
 - (H) Date of shipment.
- (I) Name of supervising regulatory agency at the point of origin of shipment.
- (J) Whether the contents are raw, pasteurized, or in the case of cream, lowfat or skim milk, whether it has been heat treated.
- (K) Seal number on inlet, outlet, wash connections and vents, where applicable.
 - (L) Grade of product.
- (8) Vehicle and Milk Tankers Properly Identified. The milk tanker operator (lessee or owner) shall insure the legible identification of the milk tanker in their possession.
- (9) Previous Inspection Report Available. When a milk tanker transports milk and milk products from one regulatory jurisdiction to another it is not necessary to inspect each milk tanker upon each arrival. Tank truck owners and operators shall carry proof of annual inspection from a state dairy regulatory agency. A milk tanker may be inspected at any time at the discretion of the Department.
- (10) Transportation of Samples. When any individual transports samples for official laboratory analysis, that individual shall carry a valid Samplers and Weighers license; or, alternatively, a sample case sealed in a manner acceptable to the Department may be accepted.

NOTE: Authority cited: Sections 401, 407, 32920.5 and 33227, Food and Agricultural Code. Reference: Sections 32920.5, 33227, 33519 and 33520, Food and Agricultural Code.

HISTORY

- 1. New section and new appendix A filed 10–25–2001 as an emergency; operative 10–25–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–22–2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10–25–2001 order, including amendment of section, transmitted to OAL 2–15–2002 and filed 4–2–2002 (Register 2002, No. 14).

§ 480.75. Recording Thermometers on Farm Tanks.

The installation and operation of recording thermometer devices provided for in Section 35783.1, California Food and Agricultural Code, shall be the responsibility of the holder of the market milk dairy permit.

- (a) Location.
- (1) A recording thermometer device may not be installed on or attached to a farm tank. It may be suspended on metal brackets from the ceiling, firmly attached to the inside wall of the milk room, firmly attached to the wall on the passageway side of the milk house, or at any location acceptable to the Bureau of Dairy Service.
- (2) The sensor bulb or device shall be so located as to record the temperature of the milk in the tank before the milk reaches 10 percent of the tank volume. Any capillary system containing any toxic gas or liquid shall not be used in a bare–bulb censoring device.
 - (b) Standards for Recording Thermometers.
- (1) The recorder chart, if circular, may make one revolution in 24 hours, 48 hours, or 72 hours, with the recommendation that the chart rotation time coincide with the maximum storage period of the milk in the farm tank. If a strip chart is used, it shall move not less than one inch an hour and may be continuous to a maximum of one calendar month.
- (2) The recorder clock may be manually wound or electrically operated. The recorder pen must reflect the actual time.
- (3) The circular recorder chart shall have a minimum diameter of 10 inches if the minimum temperature is recorded near the circumference of the chart. The chart shall have a minimum diameter of 12 inches when the minimum temperature is recorded near the center of the chart. The circular recorder chart may be 8 inches in diameter if the recorder is equipped with an accurate dual–movement mechanism of the writing stylus and the minimum temperature is recorded near the circumference of the chart. If a strip chart is used, the minimum temperature may be at the top or the bottom of the chart and the width shall be such as to meet the requirements of (b)(5) of this section.
- (4) The case of the recording device shall be moisture proof under operating conditions. The design of the rotating chart support shall meet the requirements of Administrative Code Section 583(h).
- (5) The recorder must be capable of recording from 30 to 160° F. or above with one degree or less lines of demarcation between 30 and 60° F. with an accuracy of plus or minus one degree in the 30 to 60° F. range.
- (6) If at any time the recording device becomes inoperable, the inspection service and the buyer shall be notified immediately by the dairyman. Repair or replacement of the device shall be made immediately.
 - (c) Operation.
- (1) The control of the recording device shall be sealed by a representative of an Approved or Established Inspection Service.
- (2) The dairyman shall maintain an adequate supply of recording charts. The charts shall be those recommended for the specific instrument which is installed.
- (3) The licensed Weigher and Sampler, in making a milk pick up, shall remove the chart from the recorder, mark the date and time of the pick up and sign the chart. He shall date and install a new chart on the recording device. He shall file the used charts under protected conditions provided for by the dairyman, unless they are taken to the buyer's premises for his review. If the charts are taken from the dairy, they shall be returned to the dairy within ten days from the date they were taken.

When all the milk goes to the same buyer and all lots of milk meet the temperature requirements, the temperature recording charts may be used for more than one pickup, provided that all of the pickups occur within the maximum time interval of the chart. When the chart is used for more than one pickup, the licensed Weigher and Sampler shall identify each lot of milk with the date, time of pickup, and signature.

A non-profit cooperative as defined in Food and Agricultural Code Section 61331 which maintains a processing plant, receiving station, or regular place of business may, subject to the approval of its members, file the recording thermometer charts at its place of business, provided that a copy of any chart indicating a failure to meet temperature standards is filed with the inspection agency in whose jurisdiction the dairy is located.

- (4) Before removing market milk from the farm tank, the licensed Weigher and Sampler shall check the recorder chart, and if he finds temperature variations which would preclude acceptance of the product as market milk, he shall immediately notify his superior and the dairyman.
- (5) If the milk is subsequently picked up as manufacturing milk, the licensed Weigher and Sampler shall sign the chart noting the date, time of receipt, and stick reading.
- (6) Recorder charts shall be held at the producer dairy except as otherwise provided for 60 days and shall be available to the dairy inspector.
- (7) The agitator in the farm tank shall be in operation a sufficient time during the second and subsequent milkings to preclude temperature stratification.
- (8) Recording thermometers purchased prior to November 23, 1970 for installation on farm tanks or installed prior to November 23, 1970 may be accepted by the Director on an individual basis.
- (9) If the vat pasteurizer is used in lieu of a storage tank on a producer/distributor dairy, the recording thermometer of the vat pasteurizer may be used in lieu of the recording thermometer which meets the requirements of Section 480.75(b).
- (10) When the temperature recording device shows the temperature of the milk to be a fractional degree greater than 50°F, but less than 51°F, the milk shall be deemed to meet the 50°F, requirement.

NOTE: Authority cited: Sections 407, 35783 and 35783.1, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–14–71; effective thirtieth day thereafter (Register 71, No. 16).
- 2. Amendment of subsection (c)3 and new subsection (c)(10) filed 4–27–73; effective thirtieth day thereafter (Register 73, No. 17).
- 3. Amendment of subsection (b)(3) filed 12–19–77; effective thirtieth day thereafter (Register 77, No. 52).

§ 480.76. Emergencies and Equipment Failures on Market Milk Farm Tanks.

- (a) When it is obvious that an emergency exists which could conceivably reflect significant temperature variations of the market milk in the farm tank, the producer should immediately notify the buyer and have the milk removed from the farm tank. Acceptance of subsequent milkings shall be based on the ability of the dairyman to meet the requirements of Section 35783 of the Food and Agricultural Code.
- (b) When a lot of milk fails to meet the 50°F. standard, the lot of milk may not be classified as market milk. Each lot shall be dealt with on an individual basis. If two of the last four lots fail to meet the 50°F. requirement, the dairyman shall be put on notice by the milk inspection agency. If three of the last five lots of milk fail to meet the temperature standard, the dairy shall be degraded by the inspection agency to manufacturing status, and shall not be reinstated until two consecutive lots of milk meet the cooling standard.

HISTORY

- 1. New section filed 4–14–71; effective thirtieth day thereafter (Register 71, No. 16).
- 2. Amendment filed 4–27–73; effective thirtieth day thereafter (Register 73, No. 17).

§ 481. Milk Cans in Barns.

The practice of emptying and holding milk cans in barns, corrals, etc., where milking is done is construed to be a violation of Section 33518 of the Food and Agricultural Code, wherein it is required that milk must not be canned or kept in a place occupied by cows or other animals. The practice of pouring milk from a milking machine pail into a stripping pail or other properly protected container from which the milk is removed to the milk house immediately shall not be deemed a violation of this provision. No milk buckets or pails shall be placed on the barn floor, except when in actual use; and any such buckets or pails shall at all times be covered or protected from contamination. Unless protected by other means, teat cups shall be kept off the floor high enough to prevent contamination.

HISTORY

1. Amendment filed 12–28–49, designated to be effective 2–1–50 (Register 18, No. 9).

- 2. Amendment filed 11–1–51; effective thirtieth day thereafter (Register 26, No. 3).
- 3. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 481.5. Practices to Be Observed When Pouring Milk in Tank.

- (a) Sanitary milk pipes shall be no longer than the washing and sterilizing facilities will accommodate. When the pipeline is washed and sterilized in an assembled position, the line must be capable of being disassembled for inspection. When milk pumps are used, the riser pipe shall be of sufficient height to permit the efficient and speedy gravity flow of milk to the milk house. Means must be provided for keeping sanitary milk pipes and fittings off the floor while being assembled.
- (b) The milk dump tank must be provided with a splashproof, self-closing cover which is operated by means of a metal foot pedal assembly or by other means approved by the director.

- (c) A substantial metal framework to furnish protection from contact with animals must be provided.
 - (d) Metal shields must be provided for protection against splash.
- (e) The top of the dump tank must be at least 30 inches above the cows' standing platform, except in a tandem type barn where the minimum height must be at least 30 inches from the milker's standing platform.
- (f) In tandem type barns, the dump tank must be located at least three feet from the cows' standing platform when metal splash shields are provided or at least six feet from the cows' standing platform if metal splash shields are not provided. In all other types of barns, the distance from the dump tank to the cows' standing platform must be at least four feet five inches.

HISTORY

- 1. New section filed 12–28–49, designated to be effective 2–1–50 (Register 18, No. 9).
- 2. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)

§ 499.5. Butter Grader's Examination and License.

- (a) Any person desiring to obtain a butter grader's license as required by section 35134 of the Food and Agricultural Code shall comply with all of the following requirements:
- (1) File an application with the Department on the Butter Grader's License Application, Form No. 72–267 (Est. 7/05), which is incorporated by reference, accompanied by the applicable fee for the license pursuant to Food and Agricultural Code section 35231. The fee is non–refundable and covers Departmental costs of administering the examination.
- (2) Obtain a grade of at least 80 percent on a written examination, and obtain a grade of at least 80 percent on an oral and practical examination to demonstrate the ability of the applicant to properly grade butter.
- (b) Each licensed butter grader shall keep their current license displayed at all times at the facility where they are employed.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 35134, 35135, 35161, 35162, 35163, 35164, 35166, 35167, 35168, 35171 and 351231, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–12–62; effective thirtieth day thereafter (Register 62, No. 1).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- Repealer and new section filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 500. Sampler's and Weigher's Examination and License.

- (a) The Department shall issue a general and limited sampler's and weigher's license. The general license shall apply to persons who collect milk samples for basis for payment under section 35163 of the Food and Agricultural Code. The limited license shall apply to processing plant personnel who only collect samples of bulk raw milk for drug residue testing prior to processing under section 32761.5 of the Food and Agricultural Code.
- (b) Any person desiring to obtain a sampler's and weigher's license as required by section 35163 of the Food and Agricultural Code or section 576.1(c) of Title 3 of the California Code of Regulations shall comply with all of the following requirements:
- (1) File an application with the Department on the Sampler's and Weigher's License Application, Form No. 72–246 (Rev. 2/06), which is incorporated by reference, accompanied by the applicable fee for the license pursuant to Food and Agricultural Code section 35231. The fee is non-refundable and covers Departmental costs of administering the examination.
- (2) Obtain a grade of at least 80 percent on a written examination specific to the type of license to be issued.
- (3) A general sampler's and weigher's license applicant must, in addition to subsections (b)(1) and (2) above, obtain a grade of at least 80 percent on an oral and practical examination to demonstrate the ability of the applicant to correctly collect representative samples, make correct

weights on milk and cream and properly and legibly complete a satisfactory weigh sheet. A weigh sheet shall contain all of the following essential information: full date on which the milk and cream was received; name and address of person purchasing, receiving, or selling the product weighed; name or number of the patron; net weight of the milk or cream of the delivery or shipment; and the full name and sampler's and weigher's license number of the person who does the weighing.

§ 502

- (4) A limited sampler's and weigher's license applicant must, in addition to subsections (b)(1) and (2) above, obtain a grade of at least 80 percent on an oral and practical examination to demonstrate the ability of the applicant to correctly collect representative samples from a bulk milk tanker
- (c) Each general licensed sampler and weigher shall keep their current license on their person and available for inspection at all times during their work as a licensee.
- (d) Each limited licensed sampler and weigher shall keep their current license displayed at all times at the facility where they are employed. NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 35161, 35162, 35163, 35164, 35166, 35167, 35168, 35170, 35171 and 35231, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 2. Amendment of section heading, section and NoTE filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 501. Technician's Examination and License.

- (a) Any person desiring to secure a license to make bacteriological determinations upon milk or cream which determinations are to be used as a basis for payment or for determining value as required by section 35167 of the Food and Agricultural Code, shall comply with the following requirements:
- (1) File an application with the Department on the Technician's License Application, Form No. 72–252 (Rev. 7/05), which is incorporated by reference, accompanied by the applicable fee for the license pursuant to Food and Agricultural Code section 35231. The fee is non–refundable and covers Departmental costs of administering the examination.
- (2) Obtain a grade of at least 80 percent on a written examination, and obtain a grade of at least 80 percent on an oral and practical examination to demonstrate the ability of the applicant to conduct accurate bacterial determinations on milk and cream.
- (b) Each licensed technician shall keep their current license displayed at all times at the facility where they are employed.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 35161, 35162, 35163, 35164, 35166, 35167, 35168, 35170, 35171 and 35231, Food and Agricultural Code.

HISTORY

- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 2. Amendment of section heading, section and Note filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 502. Standard Methods for Examination of Dairy Products.

The taking of samples and the technique followed in determining the bacterial content of milk or cream, when taken for determining value or upon which basis for payment is made, must be in a manner described in "Standard Methods for the Examination of Dairy Products", 17th Edition, of the American Public Health Association. Such samples must be representative and must be taken from the container from which the milk is sold, at least once each half month.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 35161, 35162, 35163, 35164, 35166, 35167 and 35168, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- Amendment of section and new NOTE filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 503. Duplicate Records.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 35161, 35162, 35163, 35164, 35166, 35167 and 35168, Food and Agricultural Code.

HISTORY

Repealer of section and new NOTE filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 504. Bacteriological Record Sheets.

- (a) The forms on which bacteria counts are kept shall be of satisfactory paper stock of suitable size, providing space for necessary information.
- (b) Each sheet shall be authenticated by the signature of the licensed technician and marked with the date upon which the tests were made. All bacteria test records shall be permanently identified with the name or number of the concern for whom the tests are made. The name and address of the testing laboratory shall appear on the bacteria test record sheet.
- (c) The original bacteriological record sheet shall be delivered to the management of the concern for whom the tests are made immediately upon completion of the bacterial examination.
- (d) All persons holding a technician's license shall make duplicate records of the result of each test, the original to be made with indelible ink.
- (e) The duplicate bacteriological record sheets shall be available at the laboratory in hard copy for no less than 30 days, in addition to any back up copies of the data. After 30 days the records may be archived to any type of removable storage media where they are to be kept for a minimum of two years.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 35161, 35162, 35163, 35164, 35166, 35167 and 35168, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- Amendment of section heading and section and new Note filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 505. Changing Records.

Whenever a change in the records, while still in the possession of the licensed technician, is necessary, the original entry on the records shall be marked out with a single stroke of the pen without defacing the figure and the correction noted immediately adjacent to the original entry. The change shall be identified by the initials of the technician, which are to be written on the record immediately adjacent to the correction. When necessary changes are made on the original test sheet, such changes shall be made only by the licensed technician.

Article 14. Official and Approved Testing Methods and Protocols

§ 509. Official and Approved Testing Methods.

This article shall govern the official final action methods and the other acceptable methods of comparable accuracy when used to determine the components of milk, bulk milk, products of milk, or products resembling milk products, and cream when such component determinations are required as a basis for payment, or to meet a legal compositional requirement of Part 2 (commencing with section 35601) and Part 3 (commencing with section 36601), of Division 15 of the Food and Agriculture Code. The official final action methods and procedures of analyses used by laboratories operated by the Department shall be deemed to be official for all regulatory purposes.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 34231 and 34261.5, Food and Agricultural Code.

History

- 1. New section filed 10–19–79; designated effective 1–1–80 (Register 79, No. 42).
- 2. Amendment of article heading, section and Note filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 510. Official Final Action Methods of Analysis.

Any testing for milk components that requires one or more of the tests described in section 32921 of the Food and Agricultural Code to be used as an official final action determination, shall, except where variations are approved in writing by the Department, be conducted by procedures and equipment outlined in the 18th edition of the Official Methods of Analysis of the Association of Official Analytical Chemists International, which is incorporated by reference.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–19–79; designated effective 1–1–80 (Register 79, No. 42).
- 2. Amendment filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 511. Approved Testing Methods of Comparable

- (a) Each of the testing methods listed in this section is approved for use as an acceptable method of analysis for the determination of the components of milk, cream, bulk milk, products of milk, or products resembling milk products and shall be conducted by procedures and equipment outlined in the 18th edition of the Official Methods of Analysis of the Association of Official Analytical Chemists International, which is incorporated by reference.
 - (1) Fat in Raw Milk, Babcock Method, AOAC Official Method 989.04
- (2) Fat in Milk, Modified Mojonnier Ether Extraction Method, AOAC Official Method 989.05
 - (3) Fat in Cream, Babcock Method, AOAC Official Method 995.18
- (4) Fat in Cream, Mojonnier Ether Extraction Method, AOAC Official Method 995.19.
- (5) Fat in Cream, Roese-Gottlieb Method, AOAC Official Method 920.111.
 - (6) Solids
- (Total) in Milk, By Direct Forced Air Oven Drying, AOAC Official Method 990.20.
 - (7) Solids-Not-Fat in Milk, AOAC Official Method 990.21.
- (8) Fat, Lactose, Protein, and Solids in Milk, Mid-Infrared Spectroscopic Method, AOAC Official Method 972.16.
- (9) Lactose in Milk, Polarimetric Method, AOAC Official Method 896.01.
- (10) Lactose in Milk, Enzymatic Method, AOAC Official Method 984.15.
- (11) Protein in Milk, Dye Binding Method I, AOAC Official Method 967.12.
- (12) Nitrogen (Total) in Milk, Kjeldahl Method, AOAC Official Method 991.20.

Page 28

- (13) Nonprotein Nitrogen in Whole Milk, Kjeldahl method, AOAC Official Method 991.21.
- (14) TCA Precipitated Protein Nitrogen Content of Milk, Kjeldahl Method, AOAC Official Method 991.22.
- (15) Protein Nitrogen Content of Milk, Indirect Kjeldahl Method, AOAC Official Method 991.23
- (b) Each of the approved testing methods of comparable accuracy utilized in the testing of milk for payment purposes shall comply with the required levels of accuracy and precision outlined in section 512.2(e) of this article.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 34202, 34231 and 34261.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 10-19-79; designated effective 1-1-80 (Register 79, No. 42).
- Amendment of section and Note filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 512. Testing Procedures and Equipment.

- (a) Except where approved in writing by the Department, licensees making tests by the approved testing methods stated in section 511, shall use equipment and follow the methods and procedures outlined in the 18th edition of the Official Methods of Analysis of the Association of Official Analytical Chemists International (AOAC), which is incorporated by reference. In the absence of prescribed equipment, methods, and procedures in AOAC, or when the Department has documented evidence that a deviation from AOAC procedures and equipment will provide testing results that are at least as accurate and precise as results obtained under AOAC procedures, the Department may give written authorization to use other testing methods and deviations.
- (b) For laboratories that test raw milk for payment by infrared (IR) instrumentation, pursuant to section 511(a)(5) of this article, the procedures and pre-calibration checks outlined in section 15.121 of "Standard Methods for the Examination of Dairy Products", 17th edition, which is incorporated by reference, must be followed. A letter requesting approval of an individual instrument for IR payment testing must be submitted to the Department, along with results of the pre-calibration checks and results of a minimum of 4 consecutive sets of IR calibration samples. All mean differences and standard deviations shall meet the established tolerances, and individual differences shall meet the tolerances with a 95% confidence interval. All data will be reviewed and approved by the Department prior to the instrument being approved for payment testing.
- (c) When the Babcock method is utilized for the testing of milk and cream for fat content, the readings between lines of demarcation shall be extrapolated and reported to the nearest five one hundredths of one percent (0.05%) or less for milk and the nearest twenty—five one hundredths of one percent (0.25%) or less for cream.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–19–79; designated effective 1–1–80 (Register 79, No. 42).
- 2. Amendment of subsection (a), new subsection (b) and subsection relettering filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 512.1. Testing Equipment.

- (a) All calibrated measuring devices, weights, scales, or other analytical equipment used by any licensed tester or licensed technician, with any of the official final action testing methods or with other acceptable testing methods of comparable accuracy that are approved for use, shall be accurate, precise, in good working condition, and otherwise meet Departmental approval.
- (b) All measuring glassware used for basis for payment testing shall meet or exceed the specifications for such apparatus outlined in the 18th edition of the Official Methods of Analysis of the Association of Official Analytical Chemists International, which is incorporated by reference. NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-19-79; designated effective 1-1-80 (Register 79, No. 42).

- 2. Amendment of subsection (b) filed 8-13-80; effective thirtieth day thereafter (Register 80, No. 33).
- 3. Amendment filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 512.2. Character of Work and Tolerances.

- (a) "Accuracy" means the degree of agreement of individual measurements with an accepted reference value. The accepted reference value shall be the analytical result made by the Department. "Precision" means the degree of mutual agreement among individual measurements made under prescribed—like conditions.
- (b) After notifying the management of any milk distributor, milk processor, dairy association, or commercial testing laboratory, the Department may obtain samples of any milk or cream previously tested by a licensed tester for the payment of any milk or cream or component of milk or cream. These samples may be tested in the Department's dairy chemistry laboratory to determine the accuracy of the licensed tester's work. The Department may request that the licensed tester retest the sample at the original testing facility by the same method as the sample was originally run, to determine the precision of the tester's work.
- (c) Persons making milk component tests by any approved or final action testing methods for payment purposes shall be able to demonstrate a capability to reproduce their own original tests and be able to produce work comparable to official final action tests from duplicate samples tested by the Department's dairy chemistry laboratory within the limits outlined in subsection (e) of this section.
- (d) Where analysis of milk components for payment purposes are made by infrared instrumentation, the Department will provide calibration samples to laboratories at a frequency established by mutual agreement but no less than that recommended in the instruction manual of the manufacturer of the instrument. The laboratory must demonstrate that they meet the required precision and accuracy as outlined in subsection (e) of this section.

(e)

ACCURACY AND PRECISION OF MILK TESTS BETWEEN RETESTS AND/OR OFFICIAL LABORATORY TESTS

	A	ccuracy	g. , , ,	Precision
		Mean fference	Standard Deviation of the Difference (SDD)	Maximum Difference between original test & retest
	<i>5–</i> 8	9–16	. ,	
Component	Tests	Tests		
% Milk Fat % Total Solids % Solids Not Fat % Protein % Lactose	± 0.04 0.07 0.07 0.05 0.05	± 0.03 0.05 0.05 0.04 0.04	0.05 0.08 0.08 0.06 0.06	0.06 0.12 0.12 0.05 0.07

- (f) When a retest on individual sample of milk exceeds the maximum difference in subsection (e) of this section, the retest shall be used, unless the sample is deemed to be unsuitable for testing due to oiling off, churning, water in the sample, or other sample anomaly, in which case the application of the averaging procedures in section 525(e) of this article, shall be used. A test on an individual sample of milk that exceeds the previous test average (minimum of 4 samples to arrive at previous test average) by more than 0.2 % for any component will automatically trigger a retest.
- (g) When a retest on an individual sample of milk does not exceed the maximum difference allowed in subsection (e) of this section the original test must be used as the basis for payment, and the original test will be reported on the original test sheet, with an explanation of the retest.
- (h) When a retest on a sample of cream amounts to seventy-five hundredths of one percent (0.75%) or greater, the retest shall be used, unless the sample is deemed to be unsuitable for testing due to oiling off, churning, water in the sample, or other sample anomaly, in which case the application of the averaging procedures in section 525(e) of this article shall be used.

(i) The Department may check the accuracy and precision of licensed testers' work by unannounced inspections. The Department will review the work of licensed testers whenever a complaint is made regarding the accuracy and precision of their work.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–19–79; designated effective 1–1–80 (Register 79, No. 42).
- 2. Editorial correction of Example 2 (Register 80, No. 6).
- 3. Amendment filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 512.3. Licensing.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–19–79; designated effective 1–1–80 (Register 79, No. 42).
- 2. Repealer filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 513. Infrared Instrumentation.

The Department approves of the use of mid-infrared instruments that rapidly determine the percentages of the fat, protein, lactose and solids content of milk as outlined in the 17th Edition of Standard Methods for the Examination of Dairy Products, which is incorporated by reference, including all precalibration testing requirements and routine instrument performance checks, when such findings form the basis for payment for raw milk.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921, 34202, 34231, 34261.5, 35784, 38181, 38191–38213, Food and Agricultural Code.

HISTORY

1. New section filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7). For prior history, see Register 79, No. 42.

§ 513.5. Operation of Infrared Instruments.

- (a) The following shall govern the determination of milk components by Infrared (IR) instrumentation:
- (1) Persons testing raw milk by means of IR instrumentation shall hold a tester's license for IR and work under the supervision of personnel also licensed for IR testing, and responsible for all aspects of component payment testing at the facility.
- (2) Each day the IR instrument is used, a check (pilot) sample warmed according to section 15.121 of the 17th Edition of Standard Methods for the Examination of Dairy Products, which is incorporated by reference, with the temperature verified and recorded prior to testing, shall be analyzed at start-up and once every hour thereafter. The pilot sample can be a commercially prepared pilot sample, UHT whole milk, pasteurized whole milk, or raw milk or similar matrix. The pilot sample shall be handled, prepared, and tested in the same manner as producer payment samples. The pilot sample component values will be determined by averaging several instrument readings, after having cleaned and zeroed the instrument. The average instrument readings for each component will be used as the baseline to compare the daily start-up and hourly pilot samples. The results shall be recorded in the permanent log book, in accordance with subsection (a)(5). The component values on the pilot samples shall be less than or equal to 0.04% of the original base line values. If any component value on a pilot sample exceeds the original base line value by more than 0.04%, the instrument shall be cleaned and zeroed, and a fresh pilot sample shall be run. If any of the pilot sample components still deviate from the baseline values by more than 0.04% the instrument will be considered to be malfunctioning, and all payment samples analyzed since the last acceptable pilot sample shall have their results reported using the averaging procedures outlined in section 525(e) of this article. In the event of instrument malfunction further testing must be done by alternate official final action methods, or acceptable methods of comparable accuracy. If the laboratory cannot perform the above methods, payment samples must be sent to another payment laboratory for analysis. The laboratory management shall submit a letter to the Department's Milk and Dairy Food Safety Branch identifying the alternate official final action methods and/or alternate laboratory that shall be used to analyze payment

samples in the event of instrument malfunction, and update the letter as circumstances change.

- (3) Samples of raw milk which are high in acidity, coagulated, or churned may not be tested by IR.
- (4) If at any time the tester licensed to make milk component determinations by IR has reason to believe the results obtained are biased or inaccurate, all further testing must be done by alternate official final action methods listed in Food and Agricultural Code section 32921, or by acceptable methods of comparable accuracy, or the samples shall be tested by another payment laboratory until the bias is eliminated.
- (5) The recommendations provided in the Instruction Manual of the manufacturer for calibration, sample preparation, operation, routine maintenance, daily instrument checks, and cleaning shall be followed, unless otherwise instructed in writing by a representative of the Department. A permanent log book shall be maintained that records the results of all pilot samples, as well as information pertaining to any adjustments made to the instrument (i.e. maintenance, calibration changes, daily instrument checks, and any other work done on the instrument). The log book shall be available for review by the Department upon request.
- (6) The volume of the test portion shall be sufficient to make an original test and a retest. This volume may vary by instrument depending on the individual instrument volume uptake settings.
- (7) The power input to the IR instrument shall be standardized by a constant voltage regulator.
- (8) The IR instrument must be operated in an air-conditioned room where the temperature does not exceed 80°F.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

1. New section filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 514. Samples, Sampling and Weighing.

- (a) Bulk milk and cream must be thoroughly mixed in accordance with the 17th Edition of Standard Methods for the Examination of Dairy Products, which is incorporated by reference, for at least five minutes before sampling, or longer as may be required to obtain a representative sample throughout the tank. Bulk milk tanks from which samples are taken must be equipped with power-driven mechanical devices which will thoroughly mix the milk or cream prior to sample collection. Such mechanical devices shall be of a type and installed in a manner approved by the Department. Samples shall be representative of the fat content of the product sampled. Sampling tubes and dippers that are badly dented, or leak, must not be used. Cylindrical shaped dippers, only, shall be used when samples are secured with dippers. The sampling devices shall be rinsed in the product to be sampled before any part of the product is transferred to the sample bottle. Sample bottles shall be filled away from the farm tank opening so that no milk is spilled back into the farm tank. Sample bottles shall be filled no more than three quarters full to permit proper mixing of the sample at the laboratory.
- (b) Samples shall be marked with the date and the producer's name or patron number in a manner that will not erase.
- (c) Weights must be read and recorded to the nearest half-pound graduation on the scales for cream, and the nearest one-pound graduation for milk or weights taken or measurements made in a manner and to an accuracy acceptable to the Sealer of Weights and Measures.
- (d) At the time samples are being taken, licensee will be held responsible for operating the mechanical agitators in a manner that will assure a representative sample, and for securing a correct weight or measurement. NOTE: Authority cited: Sections 407 and 34261.5, Food and Agricultural Code. Reference: Sections 32731, 32734, 34201, 34231, 34265, 34301 and 35163, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- Amendment of section and new Note filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

Page 30 Register 2007, No. 7; 2–16–2007

§ 515. Sample Bottles.

Milk and cream samples to be tested for payment purposes shall be collected and held in single use plastic vials or bottles made of plastics that are manufactured from known chemical content, which does not contain materials that migrate into the food which may adversely affect the composition or bacteriological quality of the product.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 34351 and 35166, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Amendment of section heading, repealer and new section and new NOTE filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 516. Milk Preservatives.

For preserving milk samples in the laboratory for the determination of milk components, bronopol (0.02-0.06 percent by weight of the sample), bronopol with a yeast and mold inhibitor (0.02-0.06 percent by weight of the sample), or potassium dichromate (0.1 percent maximum by weight of the sample) may be used. A request for approval for the use of other preservatives not specified in this section, must be submitted in writing to the Department prior to use. Any milk sample tested within 3 days after the sample is collected need not be preserved.

NOTE: Authority cited: Sections 407 and 34231, Food and Agricultural Code. Reference: Section 34231(b), Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) filed 3-22-74; effective thirtieth day thereafter (Register 74, No. 12).
- Repealer and new section filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 517. Storage and Testing of Samples.

(a) The management of each facility that tests milk or cream for basis for payment shall designate one licensed tester to be the responsible party (designee) for ensuring that the samples are received, stored, handled, prepared, tested, and recorded as outlined in sections 499, 509, 510, 511, 512, 512.1, 512.2, 513, 513.5, 515, 516, 517, and 525 of Title 3 of the California Code of Regulations, and ensure that all personnel who test samples for payment are licensed testers. The designee shall also be responsible for ensuring that the daily calibration checks are performed and recorded properly, and that the instrument is maintained according to the manufacturer's suggested guidelines. Management shall, within at least 24 hours, notify the Department by telephone or electronic mail when there is a personnel change with regard to the designee, and make certain that at all times there is a trained backup person available to take over the designee's role.

(b) Each person purchasing, receiving, or selling milk or cream on the basis of milk components shall provide a refrigerator maintained at a temperature between 0° and 4.4°C. in which licensed weighers, samplers and testers shall keep all samples taken or maintained during sampling and holding periods. All such samples shall be kept in a secure place in the refrigerator which shall be constructed and maintained in a manner acceptable to the Department. Written procedures shall be in place to ensure the security of the samples at all times. A copy of the written procedures shall be submitted to the Department at the time the laboratory requests approval for payment testing, whenever procedures or methods are changed, or when requested by the Department.

(c) Samples of all milk and cream tested at a payment laboratory shall be maintained for a period of at least 72 hours after testing. The laboratory designee shall be personally responsible for their safekeeping.

§ 524. Reading Milk Tests.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

1. Repealer filed 10–19–79; designated effective 1–1–80 (Register 79, No. 42).

§ 525. Keeping Records of Tests.

- (a) All milk and cream test record sheets shall be permanently identified with the name or number of the concern for whom the tests are made. Daily test records must be available at the laboratory in hard copy for no less than 30 days, in addition to any back up copies of the data. After 30 days the records may be archived to any type of removable storage media where they are to be kept for a minimum of two years.
- (b) Each test record sheet shall be authenticated by the full signature of the licensed tester, marked with the complete date on which the tests were made, and the date the sample was taken. The name and address of the person, firm, company, or association purchasing, receiving, or selling the product that has been tested shall appear on the test record sheets. The name and address of the testing laboratory shall appear on the test record sheet. If an infrared instrument is used, the serial number of the instrument used to test the samples shall appear on each test record sheet.
- (c) Whenever a change in the records, while still in possession of the tester, is necessary by reason of accident or failure to properly record the test, or when a retest is made, and the retest is sufficiently different from the first test, as specified in section 512.2(e), the original entry on the records shall be marked out with a single stroke of the pen, without obliterating the figures, and the correction or retest noted immediately adjacent to the original entry. The change shall be identified by the initials of the tester, which are to be written on the test record sheet immediately adjacent to the correction. Whenever, for any such cause, a change in the records is necessary, a record of such change shall be made by the licensed

tester on a retest sheet. Any changes or corrections occasioned by these retests are to be made by the licensed tester only, and the original retest sheet must be permanently fastened to the original test record sheet. The name and address of the person, firm, company, or association purchasing, receiving, or selling the product retested must be entered on all retest sheets. Two dates must appear on all retest sheets—one showing the date the retest was made and the other showing the date that the milk or cream was first tested. All retest sheets must be made with ink and be signed with the full name of the tester. All retests must be accompanied by the patron's name or number in order to determined to whom the sample retested belonged.

- (d) The original test record sheets shall be delivered to the management of the concern for whom the tests are made immediately upon completion of the tests on the day's samples.
- (e) When sample bottles leak or they are lost, or the contents are partly spilled, or the bottles are broken or cracked, or for any other reason the sample is not representative, notation of occurrence must be made on the test record sheet by the licensed tester. In such cases an averaged test must be given to the patron, based on the average of the four immediately preceding tests if the sample was a milk sample. In the case of a sample of cream, the averaged amount of fat shall be based on the average of four deliveries of cream from the same patron, immediately preceding the day for which the fat is averaged.
- (f) Weights or measurements must not be changed without approval of the Department, except where obvious errors have been made by the licensed sampler and weigher. An average weight or measurement based on the four immediately preceding recorded weights, whenever available, shall be used if the actual correct weight cannot be determined.
- (g) Explanations as to averaged tests on milk and averaged amounts of fat on cream, and averages in weights or measurements must appear on the original patron statement. All such changes must be identified with the name or initials of the plant manager or the person responsible for these records.

Article 14.6. Testing of Raw Milk for Butterfat by Light Transmission

§ 543. Milko-Tester.

NOTE: Authority cited: Sections 407 and 35162, Food and Agricultural Code.

- New Article 14.6 (§§ 543, 544, 545) filed 10–19–70; effective thirtieth day thereafter (Register 70, No. 43).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 3. Repealer of article 14.6 (sections 543–545) and repealer of section filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 544. Milko-Tester Operation.

HISTORY

- 1. Amendment of subsections (i) and (l) filed 4-25-75; effective thirtieth day thereafter (Register 75, No. 17).
- 2. Repealer filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 545. Applicable Sections.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32921 and 34261.5, Food and Agricultural Code.

HISTORY

1. Repealer filed 10-19-79; designated effective 1-1-80 (Register 79, No. 42).

Article 14.7. Testing of Raw Milk for Butterfat and Other Milk Constituents by Infrared Light Transmission

§ 546. Infrared Milk Analyzer (IRMA).

NOTE: Authority cited for Article 14.7: Sections 407 and 35162, Food and Agricultural Code.

HISTORY

- 1. New Article 14.7 (Sections 546 and 547) filed 12–30–70; effective thirtieth day thereafter (Register 71, No. 1).
- 2. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 3. Repealer of article 14.7 (sections 546–547) and repealer of section filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 547. Operation of IRMA.

HISTORY

- 1. Amendments filed 4–27–73; effective thirtieth day thereafter (Register 73, No. 17).
- 2. Repealer of subsection (o) filed 10–9–79; designated effective 1–1–80 (Register 79, No. 42).
- 3. Repealer filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

Article 14.8. Third Party Testing

§ 550. Purpose.

NOTE: Authority cited: Sections 407 and 34231, Food and Agricultural Code.
HISTORY

- 1. New Article 14.8 (§§ 550 through 554) filed 6–1–73; effective thirtieth day thereafter (Register 73, No. 22).
- 2. Repealer filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 551. Definitions.

For the purposes of this Article, the term "third party" means a commercial laboratory or any laboratory approved by the Department having no vested interest in the laboratory findings of specific analyses.

NOTE: Authority cited: Sections 407 and 34231, Food and Agricultural Code. Reference: Sections 34201 and 34231, Food and Agricultural Code.

HISTORY

1. Amendment of section and Note filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 552. Interplant Bulk Sales of Commingled Milk.

- (a) For bulk sales of commingled milk from members' ranches to a distributor when such deliveries are made by a non-profit cooperative association or its agent, the non-profit cooperative association shall be deemed a single producer subject to the provisions of section 34231(b) and (c).
- (b) For direct sales from individual members' ranches when the milk is picked up by a distributor or his agent, the non-profit cooperative

member shall be considered an individual producer subject to the provisions of section 34231(b) and (c).

NOTE: Authority cited: Sections 407 and 34231, Food and Agricultural Code. Reference: Sections 34231 and 34301, Food and Agricultural Code.

HISTORY

Amendment of section heading and section and new NOTE filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 553. Procedures for Designation.

- (a) A designation of a laboratory or laboratories by the Department will be based upon a combination of the following criteria:
 - (1) Accuracy of analytical procedure.
- (2) Capability of laboratory or laboratories in terms of time and frequency of analyses.
 - (3) Lowest cost of service to be performed.
- (b) Whenever there is a substantial change in circumstances on which designation was predicated, the Department shall be advised by the parties; in such an event, the Department will determine whether a change in designation shall be made.
- (c) When, as a result of prescribed written application under provision of section 34231(c) of the Food and Agricultural Code, the Department designates third party testing, such designation shall be deemed operative for the distributor and for all producers shipping to the milk plant affected

NOTE: Authority cited: Sections 407 and 34231, Food and Agricultural Code. Reference: Sections 34921, 34233 and 34301, Food and Agricultural Code.

HISTORY

1. Amendment of section heading and section and new NOTE filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

§ 554. Resolution of Test Variations.

In the absence of mutual agreement or designation provided for in subsection (c) of section 34231 of the Food and Agricultural Code, analyses of milk fat and non-fat milk solids made on a lot or lots of milk by a licensed tester(s) representing the seller and a licensed tester(s) representing the buyer, any differences in findings will be resolved by using the findings of the laboratory utilizing the most accurate analytical procedure. When both testers use the same procedure, an average of the two tests will form the basis for resolution of the differences. If one or both samples are available, additional analyses shall be made.

NOTE: Authority cited: Sections 407 and 34231, Food and Agricultural Code.Reference: Section 34301, Food and Agricultural Code.

HISTORY

1. Amendment of section and new NOTE filed 2–15–2007; operative 3–17–2007 (Register 2007, No. 7).

Article 15. Registration of Dairy Containers Brands

§ 561. Registration of Dairy Containers Brands.

Any person desiring to register any brand, as provided by Sections 34531 and 34562 of the Food and Agricultural Code, shall file a properly executed application on a form supplied by the Department of Food and Agriculture of the State of California, whereupon the department, after holding for a period of three weeks during which time the proposed brand shall be advertised in one or more newspapers of general circulation published in the locality in which the principal place of business of the applicant is situated, and if at the end of such period there appears to be no contest of right or ownership to said brand, the department will upon receipt of an affidavit of publication, formally register such brand as the correct and legal designation for the property of the applicant.

NOTE: Authority cited: Sections 34531 and 34562, Food and Agricultural Code.

HISTORY

1. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 562. Association Brand Registration.

In the event that any brand has been registered by an association whose members are engaged in receiving, producing, manufacturing, packing, canning, bottling, handling, or selling milk or any product of milk in containers on which such brand or any part thereof appears, such brand or part thereof may be used by all members of such association. Should any member of such association cease at any time to be a member for any reason whatever then such member shall thereafter have no right to use the brand, or any part of the brand registered by such association, whether the containers bearing such brand or part thereof shall have been acquired by such member before or after his membership shall have terminated. The foregoing shall apply to all brands registered by such association.

Article 16. Milk Products Plant Construction

§ 567. Milk Plant Construction.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).
- 3. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 568. Fruit Juices.

Fruit juices and fruit juice base beverages may be handled in a milk products plant where frozen milk products are manufactured and packaged provided the handling of fruit juices and fruit juice beverages does not hamper or interfere with working space and render the milk products plant too crowded to be maintained in a sanitary condition at all times. Such beverages must be dispensed in a single service container and the milk products plant may be used only for the compounding, storage and sale of milk products and such beverages and combinations thereof. Consumption of any such products must be outside of the milk products plant.

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).

Article 17. Condemnation of Milk Products

§ 571. Condemnation of Milk or Cream.

Whenever milk or cream is condemned under authority of Section 32761 of the Food and Agricultural Code the milk or cream shall be marked for identification by the following method:

A sufficient quantity of nontoxic certified color (dye) shall be added directly to the milk or cream to render such milk or cream distinct in color from that of normal milk or cream. A tag or label shall be attached to the containers of such condemned milk or cream and shall bear the words "condemned" and the reason for such condemnation and the signature of the authorized representative of the Department of Food and Agriculture or of an approved milk inspection service making the condemnation.

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 572. Condemnation of Milk Products.

Whenever a manufactured product of milk or cream is condemned under Section 444, an authorized representative of the Department of Food and Agriculture of the State of California shall proceed to attach to such manufactured product, or the containers thereof, in an appropriate manner, a tag or label bearing the words "California inspected and retained." Such product shall not be sold, nor moved, nor transported without the authorization of the Director of Food and Agriculture to any place or premises until the owner thereof has been given due notice and hearing. Said labels shall be removed by an authorized representative of the said Department of Food and Agriculture and the product or products so held

either released or condemned and marked, or destroyed, or otherwise disposed of as determined by such hearing.

HISTORY

1. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 573. Sediment Tests.

(a) Sediment test of milk by off-the-bottom method of one pint from ten gallon containers must be classified as to the sediment content as follows: Milk conforming to a No. 1 or No. 2 disc will be considered to be satisfactory. Milk containing sediment in excess of a No. 3 disc will be condemned for human consumption.

A No. 1 disc is construed to be free of sediment.

A No. 2 disc is construed to be a disc having not in excess of 0.5 mg. of sediment.

A No. 3 disc is construed to have not in excess of 2.5 mg, of sediment.

(b) Sediment test of one pint of milk from bulk lots by the mixed sample method containing sediment in excess of a No. 3 disc will be condemned for human consumption. A restricted size disc of 0.40 inch diameter will be used for the mixed sample method.

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- 2. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).

§ 574. Overflow Milk.

HISTORY

- New section filed 9-21-56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 575. Reconstitution or Recombining of Market Milk Products.

- (a) Except as otherwise specifically provided for in Division 15 of the Food and Agricultural Code, a market milk product is adulterated if water is added to it before, during, or after processing.
- (b) Any flavoring or syrups used in the manufacture of flavored market milk products may not be diluted with water. Syrup or imitation syrup shall not exceed 35 percent water.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 36064, Food and Agricultural Code.

HISTORY

1. New section filed 3–22–74; effective thirtieth day thereafter (Register 74, No. 12).

§ 576. Prevention of Drug Residues.

Each dairy farm producing milk shall have a procedure to prevent drug residues in milk to be used for human consumption.

- (a) Where dairy animals are treated with drugs capable of being secreted into milk and which require a period during which milk is to be withheld from human consumption, this procedure shall include all of the following:
- (1) The identification of each treated animal in a manner that will be permanent during the drug withdrawal period and will be recognizable to all persons concerned with the milking of such animals;
- (2) Keeping a record of each animal treated and showing the date, kind, and amount of drug used for each animal;
- (3) Listing the time period for withholding of milk following a drug treatment, as stated on the label for the drug used, or as recommended by a licensed veterinarian;
 - (4) Milking treated animals last or with separate equipment; and
- (5) Excluding such milk from consumption in accordance with label directions for the drug administered, or in accordance with instructions of a licensed veterinarian treating the animals, and recording the disposition of milk from treated animals.
- (b) When the residue of any drug is found in the milk from a dairy farm, the milk inspection service shall immediately suspend the dairy farm from further selling, offering for sale, or giving away any milk for human consumption until:
- (1) A review of the farm's procedures is made by the inspection service and found to be in substantial compliance with the requirements of subparagraph (a);

- (2) The dairy has provided for and does isolate treated animals from untreated animals and milks them as a separate group following the milking of untreated animals, or initiates other precautionary measures of equal effectiveness as approved by the Director;
- (3) Any milk produced by the dairy containing milk from treated animals, which is required to be excluded from human consumption and which has not been excluded has been condemned; and
- (4) Each lot offered for sale following suspension shall be tested for drug residue. The suspension shall remain in effect until these tests reveal the milk to be negative to drug residues.
- (c) If at any time a dairy farm is found not to be following the procedures under subparagraph (a), of this section, it shall be suspended until such requirements are met. However, no dairy farm shall be suspended for such violations if, after written notice by a qualified inspector, evidence is provided within 72 hours of the issuance of the notice that the violation is corrected or will be in substantial compliance. A copy of each notice issued under the provisions of this section shall also be given or mailed to the processor, or distributor of the milk or cream.
- (d) Processors and distributors who perform independent tests for drug residues in milk and cream shall make records of such tests available to the Director upon request.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32731, 32761, 32765 and 32906, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–24–75; effective thirtieth day thereafter (Register 75, No. 43).
- 2. Amendment filed 3–12–79; effective thirtieth day thereafter (Register 79, No. 11).

§ 576.1. Detection of Drug Residues in Milk Reporting.

Each processing facility shall have a program in place to screen all bulk raw milk pickup tankers for drug residues with approved tests as specified in United States Food and Drug Administration, Milk Safety Branch, Coded Memorandum M-a-85, effective January 22, 2001 (M-a-85).

- (a) The following Federal and State testing procedures shall be applied by each processing facility on all drug residue screening tests performed on bulk raw milk pickup tankers of milk for human consumption using test methods approved by the Secretary and specified in M-a-85:
- (1) The drug residue testing procedures specified by United States Food and Drug Administration, Milk Safety Branch, Coded Memorandum M–a–86, effective July 23, 2001 (M–a–86), General Guidelines for Bulk Milk Pickup Tanker Screening Tests shall be followed by each processing facility.
- (2) United States Food and Drug Administration, Milk Safety Branch, Coded Memorandum M-a-86, sets forth the certification requirements of industry personnel for screening bulk milk pickup tankers for drug residues.
- (3) Milk handlers shall report all positive drug residue results from bulk raw milk tankers to the Milk and Dairy Foods Control Branch immediately, not to exceed the next State working day.
- (4) Milk handlers shall report all bulk raw milk pickup tanker drug residue test results (negative and positive) to the Milk and Dairy Foods Control Branch on a quarterly basis.
- (5) Bulk raw milk pickup tankers reported positive for drug residues must be confirmed at a State and Federal certified laboratory by State and Federal certified analysts by completing all of the following tests: Lactek B-L, Lactek CEF and Bacillus Stearothermophilus Disc Assay, or an equivalent series of tests approved by the Secretary.
- (b) Handlers with producer pools or cooperatives who have established a single approved M-a-85 test by policy or contract agreement with producers may upon application to the Secretary and upon approval be allowed to use confirmation testing by the same drug residue test method employed in screening at a State and Federal certified laboratory by State and Federal certified analysts.
- (c) All drug residue samples required by subsections (a) and (b) shall be obtained by a licensed sampler and weigher or persons authorized pursuant to Section 32701 of the Food and Agricultural Code.

(d) Milk containing violative drug residues shall be condemned and disposed of in a manner approved by the Secretary.

NOTE: Authority cited: Sections 407, 32761.5 and 33083, Food and Agricultural Code. Reference: Sections 32701, 32731, 32811, 32814 and 33733, Food and Agricultural Code.

HISTORY

- New section filed 1-30-95 as an emergency; operative 1-30-95 (Register 95, No. 5). A Certificate of Compliance must be transmitted to OAL 5-30-95 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 1–30–95 order transmitted to OAL 5–26–95 and filed 7–11–95 (Register 95, No. 28).
- 3. Change without regulatory effect amending first paragraph and subsection (a)(1) filed 1–8–2002 pursuant to section 100, title 1, California Code of Regulations (Register 2002, No. 2).

Article 18. Milk Separation

§ 577. Milk Separation.

Milk to be separated for the production of market cream may be heated upon arrival at the plant to a temperature not to exceed 110 degrees F. If heated to a higher temperature the milk must be carried through the complete process of pasteurization and the market cream produced therefrom must be labeled with the word "pasteurized."

Article 19. Operators of Pasteurization Equipment

§ 581. Pasteurization Requirements and Equivalency.

- (a) In accordance with the provisions of sections 32515 and 34001 of the Food and Agricultural Code, processes which have been demonstrated to be equally efficient and approved by the Department are as follows:
- (1) "Pasteurization", "pasteurized" and similar terms shall mean the process of heating every particle of milk or milk product, in approved equipment (as specified in Article 19), to one of the temperatures given in the following chart and held continuously at or above that temperature for at least the corresponding specified time:

Temperature	Time
63°C (145°F) (see 581(a)(1)(A))	30 minutes
72°C (161°F) (see 581(a)(1)(A))	15 seconds
89°C (191°F)	1.0 second
90°C (194°F)	0.5 seconds
94°C (201°F)	0.1 seconds
96°C (204°F)	0.05 seconds
100°C (212°F)	0.01 seconds

(A) If the fat content of the milk product is ten percent (10%) or more, or if it contains added sweeteners, or if it is concentrated (condensed), the specified temperature shall be increased by 3°C (5°F). Provided, that eggnog, as defined in 21 CFR, section 131.170 (2005), shall be heated to at least the following temperature and time specifications:

Temperature	Time
69°C (155°F)	30 minutes
80°C (175°F)	25 seconds
83°C (180°F)	15 seconds

- (b) Proposals must be submitted to the Department of Food and Agriculture, Milk and Dairy Food Safety Branch, for consideration of a process to be equally efficient to the pasteurization and immediate cooling standards as specified in section 34001 of the Food and Agricultural Code and subsections (a)(1) and (a)(1)(A) of this section. The proposal shall be evaluated for equivalency, on a case—by—case basis, and the proposal shall include, but is not limited to, the following information:
- (1) Company name, address, contact information, corporate address, and the facility location where the equipment is proposed for use.
- (2) Statement of proposal, including the description of the process and an explanation why currently approved methods cannot be used, or are less practical, for the proposed application.
- (3) Identification of product(s) to be processed with the proposed methodology.
 - (4) Diagram of the process and product flow.

- (5) Process parameters, including temperature(s), pressure(s) and times, and significant equipment or parameter changes from currently approved methods of pasteurization.
 - (6) Equipment material, design and finishes.
- (7) Statistically valid experimental data that compares the proposed process to currently approved methods, and that relates the data to the conditions and product formulations in California under which the product(s) is intended for use.
- (8) If available, written approval from other state or federal dairy regulatory agencies, or published conference actions of the National Conference on Interstate Milk Shipments (NCIMS) supporting the proposed process.
- (9) If available, technical reviews or evaluations furnished by state or federal accredited and licensed, scientists, engineers or other professionals that specialize in, or relate to the proposed process.
- (c) The Department shall respond to written proposals within 30 business days to acknowledge receipt of the proposal.
- (d) Prior to issuing a decision regarding equivalency, the Department may conduct site visits, may conduct a pilot program to verify and study the results of the equivalency process, and may perform any other tests or studies to verify equivalency as the Department deems appropriate on a case—by—case basis.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32515 and 34001, Food and Agricultural Code.

HISTORY

- 1. New section filed 9-16-2005; operative 10-16-2005 (Register 2005, No. 37).
- 2. Editorial correction of subsection (a)(1)(A) (Register 2006, No. 3).

§ 582. Operators of Pasteurization Equipment.

- All persons operating pasteurizers must comply with the following:
- (a) Every pasteurizer must be equipped and operated with a recording thermometer which must be used solely for that individual piece of equipment. Transferring of thermometer spuds from one vat to another is prohibited.
- (b) Recording of temperatures on recording thermometer charts shall be continued during the complete revolution of the chart and in no case shall a recording thermometer chart be used for a period longer than for which it was intended.
- (c) Recording thermometer charts shall be placed on recording thermometer devices in a way that will record the correct time of day during which the various operations of pasteurization, cooling (if cooled in vat) and sterilization took place.
- (d) Recording thermometer charts shall be dated at the time they are placed on recording thermometer devices.
- (e) Notations shall be placed on recording thermometer charts showing what product or products were pasteurized.
- (f) All recording thermometer devices shall be securely fastened to solid foundations and shall be free from vibration.
- (g) All recording thermometer charts shall be authenticated by the signature of the operator of the pasteurizing equipment.

HISTORY

- 1. Amendment filed 8–31–51 designated to be effective 10–1–51 (Register 25, No. 4)
- 2. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).

§ 583. General Requirements.

- (a) The process of condensing or evaporating milk or milk products does not constitute pasteurization.
- (b) All inlet and outlet valves to pasteurizers (installed after the effective date of this provision) shall be leak protector type properly installed to prevent any mixing with raw products.
- (c) The inlet lines on pasteurizers not equipped with leak protector valves shall be removed during the heating, holding and emptying period. The outlet lines on pasteurizers not equipped with leak protector valves must be removed during the filling, heating and holding periods.
- (d) All milk and milk products pipelines connected to pasteurizers shall be vented and otherwise controlled to prevent siphonage.

- (e) All indicating and recording thermometers and charts shall comply with the specifications set forth under HTST method and holder method, hereinafter described, except where the products are heated by the holding method above 150 degrees F. or by the HTST method above 165 degrees F., in which case, the temperature indicating and recording devices shall be of a type approved by the director.
- (f) All milk and milk products tanks and receptacles used in the processing and filling operations shall have sanitary covers which protect the product from contamination. Drip shields and port collars shall be provided whenever necessary to prevent splash and contamination.
- (g) The operator of each pasteurizer shall at least once during his work-day or shift check the recording thermometer against the indicating thermometer on all pasteurizers used by him. The check must be made during the process of pasteurization at pasteurization temperature after a stabilization period of at least five minutes at constant temperature. The temperature of the indicating thermometer shall be recorded on the recording chart together with a mark designating the time at which the check was made.
- (h) The rotating chart support must be provided with pins or knife to puncture the chart in a manner that will prevent its fraudulent rotation.

HISTORY

- 1. New section filed 8–31–51 designated to be effective 10–1–51 (Register 25, No. 4).
- Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).

§ 584. Holding Method.

- (a) Where holding method of pasteurization is used and the product heated above 161 degrees F., the holding time may be reduced by one minute for each degree of temperature above 145 degrees F., provided the product so treated will successfully pass the phosphatase test for pasteurization as prescribed in the current edition of Standard Methods for the Examination of Dairy Products.
- (b) Each holder vat must be equipped and operated with a satisfactory means of keeping the atmosphere in the vat above the milk or milk products at a temperature of t least 5 degrees F. higher than the required pasteurization temperature of the product during the heating and holding period. If steam is admitted into the vat, the steam line must be provided with a trap properly designed to avoid the discharge of water into the product. An approved sanitary type air temperature indicating thermometer must be installed on each vat. The air temperature thermometer must have a scale range of 130 degrees F. to 210 degrees F. Temperature ranges above or below are permissible. It must be accurate within 1 degree F. plus or minus, through the specified scale range; the smallest scale division must not be more than 2 degrees F. and not more than 16 degrees per inch of scale.
- (c) Recording thermometer charts made for products pasteurized by the holding method must show the end point of the holding period by some distinguishing mark which must be made before any of the product is removed from the vat. A notation must be placed on the recording chart showing the temperature of the air space as indicated by the air space thermometer for each vat of product pasteurized.
 - (d) Flush-type outlet valves are required on pasteurizing vats.
- (e) Installations made after the effective date of this provision shall comply with the following: If the interior lining of the vat is flared at the valve opening, then the diameter at the large end of the flare shall be at least equal to the depth of the flare, plus the diameter of the opening. The distance from the small end of the flare to the valve shutoff point or the distance from the interior lining to valve shutoff point if no flare is used shall not exceed the diameter of the opening.
- (f) Indicating thermometers shall be accurate within 0.5 degrees F., plus or minus, within the pasteurization temperature range, and shall have a scale range of 130 degrees to 212 degrees F., extension either side permissive, protected against damage at 220 degrees F. The smallest scale division shall not be more than 1 degree F. between 130 degrees and 150 degrees F. The magnification of the mercury column shall be to apparent width of not less than one–sixteenth inch (1/16). Spuds of indicat-

Page 36

ing thermometers shall be at the level of the spud of the recording thermometer.

(g) Recording thermometers and charts not exempt by subsection (e) of Section 583 of the Administrative Code must comply with the following specifications:

Temperature Accuracy. Within 1 degree F., plus or minus, between 142 degrees and 145 degrees.

Time Accuracy. The recorded elapsed time as indicated by the chart rotation must not exceed the time elapsed as indicated by a correct time-piece over a period of at last 30 minutes.

The smallest temperature scale division must not be greater than one degree between 140 degrees and 145 degrees F.

The width of the scale division between 142 degrees and 145 degrees F. must not be less than one–sixteenth of an inch.

The radial lines that indicate the time must not be closer than one-fourth inch between 142 degrees and 145 degrees F. and represent not more than 10 minutes.

HISTORY

- 1. New section filed 8–31–51 designated to be effective 10–1–51 (Register 25, No. 4).
- Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 3. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).

§ 585. High-Temperature, Short-Time Pasteurization.

- (a) All HTST pasteurizing devices shall be equipped so as to automatically prevent the forward flow of milk or milk products which have not been heated to the required temperature.
- (b) The regenerator must be designed and installed so that the raw product will at all times be at a lower pressure than the pasteurized product.
- (c) The raw product "cross-overs" shall be constructed so that any leakage will be to the atmosphere.
- (d) The holding time of at least 15 seconds in forward flow and diverted flow is required in the pasteurization of milk or fluid derivatives. In the pasteurization of ice cream mix or ice milk mix the holding time shall be at least 25 seconds in forward flow and diverted flow; and the temperature of pasteurization shall be at least 175 degrees F.

No holding time is required in the pasteurization of milk or milk products if the temperature of pasteurization in approved high-temperature short-time equipment is at least 192 degrees F. and 194 degrees for the vacreator. Milk and milk products pasteurized by the Roswell process shall be heated to 200 degrees F. and held at that temperature for a minimum of three seconds.

- (e) The holding tube must have a positive upward slant from the inlet to the outlet. The brackets must be permanently installed. The indicating and recording controller spuds and the flow diversion valve must be located at the outlet end of the holding tube.
- (f) The timing pump shall be so constructed and operated that the speed setting will insure the required holding time. All variable speed pumps must have a high speed stop that can be sealed and so designed that wear or stretch of belts or other driving medium will not shorten the holding time.
- (g) HTST pasteurizers shall be checked and sealed by the director or authorized representatives of an approved milk inspection service before using and as often as is necessary to insure satisfactory operation. The timing pump, if variable speed type, shall be sealed to prevent increase of the maximum allowable speed. Other types of pumps, including homogenizers, may be sealed at the option of the control official. The setting device for controlling the flow diversion temperature shall be sealed in a tamper proof manner. Equipment on which the seals are broken or tampered with is not in compliance with Section 515 of the Agricultural Code.
- (h) Plant managers shall immediately notify the local milk inspection service or the state representative, whichever has immediate supervision,

in case of any readjustment or replacements of parts which may affect the pasteurization holding time or temperature.

- (i) All variable control devices shall be sealed in a tamper proof manner to prevent their use above maximum setting.
- (j) No manual switches are permitted that will cause a flow diversion valve to assume the forward flow position below pasteurizing temperature
- (k) The recording thermometer device on HTST pasteurizers shall record on the chart the operation of the forward flow control.
- (1) Indicating and recording thermometers not exempt by subsection (e) of Section 583 of Administrative Code must comply with the following specifications:

Indicating Thermometers. The scale division must not be more than one–half degree between 138 and 165 degrees F.; accurate within one–half degree F. plus or minus, and not more than eight degrees F. per inch of scale. Lag must not exceed four seconds on temperature rise between 141 and 153 degrees F. when the spud is at room temperature and is then immersed in stirred water at 160 degrees F.

Recording Thermometers. Scale range 145 to 200 degrees F.—the smallest scale division must not be more than one degree between 159 and 162 degrees F. Scale lines must be at least one—sixteenth inch wide in this range. The recording device must record the correct time of day. Recording of temperature must be accurate within one degree F. The pen arm setting device must be easily accessible and simple to adjust. The pen must record a thin, clear line. Radial lines that indicate the time must not be closer than one—fourth inch between 159 and 162 degrees F.; the space must not represent more than 10 minutes.

- (m) Flow diversion valve controller response not to exceed five seconds on temperature rise from 148 to 160 degrees F. when the spud is at room temperature and then is immersed in well stirred water at 167 degrees F.
- (n) The operator of each HTST (high-temperature short-time) pasteurizer must at least once at the beginning of his workday or shift make a notation on the recording thermometer chart of the cutin and cutout temperature of the flow diversion valve.

HISTORY

- 1. New section filed 8–31–51 designated to be effective 10–1–51 (Register 25, No. 4).
- 2. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).

§ 586. Preheated Cream.

Cream subjected to heat treatment as provided for in Section 34003 of the Food and Agricultural Code must be labeled "preheated cream." Section 577 of the Administrative Code is not applicable to "preheated cream."

HISTORY

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

Article 20. Milk Products Plant Floor Drains

§ 587. Milk Products Plant Floor Drains.

In accordance with the requirements of Section 33768 of the Food and Agricultural Code, floor drains or sewage drains with exposed pipes within any product processing or packaging room or any room where processing or clean packaging equipment is handled or kept, shall be constructed in a leak–proof manner. Screw–joint pipe and no–hub–band joints, when correctly installed, are considered leak–proof. Pipe supports shall be installed to maintain pipe alignment. Bell–hub joints shall be completely enclosed with a metal sheeting sloped sufficiently toward an outlet in the sheathing at floor level to readily detect leakage in the drainage or sewer pipe, and shall be of such construction as to permit removal of the sheathing for repairing any leakage that might occur in the drainage or sewer pipe line or sealed in a manner acceptable to the Director.

Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

Article 21. Milk Inspection Services

§ 590. Registered Dairy Inspector.

In accordance with the provisions of Food and Agricultural Code Sections 33112 and 33114, provisions for examinations will be as follows:

- (a) Written examinations will be scheduled in Sacramento, Oakland. Fresno, and Los Angeles semi-annually. The examination time and date will be set at least 60 days prior to the examination. If proof of hardship is offered, the Director may give special examinations at other times.
- (b) Applications for registration must be made on forms available from the Department of Food and Agriculture, and must be filed with a non-returnable fee of ten dollars (\$10 with the Department of Food and Agriculture no later than 15 days prior to the date of examination.
- (c) A grade of 75 percent in both written and oral examinations will be considered the minimum passing grade.
- (d) A non-returnable examination fee of twenty five dollars (\$25) shall be paid to the Department of Food and Agriculture before or at the time and place of examination.
- (e) The oral examination shall be conducted by a panel selected by the Director.
- (f) A copy of the college transcript of record shall accompany the application for persons not employed as Dairy Inspectors as of March 1, 1973.

HISTORY

1. New section filed 3–29–73; effective thirtieth day thereafter (Register 73, No. 13).

§ 598. Milk Inspection Services.

Any unit of government desiring approval of a milk inspection service shall make application for approval in writing to the Director of Food and Agriculture of the State of California. Upon receipt of said application, the said Director of Food and Agriculture shall issue a certificate of approval to the milk inspection service, provided, such approval may be withdrawn should the milk inspection service later become inefficient or fail to carry out the requirements of the Food and Agricultural Code or Administrative Code as they apply to Approved Milk Inspection Services.

No withdrawal of approval shall be made until the Director of Food and Agriculture has given written notice to the inspection service involved. Such inspection service shall have 30 days to file a written request for a hearing with the Director of Food and Agriculture. No withdrawal of approval shall be made before the expiration of 30–day period granted to file a written request for a hearing, or before completion of such requested hearing.

HISTORY

- 1. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).
- Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 599. Conditions of Approval.

To secure and hold such approval a milk inspection service must:

- (a) Provide a sufficient force of qualified inspectors, under the general direction of a licensed physician, and sufficient laboratory facilities to enforce any and all laws and regulations relating to graded milk and cream. Arrangements may be made with a person or firm, approved by the Director of Food and Agriculture, to do bacteriological and other laboratory work.
- (b) Personnel making laboratory analyses as provided for in Section 32503 of the Food and Agricultural Code must have taken an examination for a certificate of proficiency in analysis of milk and milk products as given by a representative of the Department of Food and Agriculture and passed with a grade of at least 75 percent. This certificate may be re-

- voked for cause and is automatically revoked when the holder becomes inactive in laboratory milk control work for two years.
- (c) Provide for the examination of cattle producing milk to be sold in or from its jurisdiction. Examination shall consist of observations for manifest evidence of diseases such as enlarged glands, mastitis, pyometra, tuberculosis, open sores, ulcerated teeth, abscesses and/or any other condition which might affect the quality or safety of the milk.
- (d) Maintain the standards for the various grades of market milk, market cream, and other fluid market milk products as established by the Food and Agricultural Code and the Administrative Code.
- (e) Cooperate in holding official surprise milk scoring contests, surveys, or other related work, whenever requested to do so by a duly authorized representative of the Department of Food and Agriculture.
- (f) Provide for the inspection of dairy farms producing manufacturing milk pursuant to Food and Agricultural Code Section 33322.

 NOTE: Authority cited: Sections 407, 32503 and 33083, Food and Agricultural Code. Reference: Sections 32503, 33083 and 33322, Food and Agricultural Code. HISTORY
- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- Amendment filed 4-25-75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 3. Amendment of subsection (b) and new subsection (f) filed 2–26–82; effective thirtieth day thereafter (Register 82, No. 9).

§ 600. Inspection.

- (a) Inspection of market milk shall consist of laboratory examinations of the products and adequate supervision of the equipment and methods of the various producers and distributors.
- (b) Guidelines for the inspection of dairy farms producing manufacturing milk shall be those currently published by the United States Department of Agriculture entitled "General Instructions For Performing Farm Inspections According To The USDA Recommended Requirements For Milk For Manufacturing Purposes And Its Production And Processing For Adoption By State Regulatory Agencies."
- (c) For the purpose of this section and section 601; "producer" means any dairy farm described in section 32505 of the Food and Agricultural Code; "distributor" means any person that purchases or handles any milk, cream, or any dairy product for processing, manufacture, or sale in this state; "retail store" means any person that owns or operates a retail grocery store, restaurant, confectionery, or other similar business where milk, cream, or any dairy product is sold to the general public; and, "market milk product" means any uncultured milk product with a standard of composition requiring fluid market milk or any derivative of market milk.

NOTE: Authority cited: Sections 407 and 33083, Food and Agricultural Code. Reference: Sections 33321, 33322 and 36331, Food and Agricultural Code.

HISTORY

1. Amendment filed 2–26–82; effective thirtieth day thereafter (Register 82, No. 9).

§ 601. Laboratory and Field Examinations of Market Milk and Market Milk Products.

- (a) During any six months the following samples shall be taken: (The term "during any six months" is considered to be the six months preceding the month in which the last sample was taken.)
- (1) From each producer, at least four samples of raw market milk for pasteurization;
- (2) From each milk plant after receipt from producers, at least four samples of raw market milk for pasteurization prior to pasteurization;
- (3) From each milk plant, or as an alternative, from vehicles operated by the milk plant, at least four samples of each market milk product processed in the plant;
- (4) From each distributor handling market milk products processed outside of any Approved or Established Inspection Service area, at least four samples of each product handled;
- (5) From each distributor whose market milk products are distributed outside of an Approved or Established Inspection Service area where the products were processed, at least two samples of each such product handled;

Page 38 Register 2007, No. 7; 2–16–2007

- (6) Samples required by (4) and (5) above may be taken from the vehicle delivering the products or from the retail store handling the products.
- (b) Samples of market milk and market milk products shall be taken periodically from retail stores. Except where conditions warrant, the frequency of sampling separate brands of packaged products shall not exceed four times in six months. Samples shall be taken in all cases where a complaint is received regarding the condition of the products handled by the store.
- (c) The following tests shall be conducted on the samples required by paragraph (a) above.
- (1) Standard plate count, coliform count, laboratory pasteurized count, antibiotics, screening and confirmatory methods for the detection of abnormal milk, and examinations for extraneous sediment, on each producer's raw milk;
- (2) Standard plate count and temperature tests on all milk plant samples of raw milk for pasteurization;
- (3) On all market milk products sampled under (a)(3) and (a)(4) above, where there are applicable standards, standard plate count, coliform count, fat, solids not fat, phosphatase, temperature, and antibiotics. Only standard plate count and temperature tests are required on samples taken under (a)(5), and (b) above.
- (4) Tests for added water or other adulterations shall be routinely performed with such frequency as to assure the fluid milk product to be free from adulterants, but not less than once each quarter.
- (5) Participation in all nuclear emergency response activities with the sampling of milk and submission of such milk samples to the appropriate laboratories when deemed necessary by federal and state agencies responsible for radiological monitoring.
- (d)(1) Procedures for the collection and holding of samples; the selection and preparation of apparatus, media and reagents; and the analytical procedures, incubation, reading and reporting of results, shall be in substantial compliance with those procedures found in Standard Methods for the Examination of Dairy Products of the American Public Health Association and the Official Methods of Analyses of the Association of Official Analytical Chemists.
- (2) In addition to the general provisions, the following procedures found in the above–mentioned documents shall be those specified for:
 - (A) Standard Plate Count at 32°C.
 - (B) Simplified method for viable counts of raw milk at 32°C.
 - (C) Coliform tests with solid media at 32°C.
- (D) Bacillus Stearothermophilus Disc Assay Method for drug residues in producer raw milk sampled at the farm and commingled raw milk after receipt at the plant.
- (E) Bacillus Stearothermophilus Disc Assay Method for drug residues in market milk, market milk products, manufacturing milk and manufactured milk products.
- (F) Bacillus Subtilis Disc Assay Method for raw goat milk, goat milk and goat milk products.
- (G) American Public Health Association or Association of Official Agricultural Chemists phosphatase tests.
- (H) California Mastitis Test as a screening method for abnormal milk followed by a microscopic or an electronic cell counting procedure to confirm excessive screening results.
- (e) Samples specified in subsection (a)(1) shall be analyzed by an official laboratory or a laboratory designated by the director. Any designation shall be permissive and may be revoked by the director. In making designations, the director shall be governed by the following requirements:
- (1) Samples may be taken by dairy inspectors or persons licensed under Food and Agricultural Code Sections 35161 or 35163. The taking, caring, and analysis of the samples shall be in compliance with the requirements of Section 601, subsection (d).
- (2) Analyses shall be performed by persons having successfully passed applicable portions of the Examination for Certificate of Profi-

- ciency in the Analysis of Milk and Milk Products as provided for in Section 599(b).
- (3) Designated laboratories shall participate in all Bureau of Milk and Dairy Foods Control laboratory split sample surveys for applicable analyses.
- (4) In a series of samples of raw market milk for pasteurization which indicate the possibility of degrade, the director or Approved Milk Inspection Service shall take and analyze the second sample for degrade and all samples necessary for reinstatement; however, if the director or Approved Milk Inspection Service obtains three consecutive legal counts, industry may resume sampling and analyzing until an illegal count is found.
- (5) The director or Approved Milk Inspection Service shall take all samples and make all analyses which may involve other legal action or condemnation of the product.
- (6) The permissive utilization of industry sampling and analyses is limited to individual producer milk. The director in designating laboratories shall stipulate the analyses which may be performed by industry laboratories
- (7) State Dairy Inspectors and representatives of Approved Milk Inspection Services shall resolve any infractions of subsection (e)(1). If they are unsuccessful, they shall file a report with the director outlining all deviations and attempts at rectification.
- (8) In the event of any conflict between designated laboratories and laboratories maintained by official agencies, the findings of official laboratories will prevail.
- (9) On completion of analyses, the designated laboratories will immediately convey the analytical findings to the director or his representative or Approved Milk Inspection Service having jurisdiction of the dairies. NOTE: Authority cited: Sections 407, 32761.5 and 32733, Food and Agricultural Code. Reference: Sections 32761.5, 32731, 32733 and 33083, Food and Agricultural Code.

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- 2. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).
- 3. Amendment filed 5-7-68; effective thirtieth day thereafter (Register 68, No. 18).
- 4. New subsection 5, filed 10–19–70; effective thirtieth day thereafter (Register 70, No. 43).
- 5. Amendment filed 2–26–82; effective thirtieth day thereafter (Register 82, No. 9).
- 6. Amendment of subsections (d)(2)(D)–(F) filed 1–30–95 as an emergency; operative 1–30–95 (Register 95, No. 5). A Certificate of Compliance must be transmitted to OAL 5–30–95 or emergency language will be repealed by operation of law on the following day.
- 7. Certificate of Compliance as to 1–30–95 order transmitted to OAL 5–26–95 and filed 7–11–95 (Register 95, No. 28).

§ 602. Frequency of Inspections.

- (a) Dairy farms shall be inspected at least six times a year. Pasteurizing plants shall be inspected at least once every month. Plants of producer—distributors of raw milk shall be inspected at least once each month. Visits of inspectors shall be unannounced and at irregular intervals.
- (b) An official scoring shall be made at least once each six—month period for dairy farms, and at least once each three—month period for processing plants and premises where raw milk is bottled. The market milk permit and one copy of the most recent official score shall be immediately available at the milk plant or dairy on request of the Dairy Inspector. An identical copy of the official score shall be on file with the records of the inspection agency for not less than one year.
- (c) Pasteurizing equipment shall be tested initially on installation, and at least once each three months thereafter, and whenever any alteration or replacements are made which may effect the proper operation of the installation or device, except that the holding—time test may be made semiannually if no alterations or replacements have been made on the flow—promoting devices since the last test. The test shall include:
 - (1) Indicating thermometers, for temperature accuracy;

- (2) Recording thermometers, for time and temperature accuracy;
- (3) Leak-protector valves, for leakage;
- (4) Flow-diversion valve to
- (A) Confirm cut-in and cut-out temperature,
- (B) Confirm correct assembly and function;
- (5) Thermometric response
- (A) HTST (High Temperature Short Time) indicating thermometer,
- (B) Flow-diversion valve controller;
- (6) HTST auxiliary equipment
- (A) Function of automatic-controller devices (booster pump, ratio-controller, etc.).
 - (B) Accuracy of pressure gauges,
 - (C) Function of vacuum breakers;
 - (7) HTST system
 - (A) Holding time,
 - (B) One foot static head pressure on pasteurized milk in regenerator.
- (d) A record of the tests shall be left with the plant manager and an identical copy shall be on file with the records of the inspection agency for not less than one year.
- (e) Equipment manufactured and installed in conformity with the 3–A Sanitary Standards and Practices for Batch and High Temperature Short Time Pasteurizers complies with the term "approved and properly operated equipment" used in Section 34001 of the Food and Agricultural Code. Note, 3–A Sanitary Standards and Practices for Dairy Equipment are promulgated jointly by the Sanitary Standards Subcommittee and the Dairy Industry Committee (Milk Industry Foundation and Dairy and Ice Cream Machinery Supply Associations), the Committee on Sanitary Procedure of the IAMFES (International Association of Milk, Food, and Environmental Sanitarians, Inc.), and the Dairy Sanitation Section of the Public Health Service, Food and Drug Administration, Department of Health, Education, and Welfare. 3–A Sanitary Standards and Practices are available from IAMFES, Inc., P. O. Box 701, Ames, Iowa 50010.

- 1. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4)
- 2. Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17)

§ 603. Communicable Diseases.

HISTORY

1. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 604. Laboratory Results.

Each dairy or distributor, as the case may be, of milk and cream shall be kept informed of the results of the laboratory examination of their individual products when such results indicate the product fails to comply with legal standards.

§ 604.1. Confirmation of Compliance Testing on Finished Fluid Milk Products.

- (a) When analyses of finished fluid milk products are made by mid-infrared instrumentation, the Department shall, before any action for failure to comply with the standards of composition established by sections 35784, 38181, 38191 and 38211 of the Food and Agricultural Code, have analyses confirmed by the methods listed in this section. The AOAC Official Method numbers indicated below refer to methods outlined in the 18th Edition of the Official Methods of Analysis of the Association of Official Analytical Chemists International, which is incorporated by reference.
- (1) Fat in Milk, Modified Mojonnier Ether Extraction, AOAC Official Method 989.05
- (2) Solids (Total) in Milk, By Direct Forced Air Oven Drying, AOAC Official Method 990.20
 - (3) Solids-Not-Fat in Milk, AOAC Official Method 990.21
- (b) To determine compliance with legal standards of composition, the final analytical results (lab value) from confirmation methods listed in this section shall have an expanded uncertainty value applied as follows:

- (1) Fat results on milk, reduced fat milk, lowfat milk and nonfat milk will have an expanded uncertainty value of \pm 0.03 percent fat applied to the lab value.
- (2) Total Milk Solids (TS) results on milk will have an expanded uncertainty value of \pm 0.07 percent solids applied to the lab value.
- (3) Solids Not Fat (SNF) results on milk, reduced fat milk, lowfat milk and nonfat milk, will have an expanded uncertainty value of \pm 0.07 percent solids applied to the lab value.
- (c) Written complaints sent to the Department objecting to a final analytical result used to determine compliance with legal standards of composition shall be kept on file with a copy of that final analytical result for two years.

NOTE: Authority cited: Sections 407, 34231 and 34261.5, Food and Agricultural Code. Reference: Sections 34202, 34261, 34262, 34263, 34264, 34265 and 34301, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–22–74; effective thirtieth day thereafter (Register 74, No. 12). For history of former section, see Register 73, No. 13
- Amendment of section heading, repealer and new section and amendment of Note filed 2-15-2007; operative 3-17-2007 (Register 2007, No. 7).

§ 605. Publications.

All publications or public statements relating to the quality of milk or cream, or the condition of dairies or milk plants, shall be expressed in terms of percentage, 100 percent being considered perfect. In rating milk or cream this percentage shall be based upon an average of results obtained by the examination of at least four samples taken at intervals of at least a week. The method used for computing milk scores for publication shall be approved by the Department of Food and Agriculture of the State of California.

§ 606. Dairy Farm Follow-Up Inspection Fees.

- (a) Effective January 1, 2008, in accordance with sections 32814 and 33294 of the Food and Agricultural Code, the fees for follow-up dairy farm inspection activities conducted by the Department, are as follows:
- (1) \$140 for each rescore of a dairy farm, conducted after a score below the minimum legal requirements of sections 35861 and 35891, pursuant to sections 36091 or 36092 of the Food and Agricultural Code.
- (2) \$100 for each on-farm inspection for compliance with, or reinstatement after, the issuance of an Official Order, Form 72–094 (Rev. 02/04), which is incorporated by reference, for any of the following violations:
- (A) A violation that is to be corrected within 72 hours pursuant to section 33551 of the Food and Agricultural Code;
- (B) Immediate restricted use, exclusion or condemnation of milk or cream pursuant to sections 32761, 33453 or 33552 of the Food and Agricultural Code
- (3) \$90 for each milk sample collected pursuant to section 36123 or 33581 of the Food and Agricultural Code for milk not meeting bacteria, coliform, temperature, or somatic cell count standards.
- (4) \$60 for each water sample collected from a water supply not meeting sanitary standards pursuant to section 33515 of the Food and Agricultural Code
- (5) \$150 for each on–farm investigation of antibiotic residues pursuant to section 32814 of the Food and Agricultural Code.
- (b) Pursuant to section 33292 of the Food and Agricultural Code, milk products plants shall deduct the above fees from payments which are due producers for milk and shall pay to the Department the fee required to be paid by the producer.

NOTE: Authority cited: Sections 407 and 33294, Food and Agricultural Code. Reference: Sections 32506, 32761, 32761.5, 32794, 32814, 33292, 33294, 33296, 33451, 33453, 33515, 33551, 33581, 33552, 35781, 35861, 35891, 35924, 36091, 36092 and 36123, Food and Agricultural Code.

HISTORY

 New section filed 12–20–2007; operative 12–20–2007 pursuant to Government Code section 11343.4 (Register 2007, No. 51). For prior history, see Register 73, No. 13.

§ 607. Buttermilk.

Within the requirements of Food and Agricultural Code Section 38542(f), buttermilk labeling bearing any of the following information is false and misleading:

- (a) If any design, picture, symbol or illustration showing a churn is used, and the product is not in its entirety the residue of the churning process;
- (b) If the term "churned" is used and the buttermilk is not in its entirety the residue of the churning of cream, with or without the addition of cultured milk or cultured skim milk, in the process of buttermaking.

 NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 38542(f), Food and Agricultural Code.

HISTORY

1. New section filed 5–7–75; effective thirtieth day thereafter (Register 75, No. 19). For history of former section, see Register 56, No. 18.

§ 607.5. Grade A Condensed of Dry Milk Products.

(a) Nonfat dry milk labeled for Grade A use shall be "Extra Grade"

as defined in Section 38424 of the Food and Agricultural Code.

- (b) Each container of condensed skim milk or nonfat dry milk made from pasteurized market milk shall be labeled with:
 - (1) The name and address of the manufacturer or distributor;
- (2) The name and grade of the product; the grade shall be identified as "Grade A" or "Made from Grade A milk";
 - (3) The word(s) "Pasteurized" or "Made from pasteurized milk";
- (4) The name of the inspection agency which supervises the manufacturing process. If the name and address of the manufacturer is used, it shall be preceded by the words "Manufactured by." If the name and address of the distributor is used, it shall be preceded by the words "Distributed by." The words "Manufactured by Plant 06—____" (the blank to be filled in with the plant number of the manufacturer) shall be included in the label with the name or address differs from the name and address of the plant where the product is made.

NOTE: Authority cited: Sections 407, 32912(c) and 38430, Food and Agricultural Code.

[The next page is 43.]

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 2. Amendment filed 3–22–74; effective thirtieth day thereafter (Register 74, No. 12).

§ 608. Ungraded Milk.

HISTORY

1. Repealer filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).

§ 609. Special Designations.

HICTORY

1. Repealer filed 9-21-56; effective thirtieth day thereafter (Register 56, No. 18).

§ 610. Use of Breed Designations in Labeling of Market Milk and Milk Products.

NOTE: Authority cited: Section 16, Agricultural Code. Reference: Sections 32510, 32511, 32512, and 38211, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8-29-66; designated effective 12-1-66 (Register 66, No. 29).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).
- 3. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 611. Examining Physician.

In accordance with the provisions of Sections 35862 and 35892 of the Food and Agricultural Code, any regularly licensed physician is approved to conduct physical examination of persons coming in contact with Grade "A" raw milk.

HISTORY

1. Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 612. Physical Examinations.

Such physical examination shall include:

- (a) Chest examination for tuberculosis with X-ray when indicated by chest findings.
- (b) Examination of skin for communicable diseases and any open lesions etc.
 - (c) General cleanliness.

§ 613. Laboratory Examinations.

The laboratory examination shall consist of the following:

- (a) Nose and throat cultures for diphtheria and streptococcus.
- (b) Sputum for tuberculosis.
- (c) Feces and urine for the typhoid-paratyphoid-dysentery group.

§ 614. Procedure for Physical Examinations.

All persons coming in contact with Grade "A" raw milk, or Grade "A" raw cream, who, through the provisions of Section 35892 of the Food and Agricultural Code are subject to the physical and laboratory examinations, may be physically examined by their own physician and may go to the nearest laboratory for the laboratory examinations. Bacteriological examinations must be made by a laboratory approved by the State Department of Health.

NOTE: Authority cited: Section 35892, Food and Agricultural Code.

HISTORY

1. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 615. Specimen Examinations.

Any person who resides at a great distance from an approved laboratory may have specimens for examination forwarded to the nearest laboratory by the physician giving the physical examination.

§ 616. Miscellaneous.

HISTORY

1. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 617. Cow Clipping.

NOTE: Authority cited: Sections 407 and 35601, Food and Agricultural Code. Reference: Sections 33523 and 35601, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10–19–70; effective thirtieth day thereafter (Register 70, No. 43)
- 2. Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).
- 3. Amendment filed 2–26–82; effective thirtieth day thereafter (Register 82, No. 9).
- 4. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 618. Mechanical Capping.

The reference to mechanical capping in Section 34591 of the Food and Agricultural Code, is construed to mean that bottle caps must be applied to bottles by mechanical means as well as said bottles being capped by mechanical means. Application of caps to milk bottles by hand is not considered to be by mechanical means and is therefore prohibited.

NOTE: Authority cited: Section 34591 Food and Agricultural Code.

HISTORY

1. Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 619. Milk Filters.

Filter cotton or single service strainer cloths shall be at all times kept in containers that will afford proper protection. The containers shall be constructed so as to permit dispensing the filters with a minimum amount of contact with human hands. Milk or cream, when filtered, shall be filtered with a single service filter, only.

HISTORY

1. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4)

§ 620. Status of Market Milk Dairies.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- 2. Repealer filed 7-15-97; operative 8-14-97 (Register 97, No. 29).

§ 621. Bulk Milk Dispensers.

Milk cans for use in connection with bulk milk dispensers must be (1) constructed so that the tube is contained in a pocket or cup which protects the tube against contamination or (2) the side of the can nearest to the outlet on the bottom must be supplied with a metal channel or shield for insertion of tube for protection. Other type of containers for bulk milk dispensers must be approved by the director. Cans with the tube coiled on the bottom of the can are not of an approved type. All cans must be sealed in the milk plant where filled and the tube when placed on the can, must be protected by covering, such as pliofilm, plastic, or other suitable material, to protect the tube in transit from the milk plant to the place of serving. When the milk can is empty and removed from the dispensing cabinet, the seal must be broken, and the container rinsed and drained.

HISTORY

1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)

§ 622. Protection of Water Supplies in Dairies and in Milk Products Plants.

No cross-connections may be installed between a safe water supply and any unsafe or questionable water supply. Submerged inlets into an unsafe or questionable water supply must be avoided unless such submerged inlets are installed in a manner to prevent back siphonage.

HISTORY

1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).

§ 623. Personal Cleanliness.

No employee of any dairy or milk products plant shall resume work after using the toilet room without having washed his hands. The Bureau of Milk and Dairy Foods Control or Approved Milk Inspection Service shall cause to be placed a sign in each toilet bearing the context of this requirement.

- 1. New section filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 624. Vitamins and Minerals Added to Milk or Milk Products.

- (a) Vitamins and minerals, or either, may be added to milk or milk products only upon permit of the Director and in accordance with the manner and method approved in said permit. Applications for such permit shall include:
- (1) A complete description of the method to be used and the kind and amount of vitamins and/or minerals to be added, and an agreement that the vitamins and/or minerals will be so added only in accordance with the direction of the supplier thereof;
 - (2) A copy of the supplier's directions;
- (3) A statement of the type of storage facilities to be used for storage of the vitamins and/or minerals and the storage of premixed solutions; and
 - (4) A statement of the types of measuring devices to be used.
- (b) Each permittee shall maintain a daily record of the volume of vitamin and/or mineral fortified milk products processed by him and the daily quantity of vitamins and/or minerals added to said daily volume. Said record shall show the kinds and amounts of vitamins and/or minerals added during each day's operations and the signature of the person who adds the vitamins and/or minerals. The record of each entry shall be maintained for at least 60 days and shall be made immediately available to the Director and the applicable approved milk inspection service upon request.
- (c) Vitamins and/or minerals may be added only to the final milk product after standardization. Vitamins and/or minerals may not be added to milk in bulk storage tanks unless all the milk therein is to be packaged as vitamin and/or mineral fortified milk, without further standardization.
- (d) The permit and complete description of the method, kind and amount of vitamins and/or minerals added as required by subsection (a) of this section shall be kept posted in a conspicuous place in the milk products plant readily accessible to the personnel responsible for making the vitamin and/or mineral additions.

Said permit may be revoked or suspended by the Director after a hearing to show cause for such action.

NOTE: Authority cited: Section 35751, Food and Agricultural Code.

HISTORY

- New section filed 6-11-64; effective thirtieth day thereafter (Register 64, No. 13).
- 2. Amendment of subsection (a) filed 4–25–75; effective thirtieth day thereafter (Register 75, No. 17).

§ 625. Somatic Cell Counts.

- (a) Tests for the presence of excessive numbers of somatic cells in milk shall be made routinely, using the direct microscopic or electronic cell count or the California Mastitis Test (CMT) at a frequency of not less than four examinations in each continuing six—month period. CMTs indicating No. 2 must be confirmed by direct microscopic or electronic cell count.
- (b) Any milk classified by the California Mastitis Test (CMT) as No. 3 may be considered unfit for human consumption and may be condemned when found.
- (c) The maximum somatic cell count in milk is 1,500,000. Whenever tests indicate the somatic cell count of raw market milk exceeds 1,500,000 cells as determined by a direct microscopic or electronic cell count, the degrade procedure as outlined in Food and Agricultural Code Section 36123 shall be followed. For purposes of reinstatement, CMT tests of negative, trace, or No. 1 will be considered as less than 1,500,000 somatic cells.

NOTE: Authority cited: Sections 407 and 36601, Agricultural Code. Reference: Sections 32511, 32761(a) and 35602, Agricultural Code.

HISTORY

1. New section filed 6-3-70; effective thirtieth day thereafter (Register 64, No. 13).

§ 626. Market Milk Temperature Requirements.

- (a) This section provides temperature requirements for market milk, and includes within that definition the following market milk products: milk, low fat milk, skim milk, flavored milk, cream, and half and half.
- (b) Market milk shall be promptly cooled to 45°F., or below, at the time of processing and shall be so maintained at all times while it is in commerce, i.e. until it is delivered to the retail purchaser.
- (c) This section shall not apply to (1) market milk intended for home delivery while so enroute from a distributor's licensed premises, and (2) to market milk after delivery for consumption on the premises.
- (d) The temperature of market milk in commerce when packaged in containers shall be determined by a representative sampling of the lot of containers. A lot is defined as any group of containers of the same size, product, and brand assembled in one place. From the lot, five sample containers shall be selected at random. The temperature of the milk in each container shall be measured in Fahrenheit degrees, the results totaled and divided by five to provide the average temperature. If the average temperature is 45°F., or less, the lot shall be passed, provided, however, any container within the lot found to contain market milk of 50°F., or over, shall be excluded from sale. An average temperature of the lot above 45°F. shall be a violation of this section.
- (e) The requirements of this section shall become effective on November 1, 1973.

NOTE: Authority cited: Sections 407 and 35757, Food and Agricultural Code.

HISTORY

1. New section filed 10–5–72; effective thirtieth day thereafter (Register 72, No. 41).

§ 627. Quality Assurance Date.

- (a) Except as otherwise provided in Food and Agricultural Code Section 36004(c), the licensed milk products plant which bottles or packages the following products shall be responsible for affixing the quality assurance date to all containers which are offered for sale to the consumer by a retail store: market milk, market cream, skim or non-fat milk, half and half, sour cream, sour cream dressing, low-fat milk, flavored milk, flavored dairy drink, yogurt, concentrated milk, concentrated skim milk, acidophilus milk, buttermilk and cultured buttermilk, cottage cheese, creamed cottage cheese, homogenized creamed cottage cheese spread, and partially creamed or low-fat cottage cheese.
- (b) The quality assurance date shall be readily identifiable by the consumer. If a numerical sequence of months and days is used, it may not be located on the container with other numbers such as factory license number or lot numbers unless such other numbers are clearly identified. If the quality assurance date is used with unidentified code numbers, the date shall be at least the first three letters of the month followed by the day of the month

The date shall be not less than 3/16" in height, except that it may be reduced to not less than 1/8" in height when applied to the cap area of a container. The date shall contrast with the background by color or clearly legible imprint.

Any means of conveying the quality assurance date shall be so affixed as to insure legibility of any other required information.

- (c) The date shall be placed on the various types of containers in accordance with one of the following options:
- (1) Glass, rigid plastic, or fiber board: (A) Embossed, imprinted, or overlaid in fine, clearly visible lettering on the cap or container; (B) heat or pressure–sensitive seal; (C) collar or tag.
- (2) Plastic bags: (A) Heat or pressure–sensitive seal; (B) upper or lower seal margin; (C) overlay in fine, clearly visible lettering.
- (3) Gable–topped rectangular containers: (A) On informational panel; (B) upper flat margin above gable.
- (4) Flat top, rectangular carton: (A) On informational panel; (B) flat panel or margin of top.

Page 44 Register 97, No. 29; 7–18–97

- (5) Tetrahedral: (A) Informational panel; (B) sealed ends; (C) embossed, imprinted, or overlaid in fine, clearly-visible lettering.
- (d) Nothing in this Section shall preclude the removal by the Director of any or all of the involved products from sale prior to the expiration of the quality assurance date if analysis indicates that the product fails to meet applicable bacterial standards.
- (e) Deviations from the location of the date of the quality assurance date or the manner of declaring the date, as noted above, may be made only with written permission of the Director.

1. New section filed 3-29-73; designated effective 7-1-73 (Register 73, No. 13).

Article 22. Permanent Market Milk Dairy Buildings

§ 645. Permanent Market Milk Dairy Buildings.

In accordance with provisions of Sections 33481 through 33486 of the Food and Agricultural Code, the following regulations relating to the sanitary requirements and standards of the construction of market milk dairy buildings have been established by the Secretary of Food and Agriculture.

- (a) "Secretary" means the Secretary of Food and Agriculture.
- (b) Plans and specifications for market milk dairy buildings shall be submitted to the Secretary for approval prior to construction.
- (c) Plans shall show elevations and detail to insure with certainty compliance with provisions of the California Code of Regulations, Uniform Building Code (1991 Edition), National Electrical Code (1990 Edition) and National Plumbing Code (1991 Edition).
- (d) All deviations from the minimum requirements and from approved plans and specifications may be made only after written approval of the Secretary.
- (e) Nothing in these regulations shall be construed as abrogating the provisions of Division 13, Part 3, of the Health and Safety Code (Riley Act).

NOTE: Authority cited: Sections 407 and 33481, Food and Agricultural Code. Reference: Sections 33481, 33484 and 33486, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- Amendment filed 9-10-71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission on 8-18-71.
- 3. Amendment of section and new NOTE filed 11–9–95; operative 12–9–95 (Register 95, No. 45).

§ 646. Site.

- (a) The milking barn and milk house shall be located in a place free from contaminating surroundings.
- (b) Feed racks, calf, bull, hog, and poultry pens, horse stables, horse corrals, and shelter sheds shall not be located closer than 100 feet from the milk room or 50 feet from the milking barn.

NOTE: Authority cited: Sections 407 and 33481, Food and Agricultural Code. Reference: Sections 33482, 33483 and 33486, Food and Agricultural Code.

HISTORY

- Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 9-10-71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8-18-71.
- Repealer of subsection (b), subsection relettering, amendment of newly designated subsection (b) and new Note filed 11–9–95; operative 12–9–95 (Register 95, No. 45).

§ 646.1. Surroundings, Corrals and Ramps.

Dirt or unpaved corrals, or unpaved lanes, shall not be located closer than 25 feet from the milking barn or closer than 50 feet from the milk house. Corral drainage must be provided. A minimum of 3 percent slope shall be maintained in unpaved corrals where the available space for each animal is 400 square feet or less. The slope in areas more than 400 square feet per animal may be reduced proportionately to not less than 1 1/2 per-

cent at 800 square feet or more per animal. Deviations from the corral slope requirements, permissible under the authority of Section 33482 of the Agricultural Code, shall not be made without written permission from the director. The deviation request must be supported with evidence the proposal will result in comparable drainage.

A paved (concrete or equivalent) ramp or corral shall be provided to allow the animals to enter and leave the milking barn. This paved area shall be curbed (minimum of 6 inches high and 6 inches wide) and sloped to a drain. Cow washing areas shall be paved (concrete or equivalent) and sloped to a drain. The perimeter of the area shall be constructed in a manner that will retain the wash water to a paved drained area. Paved access shall be provided to permanent feed racks, mangers, and water troughs. Water troughs shall be provided with: (1) a drain to carry the water from the corrals; (2) pavement (concrete or equivalent) which is at least 10 feet wide at the drinking area.

The cow standing platform at permanent feed racks shall be paved with concrete or equivalent for at least 10 feet back of the stanchion line. NOTE: Authority cited: Sections 407 and 33481, Agricultural Code. Reference: Sections 33481 through 33486, Agricultural Code.

HISTORY

New section filed 9-10-71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8-18-71.

§ 647. Elevations.

Floor level elevations of all structures shall be at least 15 inches above surrounding ground level and shall facilitate carrying drainage for at least 50 feet from the milking barn and at least 100 feet from the milk house. In lieu of natural drainage, automatic pumps or other satisfactory means shall be provided for disposal of drainage. Disposal of drainage shall not be in violation of law.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- Amendment filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71.

§ 648. Milk Room.

(a) General Provisions.

The milk room shall be located under the same roof (extended) as the milking barn.

The milk room shall consist of one or more rooms for the care of the milk and the cleaning, sterilizing, and storage of milk handling equipment. Hot and cold running water outlets shall be installed in each room. If the door into the milk room is provided on any side other than the barn side, the area leading from the barn to the door shall be roofed and a curbed, drained, concrete walkway provided.

The minimum distance between a farm tank and the wash trays shall be 5 feet. The minimum distance between any farm tank or farm tank appurtenance and the other milk room walls or ceiling shall be 2 feet. The distance from tank to wall may be reduced to 6 inches when the farm tank is bulkheaded no more than 36 inches into the milk room.

A one–room milk room shall meet the following requisites: (1) a farm tank for the storage of milk; (2) a pipeline for conveying milk from the cows or goats to the farm tank.

(b) Passageway.

When the milk room and the milking barn are under the same roof, a passageway to permit entry to the milking barn is permissible. The passageway shall provide not less than a 3-foot clearance for ingress and egress and have ceiling or roof ventilation.

Equipment such as milk receivers, filters, or coolers which are part of an enclosed milk line system may be installed in the passageway under the following conditions: (1) a 3-foot clearance is allowed for walkway; (2) sufficient space is provided between walls and equipment to permit disassembly for cleaning or inspection of equipment, walls, floor; (3) Passageway walls shall be finished in a manner similar to the milk room. The passageway may be structurally closed at one end. The barn may be separated from the passageway by a pipe rail fence. If the slope of the barn floor is toward the passageway, a concrete wall of at least 12 inches in

height shall be provided. Rustless pipesleeves with tight fitting flanges and protective closures shall be installed where the milk lines, hoses for tankers, and wash lines go through the walls or stationary doors. Delivery of milk from the passageway or barn into the milk room shall be by sanitary milk lines.

(c) Floors.

The floors of the milk room, and passageway if provided, shall be constructed of concrete at least 4 inches thick, or other suitable material approved by the Secretary, troweled smooth with a true slope. The milk room floor shall slope at least 1/4 inch per foot to a vented trapped drain. The passageway floor shall slope at least 1 inch in 10 feet toward a drain or gutter. A 2–inch minimum radius cove is required at all floor and wall junctions. The cove shall be an integral part of the floor. A sand or rock cushion of at least 6 inches shall be placed under concrete floors on soils other than sandy loams. All concrete floor slabs shall be reinforced with a minimum #6 x #6/10 x 10 steel mesh or other reinforcement material of equal or greater strength.

- (d) Walls and Ceilings.
- (1) All walls and partitions shall be of concrete or masonry to a height of not less than 8 inches above the floor. The milk and washroom walls, partitions, and ceilings shall be finished smooth with waterproof cement plaster or masonry (tile). Portland cement type sheeting, fiberglass sheathing or metal sheathing that has been made corrosion and rust resistant may be used for the inside finish of the walls (above 8 inches) and ceiling provided such sheeting is smooth and installed with firm backing and sealed joints. Where masonry or concrete block construction is used, all voids below the floor line shall be filled with concrete.
- (2) Main ceiling height shall be at least 9 feet above the floor but in no case less than the height of the farm tank plus 2 feet. Ceiling may follow rafters to the plate which shall be not less than 7 feet 3 inches above the floor. If a cupola or light well is provided as an extension of the ceiling, there shall be at least 2 feet clearance surrounding the farm tank or any equipment extending into the area.
 - (e) Doors and Windows.
- (1) Each room of the milk house shall have at least one glass window or other light-transmitting material. The total window area in each room shall be equivalent to at least 1/10 of the floor area. Window screens shall be standard 16-mesh and are required on all windows that open. Only stationary type windows may be installed on the barn side of the milk house.
- (2) Exterior doors of the milk room shall open outward, be solid, self-closing, and tight fitting. Where the milk and washroom are separate, a swinging door or a door hinged to open into the washroom shall be installed between the milk room and the washroom. These doors shall be self-closing. Any door from a passageway shall be a solid type door, covered on both sides of the bottom half with a waterproof sheathing, and located as to lead into the wash-up area. Wooden door jambs or frames shall terminate 6 inches above the floor, and the concrete floor cove shall be extended to the jambs or frames.
- (3) Artificial light shall be installed in each room to provide at least 30–foot candles of light at floor level. Light fixtures shall not be located over a bulk tank opening or wash trays.

(f) Ventilation.

Wall ventilators shall be installed horizontally not more than 10 inches or less than 4 inches above the floor in a one-room milk room and one in each room if more than one room is provided. The wall ventilators shall provide openings equivalent to 2 percent of the floor area. Metal framed vents with insect screening and closeable louvers shall be installed in wall-vent openings. Wall ventilators shall not be installed on the milking barn side of the milk room. Ceiling vents are required in the milk room. In the absence of forced draft ventilation, the ceiling vents shall be shafted to a stack type, rotary or directional vent which shall be at least 12 inches in diameter and of a height to properly ventilate the room and shall exclude dust, rain, birds, insects, and trash. Ceiling vents shall provide high ventilation equivalent to an opening of 2 percent or more of the floor area. Ceiling vent opening shall not be located above a bulk tank

opening or wash trays. Oil or gas water heaters shall be vented to the outside and above the roof edge.

(g) Drainage.

Drainage from the milk house may be connected with the barn drainage or it may be independent. When a common drain system is used for the milk house and barn, the design of the system shall preclude back flow into the milk house under all conditions. Floor drains shall be vented, have a water trap, and a clean—out plug. All floor drains and pipes under milk house and barn floors shall have leak—proof connections and meet all applicable plumbing codes.

NOTE: Authority cited: Sections 407 and 33481, Food and Agricultural Code. Reference: Sections 33481, 33482, 33483, 33484 and 33486, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71. For prior history, see Register 62, No. 4.
- Amendment of section and new NOTE filed 11–9–95; operative 12–9–95 (Register 95, No. 45).

§ 649. Painting.

All inside woodwork shall be painted with a light-colored waterproof paint, or material acceptable to the Director.

HISTORY

1. New section filed 9-10-71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8-18-71.

§ 650. Tanker Loading or Washing.

A minimum of 10 feet by 24 feet, paved, curbed, sloped to a drain, tanker-loading area shall be provided adjacent to the milk house where milk is transferred from a farm tank to a milk tanker. If a tanker is used in lieu of a farm tank, overhead protection shall be provided over the loading washing area.

NOTE: Authority cited: Sections 407 and 33481, Food and Agricultural Code. Reference: Sections 33481, 33482, 33483, 33484 and 33486, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71.
- 2. Amendment of section heading and section and new NOTE filed 11–9–95; operative 12–9–95 (Register 95, No. 45).

§ 658. General Provisions.

All dairies producing market milk or market cream shall provide a milking barn which is sound, readily cleanable, and of sanitary construction. The building shall afford the proper working space and be constructed to admit sufficient light and ventilation.

HISTORY

- 1. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18)
- 2. Amendment filed 2-23-62; effective thirtieth day thereafter (Register 62, No. 4)
- 3. Amendment filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71.

§ 659. Milking Barn.

- (a) Slopes and Finishes.
- (1) The floors, curbs, and gutters shall be constructed of concrete or other material acceptable to the Secretary. The floors and gutters, if of concrete or concrete base, shall be at least 4 inches thick. The floors, alleys, gutters, mangers, and curbs shall slope lengthwise at a minimum of 1 1/2 inches in 10 feet. The cow standing platform and litter alley shall slope at least 1 inch toward the gutter. The cow standing platform in the elevated stall type barn shall slope toward the wall at a minimum grade of 1 1/2 inches in 10 feet or this slope requirement may be eliminated with a flush system approved by the Secretary.
- (2) A 2-inch minimum radius cove is required at all floor and wall junctions and shall be an integral part of the floor.
- (3) The manger, if concrete, gutter and curbs when present, shall be finished smooth with a steel trowel. The cow standing platform, wash pen, litter alley, and feed alley shall be given a true even surface with a

Page 46 Register 97, No. 29; 7–18–97

wood float. The cow standing platform, litter alley, holding corral, and concrete lane shall be treated to prevent slipping and may be finished either with a suitable instrument, drawn in the direction of both slopes or treatment of the surface with emery aggregate, carborundum grit, or equivalent material. A sand or rock cushion of at least 6 inches shall be placed under the floor on soils other than sandy loam. All concrete floor slabs shall be reinforced with a minimum of #6 x #6/10 x 10 steel mesh or other reinforcing material of equal or greater strength.

(b) Walls.

All walls shall be of masonry or reinforced concrete and be at least 3 feet 6 inches in height above the floor. All walls shall be finished smooth on the inside with the top ledge rounded on open walls. When a barn wall forms part of the holding corral or an entrance or exit lane, it shall be finished smooth on the outside. Where concrete block or masonry construction is used, all voids below the floor line shall be filled with concrete. In elevated stall type barns, the wall under the cow standing platform adjacent to the milker's area shall be finished smooth.

(c) Plate Line.

The plate line in the floor level milking barn shall not be less than 7 feet 3 inches above the floor. In elevated stall type barns, the plate line shall be not less than 6 feet 6 inches above the cow standing platform.

(d) Superstructure.

The exposed superstructure of the barn roof or ceiling shall be constructed of smooth material. Exposed superstructure shall be such that the roof sheathing is applied directly to the rafters.

(e) Electrical Wiring.

All surface—mounted wiring shall be in rigid conduit or electrical metal tubing. All outlets and switches in wet locations shall be of a type which afford protection from water. Metal stanchions shall be electrically grounded.

(f) Stalls.

The cow standing platform in floor level barns shall not be less than 3 feet wide for each cow and shall be at least 4 feet 10 inches and not over 6 feet from the stanchion line to the gutter, depending on the size of the cattle and the design of the manger. Where stanchions are not used, the cow standing platform shall be at least 7 feet in length. The cow stall in tandem type elevated stall barns shall be 8 feet in length. The tandem, parallel and herringbone stalls shall have a smooth, flat, nonabsorbent splash panel behind each cow.

(g) Light and Air Space.

The milking barn shall have at least 400 cubic feet of air space for each stall. Window space shall be equivalent to at least 6 percent of the floor area. Light–transmitting material in the roof may be substituted for window space. Artificial light shall not be less than 20–foot candles at the floor level and so located as to minimize shadows in the milking area.

- (h) Alleys.
- (1) The litter alley exclusive of gutter shall be not less than 4 feet 9 inches wide behind a single string of cows or goats. In two-string, head-out barns, the litter alley shall be at least 8 feet wide between gutters.
- (2) In floor level barns, the feed alley in single and two-string, head-out types, shall be at least 5 feet 9 inches wide between stanchion line and wall. In two-string, head-in barns, a minimum of 10 feet between lines of stanchions is required.
- (3) The milker's alley in the two-string tandem type elevated stall barn shall be at least 8 feet wide, but may be reduced to 5 feet at the narrowest point when automatic feeders are installed and used. The width of the milker's alley in the two-string herringbone type barn may be reduced to 5 feet at the narrowest point.
- (4) In the single-string elevated stall type barn, the milker's alley shall be at least 4 feet wide. The milker's alley and passageway if combined shall be at least 8 feet wide.

(i) Gutters.

All barns shall have gutters so designed and located to catch the defecation of cows while in the stall and washings of the barns.

- (1) Gutters in the floor level type barn may be either the trench or stepoff type. The gutter shall be at least 14 inches wide and 2 inches deep at the cow standing platform. The gutter floor shall slope down away from the cow standing platform 1/2 inch across its width. The gutter shall have a uniform depth for its entire length.
- (2) The gutters in the elevated stall type barn shall be grate—covered in the stall. The stall gutter shall be located to catch the defecation of the cow in the stall. It shall be at least 500 square inches in area and at least 20 inches wide and 4 inches deep. The herringbone type barns may have the stall gutter width reduced to 14 inches provided the 500 square inch area per animal is maintained. The parallel type barn shall have a 6—inchwide gutter mounted to the splash panel. Gutter shall automatically flush when cows exit.
- (3) Pipe used for barn gutter drainage shall not be less than 4 inches in diameter and meet local plumbing codes.
 - (i) Curbs.
- (1) In elevated type barns, the cow standing platform shall be curbed on the side next to the milker's alley and the curb shall be at least 4 inches in height and designed to retain the elevated stall floor washings. Metal curbs shall be free of voids and sealed to stall floor or wall.
- (2) In floor level barns, a curb under the stanchion line at least 6 inches wide and 12 inches high from the stall floor is required, except where metal mangers are used; the top of this curb shall be rounded.

(k) Stanchions.

Stanchions shall be of metal or other waterproof, easily cleanable material approved by the Director. The lower horizontal line of the stanchion shall be at least 2 inches above the curb and at least 14 inches above the floor when no curb is provided.

(1) Mangers.

In floor level type barns, the manger shall have a minimum width of 27 inches with a back wall at least 12 inches above the floor; corners rounded, the low point of the manger at least 8 inches out from the stanchion line and 3 inches above the floor; with a true lengthwise slope of a minimum of 11/2 inches in 10 feet. Mangers and feed boxes in all type barns shall be constructed of impervious materials, finished smooth and provided with drainage outlets at low points.

- (m) Ventilators. Adequate ventilation shall be provided in the milking barn and holding corral/wash area if roofed.
- (1) Continuous open (18 inch) ridge vents that rise at least 6 inches above the roof are acceptable. Any ridge vent continuing over the feed room shall be screened fly tight.
- (2) Stack type vents are acceptable. Where this type of vent is used, provision shall be made for a 12-inch diameter opening on single-string barns, or a 14-inch diameter opening for multi-string barns, with not more than 10 feet between vent and wall and vent and vent.
- (3) When a flat ceiling is installed, it shall have at least two vents, 2 feet by 2 feet or equivalent, shafted to a roof peak vent which has not less than a 12-inch opening. The ceiling vents may be located directly in line over the cow standing platform or over the milker's pit. The vents shall be located not more than 10 feet between vent and wall and vent and vent.
- (n) Barn Doors. The lower half of barn doors shall be covered on both sides with smooth corrosion–resistant metal.
- (o) The dimensions of sub items (b), (f), (h), (i), (j), (k), (l), of T3–659 may be altered for milking barns for goats.

NOTE: Authority cited: Sections 407 and 33481, Food and Agricultural Code. Reference: Sections 33481, 33482, 33483, 33484 and 33486, Food and Agricultural Code.

HISTORY

- New section filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71.
- 2. Amendment of subsections (a)(1), (a)(3), (f), (i)(2) and (j)(1), and new NOTE filed 11–9–95; operative 12–9–95 (Register 95, No. 45).

§ 660. Painting.

All woodwork shall be painted with light colored waterproof paint or materials acceptable to the Director.

1. New section filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71.

§ 661. Roof Drainage.

Roof drainage from barns, milk house, or shelters shall not drain into the corrals unless the corrals are paved and properly drained.

HISTORY

New section filed 9-10-71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8-18-71.

§ 662. Feed Storage Facilities.

When animals are fed in the milking barn, adequate feed storage facilities shall be provided. Feed storage rooms, when installed, shall be partitioned from the milking barn and shall be fly and rodent proof. The feed discharge area of bulk feed storage shall be paved with concrete or equivalent, curbed, and drained. Bulk feed may discharge directly into the barn. When a bulk feed tank is located opposite the passageway, it shall be no closer than 6 feet from the milk house. Overhead feed storage is permissible if fly, rodent, and dust tight. Feed shall be conveyed to the manger or feed box in a tightly closed dust–free system. Dust tight overhead metal feed tanks may be used. Where an overhead feed storage room is provided, it shall be tight and readily cleanable and the ceiling of the milking barn below such room shall be of smooth cement plaster or equivalent. Any part of the loft or superstructure used as an entryway shall be smoothly finished and readily cleanable.

History

1. New section filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71.

§ 663. Toilet and Hand Wash-Basin.

A fly-proof, well-lighted, well-ventilated room with self-closing door, equipped with a flush-type toilet and a stationary handwash basin equipped with soap and single-service towels shall be installed in either the milk house, milking barn, or immediately adjacent to the milking facility. The toilet room may not open directly into any milk handling area. A water tap, with a basin, provided with soap and single-service towels shall be installed in the milk house and passageway, or barn, at a location that is convenient to the milkers and milk handlers.

NOTE: Authority cited: Sections 407 and 33481, Food and Agricultural Code. Reference: Sections 33481, 33482 and 33486, Food and Agricultural Code.

HISTORY

- New section filed 9–10–71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8–18–71.
- Amendment of section and new NOTE filed 11-9-95; operative 12-9-95 (Register 95, No. 45).

§ 664. Supply Storage.

Facilities to store dairy supplies shall be provided. Only supplies that come in contact with the milk or milk contact surface of the milk handling equipment may be stored in the milk or washroom. These supplies shall be protected from toxic materials, vectors, dust, etc., at all times. Supplies stored in the milk or washroom shall be in a cabinet, on a shelf, or a metal stand, which will keep them at least 4 inches above the floor.

HISTORY

New section filed 9-10-71; effective thirtieth day thereafter (Register 71, No. 37). Approved by State Building Standards Commission 8-18-71.

§ 665. Water Supply.

(a) Well Location.

Well must be located at least 50 feet from any animal enclosure, 100 feet from a septic tank leach line, and 150 feet from a seepage pit 8 feet or more deep.

- (b) Well construction must comply with State and local requirements.
- (c) Any connection to an unsafe water supply must be protected by proper installation of an approved backflow prevention device or be properly air gapped.
- (d) Water supply to the dairy must be tested initially, whenever the system is opened for repairs, and once each three years thereafter. The water

quality shall meet the requirements of Section 33515 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 407 and 33481, Food and Agricultural Code. Reference: Sections 33482, 33483 and 33515, Food and Agricultural Code.

HISTORY

1. New section filed 11-9-95; operative 12-9-95 (Register 95, No. 45).

Article 23. Evaporated Milk or Condensed Milk

§ 675. Evaporated Milk or Condensed Milk.

NOTE: Authority cited: Sections 407 and 38231, Food and Agricultural Code. Reference: Section 38231, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8–10–60; effective thirtieth day thereafter (Register 60, No. 18)
- 2. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).
- Amendment filed 3-22-74; effective thirtieth day thereafter (Register 74, No. 12).
- 4. Amendment filed 2–26–82; effective thirtieth day thereafter (Register 82, No. 9)
- 5. Repealer filed 7–15–97; operative 8–14–97 (Register 97, No. 29).

§ 676. Evaporated Goat Milk or Condensed Goat Milk.

Evaporated goat or condensed goat milk shall contain not less than 6.5 percent of milk fat, nor less than 22 percent of total milk solids.

NOTE: Authority cited: Sections 407 and 38231, Food and Agricultural Code. Reference: Section 38231, Food and Agricultural Code.

HISTORY

1. New section filed 2–26–82; effective thirtieth day thereafter (Register 82, No. 9). For history of former section, see Registers 62, No. 4 and 60, No. 18.

§ 677. Dried Whey-Extra Grade Edible.

HISTORY

- 1. New section filed 8–10–60; effective thirtieth day thereafter (Register 60, No. 18)
- 2. Repealer filed 2-23-62; effective thirtieth day thereafter (Register 62, No. 4).

§ 678. Cheese.

HISTORY

- New section filed 8–10–60; effective thirtieth day thereafter (Register 60, No. 18).
- 2. Repealer filed 2-23-62; effective thirtieth day thereafter (Register 62, No. 4).

§ 679. Evaporated Skim Milk or Condensed Skim Milk.

HISTORY

- 1. New section filed 8–10–60; effective thirtieth day thereafter (Register 60, No. 18).
- 2. Repealer filed 2-23-62; effective thirtieth day thereafter (Register 62, No. 4).

Article 24. Butter Grades

§ 686. Butter Grades.

In accordance with Section 37103 of the Food and Agricultural Code, quality designations are to be affixed on butter packages as follows:

(a) On quarter–pound, half–pound, one–pound and two–pound butter wrappers, the quality designations shall appear on the lower side panel. No other printing shall appear on the lower side panel, except designations which have been approved by the director, which designs shall in no case overlap or interfere with the legibility of said quality designations. On continuous design machine wrappers, the quality designation need not appear on the lower side panel but at least two full quality designations shall appear on each wrapper. The quality designations on quarter–pound and half–pound wrappers are required to appear in 12–point type in caps for the letters and 24–point type for the numerals. On one and two–pound wrappers the 24–point type in caps is to be used for the letters and 48–point type for the numerals. When butter is packaged in any other than quarter–pound, half–pound, one or two–pound prints the size of type to be used for quality designations on such packages shall be approved by the director.

Page 48

- (b) The quality designations must b spelled out with no abbreviations being permitted. The terms to be used are as follows: "1 First Quality 1" and "2 Second Quality 2."
- (c) On butter cartons, or packages, the quality designations must appear on the two end or side panels with nothing else appearing thereon, except that the name of the manufacturer or the brand of the butter may appear. The same terms appearing on the wrapper shall be used, except that the words "first quality" or "second quality" are to appear as in the following arrangement:

FIRST QUALITY

The numerals shall also appear on each side of the end panel.

- (d) On the half-pound and one-pound carton, the numerals shall be three-quarters of an inch in height and the lettering one-fourth of an inch in height. On cartons or packages of two pounds or more, including chiplets, the numerals shall be one and one-fourth inches in height and the lettering one-half inch in height.
- (e) When the name of the manufacturer or the name of the brand of butter appears in connection with quality designations, they shall be in letters not larger than half the size of the type used for quality designations.
- (f) Quality designations are to be of the same color used for the manufacturer's name or butter brand except where otherwise approved in writing by the director. Yellow and similar colors are not to be used for quality designations.

HISTORY

- 1. Amendment filed 10-7-49 (Register 18, No. 2).
- 2. Amendment filed 9–21–56; effective thirtieth day thereafter (Register 56, No. 18).
- 3. Amendment filed 2–23–62; effective thirtieth day thereafter (Register 62, No. 4).
- Amendment filed 4–25–75 as procedural and organizational; effective upon filing (Register 75, No. 17).

§ 687. Manner of Scoring Butter.

In accordance with the provisions of Section 37102 of the Food and Agricultural Code, the manner for determining the method of scoring butter and for establishing quality ratings in butter shall be as follows:

- (a) The flavor shall be classified in accordance with paragraph (e).
- (b) The defects in body, color and salt shall be rated in accordance with paragraph (f).
- (c) The relation of the quality of the butter to the flavor classification of it as affected by total defects in body, color and salt, shall be determined in accordance with paragraph (g).
- (d) Butter with flavor defects, such as woody, barney, metallic, sour, onion, garlic, or yeasty shall be classified as impure or rancid in the case of lipase. Such butter may be used for renovating purposes.
 - (e) Various identified flavors in butter shall be classified as follows:

Flavor Classification					
Flavor Ratings	93	92	90	Less than 90	
Ŭ.	First	First	Second	Cooking	
Identified Flavor	quality	quality	quality	and baking	
Feed	S	D	P	-	
Cooked	D	D			
Acid		S	D		
Aged		S	D		
Bitter		S	D		
Coarse		S			
Flat		S			
Smothered		S	D		
Storage		S	D		
Malty			S	D	
Musty			S	D	
Neutralizer			S	D	
Scorched			S	D	
Utensil			S	D	
Weed			S	D	
Whey			S	D	
Old cream			Y-2		

S—Slight D—Definite P—Pronounced

When more than one flavor is discernible in a sample of butter, the flavor classification of the sample shall be established on the basis of the flavor that carries the lowest classification.

(f) (1) Defects and disratings for body, color and salt are:

	Disratings			
Defects	Slight	Definite	Pronounced	
Body	o .	v		
Crumbly	1/2	1		
Gummy	1/2	1		
Leaky	1/2	1		
Mealy or grainy	1/2	l	2	
Short	1/2	1		
Weak	1/2	1		
Sticky	1/2	1		
Ragged boring	1	2		

	Distaings			
Color	Slight	Definite	Pronounced	
Wavy	1/2	1		
Mottled	1	2		
Streaked	1	2		
Color Specks	1	2		
Salt				
Sharp	1/2	1		
Gritty		2		

Dimension

(g) The flavor classification and maximum disratings for defects in body and color and salt permitted for each California grade follows;

Flavor	Maximum defect	
Classification	disrating permitted	California grade
93 First quality	1	First quality
93 First quality	1 1/2	Second quality
92 First quality	1/2	First quality
92 First quality		Second quality
92 First quality	1 1/2	Cooking and baking
90 Second qual	ity 1/2	Second quality
90 Second qual:	ity 1	Cooking and baking

(h) Terms used in subsections (e) and (f) of this section are those defined as follows:

SLIGHT. An attribute which is barely identifiable and present only to a small degree.

DEFINITE. An attribute which is readily identifiable and present to a substantial degree.

PRONOUNCED. An attribute which is markedly identifiable and present to a large degree.

AGED. Characterized by lack of freshness.

BITTER. Astringent, similar to taste of quinine and produces a puckery sensation.

ACID. Lacks a delicate flavor or aroma and is associated with an acid condition but there is no indication of sourness.

COOKED. Smooth, nutty-like character resembling a custard flavor.

COARSE. Lacks a fine, delicate smooth flavor.

FEED. Aromatic flavor characteristic of feeds eaten by cows.

FLAT. Lacks natural butter flavor.

MALTY. A distinctive, harsh flavor suggestive of malt.

MUSTY. Suggestive of the aroma of a damp vegetable cellar.

NEUTRALIZER. Suggestive of a bicarbonate of soda flavor or the flavor of similar compounds.

OLD CREAM. Aged cream characterized by lack of freshness and imparts a rough aftertaste on the tongue.

SCORCHED. A more intensified flavor than coarse and imparts a harsh aftertaste suggestive of excessive heating.

SMOTHERED. Suggestive of improperly cooled cream.

STORAGE. Characterized by lack of freshness and more intensified than "aged" flavor.

UTENSIL. A flavor suggestive of unclean cans, utensils and equipment.

WEED. Aromatic flavor characteristic of the weeds eaten by cows. WHEY. A flavor and aroma characteristic of cheese whey.

TERMS RELATING TO BODY

CRUMBLY. When a "crumbly" body is present the particles lack cohesion. The intensity is described as "slight" when the trier plug tends to break and the butter lacks plasticity; and "definite" when the butter breaks roughly or crumbles.

GUMMY. Gummy-bodied butter does not melt readily and is inclined to stick to the roof of the mouth. The intensity is described as "slight" when the butter tends to become chewy and "definite" when it imparts a gum-like impression in the mouth.

LEAKY. A "leaky" body is present when on visual examination there are beads of moisture on the surface of the trier plug and on the back of the trier, or when slight pressure is applied to the butter on the trier plug. The intensity is described as "slight" when the droplets or beads of moisture are barely visible and about the size of a pinhead; "definite" when the moisture drops are somewhat larger or the droplets are more numerous and tend to run together; and "pronounced" when the leaky condition is so evident that drops of water drip from the trier plug.

MEALY OR GRAINY. A "mealy" or "grainy" condition imparts a granular consistency when the butter is melted on the tongue. The intensity is described as "slight" when the mealiness or graininess is barely detectable on the tongue and "definite" when the mealiness or graininess is readily detectable.

RAGGED BORING. A "ragged boring" body in contrast to a solid boring, is when a sticky-crumbly condition is present to such a degree that a full trier of butter cannot be drawn. The intensity is described as "slight" when there is considerable adherence of butter to the back of the trier and "definite" when it is practically impossible to draw a full plug of butter.

SHORT. The texture is short–grained, lacks plasticity and tends toward brittleness. The intensity is described as "slight" when the butter lacks pliability and tends to be brittle; and "definite" when sharp and distinct breaks form as pressure is applied against the plug.

STICKY. When a "sticky" condition is present, the butter adheres to the trier as a smear and possesses excessive adhesion. The intensity is described as "slight" when the smear is present only on a portion of the back of the trier and "definite" when the trier becomes smeary throughout its length.

WEAK. A "weak" body lacks firmness and tends to be spongy. The intensity is described as "slight" when the plug of butter, under slight pressure, tends to depress and is not firm and compact; and "definite" when the plug of butter, under slight pressure, tends to depress easily and definitely lacks firmness and compactness.

TERMS RELATING TO COLOR

MOTTLED. "Mottled" appears as a dappled condition with spots of lighter and deeper shades of yellow. The intensity is described as "slight" when the small spots of different shades of yellow, irregular in shape, are barely discernible on the plug of butter and "definite" when the mottles are readily discernible on the plug of butter.

SPECKS. "Specks" usually appear in butter as small white or dark yellow particles, however, they may be of variable size. The intensity is described as "slight" when the particles are few in number and "definite" when they are noticeable in large numbers.

STREAKED. "Streaked" color appears as light colored portions surrounded by more highly colored portions. The intensity is described as "slight" when only a few are present and "definite" when they are more numerous on the trier plug.

WAVY. "Wavy" color in butter is an unevenness in the color that appears as waves of different shades of yellow. The intensity is described as "slight" when the waves are barely discernible and "definite" when they are readily noticeable on the trier plug.

TERMS RELATING TO SALT

SHARP. "Sharp" salt is characterized by taste sensations suggestive of salt. The intensity is described as "slight" when the salt taste predominates in flavor; and "definite" when the salt taste distinctly predominates in flavor.

GRITTY. A "gritty" salt condition is detected by the sandlike feel of the grains of undissolved salt, on the tongue or between the teeth when the butter is chewed. The intensity is described as "slight" when only a

few grains of undissolved salt are detected and "definite" when the condition is more readily noticeable.

- 3. Repealer of Article 25 (Sections 690-697) and new Article 25 (Sections 690-696) filed 1-26-79; effective thirtieth day thereafter (Register 79, No. 4).
- 4. Repealer filed 7–15–97; operative 8–14–97 (Register 97, No. 29).

§ 691. Flavorings and Colorings.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 32912, 32912.5, 38951, and 38953, Food and Agricultural Code.

HISTORY

1. Repealer filed 7–15–97; operative 8–14–97 (Register 97, No. 29).

§ 692. Frozen Dairy Products Sold at Retail.

(a) Retail stores which package frozen dairy products in the presence of the consumer may make ingredient statements for such products available by other than placement on the package. Such alternative statements shall be printed in a legible manner, understandable under normal conditions by the person purchasing frozen dairy products and may be in the form of a counter card, sign, handbill, or such other form approved in writing by the Director.

(b) With the prior approval of the Director, small retail stores which own, operate, control or supply other retail outlets may, in lieu of the required package labeling, print such ingredient statements in a legible manner on an insert or sleeve placed on or attached to the package, on a bag or other wrapper that contains the package, on a handbill made available to the customer at the time of purchase, or by any other form approved in writing by the Director.

§ 750. Removal of Cattle, etc., from Slaughterhouse Pens, etc.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Section 9164, Food and Agricultural Code.

HISTORY

1. Repealer of Article 1 (Section 750) filed 1–14–86; effective thirtieth day thereafter (Register 86, No. 3).

Article 1.5. Bovine Brucellosis

§ 752. Vaccine, Vaccination, and Test Reagents.

- (a) Approved *Brucella* Vaccine. A vaccine, approved by and produced under license of the United States Department of Agriculture, to increase the resistance of cattle to brucellosis infection. It shall be procured and distributed by the California Department of Food and Agriculture. Direct sale of Brucella vaccine without approval of the California Department of Food and Agriculture is prohibited.
- (b) Official Vaccinate. A female bovine animal, when vaccinated identified, and reported, by a federal or state veterinarian or an accredited, contract veterinarian with an approved *Brucella* vaccine, is classified as an:
- (1) official brucellosis calfhood vaccinate when vaccinated against brucellosis at the prescribed age for calfhood vaccination, or
- (2) official brucellosis adult vaccinate when vaccinated against brucellosis, at an age older than the age prescribed for calfhood vaccination as part of an individual whole–herd adult vaccination plan.
- (c) Calfhood Vaccination (official brucellosis calfhood vaccinate). All female dairy calves shall be vaccinated against brucellosis with an approved *Brucella* vaccine between the ages of four (4) through 12 months (120 through 365 days). Female beef calves, if vaccinated against brucellosis, shall be vaccinated between the ages of four (4) through 12 months (120 through 365 days). All calves vaccinated pursuant to this Section shall be identified in compliance with Sections 752.1 and 752.2. The use of all vaccines for brucellosis calfhood vaccination and eartags used for identification shall be reported to the Animal Health Branch within 14 days. A report of heifer calves vaccinated for brucellosis shall contain the following information:

- (1) County of vaccination; herd number, if available; Animal Health District.
 - (2) Name of the herd owner.
 - (3) Address or P.O. Box number, city, state, location of calves.
- (4) Date of vaccination; optionally, the date of next vaccination (month and year).
 - (5) Number and type of calves vaccinated (dairy, beef, total).
 - (6) Eartag numbers applied.
- (7) Vaccine information: manufacturer, serial number, expiration date.
- (8) A statement to be signed by the contract veterinarian, identified by license number, vaccinating the calves certifying that: the calves were vaccinated with an approved brucellosis vaccine; the calves were in the prescribed age range when vaccinated; each calf was tattooed in the right ear with the official tattoo showing the correct quarter of the year or type of vaccine and year; each calf was tagged with an official calf vaccination eartag in the right ear, unless the vaccinating veterinarian received a request in writing by the owner, or owner's agent, not to apply the eartag.
- (9) Acknowledgment signed by the owner or agent that the described calves were vaccinated and that all calves were within California's prescribed vaccination age limits.
- (10) Optional request that may be signed by the owner or owner's agent not to apply the official vaccination eartags to the calves because they can be identified as vaccinates within the herd.
- (d) Adult Vaccination (official brucellosis adult vaccinate). A female bovine animal over the eligible age prescribed for calfhood vaccination may be vaccinated with an approved adult brucellosis vaccine as a part of an individual whole–herd vaccination plan as agreed to by the Department and the owner of that herd. Adult vaccination shall be supervised by a state or federal veterinarian. Each animal vaccinated under this plan shall be negative to an official blood test for brucellosis before vaccination and shall be permanently identified in accordance with the agreement developed as part of the whole–herd vaccination plan. Blood for testing may be collected at the time of vaccination if the owner agrees to remove all brucellosis titered animals from the herd immediately upon receipt of the test results. Test eligibility before adult vaccination shall be determined by the Designated or District Epidemiologist.
- (e) Accredited Veterinarian. A veterinarian approved by the Administrator, or a person authorized to act for the Administrator, Animal and Plant Health Inspection Service (or equivalent titled agency), of the United States Department of Agriculture, in accordance with the provisions of Title 9, Part 161, Code of Federal Regulations, to perform functions required by cooperative State–Federal disease control and eradication programs.
- (f) Contract Veterinarian. An accredited veterinarian who has a valid contract with the Animal Health Branch, California Department of Food and Agriculture, to vaccinate animals in California against brucellosis and perform other brucellosis regulatory procedures if included in the vaccination contract or if included in a separate contract.
- (1) The contract for vaccinating female calves against bovine brucellosis shall include the following information: Full name, mailing address, telephone number, California state license number, accreditation date, and Animal Health District of the practice of the accredited veterinarian contracting with the Department; and dates of issue and expiration of the contract.
- (2) The contracting veterinarian will agree to: vaccinate female calves with an approved *Brucella* vaccine within the ages prescribed by regulation; apply the official permanent tattoo of brucellosis vaccination and the official brucellosis calfhood vaccination eartag in the right ear of the vaccinate; perform the vaccination, eartagging, and tattooing in a sanitary and professional manner; store unmixed vaccine as directed by the manufacturer; use the reconstituted vaccine as mixed and not hold for future use; dispose of unused reconstituted vaccine according to biohazard waste guidelines; complete, sign, and record his/her state veterinary license on a calf vaccination report as described in Section(c), above; obtain the owner (or agent) signatures as applicable on the report; give the

owner a copy of the vaccination report at the time of vaccination; and send a copy of the report to the local Animal Health District Office within 14 days.

- (3) The contract veterinarian shall also agree to follow any official supplemental written or oral instructions furnished by Animal Health personnel related to methods and procedures associated with any brucellosis contract; notify the local Animal Health District Office of movement to another district; and return all supplies and materials supplied by the State to an Animal Health District Office at the termination of the contract.
- (4) The contract shall expire on the stated expiration date unless terminated earlier by ten (10) days written notice by either party. The contract shall be valid for up to two (2) years.
- (5) The contract shall be signed for the Department by the Chief of the Animal Health Branch or a Staff Veterinarian designated by the Chief. The Department may suspend temporarily or cancel the contract of a veterinarian not complying with any part of the contract.
- (g) Designated Epidemiologist. A state or federal veterinarian with knowledge of brucellosis epidemiology, selected by state and federal veterinarians in charge, with the concurrence of the United States Department of Agriculture brucellosis staff. The Designated Epidemiologist will coordinate and evaluate the Brucellosis Eradication Program as assigned.
- (h) District Epidemiologist. A district or field veterinarian selected by the Chief of the Animal Health Branch to supervise brucellosis disease control and eradication within a herd or a district.
- (i) Purchase, Possession, Sale, and Use of *Brucella* Diagnostic Test Reagents or Vaccine.
- (1) The following may purchase, possess, or use *Brucella* vaccines and diagnostic test reagents containing *Brucella* microorganisms or components thereof in California:
- (A) Federal, state, county, or municipal veterinarians, or public health officials in their official capacities.
 - (B) Contract veterinarians.
- (C) Laboratories approved by the United States Department of Agriculture, their distributors, or agents.
- (2) The following may purchase, possess, or use *Brucella* diagnostic test reagents and materials:
- (A) Laboratories having a permit from the California Department of Health Services to operate under the State Clinical Laboratory Act.
- (B) Laboratories approved for public health work by the California Department of Health Services.
- (3) All sales or transfers of *Brucella* test reagents or vaccines containing *Brucella* microorganisms or components thereof by manufacturing laboratories, their distributors or agents, to persons or laboratories within California shall be limited to those persons or laboratories specified in paragraphs (1) and (2) above. Sales or transfers of vaccine shall be reported by letter through the U. S. Postal Service, to the California Department of Food and Agriculture, Animal Health Branch, 1220 N Street, Sacramento, CA, 95814, within five (5) business days after the date of sale or transfer.

NOTE: Authority cited: Sections 407, 10324, 10326 and 10327, Food and Agricultural Code. - Repealer of former article 1.5 (sections 752–754.21) and section, and new article 1.5 (sections 752–754.2) and section filed 5–24–99; operative 6–23–99 (Register 99, No. 22).
- 3. Amendment of subsection (c) filed 4-2-2007; operative 5-2-2007 (Register 2007, No. 14).

§ 752.1. Official Tattoo of Calfhood Vaccination.

The official tattoo indicating bovine brucellosis calfhood vaccination shall be placed in the right ear of each calf vaccinated. All elements of the tattoo will be made by a series of pins and followed with the application of a tattoo ink furnished or approved by the Department as being suit-

able to produce a permanent tattoo in the ear. It shall consist of three (3) elements in order from left to right as follows:

- (a) First Element.
- (1) If vaccinated with Strain 19 vaccine, the first element will be the capital letter "A," "B," "C," or "D", indicating the quarter of the year in which the animal was vaccinated: "A" for the first quarter (January–March), "B," "C," and "D" for the second, third, and fourth quarters respectively.
- (2) If vaccinated with RB-51 vaccine the first element will be the capital letter "R".
- (3) If a vaccine other than Strain 19 or RB-51 is used, a different first element may be designated by the Department and used in the tattoo.
- (b) Second Element. The second element will be the official United States Department of Agriculture shield tattoo insert as registered with the United States Commissioner of Patents, Washington, D.C.
- (c) Third Element. The third element will be the number designating the last digit of the year in which the animal was vaccinated.

The second and third elements of the tattoo will be as described regardless of the *Brucella* vaccine used. An example of a complete tattoo is illustrated below:

NOTE: Authority cited: Sections 407, 10324, 10326 and 10327, Food and Agricultural Code. Reference: Sections 10352 and 10356–10359, Food and Agricultural Code; and Title 9, Section 78.1, Code of Federal Regulations, January 1, 1997 Edition

HISTORY

- 1. New section filed 3-5-62; effective thirtieth day thereafter (Register 62, No. 5).
 2. Amendment filed 4-16-68; effective thirtieth day thereafter (Register 68, No. 16).
- 3. Amendment filed 8–22–78; effective thirtieth day thereafter (Register 78, No. 34)
- 4. Repealer and section filed 5–24–99; operative 6–23–99 (Register 99, No. 22).

§ 752.2. Official Eartag of Calfhood Vaccination.

In addition to the official brucellosis tattoo, each calf vaccinated against brucellosis shall have an official brucellosis calfhood vaccination eartag placed in the right ear by the veterinarian performing the service. The official brucellosis eartag shall be orange in color and bear the legend "Calif. Vac." and a nine-character alphanumeric code that conforms to the nine-character alpha-numeric National Uniform Eartagging System. An eartag will not be required if the owner of the calf signs the written request for exemption that is part of Section 752(c)(10) and has other means of identifying the animal within the herd.

NOTE: Authority cited: Sections 407, 10324, 10326 and 10327, Food and Agricultural Code. Reference: Sections 10323, 10325, 10352 and 10356–10359, Food and Agricultural Code; and Title 9, Section 78.1, Code of Federal Regulations, January 1, 1997 Edition.

HISTORY

1. New section filed 5-24-99; operative 6-23-99 (Register 99, No. 22).

§ 752.3. Testing.

(a) Test Samples. Blood, milk, or other samples for brucellosis eradication program testing shall be taken from cattle only by accredited veterinarians licensed to practice veterinary medicine in California, designated representatives from federal, state, or county governments, or persons authorized by the California Department of Food and Agriculture or United States Department of Agriculture at slaughter establishments. Test samples shall be collected from brucellosis suspect or reactor animals at slaughter when requested by the District or Designated Epidemiologist. All cattle tested for the brucellosis program shall be individually identified using eartags, registration numbers, or other methods of identification approved as satisfactory for individual identification by the Department. Each individual identification recording shall include the brucellosis vaccination status of the animal from which the sample was taken. All specimens submitted for brucellosis program testing shall be accompanied with sufficient information to identify the owner's name, address, location of the animals, and the purpose of the test. As an aid to brucellosis disease surveillance in California, a diagnostic labora-

Page 52

tory may test any non-program specimens submitted for analysis by any person for the presence of signs of *Brucella* species.

- (b) Official Tests and Procedures. All brucellosis test protocols, procedures, and methods approved by the California Department of Food and Agriculture and the United States Department of Agriculture as being suitable to detect the presence of *Brucella*, or *Brucella* antibodies or components shall be regarded as official.
- (c) Testing Laboratories. Tests for brucellosis shall be made only by persons approved by the Department or by the United States Department of Agriculture as proficient in brucellosis testing in a laboratory or facility of the following:
 - (1) United States Department of Agriculture.
 - (2) California Department of Food and Agriculture.
- (3) University of California, California Veterinary Diagnostic Laboratory System.
 - (4) A County Veterinarian when approved by the Department.
- (5) The designated veterinarian of a Specifically Approved Stockyard (as defined in Title 9, Section 78.44, Code of Federal Regulations, January 1, 1997 Edition).
- (6) Those possessing a permit from the California Department of Health Services.
- (d) Test Reporting. Every positive brucellosis test shall be reported by telephone to the Animal Health Branch within 24 hours after completion by the laboratory conducting the test. All other results shall be reported within five (5) business days of the test.
 - (e) Blood Test Eligible.
- (1) Female cattle officially vaccinated for brucellosis with Strain 19 are eligible for testing if:
- (A) dairy breed 18 months of age and over (as evidenced by the loss of the first pair of temporary incisor teeth).
- (B) beef breed 24 months of age and over (as evidenced by the presence of the first pair of fully erupted permanent incisor teeth).
- (C) any age dairy or beef breed if parturient (visibly prepared to give birth or within two (2) weeks of giving birth, a "springer") or post–parturient (having already given birth).
- (2) Female cattle not vaccinated with a *Brucella* vaccine or officially vaccinated with other than Strain 19 are eligible for testing if six (6) months of age and over.
- (3) Bulls over 18 months of age (as evidenced by the loss of the first pair of temporary incisor teeth).
- (4) Steers and identified spayed heifers are exempt from brucellosis testing.
- (5) As determined by the Designated or District Epidemiologist on a case-by-case basis in exposed or affected herds where testing of animals might be indicated as part of the epidemiological disease evaluation. NOTE: Authority cited: Sections 407, 10324 and 10326, Food and Agricultural Code. Reference: Sections 461, 520, 521, 527, 5006, 9101, 9165-9169, 9531, 9532, 9561-9567, 10301-10311, 10321-10323, 10325, 10381-10385, 10387 and 10493, Food and Agricultural Code; and Title 9, Section 78.1, Code of Federal Regulations, January 1, 1997 Edition.

HISTORY

1. New section filed 5-24-99; operative 6-23-99 (Register 99, No. 22).

§ 752.4. Classifying.

- (a) Classifying Animals.
- (1) Reactor Animals are classified or reclassified as brucellosis reactors by a Designated or District Epidemiologist when:
- (A) official testing and interpretation of the results indicate the animal has been infected with *Brucella*, or
 - (B) epidemiologic evidence indicates a reactor status.
- (2) Suspect Animals are classified or reclassified as brucellosis suspects by a Designated or District Epidemiologist when:
- (A) official testing and interpretation of the results suggest infection, or
 - (B) epidemiologic evidence indicates a suspect classification.
- (3) Negative Animals are classified or reclassified as brucellosis negative by a Designated or District Epidemiologist when:

- (A) official tests performed are negative for brucellosis, or
- (B) epidemiologic evidence indicates negative brucellosis status.
- (b) Classifying Herds.
- (1) Affected Herd A herd in which any animal has been infected with field strain *Brucella*, has been classified as a brucellosis reactor, and has not been released from Hold Order.
- (2) Exposed Herd A herd containing one or more animals known to be exposed, or had an opportunity to be exposed, to brucellosis infected animals or materials possibly contaminated with *Brucella*.
- (3) Herd Not Known to be Affected A herd in which no field strain brucellosis reactors have been found, or a herd in which one or more animals have been classified as a brucellosis reactor, but has since been released from Hold Order.
- (c) Hold Order. A written directive by a department representative to confine one or more animals to a specific location to:
- (1) limit exposure of other animals to an exposed, possibly diseased, or a diseased animal.
- (2) restrict movement of animals with unknown brucellosis vaccination or disease status until their status is clarified.
 - (3) control movement of non-brucellosis vaccinated animals.

The Hold Order is a written notice and order to hold animals on their current premises. It shall contain the following information: date of writing; name of the owner, or owner's agent; description of the animals being held; where they are located; and why they are being placed under a Hold Order (infected with..., infested with..., exposed to..., or may have been exposed to..., and may transmit, carry, or distribute the disease); the name, title, and date of issue by the person issuing the notice or order; and the name of the person, if known, receiving the Hold Order. Absence of a signature by the owner or owner's agent acknowledging receipt does not invalidate the essence of the Hold Order. If a temporary verbal Hold Order is issued, it shall be followed with a written Hold Order, mailed within three (3) business days. To appeal the issuing of a Hold Order, the Chief of the Animal Health Branch of the Department must be contacted within seven (7) days of the issue of the order. This procedure to appeal the Hold Order shall be stated in the order. Animals confined under a Hold Order may be moved, if it appears to the Department that there will be no disease risk associated with the movement and the movement is in compliance with a prior written agreement between the owner and the Department. The Hold Order may be released as determined by the person issuing the order or a Designated or District Epidemiologist.

NOTE: Authority cited: Sections 407, 10324, 10326, 10327 and 10386, Food and Agricultural Code. Reference: Sections 461, 5006, 9163–9169, 9561–9567, 9574, 9698–9702, 10301–10311 and 10493–10496, Food and Agricultural Code; and Title 9, Section 78.1, Code of Federal Regulations, January 1, 1997 Edition.

History

1. New section filed 5-24-99; operative 6-23-99 (Register 99, No. 22).

§ 752.5. Reactors.

- (a) Identifying Reactors. When any animal is classified as a brucellosis reactor it shall be immediately identified with an official brucellosis reactor eartag attached to the left ear. Identification shall be supervised by the accredited veterinarian who collected the blood, milk, or other sample, or by a government official designated by the District Veterinarian. The person supervising the identification shall report its completion in person or by telephone to the Animal Health Branch within five (5) business days.
- (b) Disposing of Reactors. A reactor shall be slaughtered within 30 days of identification and shall be confined under a Hold Order on the premises where found until it is moved for immediate slaughter. Before reactors are moved they require written permission to move to either a facility authorized by the Department to handle brucellosis reactors or directly to the holding pens of a slaughter establishment approved by the Department as capable of maintaining the identity of a reactor and confirming its slaughter. The reactor shall not be hauled with other animals unless they are also going to immediate slaughter, nor be unloaded on premises or facilities used for holding or handling livestock for any other purpose than consignment for slaughter. Vehicles used for transporting

Page 53 Register 99, No. 25; 6–18–99

reactors shall be cleaned and disinfected before reuse for transporting other livestock. A reactor may be slaughtered on the premises by the owner, providing the slaughter is witnessed by a government official designated by the District Veterinarian and a statement acknowledging a possible public health hazard is signed by the owner prior to slaughter. Any contaminated materials shall be removed and the premises shall be cleaned and disinfected within 15 days of removal of reacting animals, using methods and materials recommended after a case—by—case evaluation by the Department. The 15—day cleanup period may be extended due to unforseen circumstances not within control of the owner, if upon request for an extension, it is determined by the Department that the extension will not adversely affect the Brucellosis Eradication Program.

(c) Immediate Slaughter. Animals for immediate slaughter shall be delivered without diversion to the slaughtering establishment within 10 days from the date the animals were either consigned to slaughter or a permit was issued for their consignment to slaughter. Such animals, upon delivery to the slaughtering establishment, shall be slaughtered within 10 days after arrival unless, due to unforseen circumstances not within control of the slaughter facility, the slaughter facility requests an exemption and the exception is granted by the Department.

HISTORY

1. New section filed 5-24-99; operative 6-23-99 (Register 99, No. 22).

§ 753. Moving Intrastate.

- (a) General.
- (1) The Department may refuse permission to transport animals within California where there may be a danger of infection or spread of brucellosis
- (2) In the case of demonstrated hardship, or of an emergency beyond the control of the cattle owner, the Department may issue a permit allowing cattle to move from one location to another if it is determined that there are adequate safeguards. Special conditions may be imposed and reports may be required.
- (3) When requested by a department representative or other official, any person transporting cattle within California shall produce documents for inspection proving that each animal in the load is moving in compliance with brucellosis laws and regulations. Animals in any load or part of a shipment may be inspected en route or after arrival.
- (4) Documents recording intrastate movements shall be kept by the owner of the animal for two (2) years and shall be available for examination and copying upon request by a department representative.
- (5) Slaughter cows of any age and bulls over 24 months of age, whether beef or dairy breeds, shall be identified before slaughter by a United States Department of Agriculture backtag or other similar backtag that will give equivalent individual animal identification and is approved by the Department for identification purposes prior to use. The backtag number shall be correlated with sufficient ownership information to enable the tracing of each animal to its origin.
- (6) A "Permit to Move" is a written document to move animals under a Hold Order, or other restriction, between premises within California or to a state border, in accordance with Section 9566 of the Food and Agri-

cultural Code. At a minimum, it shall contain: the county of origin of the movement; date, and hour if applicable, of issue; the owner's name and address; permission to move animals identified by the number, species, type, tag numbers, and any other information that might be necessary to sufficiently identify the animals being moved; the reason for the Hold Order or restriction; location the animals are being moved from; purpose of the movement; and a destination described by location and name (slaughterer, stockyard, person, etc.). Other information may be included in the permit if it is pertinent to the movement. No diversion will be permitted between origin and destination. An expiration time will be stated in days and/or hours from the issue date and time. The permit for movement shall be signed, with title, by the issuing Animal Health Branch representative. The original shall accompany the shipment, with a copy for each load in the shipment; and copies to the destination (if applicable), the local district office, and to headquarters.

- (b) Dairy. No person shall move, or cause to be moved, from one location to another within California or receive, or cause to be received, any female cattle of the dairy breeds unless they bear evidence of official brucellosis vaccination by the presence of a legible official brucellosis tattoo. The following are exempt from the vaccination requirements of this Section:
 - (1) calves less than four (4) months of age.
 - (2) cattle consigned for immediate slaughter.
- (3) cattle moving only for pasture or grazing purposes to premises under the control of the owner of the cattle and returning to the premises of their origin, providing there has been no commingling with other cattle.
 - (4) permanently identified spayed females.
- (5) cattle not vaccinated against brucellosis moving with a special entry or other written permit to move.
- (c) Beef. All female cattle of the beef breeds more than 12 months of age subjected to a change of ownership within California shall bear evidence of official brucellosis calfhood vaccination by the presence of an official tattoo unless:
 - (1) permanently identified as a spayed female, or
 - (2) moving directly to a slaughter establishment, or
- (3) sold to slaughter through a saleyard approved, in this instance, by the Department as capable of maintaining identification of animals moving through the facility, or
- (4) moving to a registered feedlot included in a registry of currently approved feedlots maintained by the Department (Sections 20013 and 21081–21084, Food and Agricultural Code) for feeding for up to six (6) months before going to slaughter. These animals shall be moved directly to a slaughter establishment under official government inspection from the registered feedlot.

- 4. Certificate of Compliance filed 1-16-74 (Register 74, No. 3).
- Amendment filed 12–26–75; effective thirtieth day thereafter (Register 75, No. 52).
- 6. Amendment filed 7–30–81; effective thirtieth day thereafter (Register 81, No. 31).
- 7. Repealer and new section filed 5–24–99; operative 6–23–99 (Register 99, No. 22).

§ 753.1. Interstate Entry.

- (a) General.
- (1) The Department may deny permission to transport any species of animal or animal material into California when there may be a danger of infection from brucellosis.

Page 54 Register 99, No. 25; 6–18–99

- (2) The provisions of this Section are in addition to other California requirements for moving cattle and bison into and within California and any requirements of the United States Department of Agriculture.
- (3) The term "Health Certificate", where used in this Chapter, refers to a numbered interstate "Health Certificate", "Certificate of Veterinary Inspection", or a similar titled document that is a record of veterinary health inspection of one or more animals, issued on an official form by an accredited veterinarian from the state of origin. A Health Certificate shall be valid for 30 days following the inspection of the animals described.
- (4) The term "official certificate", where used in this Chapter, shall refer to a Health Certificate, Brand Inspection Certificate, or other official inspection or movement document issued by a federal or state animal health or brand inspection representative or an accredited veterinarian at the point of origin prior to an interstate animal movement into California.
- (5) Upon request by a department representative or other official, any person transporting animals into California shall produce documents for each load or part of a shipment, to prove that each animal transported, pursuant to a permit and/or Health Certificate, falls within a stated requirement or exception. Animals in any load or part of a shipment may be inspected en route or after arrival.
- (6) No person(s) or entity shall receive or accept female cattle or bison transported from outside of California unless first presented with a copy of the documents required for entry. The recipient shall verify that each animal received is described on the importation documents, is identified and tested as required, and each brucellosis vaccinated animal bears a legible official brucellosis calfhood vaccination tattoo.
- (7) Permits, Health Certificates, and other transportation records shall be kept by the recipient for two (2) years after the animals entered California and shall be available for examination and copying upon request by the Department.
- (8) All costs of movement and post entry testing of cattle and bison shall be borne by the owner.
- (9) Native animals are considered to be a group of animals under one owner, on the premises where they were born, or have been kept for at least four (4) months before shipping, provided animals have not been added to the group on the premises within the four (4) months prior to the date of shipping.
- (10) Groups of animals, with no outside additions in the previous four (4) months, under common ownership or supervision, located on two or more geographically separate premises where animals from the different premises have been interchanged or had contact with each other, may be considered a "herd".
- (11) Only bison originating from herds not known to be affected with brucellosis will be considered for entry into California. Test data may be required to document that the herd of origin is free from brucellosis infection. Federal brucellosis classifications for states for cattle shall not apply to bison or other animal species.
 - (b) Entry Permits.
- (1) Permits for cattle and bison to enter California shall be obtained from the Animal Health Branch. Requests for entry permits may be made by telephone; however, written application may be required when necessary to accomplish the purposes of this section. Each entry permit shall have a unique number and shall expire 15 days after issuance, unless a special entry permit has been issued for a different period. No diversion shall be allowed from the requested destination after entry.
- (2) A separate entry permit is required for each shipment containing female cattle of any age, male cattle 18 months of age and over, and bison of any age and sex, before they are transported into California. The entry permit number shall be recorded on the documents accompanying the shipment.
 - (3) The applicant for the entry permit shall:
- (A) establish that all animals in the shipment meet California brucellosis entry requirements, and
 - (B) possess a properly completed Health Certificate when required.

- (4) If the Department suspects or has knowledge indicating that the proposed movement might be a disease threat to California animals, or that the animals might not actually meet California entry requirements, the Department may refuse to issue a permit. The Department may require that brucellosis pre-entry testing procedures (Section 753.1(e)(1)) be completed and the results be presented to a branch brucellosis epidemiologist for evaluation before considering an entry permit. If an entry permit is issued, the Department may require, as part of the entry permit, that all of the animals in the shipment be transported to a designated inspection station immediately upon arrival in California, or held separate at their destination, for inspection by Animal Health Branch personnel. If after inspection the Department finds that all requirements for entry have been satisfied and the animals do not appear to be a disease risk and have met California entry requirements, the transporter will be given permission to deliver the animals to their destination, or they will be released if already at their destination. The entry documents will be validated as necessary.
- (5) If the Department finds that the conditions of an entry permit have not been satisfied, additional proof may be required promptly from the person(s) transporting or receiving the animals. Failure to establish that the requirements for entry have been fully complied with or finding that the animals may pose a disease risk, the Department may place the animals under Hold Order until their disposition is determined and, at the expense of the owner of the animals or person in possession thereof:
 - (A) require vaccination or testing to remain in California, or
- (B) deny permission to deliver the animals in California and require that the animals be returned to their origin, transported out of state, or be consigned to immediate slaughter.
- (6) If any person has given false information to obtain an entry permit for transporting animals into California, has failed to fulfill the conditions of an entry permit, has failed to obtain an entry permit as required, or has caused brucellosis infection in California as a result of importing an infected animal, the Department may levy a penalty (Sections 9166 and 9574, Food and Agricultural Code), and/or refuse to grant future entry to such person, and/or others associated with such violations.
- (7) Notification of suspension of a special entry permit may be made by personal service or by telephone with confirmation by regular mail.
- (8) Requirements for movement with regular entry permits or movements associated with special entry permits may be modified in the event of an outbreak of brucellosis or other disease requiring restriction of animal movements.
- (9) Most permits to allow entry of cattle into California are applied for by telephone or other electronic means accepted by the Department. A permit number, indicating approval of the application, is usually issued immediately over the telephone after entry information is gathered. The entry permit generally will be a paper or computer record for internal Animal Health Branch use and a copy will not be sent to the applicant unless specifically requested or it is needed to accompany a shipment. The information required for a regular entry permit to enter California shall include: date of issue; permit number; name of the shipper or importer; origin of the shipment; description of the animals being imported (number, type, etc.); name and mailing address of entity receiving the animals; a geographic destination if animals are not being received at the destination mailing address; purpose of the importation; name and telephone number of a contact person in California, if not the owner; name and telephone number of the person requesting the permit; the Health Certificate number, if available; name of herd veterinarian, if available; and a list of entry requirements for the type of animals entering. Additional information may be required for a special entry permit.
 - (c) Health Certificates.
- (1) A copy of a properly completed Health Certificate with individual identification where required shall accompany each load or part of a shipment entering California containing:
 - (A) female dairy cattle more than four (4) months of age, and

- (B) female beef cattle and all bison more than six (6) months of age, and
 - (C) cattle bulls more than 18 months of age, and
 - (D) any animal requiring a blood test prior to entry.
 - (2) A Health Certificate shall not be required if:
- (A) all the animals in the shipment are entering for direct delivery to a slaughter establishment for immediate slaughter under official government inspection, or
- (B) they have a special entry permit that exempts them from the health certificate requirement.
- (3) A valid Brand Inspection Certificate may be substituted for the individual animal identification required on a Health Certificate for native cattle entering from a brucellosis Class Free State (as defined in Title 9, Code of Federal Regulations, Section 78.1, January 1, 1997 Edition) with an official brand recording agency provided all the animals in the shipment are one owner branded animals, the brand is registered to that owner, and no brucellosis blood test is required prior to entry. The Brand Inspection Certificate shall be numbered or made unique to identify it as representative only of that particular shipment. The Brand Inspection Certificate shall list the ownership brand, consignor, consignee, origin, destination, number and description of the animals, and shall be attached (stapled) to the Health Certificate. All animals in the shipment shall be officially calfhood vaccinated against brucellosis and have legible brucellosis vaccination tattoos. The owner, or the owner's designated agent, shall sign a certification on the Health Certificate indicating that:
- (A) the shipment consists only of native cattle originating from a brucellosis Class Free State, and
- (B) the animals in the shipment have been officially brucellosis calfhood vaccinated and have legible official brucellosis tattoos as evidence of vaccination.
- (4) A valid Brand Inspection Certificate may be substituted for the individual animal identification required on a Health Certificate for native, non-test eligible (Section 752.3(e)) cattle, from a brucellosis Class A State (as defined in Title 9, Code of Federal Regulations, Section 78.1, January 1, 1997 Edition) provided the requirements of Section 753.1(c)(3) are fulfilled.
- (5) The Health Certificate shall be signed by the accredited veterinarian who examined the animals in the shipment. It shall include: the permit number; a description of the animals; complete information on the consignor, consignee, origin, and destination; the federal brucellosis classification of the state of origin; purpose of the movement; and owner's certification and agreement when required in Section 753.1(f) or as specified by another disease control code or regulation. For test eligible animals, as described in Section 753.1(e), the description shall include individual animal identification with the official eartag number, a representation of the brucellosis vaccination tattoo present, brucellosis test date and results. A copy of the official brucellosis test record with a description of each animal, its eartag number, its brucellosis vaccination tattoo, and blood test results may be attached to each copy of the Health Certificate instead of transferring that information onto the certificate. Brucellosis vaccinated animals that are exempt from testing requirements, and are entering California for movement and sale within the State shall have the presence of vaccination and legible tattoos certified by the owner. The Health Certificate, with attachments, shall be available for examination en route and after arrival in California. A copy of the completed Health Certificate shall be sent to the California State Veterinarian's office within 15 days of examination. Purebred registered cattle entering California, if not utilizing an official vaccination eartag and tattoo for identification, may be identified by a registration ear tattoo and their official brucellosis calfhood vaccination tattoo, or by another method of permanent identification as requested by the owner and approved by the Department.
- (6) The examining accredited veterinarian shall indicate on the Health Certificate that each animal in the shipment meets California entry requirements.
- (7) It may be necessary to obtain a Health Certificate for entry into California because of a disease condition in another state, even though

- the animals are exempt from obtaining a Health Certificate by brucellosis regulations.
 - (d) Vaccination Requirements.
- (1) Official brucellosis calfhood vaccination, indicated by the presence of a legible official calfhood vaccination tattoo as evidence of the vaccination, is required for entry of each:
 - (A) dairy breed female more than four (4) months of age.
- (B) beef breed female more than 12 months of age and requested of each beef breed female more than six (6) months of age.
 - (2) Non-brucellosis vaccinated female:
- (A) dairy and beef breed calves of brucellosis vaccination age will be allowed to enter California if they meet the requirements of a prior special entry permit to be vaccinated against brucellosis on arrival.
- (B) dairy breed cattle over eight (8) months of age, and beef breed cattle over 12 months of age shall not be eligible for entry into California unless entering:
 - 1. with a special entry permit, or
- 2. for immediate slaughter at a slaughter establishment under official government inspection.
 - (3) Brucellosis vaccination is not required for entry of:
 - (A) dairy breed female calves less than four (4) months of age.
 - (B) beef breed female calves less than six (6) months of age.
 - (C) bison, steers, bulls, and identified spayed female cattle.
 - (e) Test Requirements.
- (1) Blood for pre-entry testing shall be collected within 30 days before entry and tested by a laboratory approved for brucellosis testing by federal or state officials. An additional signed statement must be included on the Health Certificate that explains how the test results were verified to represent each animal in the shipment when the blood was not collected and submitted to the laboratory by the veterinarian issuing the Health Certificate.
- (2) No animals will be allowed to enter California if they are part of a lot or herd in which a reactor has been found.
- (3) Cattle from non-Class Free States and cattle from a Class Free State that are not native to that state (Section 753.1(a)(9)) must have a negative brucellosis blood test record prior to entry if they are:
- (A) non-brucellosis vaccinated female calves of brucellosis vaccination age entering under a special entry permit to be vaccinated on arrival, or
- (B) brucellosis vaccinated dairy breed females 18 months of age and over, or
- (C) brucellosis vaccinated beef breed females 24 months of age and over, or
 - (D) parturient (springers) or post-parturient of any age, or
 - (E) cattle bulls 18 months of age and over, or
- (F) beef heifers six (6) months of age and over not vaccinated against brucellosis.
- (4) Bison (except steers and identified spayed heifers) from any state must have a negative brucellosis blood test record prior to entry if they are:
- (A) non-brucellosis vaccinated female calves of brucellosis vaccination age entering under a special entry permit to be vaccinated on arrival, or
- (B) six (6) months of age and over and not vaccinated against brucellosis, or
 - (C) brucellosis vaccinated females 24 months of age and over, or
 - (D) parturient (springers) or post-parturient of any age.
- (5) Non-brucellosis vaccinated female animals with a special entry permit from any class state must be brucellosis test negative prior to entry if they are:
 - (A) registered cattle entering for preserving or developing bloodlines.
- (B) cattle or bison entering a registered feedlot included in a registry of currently approved feedlots maintained by the Department for feeding prior to slaughter.
 - (6) The test requirements of this Section do not apply to:
 - (A) cattle native to brucellosis Class Free States that are:

Page 56 Register 99, No. 25; 6–18–99

- 1. non-brucellosis vaccinated female calves of brucellosis vaccination age entering under a special entry permit to be brucellosis vaccinated on arrival, or
- 2. officially calfhood brucellosis vaccinated female cattle of any age with legible official brucellosis vaccination tattoos, or
 - 3. bulls.
- (B) cattle and bison irrespective of the status of the state of origin transported into California that are:
- 1. for direct delivery to a slaughter establishment for immediate slaughter under official government inspection.
 - 2. dairy breed female calves less than four (4) months of age.
 - 3. brucellosis vaccinated dairy breed females under 18 months of age.
 - 4. beef breed female calves less than six (6) months of age.
 - 5. brucellosis vaccinated beef breed females under 24 months of age.
- 6. cattle bulls less than 18 months of age, steers, and identified spayed females.
- 7. cattle and bison from current Certified Brucellosis-Free Herds. The herd number and the date of the current test shall be recorded on the Health Certificate.
- 8. cattle consigned directly to a Specifically Approved Stockyard. There shall be no movement out of a Specifically Approved Stockyard except to slaughter, or to leave California, unless the animals meet all California entry requirements.
- 9. officially brucellosis calfhood vaccinated dairy breed females returning with a special entry permit after feeding another state.
 - (f) Special Entry Permits.
- (1) Dairy heifers, officially brucellosis calfhood vaccinated originating in California, feeding in a Class Free State for a period of time, and returning to the property of the same owner in California, may be granted a special entry permit for the return of the vaccinated dairy heifers to California, valid for 15 days, to return to California without a brucellosis blood test if the owner, or designated agent of the owner, signs and dates a form containing the following certification, agreement, and information:
 - (A) certifying:
- 1. to continuous ownership of the heifers prior to leaving and while out of California.
- 2. that cattle from states other than California have not been added to the group while out of California.
- 3. that the returning heifers have not commingled with another owner's cattle during transportation and while out of California.
- 4. that all animals in the shipment originated in California and were officially brucellosis calfhood vaccinated at the prescribed age and have legible official brucellosis tattoos.
- 5. that the heifers have not left the Class Free State where they were feeding.
- 6. to examination of each animal in the shipment for health and identification purposes within the 30 days prior to return to California and certifying that as a result of that examination that:
 - a. each animal is apparently healthy;
- b. a legible recording has been made of each animal's individual identification, both official and herd, a representation of the official brucellosis tattoo, breed, and approximate age, on a list which contains the same information about all of the animals in the shipment.
 - (B) agreeing to:
- complete the special entry permit form or obtain a Health Certificate.
- 2. obtain a special entry permit number for each shipment (for either a special entry permit or a Health Certificate).
- 3. send the original signed special entry permit or a Health Certificate (with the permit number recorded and the list of animals included in the shipment stapled to either form), to the State Veterinarian's office in California on departure for California.
- 4. make a separate copy of the completed special entry permit or the Health Certificate to accompany each load or part of the shipment and to present it to any state regulatory official on their request.

- 5. deliver a copy of the completed special entry permit or the Health Certificate (with a list of heifers in the shipment attached) at the destination
- 6. present some or all of the heifers and/or the entry documents for inspection at a reasonable time after arrival to validate compliance with this regulation, if requested by Animal Health Branch personnel.
- 7. keep an individual animal identification record of non–California heifers purchased and brought into California before being transported out of California for feeding under this special entry permit. The purchasers of the out–of–state heifers shall maintain sufficient animal identification to trace the purchases back to their origin.

The owner is responsible for the accuracy of the certifications and the attached animal identification list which becomes part of the special entry permit or Health Certificate. This special entry permit form shall contain: the signature of the owner or the owner's agent; the printed name of the person signing the special entry permit form and the address and telephone number of the owner; an accurate description of the destination with name, geographic location, mailing address with county, and name and telephone number of the manager or other contact person at the destination. If the special entry permit is being requested by telephone and the request is approved, the permit number and expiration date shall be recorded in the appropriate location on the form before making copies for the transport vehicles. If the special entry permit is mailed or faxed for approval, a copy will be returned by the same method, if approved.

If the owner chooses to get a Health Certificate with individual identification instead of using this California special entry permit form, the certifications (A)1 through 5, and agreements (B)3 through 7, in this Subsection shall be signed and included as part of the Health Certificate along with the notation "Dairy heifer brucellosis vaccinates returning to California."

It is the intent of this special entry permit to trace the movement of dairy animals as accurately as possible, and should a brucellosis reactor or suspect be found, to be able to trace them to their herd of vaccination and origin.

- (2) The owner of an officially brucellosis calfhood vaccinated beef breeding herd may be issued a Pasture to Pasture Permit for a single seasonal movement (to and return within eight (8) months) between pastures under the control of the same owner in California and a Class Free State following certification by the state of origin and approval of the owner's written application by California. Owners requesting permission to enter California for pasture, or return to California after out of state pasture under a Pasture to Pasture Permit, shall utilize the California Pasture to Pasture Permit for the movement, even if it is in addition to another state's permit. The transmission of applications and approvals by mail or fax is permissible.
- (A) A signed, approved permit shall contain the expiration date and permit number as furnished by the destination state.
- (B) The applicant shall furnish the following information: state of origin and destination; number of animals by age groups (females over two (2) years old, heifers between six (6) months and 24 months old, adult bulls, steers, calves under six (6) months old, horses); brand and location; accurate description of origin and destination premises by: premises name; geographic location; mailing address including the city, state, zip code, and county; name and telephone number of premises owner or manager and any other contact information available; name and telephone number of veterinarians servicing the herd; number of years the herd has moved to described premises; fenced premises (Y/N); commingling with cattle owner by others (Y/N); and names of other owners commingling.
- (C) The applicant shall acknowledge that Pasture to Pasture Permit is for one pasture season for the described cattle, time, and premises, and that no diversion of cattle from the described premises will be allowed without prior permission of the State Veterinarian's office where cattle are on pasture, and then, only due to an environmental emergency.
 - (D) The applicant shall certify that:

- 1. the animals entering under the permit are from a beef breeding herd established more than six (6) months in the Class Free State of origin;
- 2. it will be established, by brand or health certificate obtained within the 30 days prior to a load or part of a shipment entering or returning to California, that the cattle have healed brands (brands that appear to have been applied at least four (4) months prior to movement) or other identification officially registered to the owner;
- 3. no trader or recently assembled cattle are in the origin herd or the animals moving:
- 4. all female cattle over six (6) months of age entering or returning to California are or will be officially brucellosis calfhood vaccinated and bear or will bear legible official brucellosis tattoos as evidence of the vaccination.
- (E) The purchase or addition of native cattle originating in the Class Free State destination state will be allowed if the owner certifies that:
- 1. the purchased or added cattle are native to the destination state, have been officially brucellosis calfhood vaccinated, and have legible official brucellosis vaccination tattoos, and
- 2. the California State Veterinarian's office is notified by mail or fax of the purchase or addition of animals, by number and type, in the destination state prior to returning at the end of the pasture season.
- (F) Before California can approve entry with a Pasture to Pasture Permit, an animal health official of the state of origin shall certify that the herd needing permission to enter California for pasture is an established beef breeding herd that is current with its brucellosis calfhood vaccinations and is not known to be affected with or exposed to brucellosis. After receiving this certification, the Department shall evaluate the entries on the permit request. If it appears that there will be no brucellosis danger to California animals and that the applicant will implement the permit requirements, the permit may be approved by a representative of the Animal Health Branch.
- (G) The owner, or owner's agent, of cattle that have received a Pasture to Pasture Permit to leave California for pasture and return shall:
- 1. enter the estimated date of return to California and any animal purchase or animal addition information on the permit as indicated.
- 2. forward a copy of the permit with the return information to the State Veterinarian of California by mail or fax within the 15 days prior to the date of returning the first load or part of a shipment of cattle.
- (H) Cattle moving with an approved Pasture to Pasture Permit are exempt from brucellosis test and individual identification requirements associated with a Health Certificate as long as the owner remains in compliance with the current approved Pasture to Pasture permit and there is no suspicion of brucellosis infection in the herd. An official certificate, in addition to the valid permit, is required to be obtained for all cattle within the 30 days prior to entering California. Copies of the official certificate and the Pasture to Pasture Permit shall accompany each load or part of a shipment of cattle entering California.
- (3) A special entry permit may be issued for entry of non-brucellosis vaccinated brucellosis, test negative, purebred registered dairy or beef breed cattle, with breed association individual identification, for preserving or developing bloodlines. A copy of the registration papers, along with side-view photographs suitable for identification purposes, a drawing of the registration ear tattoo, or a description of other registration mark or identifier, may be required to be forwarded to the Animal Health Branch, before a special entry permit can be considered. The cattle shall meet all other entry identification and negative test requirements. Animals admitted under this provision shall be maintained under a permanent Hold Order. If it appears that there will be no disease risk to a nonbrucellosis vaccinated animal at an exhibition and the exhibition allows their entry, the Department may give written permission to move within California to be exhibited. A Permit to Move may be issued for movement: for exhibition, to another premises, to go to slaughter, or to leave the State.
- (4) A special entry permit may be issued for entry of brucellosis vaccination age, non-brucellosis vaccinated calves, native to their state of origin, to be brucellosis vaccinated on arrival by a program cooperator

(a person who by past favorable interaction with the brucellosis program, or by industry reputation, it is felt will implement the requirements of the special permit). If the cooperator and the vaccination premises appear to be satisfactory to the destination Animal Health Branch District, Animal Health Headquarters may issue a permit and calves will be allowed to enter from:

- (A) Class Free States without a negative brucellosis test, or
- (B) non-Class Free States with a negative brucellosis test.
- (5) Following a signed interstate feeder heifer agreement between the State Veterinarians of a Class Free State of origin and California, a special Beef Feeder Heifer Permit, valid for up to one year, may be issued to an owner to import, for feeding or pasture purposes for a period of up to eight (8) months, apparently healthy female beef breed heifers under the age of 24 months that have been officially calfhood vaccinated against brucellosis, providing the owner complies with the following conditions:
- (A) At least 15 days before the first expected entry, or expiration of a prior Beef Feeder Heifer Permit, the owner shall complete a written application for a special Beef Feeder Heifer Permit and obtain the approval of a California Animal Health Branch Staff Veterinarian and the acknowledgment of the an animal health staff member of the Class Free origin state. The application for the Beef Feeder Heifer Permit, when approved, will serve as the permit and shall contain the following information: date of application, permit number issued, expiration date of the permit, and the applicants name. Space will be provided on the application for approval by a California Animal Health Staff Veterinarian and acknowledgment of an animal health official of the origin state.
- 1. The owner, or agent of the owner, shall certify on each Beef Feeder Entry Form that all the animals in that shipment:
 - a. are apparently healthy.
 - b. are beef breed heifers under 24 months of age.
 - c. originate from a brucellosis Class Free State.
 - d. are officially calfhood vaccinated against brucellosis.
 - e. have legible official brucellosis vaccination tattoos.
 - f. have not had any contact with cattle of Mexican origin.
 - 2. In addition, the applicant shall agree to:
- a. complete a Beef Feeder Heifer Entry Form for each shipment of heifers entering California.
- b. send (mail or fax) a copy of the completed entry form to the State Veterinarian of California and the origin state within 15 days prior to the expected date of entry of each shipment.
- c. provide a copy of the completed entry form to the driver of each load of heifers in the shipment and instruct the driver to present the copy to government officials for examination when requested.
- d. notify the local Animal Health District Office of movement to: another previously registered premises, another state, into a trade channel, sale to a private buyer, or to slaughter.
- e. maintain records for tracing of the origin and disposition of the heifers for two (2) years for inspection and copying by Animal Health representatives.
- f. within 30 days after the completion of the feeding period, notify the local Animal Health District Office of the number of heifers disposed of by:
 - 1. slaughter.
 - 2. addition to the owner's breeding herd.
 - 3. movement to an identified state.
 - 4. movement into an identified trade channel.
 - 5. sale to an identified private buyer.
 - other.

The applicant shall print the owner's personal or business name, furnish complete address with telephone and fax numbers, and shall sign the certification and agreement. The application shall contain information on how to submit an application for premises registration.

(B) A copy of a properly completed Beef Feeder Heifer Entry Form shall accompany each load or part of a shipment of animals into California with the following information:

Page 58 Register 99, No. 25; 6–18–99

- 1. The entry date, permit number and its expiration date, and the origin state.
- 2. The owner's (or owner's agent) certification that all animals in the shipment are apparently healthy beef breed heifers under 24 months of age, originate from a Class Free State, have been officially calfhood vaccinated against brucellosis, bear legible official brucellosis tattoos, and have had no contact with any cattle that originated in Mexico. If the certification is signed by an agent of the owner, the agent's name, address, and telephone number shall by printed on the entry form. Owners, or owners' agents, may be required to present evidence that the animals in a shipment meet the entry requirements of this paragraph.
- 3. The name, address, and telephone number of the person responsible for managing the heifers in California.
- 4. The identification of the origin of the cattle by location or premises name and county and destination premises by number, name, and county.
- 5. The number and physical description of the heifers by age, weight, breed, and brand.
- 6. An indication of whether purchase was at a livestock marketing facility or by private treaty if heifers were purchased for feeding or pasture purposes and are not native to the state of origin of the shipment. If the heifers are not native to the shipment origin state, the source states shall be indicated. The states where the heifers were purchased must be Class Free. Purchaser must maintain records of purchases, for inspection and copying by department representatives, for two (2) years following the transaction.
- 7. "Blank and completed Beef Feeder Heifer Entry Forms may be copied as needed for movement of animals."
- (C) The destination premises shall be registered by the Animal Health Branch District containing the premises prior to departure for California. Registration shall be accomplished by submitting a completed registration form by mail, fax, or telephone to the local Animal Health Branch District Office or Animal Health Branch Headquarters of the Department in Sacramento. Issuing of a premises number will indicate successful registration. Once a premises is registered, it may be used until expiration of the registration, by any Beef Feeder Heifer permit holder. Premises may be approved for up to two (2) calendar years, with expiration on December 31 of the second year, in advance of anticipated entries and later movement. The Beef Feeder Heifer Premises Registration form, in addition to information on how to and where to obtain a registration form, shall contain:
- 1. The date of the registration, the premises number, expiration date, county of the premises, and the Animal Health District of the premises.
- 2. Name of the applicant, printed legibly; premises name; county name; type of premises; geographic location; and property owner's name, mailing address, and telephone number.
- 3. Name, address, and telephone number of the person managing the premises, if not the owner.
- 4. Signer's name printed legibly and signature of the applicant.
- 5. If the registration is signed by an agent of the owner or applicant, the person's name, address, and telephone number shall be printed legibly on the registration.
- 6. "Blank Beef Feeder Heifer Premises Registration forms may be copied as needed for submission for registration of premises."
- (D) During and at the end of the feeding or pasture period, the heifers may be moved:
 - 1. To slaughter.
- 2. Following notification of the local Animal Health District Office: to another registered premises, into the owner's breeding herd, out of state, into a trade channel, or sold to a private buyer.
- 3. Within 30 days after the completion of the feeding period the permit holder shall notify the local Animal Health District office of the number of heifers in each shipment disposed by:
 - a. slaughter.
 - b. addition to the owner's breeding herd.
 - c. movement to an identified state.

- d. movement into an identified trade channel.
- e. sale to an identified private buyer.
- f. other
- (6) Animals, from any state, not vaccinated against brucellosis, with a negative brucellosis entry blood test, and a Health Certificate with individual animal identification, may be issued a special entry permit to enter a registered feedlot (not pasture) included in a registry of currently approved feedlots maintained by the Department for feeding for up to six (6) months before slaughter. They will be maintained under a Hold Order until slaughtered at an establishment under official government inspection.
- (7) Animals entering California for direct delivery to an establishment under official government inspection for immediate slaughter must be sufficiently identified to ensure tracing to the farm or ranch of origin. They may enter with a Brand Inspection Certificate instead of a Health Certificate. A properly placed United States Department of Agriculture backtag is acceptable identification in place of an eartag if the backtag number is listed and the list is attached (stapled) to an official certificate. If a backtag is used as identification, the party utilizing it must be able to trace the animal in question back to its herd of origin and it must be the last identification applied before entry and moving to slaughter. A copy of the certificate, with attachments, shall be kept for at least two (2) years by the shipper. All certificates shall be made available for examination when requested by a department representative.
- (g) Exceptions. Any exceptions to the interstate movement section of this regulation shall have approval by the Department prior to movement. All exceptions shall be evaluated on a case—by—case basis and the following factors, at a minimum, shall be considered before approval of any exceptions:
 - (1) Possible exposure of California livestock to brucellosis.
 - (2) Welfare of out of state livestock.
 - (3) Cost to the Department for personnel to monitor the exception.
- (4) Reaction of the public and/or the livestock industry to approval of the exception.

Reference: Sections 403, 408, 461, 5006, 9161–9169, 9531, 9532, 9561–9567, 9570, 9572–9574, 9691–9693, 9698–9702, 10301–10311, 10321–10323, 10325, 10351–10359, 10381–10385, 10387, 10511, 10522, 20013, 21081–21084, Food and Agricultural Code; and Title 9, Part 78, Code of Federal Regulations, January 1, 1997 Edition.

HISTORY

- 1. New section filed 5–24–99; operative 6–23–99 (Register 99, No. 22). For prior history, see Register 96, No. 40.
- 2. Editorial correction of subsection (e)(3)(D) (Register 99, No. 25).

§ 753.2. Moving Restricted Cattle.

- (a) Intrastate Restricted Cattle. Brucellosis exposed cattle may move only when accompanied by a written Permit to Move issued by the Department. Each animal to be moved shall be identified by an official state or federal metal eartag or other identification as requested by the owner for permanent identification and approved by the Department. Upon approval of the need for movement by the Department, exposed cattle may move to the following:
- (1) A slaughter facility requested by the owner and approved by the Department as being capable of maintaining identification of the animals.
- (2) A saleyard requested by the owner and approved by the Department as being capable of maintaining identification and separation of the animals.
 - (3) A Specifically Approved Stockyard.
- (4) Premises under the control of the owner of the cattle, approved by the Department as suitable for segregated pasture or feeding only, and which will not result in exposure of other animals to possible disease risk. When the feeding period is completed, the cattle must have a written Permit to Move to return to the premises of origin or go to slaughter. There shall be no commingling of exposed cattle with other cattle.
 - (b) Interstate Restricted Cattle.

Cattle or bison, excluding steers and identified spayed females, from areas under brucellosis quarantine by the federal government, state, or country of origin shall not be allowed to enter California.

NOTE: Authority cited: Sections 407, 10324, 10326, 10327 and 10386, Food and Agricultural Code. Reference: Sections 9531, 9161, 9165–9169, 9561–9567, 9570, 9572, 9698–9702, 10301–10311, 10321–10323, 10351–10359, 10381–10385, 10387, 10401, 10406, 10423, 10492–10496, 10511 and 10512, Food and Agricultural Code.

HISTORY

- 1. New section filed 5-24-99; operative 6-23-99 (Register 99, No. 22).
- 2. Repealer of subsections (c)–(c)(5)(C) and amendment of Note filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 753.3. Dealer.

A "dealer" means any person or entity who:

- (a) purchases, deals in, holds, controls, or sells livestock in California, or
 - (b) acts as a livestock commission representative or broker, or
 - (c) operates and conducts an auction where livestock are sold.

A dealer must be licensed with the California Department of Food and Agriculture. In addition to the records required for licensing, dealers shall maintain an individual identification record for each animal sufficient to identify the animal, the seller, and the buyer. Official United States Department of Agriculture backtags are acceptable for identification of cattle consigned to slaughter. The identification information shall be maintained for two (2) years in a manner acceptable to the Department and shall be available for examination and copying during business hours, or other reasonable times, upon request by the Department.

NOTE: Authority cited: Sections 407, 10324, 10326, 10327 and 10386, Food and Agricultural Code. Reference: Sections 403, 408, 461, 5006, 9161, 9169, 9531, 9570, 9565–9567, 9572, 10301–10512, and 56107–56110, of the Food and Agricultural Code.

HISTORY

1. New section filed 5-24-99; operative 6-23-99 (Register 99, No. 22).

§ 754. Area Classification.

- (a) Classifying Areas. The State of California participates in the brucellosis area classifications of the United States Department of Agriculture Brucellosis Eradication Program as published in the Code of Federal Regulations, Title 9, Section 78.1.
- (b) Maintaining Area Classification. Area classification shall be evaluated continuously through monitoring of all brucellosis program activities. An annual report will be submitted by the Department to the United States Department of Agriculture documenting all California brucellosis surveillance activities to determine eligibility for maintaining or changing area classification. Area status may be maintained provided it can be established that:
- (1) All herds in the area are participating in surveillance procedures designated by the Department.
 - (2) All suspects to an official brucellosis test:
- (A) are retested until they are determined to be infected or non-infected, or
- (B) if not available for retest, all known contact animals or herds are tested or evaluated by a brucellosis epidemiologist.
- (3) The number of herds found affected does not exceed specified limits.
- (4) All cattle in an affected herd, except steers and identified spayed heifers, are confined to the premises under a Hold Order until the herd has followed the procedures outlined in this Section and is determined to be free of brucellosis or sold for slaughter. All eligible animals, as defined in Section 752.3(e), shall be tested (herd test). The herd is retested at 30–day intervals until the herd passes one negative blood or other official test. Two consecutive negative herd tests are required for release of the Hold Order. The first negative herd test is conducted at least 30 days after all reactors have been removed. The second negative or releasing test occurs six (6) months or more after all reactors have been removed.

An additional herd test is required either between six (6) months and 12 months after an affected herd has been released from Hold Order or between 12 and 18 months after the last reactor has been removed. Any variance to the retest procedures shall be determined by the Designated Epidemiologist.

All of the conditions in this subsection also apply to herds that have participated in a whole-herd vaccination plan.

- (5) Herds adjacent to and within one (1) mile of a premises occupied by a herd known to be affected, herds sharing common pasture or having other contact with an affected herd, or herds containing cattle from previous movements from an affected herd, within a time period determined by the District or Designated Epidemiologist, are placed under Hold Order until each herd is evaluated. Herd tests, as determined by the District or Designated Epidemiologist, shall be conducted as part of the evaluation. The Hold Orders may be maintained until brucellosis is eliminated from the area. When the Hold Order is released on the brucellosis affected herd, the District or Designated Epidemiologist reevaluates these potentially exposed herds and notifies these herd owners of the need for additional herd testing.
- (6) All other animals (any species) suspected of exposure to brucellosis infection, or found to be infected with brucellosis, are placed under Hold Order and evaluated by the District or Designated Epidemiologist. If necessary, the epidemiologist will design and implement an eradication and/or control program suitable for the *Brucella* and animal species involved to prevent exposure of livestock to brucellosis.
- (7) Any reactors found are disposed of in accordance with Section 752.5 of this Regulation.
- (c) Memorandum of Understanding. A Memorandum of Understanding (Herd Plan) shall be developed between the owner of the affected herd, the owner's veterinarian (if available), and the Department. The agreement will describe how the affected herd will be managed to minimize the spread of brucellosis and eliminate the disease from the herd. In all dairy and beef herds under conditions of close confinement, at a minimum, the owner shall:
- (1) Provide separate calving pens for isolating cows while calving or aborting.
- (2) Closely monitor the herd to assure timely separation of cows to prevent calving outside the calving pens or aborting where other cows are exposed to products of calving.
- (3) Delay returning post–parturient cows to the herd until discharge of the placenta and associated fluids is complete.
- (4) Promptly remove all products of calving and properly clean and disinfect the calving area.
- (5) Provide feeding equipment and implement procedures to prevent contaminating feed with calving products.
- (6) Make any other management, vaccination (whole-herd vaccination plan), equipment or premises changes deemed necessary under this agreement.
- (7) Set a test schedule and specific dates for accomplishing the tasks described in the Herd Plan.

NOTE: Authority cited: Sections 407, 10324, 10326, 10327 and 10386, Food and Agricultural Code. Reference: Sections 403, 408, 461, 520, 521, 527, 5006, 9161, 9169, 9531, 9565–9567, 10304, 10305, 10308, 10322, 10323, 10325, 10381–10385, 10387, 10401, 10403, 10404, 10421 and 10493, Food and Agricultural Code; and Title 9, Part 78, Code of Federal Regulations, January 1, 1997 Edition.

History

- 1. Amendment filed 6–22–71; effective thirtieth day thereafter (Register 71, No. 26). For prior history, see Register 63, No. 18.
- 2. Amendment filed 9–14–81; effective thirtieth day thereafter (Register 81, No. 38)
- 3. Repealer and new section filed 5-24-99; operative 6-23-99 (Register 99, No. 22)

§ 754.1. Control Areas.

(a) Establishing Brucellosis Control Areas. Pursuant to Section 10381 of the Food and Agricultural Code, all counties in the State of California are established as Brucellosis Control Areas. A Brucellosis Control Area is an area established by the Department to qualify and maintain for bo-

vine brucellosis control in accordance with the certification standards of the United States Department of Agriculture.

- (b) Managing Control Areas. When a county or area has been established as a Brucellosis Control Area the following shall apply:
- (1) Testing and Classifying Animals. Affected herds shall be tested as described in Section 754(b)(4). Brucellosis tests used will qualify the control area for status classification and shall be in conformance with Section 752.3 of this Chapter. Animals and herds shall be classified in conformance with Section 752.4 of this chapter.
- (2) Herd Test. A test that includes all cattle described in Section 752.3(e).
- (3) Disposing of Reactors, Cleaning, and Disinfecting. As described in Section 752.5(b).

Note: Authority cited: Sections 407, 10324, 10326, 10327 and 10386. Food and Agricultural Code. Reference: Sections 403, 408, 461, 520, 521, 527, 5006, 9101, 9163–9169, 9531, 9532, 9561–9567, 9570, 9574, 9698–9702, 10304, 10305, 10308–10311, 10321–10323, 10325, 10382–10385, 10387, 10401, 10403–10407 and 10493–10496, Food and Agricultural Code; and Title 9, Part 78, Code of Federal Regulations, January 1, 1997 Edition.

HISTORY

- 1. Amendment filed 4–16–68; effective thirtieth day thereafter (Register 68, No. 16). For prior history, see Register 62, No. 5.
- 2. Amendment filed 12–26–75; effective thirtieth day thereafter (Register 75, No. 52).
- Amendment filed 9–14–81; effective thirtieth day thereafter (Register 81, No. 38).
- 4. Repealer and new section filed 5–24–99; operative 6–23–99 (Register 99, No. 22).

§ 754.2. Critical Brucellosis Areas.

If brucellosis is reintroduced into a brucellosis free area, and the spread of infection appears imminent, a Critical Brucellosis Area shall be established and the following shall apply:

- (a) The county, counties, or area shall be declared a Critical Brucellosis Area by the Department.
- (b) Female cattle may enter a Critical Brucellosis Area from within the State only if they bear evidence of official calfhood vaccination against brucellosis. Calves under minimum vaccination age, cattle consigned for immediate slaughter, and those moving between premises controlled by the same owner without change of ownership, are exempt from this requirement.
- (c) No person shall move, or cause to be moved, any cattle from a premises in a Critical Brucellosis Area to another premises, either within or outside of a Critical Brucellosis Area, or receive, or cause to be received, any cattle from a premises in a Critical Brucellosis Area unless they are accompanied by evidence of an official negative blood test for brucellosis conducted within 30 days prior to the movement. The following are exempt from the test requirement:
 - (1) Calves less than four (4) months of age.
- (2) Official Strain 19 dairy vaccinates less than 18 months of age and beef vaccinates less than 24 months of age.
 - (3) Cattle consigned for immediate slaughter.
- (4) Cattle moving for feeding purposes to premises under control of the owner and where no commingling with other livestock will occur.
- (5) Cattle from herds in which all lactating animals were negative to a brucellosis milk surveillance test and all non-lactating animals were negative to a blood brucellosis test within 30 days prior to the movement.
- (6) In cases of demonstrated hardship, or of an emergency beyond the control of the cattle owner, the Department may issue a conditional permit allowing the movement of cattle from one location to another.
 - (d) There are no Critical Brucellosis Areas.

Note: Authority cited: Sections 407, 10324, 10326, 10327 and 10386, Food and Agricultural Code. Reference: Sections 403, 408, 461, 520, 521, 527, 5006, 9531, 9561, 9562–9567, 9570, 9572–9574, 9691–9693, 9698–9702, 10304–10310, 10322, 10323, 10325, 10351–10359, 10381–10385, 10387, 10401, 10403, 10404, 10421, 10493–10496, 10511 and 10512, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–26–75; effective thirtieth day thereafter (Register 75, No. 52). For prior history, see Register 75, No. 2.
- Amendment filed 9–14–81; effective thirtieth day thereafter (Register 81, No. 38).

3. Repealer and new section filed 5–24–99; operative 6–23–99 (Register 99, No. 22).

NOTE: Authority cited: Sections 407, 9570, 10324, 10326, and 10386, Food and Agricultural Code. Reference: Sections 461, 9570, and 10301–10492, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–23–57 as an emergency; effective on filing (Register 57, No. 2).
- 2. Amendment filed 4–26–57; effective thirtieth day thereafter (Register 57, No. 7)
- 3. Amendment filed 4–16–68; effective thirtieth day thereafter (Register 68, No. 16)
- 4. Amendment filed 10–3–69 as an emergency; effective upon filing (Register 69, No. 40).
- Certificate of Compliance—Section 11422.1, Gov. Code, filed 11–24–69 (Register 69, No. 48).
- 6. Editorial correction filed 4-29-82 (Register 82, No. 18).
- 7. Repealer filed 5-24-99; operative 6-23-99 (Register 99, No. 22).

§ 754.7. Bovine Brucellosis Vaccine and Antigen, Sections 10342 and 10326, California Food and Agricultural Code.

NOTE: New Authority cited: Sections 407, 9570, 10324, 10326, and 10386, Food and Agricultural Code.

HISTORY

- 1. New Section filed 9–18–59; effective thirtieth day thereafter (Register 59, No. 16).
- 2. Amendment filed 4–16–68; effective thirtieth day thereafter (Register 68, No. 16).
- 3. Repealer filed 5-24-99; operative 6-23-99 (Register 99, No. 22).

§ 754.8. Prohibition of Importation of Cattle from the State of Texas.

NOTE: Authority cited: Sections 407, 9570, 10324 and 10326, Food and Agricultural Code. Reference: Sections 461 and 10326, Food and Agricultural Code.

HISTORY

 New section filed 6-14-83 as an emergency; effective upon filing (Register 83, No. 25). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 10-12-83. Repealer filed 7–8–83 as an emergency; effective upon filing (Register 83, No. 30). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 11–5–83.

§ 754.21. Brucellosis Regulation—Entry of Cattle from Certain Areas.

HISTORY

- 1. New section filed 10–11–68 as an emergency; effective upon filing (Register 68, No. 38).
- Amendment filed 11–20–68 as an emergency; effective upon filing (Register 68, No. 44).
- 3. Certificate of Non-compliance (repealer by operation of Sec. 11422.1, Gov. Code) filed 2–6–69 (Register 69, No. 6).

Article 2. Movement of Cattle into California from Mexico

§ 755. Definitions.

- (a) As used in this article:
- (1) "Accredited Veterinarian" means a veterinarian approved by the USDA in accordance with 9 CFR Part 161 (1/1/02 Edition) to perform functions specified in this article.
- (2) "Official brucellosis test" means a test to determine the brucellosis disease status of test–eligible cattle as defined by 9 CFR Part 78, Section 78.1.1 (1/1/02 Edition).
- (3) "Official tuberculosis test" is synonymous with "Official tuberculin test" as defined in 9 CFR, Part 77, Section 77.5 (1/1/02 Edition).
- (4) "USDA" means the United States Department of Agriculture, Animal and Plant Health Inspection Service.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. Amendment of article 2 heading and new article 2 (sections 755–755.6) and section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day. For prior history of article 2, see Register 59, No. 3.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 755.1. General Requirements.

- (a) The State Veterinarian may impose a quarantine pursuant to Food and Agricultural Code section 9562 if the requirements as specified in this article have not been met, or to amend the requirements for entry into California in response to a change in disease status in any location, state, territory or country as determined by the State Veterinarian.
- (b) The provisions of this article are in addition to other provisions that may be required for moving animals into and within California as specified in statute or regulation.
- (c) Any person transporting animals into or within California shall produce any official documents required by the Department or USDA for each load or part of a shipment upon request by the Department or other official to prove that each animal transported meets the requirements of this article. Animals in any load or part of a shipment may be inspected en route or after arrival.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-3-2003 as an emergency; operative 7-3-2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 755.2. Certificate of Veterinary Inspection.

(a) A Certificate of Veterinary Inspection is a numbered interstate document that is a record of veterinary health inspection of one or more animals, issued on an official form of the state of origin and by an accredited veterinarian from the state of origin.

- (b) A Certificate of Veterinary Inspection shall include all of the following:
 - (1) Date of inspection;
 - (2) Number of animals in the consignment;
- (3) Description of the animals including the species, breed, age, and sex, and the official identification number(s) or registration tattoos;
- (4) Name, address, and telephone number of the consignor, consignee, and the origin and destination of the animals;
 - (5) Interstate livestock entry permit number, when required;
 - (6) Statement of the purpose for which the animals are being moved;
- (7) Statement by the owner or accredited veterinarian at the point of origin as required by the Department or USDA for the interstate or intrastate movement of animals.
- (8) Signed by the accredited veterinarian who examined the animals in the shipment.
- (c) A copy of the completed Certificate of Veterinary Inspection shall be mailed to the Department within 15 days of examination to the following address: Department of Food and Agriculture, Animal Health Branch, 1220 "N" Street, Room A–107, Sacramento, California 95814.
- (d) The examining licensed and accredited veterinarian shall indicate on the Certificate of Veterinary Inspection that each animal in the shipment meets California entry requirements.
- (e) As an alternative to official individual identification on a Certificate of Veterinary Inspection, another animal identification document may be used if approved by the Department and USDA.
- (f) The Department may require a Certificate of Veterinary Inspection for animals entering California because of a disease condition in another state, even though the animals are exempt from obtaining a Certificate of Veterinary Inspection under this article.
- (g) All animals shall be transported directly and without delay to the destination stated on the Certificate of Veterinary Inspection.
- (h) A Certificate of Veterinary Inspection shall be valid for 30 days following the inspection of the animals described.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 755.3. Interstate Livestock Entry Permits.

- (a) An Interstate Livestock Entry Permit may be required for the importation of animals into California pursuant to the requirements of this article.
- (b) An Interstate Livestock Entry Permit is a numbered document issued by the Department for approving the movement of animals that meet entry requirements into California.
- (c) Requests for Interstate Livestock Entry Permits shall be made to the Department's Animal Health Branch and before the animals are transported to California. Requests for entry permits may be made by telephone, electronic transmission, or other means approved by the Department. Written application may be required when necessary to accomplish the purposes of this article.
- (d) Each Interstate Livestock Entry Permit shall have a unique number and the number may be issued to the applicant by telephone or other electronic means approved by the Department. A copy of the permit will not be sent to the applicant unless specifically requested or it is needed to accompany a shipment.
- (e) The applicant for the Interstate Livestock Entry Permit shall establish that all animals in the shipment meet California entry requirements, and possess a Certificate of Veterinary Inspection when required.
- (f) The applicant for the Interstate Livestock Entry Permit shall provide the Department with the following information:
 - (1) Name, address, and telephone number of the shipper or importer;

Page 58.4

- (2) Origin of the shipment:
- (3) The number and description of the animals being shipped including species, breed, age, sex, and purpose for which the animals will be used.
- (4) Name, mailing address, and telephone number of entity receiving the animals, or a geographic destination if animals are not being received at the destination mailing address;
- (5) Name, address, and telephone number of a contact person in California, if not the owner; and the name, address, and telephone number of the person requesting the permit;
 - (6) Certificate of Veterinary Inspection number, if available;
 - (7) Name of the herd veterinarian, if available; and
- (8) Must meet the entry requirements for the type of animals entering California.
- (g) An Interstate Livestock Entry Permit is required for the entire shipment of animals, which may consist of one or more loads.
- (h) All animals shall be transported directly and without delay to the destination stated on the Interstate Livestock Entry Permit.
- (i) The State Veterinarian may deny the request for an Interstate Livestock Entry Permit pursuant to sections 9562 and 9570 of the Food and Agricultural Code.
- (j) Interstate Livestock Entry Permits shall expire 15 days after issuance.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-3-2003 as an emergency; operative 7-3-2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 755.4. Requirements for Entry into California.

- (a) Cattle that have been in Mexico and are forty (40) percent or more dairy breed in appearance or genetics shall not be imported into California. This includes steers and spayed heifers.
 - (b) All cattle originating from Mexico and entering California shall:
- (1) Comply with the requirements for entry into the United States pursuant to 9 CFR, Parts 93.400–93.416 and Parts 93.424–93.427 (1/1/02 Edition), USDA Veterinary Services Notice 02–11, and as approved by the Secretary of the Department; and
- (2) Have a completed Certificate of Veterinary Inspection with individual animal identification, issued at the time of inspection in the United States. Any test result as required including the name of the laboratory conducting the test, and a representation of the calfhood brucellosis vaccination tattoo as evidence of brucellosis vaccination when required, shall be recorded on, or attached to the Certificate of Veterinary Inspection; and
- (3) Each shipment of cattle shall have an Interstate Livestock Entry Permit and meet the additional requirements as stated for the following classes of cattle:
- (A) Mexico origin sexually intact cattle more than 6 months of age shall have a negative official tuberculosis and brucellosis test completed within 60 days prior to entering California from Mexico.
- (B) Mexico origin female cattle shall be calfhood vaccinated for brucellosis, having a legible vaccination tattoo as evidence of vaccination, before arriving in California.
- (c) All Mexico origin cattle passing through or held in another state, or states, of the United States after entry from Mexico will not be considered native to that state, or states, by California unless they have met California's entry requirements and any movement restrictions applicable to Mexican origin cattle.
- (d) The Department may require copies of any document, certificate, declaration or affidavit required by the USDA for the entry of ruminants from Mexico.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-3-2003 as an emergency; operative 7-3-2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 755.5. Mexico Origin Cattle Maintained in California.

- (a) Mexico origin sexually intact cattle shall be quarantined and isolated pursuant to Food and Agricultural Code section 9562 at destination pending the results of an official tuberculosis and official brucellosis test conducted 60–90 days after entering California.
- (1) Male cattle may be released from quarantine if negative to the brucellosis and tuberculosis tests.
- (2) Female cattle shall continue to be maintained under quarantine until negative to an official brucellosis test conducted 30–60 days after calving.
- (3) Animals coming from a Tuberculosis Accredited Free or Tuberculosis Modified Accredited Advanced region within Mexico as defined by the USDA are exempt from the tuberculosis test requirement.
- (b) If a brucellosis or tuberculosis reactor animal is found during any testing procedures in California:
- (1) The positive animal(s) shall be slaughtered in a state or federally inspected slaughter facility or laboratory, or returned to the regulatory authorities of the country of origin, and
- (2) The whole herd, lot, or group shall be evaluated by the designated tuberculosis epidemiologist to determine the risk of spreading disease before release from quarantine.
- (c) Mexico origin animals shall not be eligible for indemnity unless they are required to be slaughtered as a result of tests conducted after they have been released for unrestricted movement in California.
- (d) Cattle discovered within California that, because of their location, physical appearance, and/or history, appear to be Mexico origin cattle of unknown disease status shall be confined and placed under quarantine until their origin has been determined. It shall be the responsibility of the owner or person in possession of the cattle to produce evidence that the cattle have met requirements to enter and move legally in California. If satisfactory evidence cannot be produced, the cattle in question, depending on their origin and subject to approval by state or federal regulatory authorities, shall be returned directly to Mexico, returned to the state of origin or port of entry, or sold for immediate slaughter. The Department may consider it necessary to identify and/or test the cattle before their export or slaughter pursuant to sections 10382 through 10385 of the Food and Agricultural Code.
- (e) All costs of individual and/or herd testing or other required procedures relating to Mexico origin cattle shall be borne by the owner or person in possession of the cattle.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- New section filed 7-3-2003 as an emergency; operative 7-3-2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 7-3-2003 order transmitted to OAL 9-19-2003 and filed 10-20-2003 (Register 2003, No. 43).

§ 755.6. Violations.

- (a) Failure to comply with any part of this article constitutes a violation.
- (b) The Department shall act consistent with any existing enforcement authority concurrently or at a later date unless otherwise prohibited. Such authority includes, but is not limited to, the following:
- (1) Denial, suspension, or revocation of a license, registration, certificate, permit, exception, or other indicia of authority issued by the Department;
 - (2) Civil or administrative penalties;
- (3) Referral to the appropriate District Attorney or the Attorney General for criminal prosecution or other appropriate remedy; and,

(4) Reimbursement to the Department for any costs incurred due to any violation of this article.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

Article 2.5. Interstate Movement of Cattle and Specified Animals into California

§ 756. Definitions.

- (a) As used in this article:
- (1) "Accredited Veterinarian" means a veterinarian approved by the USDA in accordance with 9 CFR Part 161 (1/1/02 Edition) to perform functions specified in this article.
- (2) "Designated tuberculosis epidemiologist" means a state or federal veterinarian with knowledge of epidemiology, selected by state and federal veterinarians in charge with the concurrence of the USDA. The designated tuberculosis epidemiologist will coordinate and evaluate livestock disease eradication programs as assigned.
- (3) "Official tuberculosis test" is synonymous with "Official tuberculin test" as defined in 9 CFR Part 77, Section 77.1 (1/1/02 Edition).
- (4) "USDA" means the United States Department of Agriculture, Animal and Plant Health Inspection Service.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. Amendment of article 2.5 heading, repealer of article 2.5 (sections 757–759.5) and new article 2.5 (sections 756–759) and section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 756.1. General Requirements.

- (a) The State Veterinarian may impose a quarantine pursuant to Food and Agricultural Code section 9562 if the requirements as specified in this article have not been met, or to amend the requirements for entry into California in response to a change in disease status in any location, state, territory or country as determined by the State Veterinarian.
- (b) The provisions of this article are in addition to other provisions that may be required for moving animals into and within California as specified in statute or regulation.
- (c) Any person transporting animals into or within California shall produce official documents, including but not limited to, a Certificate of Veterinary Inspection with the Interstate Livestock Entry Permit number as required, with attachments, for each load or part of a shipment upon request by the Department or other official to prove that each animal transported meets the requirements of this article. Animals in any load or part of a shipment may be inspected en route or after arrival.

HISTORY

- 1. New section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 756.2. Certificate of Veterinary Inspection.

(a) A Certificate of Veterinary Inspection is a numbered interstate document that is a record of veterinary health inspection of one or more ani-

- mals, issued on an official form of the state of origin and by an accredited veterinarian from the state of origin.
- (b) A Certificate of Veterinary Inspection shall include all of the following:
 - (1) Date of inspection;
 - (2) Number of animals in the consignment;
- (3) Description of the animals including the species, breed, age, and sex, and the official identification number(s) or registration tattoos;
- (4) Name, address, and telephone number of the consignor, consignee, and the origin and destination of the animals;
 - (5) Interstate livestock entry permit number, when required;
 - (6) Statement of the purpose for which the animals are being moved;
- (7) Statement by the owner or accredited veterinarian at the point of origin as required by the Department or USDA for the interstate or intrastate movement of animals.
- (8) Signed by the accredited veterinarian who examined the animals in the shipment.
- (c) A copy of the completed Certificate of Veterinary Inspection shall be mailed to the Department within 15 days of examination to the following address: Department of Food and Agriculture, Animal Health Branch, 1220 "N" Street, Room A–107, Sacramento, California 95814.
- (d) The examining licensed and accredited veterinarian shall indicate on the Certificate of Veterinary Inspection that each animal in the shipment meets California entry requirements.
- (e) As an alternative to official individual identification on a Certificate of Veterinary Inspection, another animal identification document may be used if approved by the Department and USDA.
- (f) The Department may require a Certificate of Veterinary Inspection for animals entering California because of a disease condition in another state, even though the animals are exempt from obtaining a Certificate of Veterinary Inspection under this article.
- (g) All animals shall be transported directly and without delay to the destination stated on the Certificate of Veterinary Inspection.
- (h) A Certificate of Veterinary Inspection shall be valid for 30 days following the inspection of the animals described.

HISTORY

- 1. New section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 756.3. Interstate Livestock Entry Permits.

- (a) An Interstate Livestock Entry Permit may be required for the importation of animals into California pursuant to the requirements of this article.
- (b) An Interstate Livestock Entry Permit is a numbered document issued by the Department for approving the movement of animals that meet entry requirements into California.
- (c) Requests for Interstate Livestock Entry Permits shall be made to the Department's Animal Health Branch and before the animals are transported to California. Requests for entry permits may be made by telephone, electronic transmission, or other means approved by the Department. Written application may be required when necessary to accomplish the purposes of this article.
- (d) Each Interstate Livestock Entry Permit shall have a unique number and the number may be issued to the applicant by telephone or other electronic means approved by the Department. A copy of the permit will not be sent to the applicant unless specifically requested or it is needed to accompany a shipment.
- (e) The applicant for the Interstate Livestock Entry Permit shall establish that all animals in the shipment meet California entry requirements, and possess a Certificate of Veterinary Inspection when required.
- (f) The applicant for the Interstate Livestock Entry Permit shall provide the Department with the following information:

Page 58.6

- (1) Name, address, and telephone number of the shipper or importer;
- (2) Origin of the shipment;
- (3) The number and description of the animals being shipped including species, breed, age, sex, and purpose for which the animals will be used.
- (4) Name, mailing address, and telephone number of entity receiving the animals, or a geographic destination if animals are not being received at the destination mailing address;
- (5) Name, address, and telephone number of a contact person in California, if not the owner; and the name, address, and telephone number of the person requesting the permit;
 - (6) Certificate of Veterinary Inspection number, if available;
 - (7) Name of the herd veterinarian, if available; and
- (8) Must meet the entry requirements for the type of animals entering California.
- (g) An Interstate Livestock Entry Permit is required for the entire shipment of animals, which may consist of one or more loads.
- (h) All animals shall be transported directly and without delay to the destination stated on the Interstate Livestock Entry Permit.
- (i) The State Veterinarian may deny the request for an Interstate Livestock Entry Permit pursuant to sections 9562 and 9570 of the Food and Agricultural Code.
- (j) Interstate Livestock Entry Permits shall expire 15 days after issuance.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 757. Cattle Scabies.

- (a) Pursuant to Food and Agricultural Code sections 9562 and 9570, the State Veterinarian may require persons importing animals into California to meet the following requirements to prevent the introduction or spread of scabies:
 - (1) A Certificate of Veterinary Inspection;
 - (2) An Interstate Livestock Entry Permit;
 - (3) Treatment of animals to prevent the spread of scabies.

NOTE: Authority cited: Sections 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–8–70 as an emergency; effective upon filing (Register 70, No. 50). For prior history, see Register 68, No. 46.
- Certificate of Compliance—Section 11422.1, Government Code, filed 2–26–71 (Register 71, No. 9).
- 3. Repealer and new section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 758. Tuberculosis — Requirements for Entry into California.

- (a) All sexually intact cattle regardless of age shall have the following:
- (1) An Interstate Livestock Entry Permit and
- (2) A Certificate of Veterinary Inspection.
- (b) All breeds of cattle, bison, goats and cervids, of any age and sex, identified as originating from or documented as having been in or at a location, state, territory, or foreign country that the State Veterinarian determines to be a threat for introducing bovine tuberculosis into California or that is documented as having a significant tuberculosis infection and entering California may be required to meet the following additional requirements:

- (1) All animals more than six (6) months of age must be negative to an official tuberculosis test completed within 60 days prior to entering California, or
- (2) Animals must have been part of a whole herd negative official tuberculin test (all animals more than six (6) months of age tuberculosis tested and all negative) within 12 months before departure, and have a negative official tuberculin test within 60 days before departure for California (90 days for cervids). If an animal was not tested at the last whole herd tuberculin test, documents must accompany the animal showing it: had a negative official tuberculin test before entering the herd and within 12 months of departure for California, or it was born into the herd, and
- (3) All imported animals shall be quarantined and held at their destination until an official tuberculin test in California 61 to 120 days after their last test before entry (91 to 120 days for cervids) has been completed. Animals may move from that location only under written directions from the Animal Health Branch. If a suspect or a reactor is found in a shipment, the whole herd at destination will be quarantined until a designated tuberculosis epidemiologist determines the final classification. No indemnity shall be paid for imported animals classified as suspects or reactors.
- (c) Individually identified animals moving directly to an officially inspected slaughter establishment shall be exempt from entry test requirements.
- (d) Animals exposed to or originating from any quarantined herd, premises, county, zone, or area shall not enter California.
- (e) The Department may require mitigation of risk factors OR deny the entry into California of any species of animal or any animal material if there may be a possibility of transmission of bovine tuberculosis infection.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day. For prior history, see Register 97, No. 39.
- Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 758.1. Tuberculosis — Designated Pens in Feedlots.

- (a) Designated pens are a set of pens on a premises approved by the Department and USDA for the feeding of cattle from California herds quarantined for tuberculosis and whose movement shall be restricted only to slaughtering establishments approved by the Department or USDA.
- (b) Feedlots requesting approval for designated pen status shall contact the Department's Animal Health Branch District Office containing the feedlot or the Animal Health Branch in Sacramento.
- (c) Approval of designated pens may be granted when the owner or manager of the feedlot completes and submits to the Department an application for the designated pen. The application will include the following:
 - (1) Name and address of the feedlot,
- (2) Name, address and telephone number of applicant, and the name and telephone number of the contact person such as manager or foreman,
 - (3) Pen numbers subject to designated pen status, and
- (4) Signature of the applicant that certifies compliance with the following requirements:
- (A) Designated pens shall be maintained for finish feeding of cattle in a dry lot with no provisions for pasturing or grazing,
- (B) Double cattle-proof fences shall separate the designated pen from the remainder of the feedlot by a minimum of 12 feet. An alley may satisfy this separation requirement if cattle are not maintained in the alley, and
 - (C) Cattle entering feedlots and maintained in designated pens:
- 1. Shall be moved directly to designated pens without contact with cattle not destined for designated pens. Common areas may be used to process cattle held in designated pens provided the area is cleaned and

disinfected with an approved disinfectant after each use and before cattle from non-designated pens are exposed to the area.

- 2. Shall have official individual permanent identification before entering the feedlot; and a lot tag which must be applied upon entering the designated pen.
- (d) Feedlots shall apply and receive written approval from the Department prior to the initial arrival of the exposed cattle.
- (e) Approval of designated pens in feedlots may be renewed every 12 months pending an annual inspection to determine if the conditions of the agreement continue to be met by the feedlot; or until:
 - (1) The feedlot requests deactivation, or
- (2) The Department or USDA determines the status should be eliminated because of the feedlot's failure to comply with the agreement or these regulations, or
- (3) Changes in Federal or State law or regulations require elimination of or change in the status.
- (f) Cattle maintained in designated pens may be inspected by the Department or the USDA.
- (g) Records including but not limited to any Certificate of Veterinary Inspection, test results, Interstate Livestock Entry Permits, or other official documents of incoming and outgoing cattle shall be maintained by the feedlot.
- (1) Records shall be retained for a period of 5 years after cattle enter the feedlot.
- (2) Records shall be available for inspection and photocopying upon request by the Department or the USDA.
- (h) The Department may amend the requirements for designated pens in response to a change in disease status as determined by the State Veterinarian.

NOTE: Authority cited: Section 407 and 9932, Food and Agricultural Code, Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- New section filed 7-3-2003 as an emergency; operative 7-3-2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 7-3-2003 order transmitted to OAL 9-19-2003 and filed 10-20-2003 (Register 2003, No. 43).

§ 759. Violations.

- (a) Failure to comply with any part of this article constitutes a violation.
- (b) The Department shall act consistent with any existing enforcement authority concurrently or at a later date unless otherwise prohibited. Such authority includes, but is not limited to, the following:
- (1) Denial, suspension, or revocation of a license, registration, certificate, permit, exception, or other indicia of authority issued by the Department:
 - (2) Civil or administrative penalties;
- (3) Referral to the appropriate District Attorney or the Attorney General for criminal prosecution or other appropriate remedy; and,
- (4) Reimbursement to the Department for any costs incurred due to any violation of this article.

HISTORY

- New section filed 8-1-94 as an emergency; operative 8-1-94 (Register 94, No. 31). A Certificate of Compliance must be transmitted to OAL by 11-29-94 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 8–1–94 order transmitted to OAL 11–18–94 and filed 12–20–94 (Register 94, No. 51).
- 3. Amendment of section heading, first paragraph and subsection (a) filed 6-15-2000 as an emergency; operative 6-15-2000 (Register 2000, No. 24). A Certificate of Compliance must be transmitted to OAL by 10-13-2000 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 6-15-2000 order transmitted to OAL 8-30-2000 and filed 10-12-2000 (Register 2000, No. 41).
- 5. Repealer and new section filed 7-3-2003 as an emergency; operative 7-3-2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2003 or emergency language will be repealed by operation of law on the following day.

 Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 759.1. Designation of Special Risk Areas.

NOTE: Authority cited: Sections 407, 9561, 9570, 9572 and 9932, Food and Agricultural Code. Reference: Sections 9161, 9165, 9166, 9574 and 10007.

HISTORY

- 1. New section filed 8-1-94 as an emergency; operative 8-1-94 (Register 94, No. 31). A Certificate of Compliance must be transmitted to OAL by 11-29-94 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 8-1-94 order transmitted to OAL 11-18-94 and filed 12-20-94 (Register $94,\,No.\,51).$
- 3. Repealer filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 7–3–2003 order transmitted to OAL 9–19–2003 and filed 10–20–2003 (Register 2003, No. 43).

§ 759.2. Permit and Inspection Requirements To Prevent Tuberculosis.

NOTE: Authority cited: Sections 407, 9531, 9561, 9570, 9572, 9931 and 9932, Food and Agricultural Code. Reference: Sections 408, 461, 9161, 9165, 9166, 9574, 10007 and 10008.

HISTORY

- 1. New section filed 8–1–94 as an emergency; operative 8–1–94 (Register 94, No. 31). A Certificate of Compliance must be transmitted to OAL by 11–29–94 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 8-1-94 order transmitted to OAL 11-18-94 and filed 12-20-94 (Register $94,\,No.\,51$).
- 3. Repealer filed 7–3–2003 as an emergency; operative 7–3–2003 (Register 2003, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2003 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 7-3-2003 order transmitted to OAL 9-19-2003 and filed 10-20-2003 (Register 2003, No. 43).

Article 3. Interstate and Intrastate Movement of Sheep and Goats

§ 760. Definitions.

- (a) As used in this article:
- (1) "Accredited veterinarian" means a veterinarian approved by the Department and the United States Department of Agriculture (USDA) in accordance with the provisions in 9 CFR Part 161 (1/1/02 Edition).
 - (2) "Animal" means a sheep or goat.
- (3) "Approved saleyard" means a premises approved by the Department and the USDA to handle sheep and goats for release only to recognized slaughter establishments or to a feedlot approved by the Department for feeding animals for the express purpose of improving the animals' condition for movement to slaughter.
- (4) "Brucella ovis free flock" means a flock of sheep officially recognized by the state of origin as free of Brucella ovis.
- (5) "Brucellosis" means the contagious, infectious, and communicable disease caused by bacteria of the genus Brucella.
- (6) "Designated scrapie epidemiologist" means a state or federal veterinarian with knowledge of scrapie epidemiology, selected by state and federal veterinarians in charge with the concurrence of the USDA scrapie staff. The designated epidemiologist will coordinate and evaluate the Scrapie Eradication Program as assigned.
- (7) "Direct movement to slaughter" means transported to a facility for slaughter, without stops or unloading except for feeding and watering during which the animals are not commingled with any other animals.
- (8) "Flock" means a number of animals that are kept, fed and herded together having a single or multiple ownership. Changes in ownership of part or all of a flock do not change the identity of the flock. This term shall be interchangeable with the term herd and shall apply to purebred and commercial sheep or goats.
- (9) "Official certificate" means a Certificate of Veterinary Inspection, or other inspection or movement document approved by the Department, issued by a licensed accredited veterinarian at the point of origin prior to an interstate animal health movement into California.
- (10) "Official eartag" means an identification eartag approved by the Department and USDA as sufficiently tamper-resistant for the intended use and providing unique identification for each animal. An official eartag may conform to the alphanumeric National Uniform Ear Tagging System or another system approved by the Department and USDA, or it may bear a premises identification number that either contains or is used in conjunction with the producer's livestock production numbering system to provide a unique identification number.
- (11) "Official identification" means an identification mark or device approved by the Department and USDA.
- (12) "Official test for Brucella ovis" means a sample collected from a test eligible ram by a licensed accredited veterinarian and tested using an approved method at an approved laboratory. The individual identification of the ram tested must be recorded and accompany the sample to the laboratory
- (13) "Owner" means a person, partnership, company, corporation, or any other legal entity that has legal or rightful title to animals, whether or not they are subject to a mortgage.
- (14) "Premises" means the ground, area, buildings, and equipment occupied by one or more flocks of animals.
- (15) "Premises identification" means a Department and USDA approved method used to identify an animal back to the premises of the flock of origin.
- (16) "Scrapie" means a transmissible spongiform encephalopathy that is a fatal, degenerative disease affecting the central nervous system of sheep and goats.
- (17) "Scrapie consistent state" means a state that the Department and USDA recognize as having an effective scrapie control program.

- (18) "Scrapie Eradication Program" means the cooperative state and federal program administered by the USDA and Consistent States to control and eradicate scrapie.
- (19) "Scrapie infected flock" means any flock in which a representative of the Department or USDA has determined that a scrapie–positive female animal has resided unless an epidemiological investigation conducted by a representative of the Department or USDA shows that the animal did not lamb or abort in the flock.
- (20) "Scrapie low-risk commercial sheep and goats" means commercial whiteface, whiteface cross, or commercial hair sheep, and goats commingled with such sheep that would be low risk goats if they were not commingled with such sheep. Animals must be identified with official eartags, official tattoos, legible permanent brand or ear notch pattern registered with an official brand registry, or other methods approved by the Department. The flock must have no known risk factors for scrapie, including any exposure to female blackface sheep. Low-risk commercial sheep may only exist in a state where scrapie has not been diagnosed in the previous 10 years in commercial whiteface, whiteface cross, or commercial hair sheep that were not commingled with female blackface sheep.
- (21) "Scrapie low-risk goat" means a goat that is not scrapie-positive, suspect, has not been exposed to scrapie, has not commingled with sheep, and is from: a state in which scrapie has not been identified in a goat during the previous 10 years, or; a state in which scrapie has been identified in a goat during the previous 10 years, but the scrapie-positive goat was not born in the state, resided in the state for less than 72 months and did not kid while in the state, or; a state in which scrapie has been identified in a goat during the previous 10 years, and the scrapie-positive goat was commingled with sheep, but flock records allowed a complete epidemiological investigation to be completed and all resulting goat herds have completed the requirements of flock plans and are in compliance with post-exposure monitoring plans.
- (22) "Scrapie non-compliant flock" means any flock whose owner fails to comply with the requirements of the Department or USDA for the control and eradication of scrapie.
- (23) "Scrapie positive animal" means an animal for which a diagnosis of scrapie has been made by a laboratory approved by the Department and the USDA.
- (24) "Scrapie source flock" means a flock in which an animal was born and subsequently diagnosed as scrapie–positive at an age of 72 months or less.
- (25) "Scrapie suspect animal" means a sheep or goat suspected of having scrapie by an accredited veterinarian or a Department or USDA representative.
- (26) "Slaughter channels" means any animal that is sold, transferred, or moved directly to a slaughter facility; or to an approved saleyard; or to an individual for custom slaughter; or for feeding for the express purpose of improving the animals' condition for movement to slaughter. Sexually intact mature female animals kept in the same enclosure as breeding animals from another flock are not in slaughter channels.
- (27) "USDA" means the United States Department of Agriculture, Animal and Plant Health Inspection Service.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–18–70 as an emergency; effective upon filing (Register 70, No. 38). For prior history, see Register 66, No. 27.
- 2. Certificate of Compliance—Section 11422.1, Gov. Code, filed 10–28–70 (Register 70, No. 44).
- 3. Amendment filed 3–9–79; effective thirtieth day thereafter (Register 79, No. 10).
- 4. Repealer of former article 3 (sections 760–761), new article 3 (sections 760–760.9) and new section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.

- Certificate of Compliance as to 4–8–2003 order, including amendment of section, transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).
- Editorial correction implementing amendments contained in 7-29-2003 Certificate of Compliance and amending HISTORY 5 (Register 2003, No. 36).

§ 760.1. General Requirements.

- (a) The State Veterinarian may impose a quarantine pursuant to Food and Agricultural Code section 9562 if the requirements as specified in this article have not been met, or amend the requirements for entry into California in response to a change in disease status in any location, state, territory or country as determined by the State Veterinarian.
- (b) The provisions of this article are in addition to other provisions that may be required for moving animals into and within California as specified in statute or regulation.
- (c) Any person transporting animals into or within California shall produce any official documents required, including but not limited to, a Certificate of Veterinary Inspection with the Interstate Livestock Entry Permit number as required, with attachments, for each load or part of a shipment upon request by the Department or other official to prove that each animal transported meets the requirements of this article. Animals in any load or part of a shipment may be inspected en route or after arrival. NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–8–2003 order, including amendment of subsection (a), transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).
- 3. Editorial correction implementing amendments contained in 7–29–2003 Certificate of Compliance and amending HISTORY 2 (Register 2003, No. 36).

§ 760.2. Certificate of Veterinary Inspection.

- (a) A Certificate of Veterinary Inspection is a numbered interstate document that is a record of veterinary health inspection of one or more animals, issued on an official form of the state of origin and by an accredited veterinarian from the state of origin.
- (b) A Certificate of Veterinary Inspection shall include all of the following:
 - (1) Date of inspection;
 - (2) Number of animals in the consignment;
- (3) Description of the animals including species, breed, age, and sex and the official identification number(s) or registration tattoos;
- (4) Name, address, and telephone number of the consignor, consignee, and the origin and destination of the animals;
 - (5) Interstate livestock entry permit number, when required;
 - (6) Purpose for which the animals are being moved;
- (7) Written statement by the owner or accredited veterinarian at the point of origin as required by the Department or USDA for the interstate or intrastate movement of animals.
- (8) Signed by the accredited veterinarian who examined the animals in the shipment.
- (c) A copy of the completed Certificate of Veterinary Inspection shall be mailed to the Department within 15 days of examination to the following address: Department of Food and Agriculture, Animal Health Branch, 1220 "N" Street, Room A–107, Sacramento, California 95814.
- (d) The examining licensed and accredited veterinarian shall indicate on the Certificate of Veterinary Inspection that each animal in the shipment meets California entry requirements.
- (e) As an alternative to official individual identification on a Certificate of Veterinary Inspection, another animal identification document may be used if approved by the Department and USDA.
- (f) The Department may require a Certificate of Veterinary Inspection for animals entering California because of a disease condition in another state, even though the animals are exempt from obtaining a Certificate of Veterinary Inspection under this article.

- (g) All animals shall be transported directly and without delay to the destination stated on the Certificate of Veterinary Inspection.
- (h) A Certificate of Veterinary Inspection shall be valid for 30 days following the inspection of the animals described.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–8–2003 order, including amendment of section, transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).
- 3. Editorial correction implementing amendments contained in 7–29–2003 Certificate of Compliance and amending HISTORY 2 (Register 2003, No. 36).

§ 760.3. Interstate Livestock Entry Permits.

- (a) An Interstate Livestock Entry Permit may be required for the importation of animals into California pursuant to the requirements of this article
- (b) An Interstate Livestock Entry Permit is a numbered document issued by the Department for approving the movement of animals that meet entry requirements into California.
- (c) Requests for Interstate Livestock Entry Permits shall be made to the Department's Animal Health Branch before the animals are transported to California. Requests for entry permits may be made by telephone, electronic transmission, or other means accepted by the Department. Written application may be required when necessary to accomplish the purposes of this article.
- (d) Each Interstate Livestock Entry Permit shall have a unique number and the number may be issued to the applicant by telephone or other electronic means approved by the Department. A copy of the permit will not be sent to the applicant unless specifically requested or it is needed to accompany a shipment.
- (e) The applicant for the Interstate Livestock Entry Permit shall establish that all animals in the shipment meet California entry requirements, and possess a Certificate of Veterinary Inspection when required.
- (f) The applicant for the Interstate Livestock Entry Permit shall provide the Department with the following information:
 - (1) Name, address, and telephone number of the shipper or importer;
 - (2) Origin of the shipment;
- (3) The number and description of the animals being imported, including, species, breed, age, sex, and purpose for which the animals will be used:
- (4) Name, mailing address, and telephone number of entity receiving the animals, or a geographic destination if animals are not being received at the destination mailing address;
- (5) Name, address, and telephone number of a contact person in California, if not the owner; and the name, address, and telephone number of the person requesting the permit;
 - (6) Certificate of Veterinary Inspection number, if available;
 - (7) Name of the flock veterinarian, if available; and
- (8) Confirm that animals meet the entry requirements for the type of animals entering California.
- (g) An Interstate Livestock Entry Permit is required for the entire shipment of animals, which may consist of one or more loads.
- (h) All animals shall be transported directly and without delay to the destination stated on the Interstate Livestock Entry Permit.
- (i) The State Veterinarian may deny the request for an Interstate Livestock Entry Permit pursuant to sections 9562 and 9570 of the Food and Agricultural Code.
- (j) Interstate Livestock Entry Permits shall expire 15 days after issuance.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

 New section filed 4-8-2003 as an emergency; operative 4-8-2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by

Page 60

- 8-6-2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–8–2003 order, including amendment of section, transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).
- Editorial correction implementing amendments contained in 7–29–2003 Certificate of Compliance and amending HISTORY 2 (Register 2003, No. 36).

§ 760.4. Ovine Brucellosis — Requirements for Entry of Rams into California.

- (a) Rams six (6) months of age and over shall have all of the following:
- (1) Individual identification with an official eartag or registration tattoo if accompanied by registration papers;
- (2) A negative official test for *Brucella ovis* within 60 days before entry into California or be from a *Brucella ovis* free flock. The individual identification of the ram tested must be recorded and accompany the sample to the laboratory.
- (A) Rams may be exempt from the *Brucella ovis* test requirement when:
 - 1. Moved for grazing purposes, without change of ownership, or
- 2. Entered in a show or sale outside of California where ownership changes, and the ram is returning to California.
- (B) Any ram with a positive test result will not be allowed entry into California until retested negative 30–60 days after the initial positive test.
- (3) A Certificate of Veterinary Inspection as specified by this article, with official identification, test results, name of the approved laboratory, date of the test, or the "*Brucella ovis* free flock number" must be recorded on the form.
- (b) Any ram six (6) months of age and older originating from a flock in which *Brucella ovis* has been diagnosed within the past 12 months shall have either:
- (1) A negative official *Brucella ovis* test conducted within 60 days prior to entry and isolation from the breeding flock upon arrival until retested negative within 45–120 days of the initial pre–entry test; or
- (2) Two (2) consecutive negative official *Brucella ovis* tests conducted 45–120 days apart with the last test conducted within 60 days prior to entry.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the
- Certificate of Compliance as to 4–8–2003 order, including amendment of section, transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).
- 3. Editorial correction implementing amendments contained in 7–29–2003 Certificate of Compliance and amending HISTORY 2 (Register 2003, No. 36).
- 4. Amendment filed 10–27–2006; operative 11–26–2006 (Register 2006, No. 43).

§ 760.5. Scrapie — Requirements for Entry of Sheep and Goats into California.

- (a) An Interstate Livestock Entry Permit is required for all animals imported into California except:
- (1) Lambs or kids less than 18 months of age in slaughter channels that have not lambed, kidded, aborted, or are pregnant;
 - (2) Low risk goats.
- (b) Official identification, in accordance with the methods and procedures in 9 CFR Part 79 (1/1/02 Edition), is required for all animals imported into California except:
- (1) Lambs or kids less than 18 months of age in slaughter channels that have not lambed, kidded, aborted, or are pregnant;
 - (2) Low-risk goats;
- (3) Castrated animals less than 18 months of age that are not for exhibition:
 - (4) Animals moving for grazing without change of ownership.
- (c) A Certificate of Veterinary Inspection is required for all sexually intact breeding animals imported into California, and the owner shall include the following phrase on the certificate: "The animals are not scra-

pie-positive or suspect, or are from a scrapie non-compliant flock." The following animals are exempt from this requirement:

- (1) Lambs or kids less than 18 months of age in slaughter channels that have not lambed, kidded, aborted, or are pregnant;
 - (2) Low-risk goats;
 - (3) Animals moving for grazing without change of ownership;
 - (4) Animals over 18 months of age in slaughter channels;
 - (5) Low risk commercial sheep, which require the following:
- (A) A written statement containing the following phrase issued by the accredited veterinarian at the point where the animals originated, and dated within 12 months of the date of movement: "To the best of my knowledge, the flock has no known risk factors for or exposure to scrapie. I have inspected the flock and it does not contain any: animal exhibiting signs of scrapie, female blackfaced sheep or female blackfaced cross sheep that were not born in the flock." The statement must include the owner's name, address, and the official eartags, official tattoos, or premises identification number and a drawing of the owner's registered brand or ear notch pattern if applicable; and,
- (B) A written statement containing the following phrase by the owner within 30 days of the date of movement: "The animals were born in the flock and the flock does not contain any animal showing signs of scrapie. To the best of my knowledge, the flock has no risk factors for or exposure to scrapie, and the flock has never contained any: animal diagnosed as having scrapie, any female blackfaced sheep or any female blackface cross sheep that were not born in the flock."
- (d) All animals imported into California for exhibition require the following:
- (1) Official identification, in accordance with the methods and procedures in 9 CFR Part 79 (1/1/02 Edition), shall be kept on the animals;
 - (2) Certificate of Veterinary Inspection;
 - (3) Interstate Livestock Entry Permit.
- (e) Any animal that is scrapie positive, suspect, or may have been exposed to scrapie, or from a scrapie infected, source, or non-compliant flock, shall be evaluated on a case-by-case basis and may only be allowed entry into California with the approval of the designated scrapie epidemiologist.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–8–2003 order, including amendment of subsections (b), (c) and (d)(1), transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).
- 3. Editorial correction implementing amendments contained in 7–29–2003 Certificate of Compliance and amending HISTORY 2 (Register 2003, No. 36).

§ 760.6. Scrapie — Intrastate Movement of Sheep and Goats.

- (a) Official identification, in accordance with the methods and procedures in 9 CFR Part 79 (1/1/02 Edition), is required for all animals changing ownership except:
- (1) Lambs or kids less than 18 months of age in slaughter channels that have not lambed, kidded, aborted, or are pregnant; or
 - (2) Low-risk goats; or
- (3) Castrated animals less than 18 months of age that are not for exhibition.
- (b) Exhibition animals shall have official identification, in accordance with the methods and procedures in 9 CFR Part 79 (1/1/02 Edition), which shall be kept on the animals.
- (c) Any animal that is scrapie positive or suspect may only be moved from one premises to another premises if the designated scrapie epidemiologist determines that such a move poses a minimum risk to other animals in California.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

- New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–8–2003 order, including amendment of section, transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).
- Editorial correction implementing amendments contained in 7–29–2003 Certificate of Compliance and amending HISTORY 2 (Register 2003, No. 36).

§ 760.7. Scabies — Requirements for Entry of Sheep and Goats into California.

- (a) Pursuant to Food and Agricultural Code sections 9562 and 9570, the State Veterinarian may require persons importing animals into California to meet the following requirements to prevent the introduction or spread of scabies:
 - (1) A Certificate of Veterinary Inspection;
 - (2) An Interstate Livestock Entry Permit;
 - (3) Treat animals to prevent the spread of scabies.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 4–8–2003 order transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).

§ 760.8. Records Retention.

- (a) Each person who buys or sells, for his or her own account or as the agent of the buyer or seller, transports, receives for transport, offers for sale or transportation, applies official identification, or otherwise handles sheep or goats must insure animals are identified as required and shall retain the following records where applicable:
- (1) Transfer of ownership, shipment, or handling of the sheep or goats, such as, yarding receipts, sale tickets, invoices and waybills for at least five (5) years after the person has sold or otherwise disposed of the sheep or goats to another person;
- (2) Official documents used for transportation purposes, including Certificates of Veterinary Inspection and Interstate Livestock Entry Permit numbers for at least five (5) years after the animals entered California
- (3) Records of all identification marks or devices used to officially identify any animal moving intrastate and/or interstate, including the date animals were identified and the official identification number applied, must be maintained for at least five (5) years by the owner of the flock of origin or any person who applies the identification.
- (b) The records shall be available for inspection and photocopying upon request by the Department or the USDA.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 4-8-2003 order transmitted to OAL 7-18-2003 and filed 7-29-2003 (Register 2003, No. 31).

§ 760.9. Violations.

- (a) Failure to comply with any part of this article constitutes a violation.
- (b) The Department shall act consistent with existing enforcement authority concurrently or at a later date unless otherwise prohibited. Such authority includes the following:
- (1) Denial, suspension, or revocation of a license, registration, certificate, permit, exception, or other indicia of authority issued by the Department:
 - (2) Civil or administrative penalties;

- (3) Referral to the appropriate District Attorney or the Attorney General for criminal prosecution or other appropriate remedy;
- (4) Reimbursement to the Department for any costs incurred due to any violation of this article.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–8–2003 as an emergency; operative 4–8–2003 (Register 2003, No. 15). A Certificate of Compliance must be transmitted to OAL by 8–6–2003 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 4–8–2003 order transmitted to OAL 7–18–2003 and filed 7–29–2003 (Register 2003, No. 31).

§ 761. Canadian Sheep Prohibited Because of Scrapie, Section 211, Agricultural Code.

NOTE: Authority cited: Sections 16 and 211, Agricultural Code. Proclamation of Governor.

HISTOR'

- 1. New section filed 3–28–59 as an emergency; effective upon filing (Register 59, No. 6).
- Certificate of Compliance—Section 11422.1, Gov. Code, filed 5–26–59 (Register 59, No. 8).
- 3. Repealer filed 12–31–59 as an emergency; effective upon filing (Register 60, No. 1).
- 4. Certificate of Compliance—Section 11422.1, Government Code, filed 2–26–60 (Register 60, No. 4).

Article 3.5. Brucella ovis Free Flock Certification

§ 765. Brucella ovis Free Flock Certification Requirements.

- (a) Definitions are incorporated by reference from section 760(a)(1) through (5), (7) through (15), and (27) of Article 3 of Chapter 2, Division 2, of Title 3 of the California Code of Regulations.
- (b) Any person interested in obtaining *Brucella ovis* Free Flock Certification in California, should contact their local Animal Health Branch District Office of the Department.
- (c) A flock of sheep may qualify as a *Brucella ovis* Free Flock when all rams six (6) months of age and older have completed two (2) negative *Brucella ovis* tests 45–120 days apart.
- (d) The Department will provide written verification to the owner of the flock recognizing the flock as a *Brucella ovis* Free Flock upon receipt of all completed test results from the veterinarian or the laboratory where the testing was performed as required by this section. The written verification will include, at a minimum, a statement that the flock is certified in California as a *Brucella ovis* Free Flock, and the date of certification.
 - (e) Approved Brucella ovis Tests.
- (1) Brucella ovis testing must be performed in a laboratory approved by the Department.
- (2) Samples must be taken and sent to an approved laboratory by a California state licensed and USDA accredited veterinarian.
- (3) Tests used for *Brucella ovis* Free Flock Certification must be approved by the Department or the USDA.
- (f) Brucella ovis Free Flock Certification will be valid for one year. For continuous Brucella ovis Free Flock Certification status:
- (1) All rams six (6) months of age and older must have one negative *Brucella ovis* test within 9–15 months of the last certification date, and
- (2) Any ram introduced into the flock must be from a *Brucella ovis* Certified Free Flock as defined herein, or be held in isolation until the completion of two (2) negative *Brucella ovis* tests conducted 45–120 days apart.
- (3) A flock that loses certified–free flock status may be recertified by repeating the certification process.
 - (g) Positive Brucella ovis Tests.
- (1) Any ram with a positive test result shall be held in isolation and retested 30–60 days after the initial positive test, or removed from the flock.
- (2) A loss of certified free status will result when a positive ram has not been held in isolation. A flock that loses certified–free flock status may be recertified by repeating the certification process.

Page 60.2 Register 2006, No. 43; 10-27-2006

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562 and 9570, Food and Agricultural Code.

HISTORY

1. Amendment of article heading and new section filed 10–27–2006; operative 11–26–2006 (Register 2006, No. 43). For prior history, see Register 2003, No. 31.

§ 765.1. Scrapie Disease of Sheep Quarantined Areas.

HISTORY

- New section filed 5-22-69 as an emergency; effective upon filing (Register 69, No. 21). For prior history, see Register 69, No. 19.
- 2. Certificate of Non–compliance—Sec. 11422.1, Gov. Code (Repealer by operation of law) filed 8–4–69 (Register 69, No. 32).
- 3. Amendment filed 1–19–70 as an emergency; effective upon filing (Register 70, No. 4).
- Certificate of Non-compliance (repealer by operation of Section 11422.1, Gov. Code) filed 5–25–70 (Register 70, No. 22).
- Amendment filed 7–6–82 as an emergency; effective upon filing (Register 82, No. 29).
- Order of Repeal of 7–6–82 emergency order filed 7–12–82 by OAL pursuant to Government Code Section 11349.6 (Register 82, No. 29).

Article 4. Vessel and Aircraft Garbage Disposal

§ 770. Definitions.

(a) "Food stores" as defined in Section 16003 of the Food and Agricultural Code means any of the following when carried as stores of vessels or aircraft, including those carried in passengers' and crews' quarters: fresh fruits or fresh vegetables or animal products. Those products that have been sterilized and canned such as canned milk or canned meats are exempt.

(b) "Garbage" as defined in Section 16004 of the Food and Agricultural Code means all waste material derived in whole or in part from fruits, vegetables, meats, or other plant or animal (including poultry) material, and other refuse of any character whatsoever that has been associated with any such material on board any means of conveyance, including food scraps, table refuse, galley refuse, food wrappers or packaging materials, and other waste material from stores, food preparation areas, passengers' or crews' quarters, dining rooms, or any other areas on vessels, aircraft, or other means of conveyance.

NOTE: Authority cited: Sections 407 and 16051, Food and Agricultural Code. Reference: Sections 16003–16004, Food and Agricultural Code.

HISTORY

- 1. New Sections 770-778 filed 5-13-46 (Register 3).
- 2. Amendment filed 7–11–77; effective thirtieth day thereafter (Register 77, No. 29).
- 3. Amendment filed 10–5–83; effective thirtieth day thereafter (Register 83, No. 41).

§ 771. Retention and Maintenance on Vessels, Aircraft or Other Vehicles.

Garbage may be retained or maintained inboard on vessels, on aircraft or on other vehicles in tightly closed containers or receptacles only. The Director of Food and Agriculture, his deputy or inspector may at any time require such other disposal or treatment of garbage, containers, or receptacles as he or they may deem necessary for the protection of agriculture. NOTE: Authority cited: Sections 407 and 16051, Food and Agricultural Code. Reference: Sections 16101 and 16152, Food and Agricultural Code.

HISTORY

- Amendment filed 7-11-77; effective thirtieth day thereafter (Register 77, No. 29).
- Amendment filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41).

§ 772. Collection or Transportation of Discharged Garbage.

No garbage shall be collected at, or transported from, any vessel or aircraft except for immediate disposal by a method described in Section 774 without removal from the dock, pier, mole, or airport, unless the person, firm, or corporation collecting or transporting such garbage holds a valid license issued by the Director or by the United States Department of Agriculture permitting such collection or transportation to an incinerator or grinder, or for movement to sea for dumping as herein provided. All garbage so collected, transported, or otherwise moved from the dock, pier, mole or airport shall be in tight containers.

NOTE: Authority cited: Sections 407 and 16051, Food and Agricultural Code. Reference: Sections 16151 and 16153, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–11–77; effective thirtieth day thereafter (Register 77, No. 29).
- Amendment filed 10-5-83; effective thirtieth day thereafter (Register 83, No. 41).

§ 773. Segregation of Garbage.

Domestic garbage and sterilized foreign garbage sterilized in accordance with Section 774(d) may have recyclable materials separated and removed at an intermediate facility between the point of collection and disposal, provided the facility, method of separation, method of treatment of the recyclable material and final disposition of the recyclable material is adequate to prevent dissemination of livestock diseases. Domestic garbage and sterilized foreign garbage remaining shall be disposed of by one of the methods described in Section 774(a), (b), (c), or (d)(3). NOTE: Authority cited: Sections 407 and 16051, Food and Agricultural Code. Reference: Sections 16004, 16051, 16101 and 16151, Food and Agricultural Code.

History

- 1. Amendment filed 7–11–77; effective thirtieth day thereafter (Register 77, No. 29)
- 2. Amendment filed 10–5–83; effective thirtieth day thereafter (Register 83, No. 41).

§ 774. Methods of Garbage Disposal.

All facilities used for garbage disposal shall be adequate to prevent the dissemination of plant and animal diseases, and disposal shall be by one of the following methods:

- (a) Complete reduction to ash by incineration.
- (b) Reduction to a liquid state by grinding and discharge into sea water.
- (c) Dumping at sea at a distance from shore which will preclude the return ashore of any portion of such garbage. Such dumping shall be done in compliance with the provisions of Section 4401 et seq. of the Health and Safety Code of California.
- (d) Sterilization by heat in a closed tank, chamber or cabinet for a period of two hours at a constant mass temperature not less than 212°F.
- (1) The sterilization tank, chamber or cabinet shall be provided with an adequate source of steam and equipped with a recording thermometer and a mechanical agitator to assure complete and uniform heat penetration to all parts of the mass for the duration of the exposure.
- (2) Temperature records shall be retained on file six months for periodic checks by authorized inspectors.
- (3) After sterilization, as provided in this section, the garbage shall be disposed of in a sanitary land fill and covered in a timely manner to prevent dissemination by birds or other animals. The land fill must not be on premises or adjacent to premises where livestock are kept.
- (e) Garbage from a vessel having food stores procured only in California may be disposed of in a sanitary land fill provided the vessel has not had contact with any port outside of California since procuring stores.
- (f) Garbage from aircraft, derived from meals served or prepared for serving to passengers or crew while in flight, may be disposed of by grinding through a garbage disposal unit and discharged into a sewage disposal system designed and operated to prevent the discharge of sewage effluents onto land surfaces, lagoons or other stationary waters.
- (g) Garbage from aircraft involved only in domestic flights, originating and terminating in the continental United States, Alaska, Hawaii, or Canada that do not contact foreign airports, and that utilize only food stores produced and procured within these areas, may be disposed of in a sanitary land fill.

NOTE: Authority cited: Sections 407, 16051 and 16151, Food and Agricultural Code. Reference: Sections 16101, 16151 and 16152, Food and Agricultural Code.

- 1. Amendment of subsection (g) filed 3-3-78; effective thirtieth day thereafter (Register 78, No. 9). For prior history, see Register 77, No. 29.
- 2. Amendment filed 10-5-83; effective thirtieth day thereafter (Register 83, No.

- 1. New Sections 782 and 783 filed 4-7-50 as an emergency (Register 20, No. 1).
- 2. Repealer of Article 5 (Sections 782 and 783) filed 2–23–83; effective thirtieth day thereafter (Register 83, No. 9).

Article 5.5. Pollorum Disease and Fowl Typhoid of Poultry

§ 784. Definitions. [Repealed]

NOTE: Authority cited for Article 5.5: Sections 16 and 200, Agricultural Code. Reference: Sections 200.5, 202, 204, and 204.5, Agricultural Code.

HISTORY

- 1. New Article 5.5 (Sections 784 and 784.1) filed 7–19–63; effective thirtieth day thereafter (Register 63, No. 13).
- Repealer of article 5.5 (sections 784–784.2) and section filed 4–1–2008; operative 5–1–2008 (Register 2008, No. 14).

§ 784.1. Intrastate Movement. [Repealed]

HISTORY

1. Repealer filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 784.2. Interstate Movement. [Repealed]

NOTE: Authority cited: Sections 16 and 211, Agricultural Code.

HISTORY

- 1. New section fled 7–19–63; effective thirtieth day thereafter (Register 63, No. 13)
- 2. Repealer filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

Article 6. Vesicular Exanthema in Swine—Quarantine Regulation

§ 790. Definition of Terms.

As used in this regulation:

- (a) "Director."
- The Director of Agriculture of the State of California.
- (b) "Bureau."
- Bureau of Livestock Disease Control, California Department of Agriculture.
 - (c) "Person."
 - Any person, firm, corporation, company, or association.
 - (d) "Ouarantined District."

Those counties or parts of counties of the State, as enumerated in Section 790.1 of this article, in which—

- (1) Vesicular exanthema exists, or
- (2) There are swine that have been infected with or exposed to vesicular exanthema, or
 - (3) Raw garbage is being fed to swine, or
 - (4) Raw garbage has been fed to swine within 30 days, or
- (5) There are premises that have not been cleaned and disinfected since vesicular exanthema was last found.
- (e) "Nonquaratined District" Those counties or parts of counties not under quarantine for vesicular exanthema.
 - (f) "Moved" or "Movement."

As applied to swine, the term "moved" or "movement" means transported, shipped, delivered, or received for transportation, driven on foot or caused to be driven on foot, by any person, and as applied to swine products, the term "moved" or "movement" means transported, shipped, or delivered or received for transportation, by any person.

(g) "Garbage."

Waste consisting in whole or in part of animal waste resulting from handling, preparing, cooking, and consuming of food, including the offal from animal carcasses or parts thereof, but excluding such waste, from ordinary household operations, which is fed directly to swine on the same premises.

(h) "Raw Garbage."

Garbage that has not been heated throughout to boiling or equivalent temperature (usually 212 degrees F. at sea level) but for 30 minutes, or treated according to a method approved by the chief of the bureau.

(i) "Cooked Garbage."

Garbage that has been heated throughout to boiling or equivalent temperature (usually 212 degrees F. at sea level) for 30 minutes, or treated according to a method approved by the chief of the bureau.

(j) "Swine Product."

Any carcass, part, or offal of swine that has not been processed as follows:

- (1) Boneless swine products heated to an internal temperature of at least 156 degrees F. momentarily, or to an internal temperature of at least 145 degrees F. for 15 minutes.
- (2) Swine products, containing bone, heated to an internal temperature of at least 156 degrees F. for 15 minutes.
- (3) Other method or methods of processing approved by the chief of the bureau, or by the United States Department of Agriculture.
- (4) The processing referred to in (1) and (2) shall be under the supervision of a federal, state, or state–approved municipal meat inspector.
 - (k) "Public Stockyard."

A stockyard or auction yard or sales yard where trading in livestock is carried on; where yarding, feeding, and watering facilities are provided by the stockyard, transportation, or similar company.

(1) "Conveyance."

Truck, trailer, railroad, car, boat, or any other object used or capable of being used to transport swine.

(m) "Common Carrier."

Any conveyance hired or loaned to transport swine.

NOTE: Authority cited for Article 6, Sections 16, 200, 202, 204, 204.5, 205 and 206, Agricultural Code.

HISTORY

- 1. New Article 6 (§§ 790, 790.1, 791, 791.1, 792, 792.1) filed 2–17–54; effective thirtieth day thereafter (Register 54, No. 4).
- 2. Amendment filed 7–30–54; effective thirtieth day thereafter (Register 54, No. 16)
- 3. Amendment filed 9–21–54 as an emergency; designated effective 10–1–54 at 12.01 a.m. (Register 54, No. 20).

§ 790.1. Districts Under Quarantine.

HISTORY

- 1. Amendment filed 1–31–56 as an emergency; effective upon filing (Register 56, No. 3). (For previous history of section see Register 55, No. 17).
- 2. Repealer filed 4–20–56 as an emergency; effective upon filing (Register 56, No. 7)

§ 790.2. Destruction of Swine to Prevent the Spread of Vesicular Exanthema.

- (a) When deemed necessary by the director in order to prevent the continuation and the spread of vesicular exanthema, he may require all swine in a quarantined district, infected with the disease or exposed to such disease, to be destroyed, and the carcasses disposed of under the supervision of a representative of the bureau.
- (b) The director may require that guards be stationed in and about all quarantined areas to police the same, and to enforce the law and regulations relating to vesicular exanthema.
- (c) When swine are destroyed in a quarantined district as provided by this section, the director may require such premises as he deems necessary to be cleaned, disinfected and tested under the direction of a representative of the bureau before such premises are released from quarantine.

HISTORY

1. New section filed 11–23–55 as an emergency; effective upon filing (Register 55, No. 17).

§ 791. Movements of Swine and Swine Products from a Quarantined District.

(a) Excepting when accompanied by a permit issued by a federal or state inspector, the movement of swine or swine products from a quarantined district is prohibited.

[The next page is 63.]

- (b) Swine within a quarantined district may be moved, for immediate slaughter and processing, as described in Section 790 hereof, under permit issued by a federal or state inspector directly to an establishment approved by the chief of the bureau or by the United States Department of Agriculture.
- (c) Swine within a quarantined district may be moved direct to another quarantined district on permit from a state or federal inspector; said inspector may issue such a permit only when he is satisfied that there is no danger of spreading vesicular exanthema by or through such movement.
- (d) Swine or Swine Products That Have Been Exposed to or Infected With Vesicular Exanthema.
- (1) Swine or swine products infected with or exposed to vesicular exanthema may be moved for processing, as described in Section 790 hereof, under permit issued by a federal or state inspector directly to a slaughtering or processing establishment approved by the chief of the bureau or by the United States Department of Agriculture. The movement shall be under federal or state seals or accompanied by a federal or state inspector.
- (2) Swine that have been exposed to or infected with vesicular exanthema may be moved, under official permit for slaughter only, directly to a federal inspected establishment where adequate provisions are maintained to prevent the pork products therefrom moving into interstate commerce or to a state inspected establishment, 60 days after the last animal has healed, provided no swine on the premises have been fed raw garbage for at least 30 days prior to movement. The 60–day period, referred to in this paragraph, may be reduced to 30 days if no swine have been added to or moved to, over or upon the said premises from outside sources since the last infection was observed.

- 1. New section filed 2–17–54; effective thirtieth day thereafter (Register 54, No. 4).
- 2. Amendment filed 7–30–54; effective thirtieth day thereafter (Register 54, No. 16).
- 3. Amendment filed 9-21-54 as an emergency; designated effective 10-1-54 at 12:01 a.m. (Register 54, No. 20).
- 4. Amendment filed 4–1–55 as an emergency; effective upon filing (Register 55, No. 5)

§ 791.1. Movement of Garbage.

- (a) Garbage shall not be moved from a quarantined district to, through or into a nonquarantined district, except in the following instances:
- (1) When, under permit of the director, garbage is to be moved for the purpose of cooking;
- (2) When, under permit of the director, said garbage has been cooked;
- (3) When, under permit of the director, garbage is to be moved to a location where swine are not likely to come into contact with raw garbage.
- (b) After any quarantine district located within a nonquarantined district meets the requirements of a nonquarantined district, and is so declared, no raw garbage shall be moved within, through or into such nonquarantined district for the purpose of feeding to swine as raw garbage.

HISTORY

- 1. New section filed 2–17–54; effective thirtieth day thereafter (Register 54, No. 4).
- Amendment filed 3-22-54 as an emergency; effective upon filing (Register 54, No. 7).

§ 792. Cleaning and Disinfecting of Conveyances and Facilities.

Common carrier vehicles and public yards known to have been used for transporting or handling swine fed raw garbage or infected with or exposed to vesicular exanthema shall be cleaned and disinfected. The cleaning and disinfection required in this section shall be done immediately and before the yards or vehicles are again used to transport or handle swine.

HISTORY

 New section filed 2-17-54; effective thirtieth day thereafter (Register 54, No. 4). 2. Amendment filed 9–21–54 as an emergency; designated effective 10–1–54 at 12.01 a.m. (Register 54, No. 20).

§ 792.1. The Cleaning and Disinfecting

required in this regulation shall be as follows:

- (a) Remove all litter, feed, and manure from all portions of each car, boat, truck, or other vehicle, including all ledges and framework outside, and handle such litter, feed, and manure in such manner as not to expose livestock to any disease contained therein; clean the interior and the exterior of each such vehicle and its equipment, saturate the entire interior surface, including all doors, end gates, portable chutes, and similar equipment with one of the disinfectants prescribed in (c). The following prescribed method of cleaning and disinfecting of other facilities shall be used:
- (b) Empty all troughs, racks, and other feeding and watering appliances; remove all litter, feed and manure from the floors, posts, or other parts, and handle such litter, feed, and manure in such manner as not to expose livestock to any disease contained therein; saturate the entire surface of the fencing, troughs, chutes, floors, walls, and all other parts with one of the disinfectants prescribed in (c).
 - (c) Disinfectants to be used:
- (1) Soda ash (sodium carbonate) used at the rate of one pound to three gallons of water.
 - (2) Sal soda used at the rate of 13 1/2 ounces to one gallon of water.
- (3) Lye (sodium hydroxide) used at the rate of 13 ounces to five gallons of water.
- (d) The cleaning and disinfecting required in this regulation shall be done without expense to the State.
- (e) The cleaning and disinfecting shall be done under the supervision of and approved by a state or federal inspector.

Article 7. Swine Diseases from Garbage

§ 793. Licensing.

HISTORY

- 1. New Article 7 (Sections 793–794.5) filed 10–14–55; designated effective 1–1–56 (Register 55, No. 15). For prior history, see Register 54, No. 20.
- 2. Repealer filed 11-29-84; effective thirtieth day thereafter (Register 84, No. 48).

§ 794. New Construction and Installations.

- (a) Plans for new construction and installations shall be submitted to the Director of Agriculture for his official approval prior to starting said construction or installation.
- (b) New construction of buildings and of feeding and cooking platforms shall have concrete foundations with rat-proof walls. Said rat-proof walls shall extend at least 18 inches below ground level, and shall be not less than three inches thick.
- (c) Balcony brooder or feeding platforms are not permitted unless constructed of concrete or equally impervious material.

HISTORY

1. Amendment filed 6–20–56 as an emergency; effective upon filing (Register 56, No. 12).

§ 794.1. Garbage Cooking Operations.

- (a) Garbage cooking equipment and facilities shall be adequate for the type, size and location of the garbage feeding operation.
- (b) The cooking area shall be segregated from the feeding, housing or hog lot sections by fencing adequate to prevent access to raw garbage by swine, other livestock and poultry.
- (c) Cooking operations shall be so located and protected as to insure proper cooking under varying weather conditions.
- (d) Garbage shall be cooked within 24 hours from the time of arrival at the cooking area. In emergency cases, as a breakdown of equipment or when extra tonnage is involved due to holidays, the time limit may be extended to 48 hours.
- (e) All cooking operations shall be conducted in a clean and sanitary manner. At no time shall food wastes, rubbish, boxes, crates and salvage

material be allowed to accumulate in the cooking area. The cooking area and equipment shall be washed, steamed or dry cleaned at the close of daily cooking operations.

- (f) In the cooking operation, the vat or container used shall not be filled to more than 90% of the full capacity of said vat or container.
- (g) All operators cooking over 50 gallons of garbage at one time shall possess and use a thermometer capable of recording temperatures up to 220°F, and of a size sufficient to accomplish the purpose. The operator shall check temperatures of the entire mass being cooked in order to determine whether said mass has been cooked to a boiling temperature.
- (h) A record of each cooking operation shall be maintained by the operator and retained by the operator for a period of at least 60 days.
- (i) Cooking platforms shall be tightly constructed to prevent leakage, and shall be constructed of concrete or equally impervious materials which can be readily washed, cleaned and disinfected. This requirement shall apply where one ton or more of garbage is cooked at one time. Adequate drainage shall be installed and maintained to prevent drainage into hog pens of fluids remaining in the cooking area. Grease traps or catch basins shall be provided for drainage from the cooking platforms.
- (j) An adequate supply of piped fresh water shall be available at all cooking and feeding areas where over one ton of garbage is cooked.

§ 794.2. Feeding Operations.

All feeding platforms or containers in or adjacent to any garbage feeding area shall:

- (a) be of concrete or equally impervious materials, tightly constructed to prevent leakage, that can be readily cleaned, washed, and disinfected;
- (b) have a curb adequate to confine garbage and fluids but in no case less than three inches high; and
- (c) be kept in a clean and sanitary condition by washing or dry cleaning. Refuse shall be removed from the feeding area within 48 hours after completion of the feeding.

HISTORY

1. Amendment filed 6-20-56 as an emergency; effective upon filing (Register 56, No. 12).

§ 794.3. Sanitation Requirements.

- (a) Disposal of refuse shall be handled in such a manner as to prevent the establishment of a nuisance or a harbor for insects and rodents.
- (b) Liquid wastes shall be disposed of in such a manner as to prevent the pollution of water used for public, domestic and livestock purposes, and also to avoid the creation of a nuisance or health hazard.
- (c) A supply of clean drinking water shall be available at all times. Water troughs shall be kept clean and so constructed or covered as to permit only the nose of the hog to enter.
 - (d) Adequate control of insects and rodents shall be employed.
- (e) All dead animals shall be disposed of within 24 hours after death by movement to an approved reduction plant, by cremation, or by burial.

§ 794.4. Direct Fire Cooking Equipment.

(a) Size.

The vat or container shall be large enough to hold at least 10% more than the largest load obtained for one cooking.

- (b) Equipment Design.
- (1) Location of Vat.

Shallow, flat vats shall be set in a firebox so that no more than one inch of the sides extends above the firebox.

Upright drums or metal barrels may extend above the firebox, provided the cooking operation has proved to be satisfactory and adequate.

- (2) The material of the firebox shall be of fire brick or of equally fireresistant material.
- (3) All four sides of the vat shall be walled in, allowing openings where necessary for fuel and draft.
 - (4) Cover.

A tight cover shall be provided and so designed that accumulated water of condensation will run back into the vat.

- (5) Facilities shall be provided for agitation of garbage while being cooked.
 - (c) Fuel.

Fuel supply shall be adequate to maintain a continuous and controlled flame during the cooking period.

§ 794.5. Steam Treating Equipment.

- (a) Tanks or vats equipped with mechanical agitators, either mobile or stationary, shall have recording thermometers installed in such a manner as to record correctly the lowest temperature of the garbage being cooked.
 - (b) Steam Pipes in Truck Bed.
- (1) The maximum load to be cooked shall not exceed 90% of the capacity of the truck bed, unless a satisfactory and adequate mechanical agitator is used.
- (2) Steam pipes or channels in truck beds shall be in contact with the floor, and shall be so located and of sufficient number to heat the entire load to a boiling or equivalent temperature. Steam pipes or steam channels shall be blown out regularly. Outlet holes shall be checked for obstruction, and shall be maintained in good operating condition.
 - (3) Cover.
- A tight cover shall be provided unless adequate provisions are made for mechanical agitation.
- (4) Operators cooking over five—ton loads of garbage at one time in trucks shall install a platform of height and length along one side of cooking platform sufficient for the safe determination of cooking temperatures and the proper agitation of cold spots in the garbage being cooked.
 - (5) Cold Spots.

Some means shall be provided for correcting cold spots found in the garbage being cooked. Claw forks or steam nozzles shall be used for manual agitation, in lieu of installed mechanical agitation.

(6) Sanitation.

Adequate means for cleaning trucks and equipment shall be provided.

HISTORY

- 1. Renumbering from 795.5 filed 7-27-71; effective thirtieth day thereafter (Register 71, No. 31). For prior history, see Register 69, No. 46.
- 2. Repealer filed 3–1–2005; operative 3–31–2005 (Register 2005, No. 9).

§ 795.34. Swine Brucellosis Control Area Regulation.

On or after July 1, 1962, the Department may, after hearing establish and maintain swine brucellosis control areas within the State wherein the Department shall examine and test such swine for brucellosis as the Director may specify and limit the movements of swine from herds found to be infected with brucellosis to bring about the control and eradication of swine brucellosis within such control ares. When a county has been established as a swine brucellosis control area, the following shall apply:

- (a) Definitions
- (1) "Premises" means any place where swine have been or are kept.
- (2) "Swine or animal" means the domestic hog of the family Suidae.
- (3) "Vaccine" means any vaccine produced by a laboratory licensed by the United States Department of Agriculture or California Department of Public Health for use in preventing and/or treatment of brucellosis in
- (4) "Swine brucellosis" means the disease of swine caused by "Brucella" microorganisms.
- (5) "Official inspector" means an inspector in the employ of the United States Department of Agriculture, State Department of Agriculture, or the County Veterinarian's Office.
- (6) "Accredited veterinarian" means a veterinarian who is so designated by the United States Department of Agriculture and the Department
- (7) A "herd test" means a swine brucellosis test on all segregated breeding swine over six (6) months of age on a premise.
- (8) "Reactor" means any swine that discloses a complete agglutination reaction in the blood titer dilution of 1/100 or higher; and any swine in an infected herd or herd of unknown status disclosing complete agglutination reaction in the blood titer dilution of 1/25 or higher, or any swine disclosing a positive card test reaction.

- (9) "Infected herd" means a herd that discloses one or more swine with a complete agglutination reaction in the blood titer dilution of 1/100 or higher, or a positive reaction to the brucellosis card test.
- (10) "Negative herd" means a herd that has been herd tested and discloses no animal reacting to the brucellosis card test or revealing more than incomplete blood titer dilutions of 1/100, or a herd in which at least ten (10) percent of the breeding swine have been tested annually in the Market Swine Testing Program for three consecutive years and no reactors disclosed.
 - (11) "Negative swine or animal" means an animal from:
 - (A) A validated brucellosis-free herd; or
- (B) A herd with a negative herd test within the previous 30 days unless otherwise classified by Department officials; or
- (C) A herd of unknown or infected status and negative to the brucellosis card test, or disclosing less than complete agglutination in the blood titer of 1/25 or higher.
- (12) "Market Swine Testing Program" means the testing of breeding swine marketed for slaughter.
 - (b) Tests.

Blood tests shall be conducted on swine that will qualify herds as negative herds and "validated brucellosis-free herds" and control areas as "validated brucellosis-free areas." When requested by an official inspector, any owner of swine in a Swine Brucellosis Control Area shall confine and restrain all swine on his premises for bleeding and failure to do so shall be regarded as a violation of this section.

(1) Collection of Samples.

Blood samples shall be collected by accredited veterinarians or official inspectors. Reports of bleeding shall be on forms prescribed by the Department.

(2) Identification of Animals.

All breeding swine officially tested under this regulation shall be identified by ear tag, or tattoo, or registration number, or other means prescribed by the Department.

(3) Testing.

All tests conducted under this regulation shall be conducted in laboratories of the Federal or State Departments of Agriculture, University of California School of Veterinary Medicine, an approved County Veterinarian's laboratory, or by such persons as may be authorized to conduct the brucellosis card test.

(4) Infected Herds.

When a herd has been found to be infected, all breeding swine in the herd shall be maintained under hold order in accordance with Section 9565 of the Agricultural Code until the herd qualifies as negative in accordance with one of the following plans or such other means specified by the Department:

PLAN A. TO BE USED WHEN BRUCELLOSIS IS WELL ESTABLISHED IN THE HERD

- 1. Market the entire infected herd for slaughter under official supervision.
- 2. Clean and disinfect the swine houses and equipment in accordance with (c) of this section. Such houses and premises are to be kept free of swine for 60 days.
- 3. Replace with (a) breeding stock from validated brucellosis-free herds or, (b) swine which have passed a negative test for brucellosis conducted within 30 days prior to entry onto the premises. Such swine shall be maintained under hold order on the premises, separate from other swine, until they pass two negative tests for brucellosis not less than 90 days apart after date of entry onto the premises.

PLAN B. MAY BE USED WHEN ONLY A FEW REACTORS ARE FOUND AND NO CLINICAL SYMPTOMS OF BRUCELLOSIS HAVE BEEN NOTED

- 1. Remove reactors from farm to slaughter under official supervision.
- 2. Retest herd at 30-day intervals, removing reactors, until entire herd is negative.

Following two negative herd tests at least 90 days apart, the herd may be released from hold order.

(c) Cleaning and Disinfecting.

Premises shall be cleaned and disinfected under supervision or proper direction of an official inspector following removal of reacting animals.

(d) Biological Products.

Owners shall not allow the use of any biological product or vaccine for the prevention or treatment of brucellosis in a herd, unless authorized by the Department.

(e) Validated Herds.

When two consecutive herd tests 60 to 90 days apart are negative, the herd may be declared a validated brucellosis—free herd for a period of 12 months or such other length of time that the department may specify, provided all swine on the farm kept for feeding purposes shall be segregated from the breeding herd until moved for slaughter. A certificate will be issued to the owner by the cooperating Federal—State officials designating the herd as brucellosis—free. Validation is made annually or at such other time specified by the Department by passing a negative herd test.

(f) Validated Brucellosis-Free Areas.

Areas may be declared validated brucellosis—free for a period of three years, provided:

- (1) All breeding herds in the area have been included in one of the following within 18 months immediately preceding the declaration of the validated brucellosis—free area status.
 - (A) Declared a validated brucellosis-free herd;
 - (B) A complete herd test;
- (C) Market Swine Testing Program for at least three years, except newly assembled herds; such herds shall be in the Market Swine Testing Program a length of time specified by the Department.
- (2) All herds in which the existence of brucellosis has been established are handled according to the provisions of (b) (4).
- (3) Not more than three percent of the herds, or one herd, whichever is greater, shall have been found to be infected on the most recent test conducted during the 18 months immediately preceding the declaration of the validated brucellosis—free area status.
- (g) Maintaining Validated Brucellosis—Free Areas. Validated brucellosis—free areas may be validated at the end of each period of validation provided all the herds in the area are handled according to the provisions of (f) and the herd infection rate does not exceed five percent during the three—year validation period.
- (h) Additions to Swine Brucellosis Control Areas and to Validated Brucellosis-Free Herds.
- (1) Replacement animals may be added without test if procured directly from a validated brucellosis-free herd currently listed or a negative herd in a validated brucellosis-free area.
- (2) All other replacement breeding animals shall have passed a negative agglutination test within 30 days and be held in isolation until passing a second negative agglutination test. The second test shall be at least 90 days after the first, in the case of boars and open gilts, or after farrowing in the case of bred sows and gilts.

NOTE: New authority cited: Sections 407 and 10781, Food and Agricultural Code. HISTORY

- 1. New section filed 3-5-62; effective thirtieth day thereafter (Register 62, No. 5).
- 2. Amendment filed 1–15–68; effective thirtieth day thereafter (Register 68, No. 3).
- 3. Renumbering from 795.6 filed 7–27–71; effective thirtieth day thereafter (Register 71, No. 31).

§ 795.35. Established Swine Brucellosis Control Areas.

All counties of the State are established Swine Brucellosis Control Areas.

NOTE: New authority cited: Sections 407 and 10781, Food and Agricultural Code.

HISTORY

1. Renumbering from Section 795.61 filed 7–27–71; effective thirtieth day thereafter (Register 71, No. 31). For prior history, see Register 68, No. 3.

§ 795.50. Prevention of Pseudorabies: Importation and Movement of Swine in California.

NOTE: Authority cited: Sections 407, 9164, 9570, and 10781, Food and Agricultural Code. Reference: Sections 9165, 9166, 10721–10726, 10781, and 10782, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–30–81; effective thirtieth day thereafter (Register 81, No. 40).
- 2. Editorial correction of printing error filed 2-21-91 (Register 91, No. 12).
- 3. Amendment filed 2-21-91; operative 3-23-91 (Register 91, No. 12)
- 4. Repealer filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).

§ 795.60. Swine Pseudorabies-Control.

- (a) Surveillance, Samples, Testing. The Secretary shall maintain a surveillance program for pseudorabies that includes sampling of blood or other tissues obtained from swine at the time of slaughter.
- (b) Investigation; Herd Testing. When a surveillance sample is determined to be positive for pseudorabies:
- (1) The Secretary shall initiate an investigation that may include sampling of blood or other tissues to determine the sources and extent of pseudorabies exposure and infection in the swine herd from which the positive test result was obtained.
- (2) The Secretary shall extend the investigation to include pseudorabies testing of all swine herds within a minimum 1.5 mile radius of an infected herd.

NOTE: Authority cited: Sections 407 and 10781, Food and Agricultural Code. Reference: Sections 461, 481 and 9531, Food and Agricultural Code.

HISTORY

1. New section filed 9-12-95; operative 10-12-95 (Register 95, No. 37).

§ 795.61. Swine Pseudorabies-Identification.

(a) Prior to being offered for sale, all sows and boars shall be identified by the owner or the market to which consigned. The identification method (e.g., official ear tag or backtag) shall be such that the Secretary may readily determine the farm of origin.

NOTE: Authority cited: Sections 407 and 10781, Food and Agricultural Code. Reference: Sections 10751 and 10781, Food and Agricultural Code.

HISTORY

1. New section filed 9-12-95; operative 10-12-95 (Register 95, No. 37).

§ 795.62. Swine Pseudorabies–Mandatory Herd Eradication.

- (a) Hold Order. The Secretary shall place all swine on any premises suspected of being infected with or having been exposed to pseudorabies through either domestic or feral sources of the disease under a hold order. The Secretary shall serve either the owner or owner's agent with a hold order that specifies that the animals are to be held on the premises where found or at another location as the Secretary may deem necessary.
- (1) Upon receipt of a written permit for movement of animals, swine from a herd under a hold order may only move directly to a location specified in the permit.
- (2) It shall be a violation for an owner or owner's agent to sell, loan, trade, barter, or otherwise move swine under a hold order from the identified premises without written permission of the Secretary.
- (b) Herd Plan. A herd plan for the eradication of pseudorabies from an infected herd shall be prepared by the owner in cooperation with the Department not later than sixty days after the date of the hold order. Herds currently under a hold order for Pseudorabies shall prepare a herd plan not later than 60 days after the effective date of this regulation.
- (1) The Secretary shall conduct an epidemiological investigation of the infected herd and premises to determine the actions necessary to eradicate the disease from the herd.
- (2) The owner of an infected herd may request the participation of a licensed, accredited veterinarian in the epidemiological investigation and the preparation of the herd plan. The cost of the services of the participating veterinarian shall be at the owner's expense.
- (3) The herd plan shall be based on one of the strategies outlined in the Livestock Conservation Institute's "Swine Pseudorabies Eradication Guidelines", Copyright 1990, or other such strategy as approved by the Secretary. The herd plan shall specify the methods and actions necessary to eradicate pseudorabies from the infected herd, and may include herd management practice, modification of facilities, separation from feral swine, cleaning and disinfection of premises, and vaccination procedures. The herd plan shall schedule tasks and accomplishments to pro-

vide a realistic probability of eradicating pseudorabies from the affected herd within 24 months of the date of the hold order, or not later than 24 months from the effective date of this regulation. Upon a showing of good cause the 24 month period may be extended by the Secretary.

- (4) The herd plan required by (b)(3) shall constitute an agreement between the owner of the infected herd and the Secretary. Failure to enter into a herd plan within the time specified in (b) constitutes a violation.
- (c) Expenses. If the owner elects to use pseudorabies vaccine, the expense of the pseudorabies vaccine shall be the responsibility of the owner of the infected herd. The use of pseudorabies vaccine is subject to the Secretary's approval.
- (d) Testing. Within 24 months of the date of the hold order, the Secretary may provide for blood sample collection and laboratory testing for pseudorabies virus. For the purposes of this section, the following definitions apply:
- (1) "Official pseudorabies epidemiologist" is a State or Federal veterinarian designated by the State animal health official and veterinarian in charge to investigate and diagnose suspected pseudorabies in livestock. The official pseudorabies epidemiologist is expected to have had special training in the diagnosis and epidemiology of pseudorabies which will provide the unique qualifications demanded by the position.
- (2) "Official pseudorabies serological test" Any official test approved by the Administrator of Animal and Plant Health Inspection Service, United States Department of Agriculture for diagnosis of pseudorabies in swine, conducted in a laboratory approved by the Administrator, and listed in Section 9 of the Code of Federal Regulations (CFR), Part 85.1, to determine the presence or absence of pseudorabies antibodies.
- (3) Official random–sample test (95/10)" A sampling procedure utilizing official pseudorabies serological tests which provides a 95–percent probability of detecting infection in a herd in which at least 10 percent of the swine are seropositive for pseudorabies. Each segregated group of swine on an individual premises must be considered a separate herd and sampled as follows: Less than 100 head–test 25, 100–200 head–test 27, 201–999 head–test 28, 1,000 and over–test 29.
- (4) "Official random–sample test (95/5)" A sampling procedure utilizing official pseudorabies serologic tests which provides a 95–percent probability of detecting infection in a herd in which at least 5 percent of the swine are seropositive for pseudorabies. Each segregated group of swine on an individual premises must be considered a separate herd and sampled as follows: Less than 100 head–test 45, 100–200 head–test 51, 201–999 head–test 57, 1,000 and over–test 59.
- (e) Compliance. If an owner fails or refuses to participate in the development and execution of the herd plan required by (b), (b)(3), and (b)(4), to comply with the provisions of the herd plan or to eradicate pseudorabies from the herd within 24 months, the owner shall be in violation of these regulations. The owner may appeal to the Secretary for an extension beyond the 24 month period.
- (f) Procedures For Release of Hold Order. The Secretary shall release the herd of swine from the hold order when no livestock or other animals on the premises have shown clinical signs of pseudorabies after removal of positive swine and at least one of the four following conditions has been met:
- (1) All swine were removed from the premises; the premises were cleaned and disinfected under official supervision with a disinfectant approved for such use by United States Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services; and the premises have been maintained free of swine for 30 days or a period of time determined adequate by an official pseudorabies epidemiologist.
- (2) All swine positive to an official pseudorabies serological test have been removed from the premises. All remaining swine, except suckling pigs, were subjected to an official pseudorabies serological test and found negative 30 days or more after removal of all positive swine.
- (3) All swine positive to an official pseudorabies serological test have been removed from the premises; all breeding swine that remain in the herd and an official random sample (95/10) of grower–finishing swine over 2 months of age are subjected to an official pseudorabies serological

test and found negative 30 days or more after removal of positive swine. A second test of grower-finishing swine at least 30 days after the first test is required for so long as the State is in Stage III or IV of the United States Department of Agriculture, Swine Pseudorabies Eradication Program.

- (4) All swine present on the date the hold order was imposed have been removed, and there have been no clinical signs in the herd for at least 6 months. Two successive official random sample (95/10) tests of the breeding herd (95/5 for Stage III States), and two successive official random sample (95/10) tests of progeny at least 4 months of age, conducted at least 90 days apart, have been determined by the official pseudorabies epidemiologist to reveal no infection. Herds released from the hold order by this provision are required to be tested by an official random sample (95/10) test one year after release of the hold order. This provision shall remain in effect for so long as the State is in Stage III of the United States Department of Agriculture, Swine Pseudorabies Eradication Program.
- (g) The Secretary may require additional herd tests prior to release of the hold order if pseudorabies is present on neighboring farms or if reintroduction of infection into the herd is suspected.

1. New section filed 9-12-95; operative 10-12-95 (Register 95, No. 37).

Article 8.5. Interstate and Intrastate Movement of Swine

§ 796. Definitions.

- (a) "Animal" means any swine in captivity.
- (b) "Herd" means any group of livestock maintained on common ground for any purpose, or two or more groups of livestock under common ownership or supervision, geographically separated, but which have an interchange or movement of animals. Swine used for 4–H, The National FFA Organization, or school projects kept isolated from the parent herd shall be considered a separate herd.
- (c) "Isolated" means separation of swine by a physical barrier in such a manner that other swine do not have access to the isolated swine's body, excrement, or discharges; not allowing the isolated swine to share a building with a common ventilation system with other swine; and not allowing the isolated swine to be within 10 feet of other swine if not sharing a building with a common ventilation system.
- (d) "Official brucellosis test" means any test for the diagnosis of brucellosis as defined by 9 CFR Part 78.1 (1/1/02 Edition).
- (e) "Official identification" of swine means any method approved by the Department and USDA for the identification of swine in interstate commerce as defined by 9 CFR Part 71.19 (1/1/02 Edition).
- (f) "Official pseudorabies test" means any test for the diagnosis of pseudorabies as defined by 9 CFR Part 85.1 (1/1/02 Edition).
- (g) "Premises" means the farm of origin where swine were born and raised or where they have resided for a minimum of 90 continuous days immediately preceding shipment.
- (h) "State or federal inspected slaughter facility" means a property where swine are slaughtered and inspected by authorized state or federal officials including all properties contiguous to the property containing the slaughter establishment if the contiguous properties are owned or controlled by the operator or those conducting business with the operator that involves live swine or products from swine.
- (i) "Swine for immediate slaughter" means swine imported into California for slaughter at an establishment under state or federal inspection within 14 days after entry.
- (j) "USDA" means United States Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

HISTORY

1. New article 8.5 (sections 796–796.6) and section filed 3–1–2005; operative 3–31–2005 (Register 2005, No. 9). For prior history of article 9, section 796, see Register 2003, No. 23.

§ 796.1. General Requirements.

- (a) The State Veterinarian may impose a quarantine pursuant to Food and Agricultural Code section 9562 if the requirements as specified in this article have not been met, or to amend the requirements for entry into California in response to a change in disease status in any location, state, territory or country as determined by the State Veterinarian.
- (b) The provisions of this article are in addition to other provisions that may be required for moving animals into and within California as specified in statute or regulation.
- (c) Any person transporting animals into or within California shall produce official documents, including but not limited to, a Certificate of Veterinary Inspection with the Interstate Livestock Entry Permit number as required, with attachments, for each load or part of a shipment upon request by the Department or other official to prove that each animal transported meets the requirements of this article. Animals in any load or part of a shipment may be inspected en route or after arrival.

NOTE: Authority cited: Section 407 and 9562, Food and Agricultural Code. Reference: Sections 9561, 9570, 9574 and 10724, Food and Agricultural Code.

HISTORY

1. New section filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).

§ 796.2. Certificate of Veterinary Inspection.

- (a) A Certificate of Veterinary Inspection is a numbered interstate document that is a record of veterinary health inspection of one or more animals, issued on an official form of the state of origin and by an accredited veterinarian from the state of origin.
- (b) A Certificate of Veterinary Inspection shall include all of the following:
 - (1) Date of inspection;
 - (2) Number of animals in the consignment;
- (3) Description of the animals including the species, breed, age, weight, color, markings, and sex, and the official identification number(s) or registration tattoos;
- (4) Name, address, and telephone number of the consignor, consignee, and the origin and destination of the animals;
 - (5) Interstate livestock entry permit number, when required;
 - (6) Statement of the purpose for which the animals are being moved;
- (7) Signed by the accredited veterinarian who examined the animals in the shipment.
- (c) A copy of the completed Certificate of Veterinary Inspection shall be mailed to the Department within 15 days of examination to the following address:

DEPARTMENT OF FOOD AND AGRICULTURE ANIMAL HEALTH BRANCH 1220 "N" STREET ROOM A-107 SACRAMENTO, CALIFORNIA 95814.

- (d) The examining licensed and accredited veterinarian shall indicate on the Certificate of Veterinary Inspection that each animal in the shipment meets California entry requirements.
- (e) As an alternative to official identification on a Certificate of Veterinary Inspection, another animal identification document may be used if approved by the Department and USDA.
- (f) The Department may require a Certificate of Veterinary Inspection for animals entering California because of a disease condition in another state, even though the animals are exempt from obtaining a Certificate of Veterinary Inspection under this article.
- (g) All animals shall be transported directly and without delay to the destination stated on the Certificate of Veterinary Inspection.
- (h) A Certificate of Veterinary Inspection shall be valid for 30 days following the inspection of the animals described.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

HISTORY

1. New section filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).

§ 796.3. Interstate Livestock Entry Permits.

- (a) An Interstate Livestock Entry Permit may be required for the importation of animals into California pursuant to the requirements of this article.
- (b) An Interstate Livestock Entry Permit is a numbered document issued by the Department for approving the movement of animals that meet entry requirements into California.
- (c) Requests for Interstate Livestock Entry Permits shall be made to the Department's Animal Health Branch before the animals are transported to California. Requests for entry permits may be made by telephone, electronic transmission, or other means approved by the Department. Written application may be required when necessary to accomplish the purposes of this article.
- (d) Each Interstate Livestock Entry Permit shall have a unique number and the number may be issued to the applicant by telephone or other electronic means approved by the Department. A copy of the permit will not be sent to the applicant unless specifically requested or it is needed to accompany a shipment.
- (e) The applicant for the Interstate Livestock Entry Permit shall establish that all animals in the shipment meet California entry requirements, and possess a Certificate of Veterinary Inspection when required.
- (f) The applicant for the Interstate Livestock Entry Permit shall provide the Department with the following information:
 - (1) Name, address, and telephone number of the shipper or importer;
 - (2) Origin of the shipment;
- (3) The number and description of the animals being shipped including species, breed, age, sex, and purpose for which the animals will be used
- (4) Name, mailing address, and telephone number of entity receiving the animals, or a geographic destination if animals are not being received at the destination mailing address;
- (5) Name, address, and telephone number of a contact person in California, if not the owner; and the name, address, and telephone number of the person requesting the permit;
 - (6) Certificate of Veterinary Inspection number, if available;
 - (7) Name of the herd veterinarian, if available; and
- (8) Must meet the entry requirements for the type of animals entering California.
- (g) An Interstate Livestock Entry Permit is required for the entire shipment of animals, which may consist of one or more loads.
- (h) All animals shall be transported directly and without delay to the destination stated on the Interstate Livestock Entry Permit.
- (i) The State Veterinarian may deny the request for an Interstate Livestock Entry Permit pursuant to sections 9562 and 9570 of the Food and Agricultural Code.
- (j) Interstate Livestock Entry Permits shall expire 15 days after issuance.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

HISTORY

1. New section filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).

§ 796.4. Pseudorabies — Movement of Swine into California for Purposes Other Than Slaughter.

- (a) Swine imported from any state for purposes other than slaughter must comply with the most stringent interstate movement requirements applicable to any other swine in the shipment.
- (b) Swine imported into California for any purpose, except slaughter, shall have:
 - (1) Certificate of Veterinary Inspection; and
 - (2) Official identification; and
 - (3) Interstate Livestock Entry Permit; and

- (A) A regular Interstate Livestock Entry Permit will not be granted for swine vaccinated for pseudorabies. However, the State Veterinarian may grant a special permit, on a case-by-case basis, with specific limitations necessary to prevent the spread of pseudorabies from such swine. A special permit application must be submitted and include all information required for a regular permit plus official identification for each animal in the shipment, exposure history, which of the animals have been vaccinated, and the vaccine type, brand, and date of vaccination.
- (4) a negative test result to an official pseudorabies test within 30 days prior to entry. Persons receiving swine must have documentation issued by the accredited veterinarian at the point of origin, showing each animal was negative to the official pseudorabies test within 30 days prior to entry.
- (c) Swine shall be quarantined and isolated pursuant to Food and Agricultural Code section 9562 at destination pending the results of an official pseudorabies retest conducted 30 to 60 days after entering California.
- (1) Swine may be released from quarantine if negative to the official pseudorabies retest or when slaughtered in a state or federally inspected slaughter establishment.
- (d) Swine may be exempt from the test, quarantine and isolation, and retest requirements when:
- (1) Native to and shipped directly from a state classified as Stage IV or V by the USDA and not exposed to swine from a state classified below Stage IV by the USDA.
- (e) Additional testing may be required for any pseudorabies positive, suspect or exposed animals in or separate from the shipment.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

§ 796.5. Swine Brucellosis — Movement of Swine into California for Purposes Other Than Slaughter.

- (a) Swine imported from any state for purposes other than slaughter must comply with the most stringent interstate movement requirements applicable to any other swine in the shipment.
- (b) Swine imported into California for any purpose, except slaughter, shall have:
 - (1) Certificate of Veterinary Inspection; and
 - (2) Interstate Livestock Entry Permit; and
 - (3) Official identification; and
- (4) for sexually intact swine over four months of age, a negative test result to an official brucellosis test within 30 days prior to entry. Persons receiving swine must have documentation issued by the accredited veterinarian at the point of origin, showing each animal was negative to the official brucellosis test within 30 days prior to entry.
- (c) Swine shall be quarantined and isolated pursuant to Food and Agricultural Code section 9562 at destination pending the results of an official brucellosis retest conducted 30 to 60 days after entering California.
- (1) Swine may be released from quarantine if negative to the official brucellosis retest or when slaughtered in a state or federally inspected slaughter establishment.
- (d) Swine may be exempt from the test, quarantine and isolation, and retest requirements when:
- (1) Native to and shipped directly from a validated brucellosis-free herd or validated brucellosis-free state or region classified by the USDA, and not exposed to or commingled with swine from a state that is not classified as free from swine brucellosis by the USDA. Verification that the animals originated from a validated brucellosis-free herd or validated brucellosis-free state or region shall be stated on the Certificate of Veterinary Inspection.
- (e) Additional testing may be required for any brucellosis positive, suspect or exposed animals in or separate from the shipment.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725,

§ 796.6. Movement of Swine into California for Immediate Slaughter.

- (a) Swine imported from any state not destined for immediate slaughter that are imported with swine from any state for immediate slaughter, must be slaughtered at a state or federally inspected slaughter facility within 14 days of importation into California.
- (b) Swine imported for immediate slaughter at a state or federally inspected slaughter plant must:
- (1) Have an Interstate Livestock Entry Permit when the State Veterinarian determines the threat of a disease being introduced into California exists with the movement of swine. Any person importing swine for immediate slaughter shall contact the Department's Animal Health Branch prior to shipment to ensure this requirement is met.
 - (2) Official identification;
- (3) Be unloaded at the slaughter facility within 24 hours after entering California without diversion; and
- (4) Be slaughtered within 14 days of importation. Upon request, the State Veterinarian may grant exemptions to the 14-day limit on a case-by-case basis.
- (c) Movement of live swine from the slaughter facility is prohibited unless the State Veterinarian authorizes the specific movement after the receipt of a written request for such movement. Written requests for exemption must include all of the following:
 - (1) Information regarding the health history of the swine;
 - (2) Name and address of the person removing the animal;
- (3) Location or address of the facility at which the swine will be maintained: and
- (4) Special economic hardship, if any, related to permitting the swine to be removed from the facility.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).
- 2. Amendment of subsection (b)(1) filed 4–2–2007; operative 5–2–2007 (Register

§ 796.7. Annual Import Permit for Slaughter Plants.

- (a) An annual import permit is an Interstate Livestock Entry Permit that may be issued to the owner or manager of slaughter plants for the importation of swine for immediate slaughter in California.
- (b) The owner or manager of slaughter plants may request an annual import permit by contacting the Animal Health Branch in Sacramento at least 15 days before the first expected entry, or expiration of a prior annual entry permit.
- (c) Approval for the annual import permit may be granted when the owner or manager of the slaughter plant completes and submits to the Department an application for the annual import permit. The application for the annual entry permit will include the following:
 - (1) Date of the application; and
- (2) Name, address, and telephone number of the applicant, and the name and telephone number of the contact person such as manager or foreman; and
- (3) The establishment's name and complete address (mailing and physical location) with telephone and facsimile numbers; and
- (4) Signature of the applicant certifying compliance with the following requirements:
- (A) Provide the annual entry permit number to the shipper of each load of swine in the shipment prior to shipment;
- (B) All swine in each load of the shipment shall have official identification.

- (C) Unload all swine at the slaughter facility within 24 hours after entering California without diversion;
- (D) Slaughter all swine within 14 days of importation. Upon request, the State Veterinarian may grant exemptions to the 14-day limit on a case-by-case basis;
- (E) Prohibit the movement of any live swine off the premises of the slaughter facility unless the State Veterinarian authorizes the specific movement after the receipt of a written request for such movement as specified in section 796.6(c); and
- (F) Maintain accurate written records of any carcass thereof, or any live swine if authorized by the State Veterinarian in accordance with section 796.6(c) coming onto and going off the property of the slaughter facility. These records shall be retained for a period of 2 years and be made readily available for review upon request of state or federal officials. Records shall include, but not be limited to: bills of sale, certificates, shipping documents, and a log of shipments onto and off the premises.
- 1. For shipments onto the premises, the log shall include, but not be limited to: official identification for each animal; number of swine; date of shipment; and name, address, and telephone number of seller.
- 2. For shipments off of the premises, the log shall include, but not be limited to: number of carcasses leaving the premise; number of rendered animals; and number and official identification of any live animals leaving the premises in accordance with section 796.6(c).
- (d) Approval of the annual import permit may be renewed every 12 months when the Department determines that the conditions of the agreement continue to be met by the slaughter plant, or until:
 - (1) The slaughter plant requests deactivation, or
- (2) The Department or USDA determines the annual permit should be voided because of the slaughter plant's failure to comply with the agreement or these regulations, or
- (3) Changes in federal or state law or regulations require elimination of or change in the status.
- (e) Swine imported on an annual import permit may be inspected by the Department or USDA.
- (f) The Department may amend the requirements for the annual import permit issued to slaughter plants in response to a change in disease status as determined by the State Veterinarian.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

HISTORY

1. New section filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).

§ 796.8. Designated Swine Feedyard.

- (a) A designated swine feedyard is one that has been approved by the State Veterinarian and meets the following requirements:
- (1) Maintains accurate written records of all swine coming onto or going off of the premises. These records shall be retained for the time period specified in 9 CFR 71.19(e)(2), (1/1/02 Edition), and shall be maintained in a manner which will clearly enable the determination of the origin and destination of individual animals and lots. Records shall include but not be limited to bills of sale, certificates, shipping documents, test records, and a log of shipments onto and off of the premises.
- (A) For each shipment onto the premises, the log shall include: official identification for each animal; number of animals; date of shipment; and name, address, and telephone number of seller; certificate number and state issuing the pertinent certificates; and Interstate Livestock Entry Permit number issued by the Department.
- (B) For each shipment off of the premises: the log shall include official identification for each animal; number of head; date of shipment; and name, address, and telephone number of the purchaser.
- (2) Makes all records readily available for review upon request by state or federal officials.
- (3) Post a sign in a prominent place stating the following: "DES-IGNATED SWINE FEEDYARD NO SALES EXCEPT FOR IM-

Page 70 Register 2007, No. 14; 4-6-2007

MEDIATE SLAUGHTER AT STATE OR FEDERAL APPROVED PLANTS." The sign shall be clearly readable at a distance of ten feet.

- (4) Prohibit the movement of any live swine off of the premises of the designated swine feedyard except:
- (A) Swine shipped directly and without addition or deletion from the shipment, and without entering any other premises containing swine, to a state or federally inspected slaughter establishment, or
- (B) Swine shipped after 100 percent of the swine on the premises have been tested negative to an official pseudorabies and an official brucellosis test at least 30 days after the addition of any new swine (tests completed prior to arrival at the designated feedyard will not fulfill this requirement); or
- (C) Persons receiving permission from the State Veterinarian pursuant to a request showing special circumstances protecting against transmission of disease.
- (b) The State Veterinarian may suspend or revoke the designated feedyard status of a premises for failure to comply with the provisions of this section or any federal or state law or regulation related to the importation of swine into California, or movement or control of the swine.
- (c) Requirements of this section are in addition to all other state or federal requirements relating to interstate movement of swine and swine disease control.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

HISTORY

1. New section filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).

§ 796.9. Violations.

- (a) Failure to comply with any part of Article 8.5 of Chapter 2, Division 2 of Title 3 of the California Code of Regulations, constitutes a violation punishable by a fine up to one hundred dollars (\$100) per individual animal for each violation.
- (b) Pursuant to section 9574 of the Food and Agricultural Code, any person who negligently or intentionally violates any state or federal law or regulation, including any quarantine regulation, by importing any animal or other article, which by virtue of being pest infested or disease infected, causes an infestation or infection of a pest, animal, or disease, or causes an existing infestation to spread beyond any quarantine boundaries is liable civilly in a sum not to exceed twenty–five thousand dollars (\$25,000) for each act that constitutes a violation of the law or regulation.
- (c) The Department may pursue other remedies in addition to subsections (a) and (b). Pursuing any one remedy does not preclude the Department from pursuing any of the remaining remedies concurrently or at a later date unless otherwise prohibited by law. Existing remedies include but are not limited to:
- (1) Denial, suspension, or revocation of a license, registration, certificate, permit, exception, or other indicia of authority issued by the Department:
 - (2) Civil or administrative penalties;
- (3) Referral to the appropriate District Attorney or the Attorney General for criminal prosecution or other appropriate remedy; and
- (4) Reimbursement of the Department for any cost incurred due to any violation of this article.

NOTE: Authority cited: Section 407 and 10781, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570, 9574, 10721, 10722, 10723, 10724, 10725, 10726, 10751, 10752, 10753, 10781, 10782, 10783, 10784, 10785 and 10786, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-1-2005; operative 3-31-2005 (Register 2005, No. 9).
- 2. Editorial correction of subsections (a) and (c) (Register 2005, No. 10).

Article 9. Reportable Conditions for Animals and Animal Products

§ 797. List of Reportable Conditions for Animals and Animal Products.

- (a) The term "condition" means any illness, disease, infection, pathogen, contagion, toxin, bacteria, virus, prion, or any other material or factors affecting animals or animal products.
- (b) The State Veterinarian shall determine which conditions shall be listed in the "List of Reportable Conditions for Animals and Animal Products" and the timeframes for reporting those conditions pursuant to section 9101 of the Food and Agricultural Code. In determining the conditions and timeframes included on the list, the State Veterinarian shall use standard epidemiological practice or credible scientific research.
- (c) The State Veterinarian shall update this list as required by conditions prevailing at the time.
- (d) All licensed veterinarians, any person operating a diagnostic laboratory, or any person who has been informed, recognizes or should recognize by virtue of education, experience, or occupation, that any animal or animal product is or may be affected by, or has been exposed to, or may be transmitting or carrying any of the conditions on the "List of Reportable Conditions for Animals and Animal Products" shall report the following information to the Department in the manner and timeframes as specified on the list:
 - (1) Name and contact information of the person reporting;
 - (2) Description of the animal(s) or animal product(s);
- (3) Description and/or address of the premises where the animal(s) or animal product(s) are located;
 - (4) Approximate date and time the condition was discovered;
- (5) Any other information pertinent to the condition that may affect public health, animal health, or food safety.
- (e) The Department of Food and Agriculture shall publish this list by posting it on the Department's Internet web site (www.cdfa.ca.gov) and by making a hard copy list available on request by contacting the California Department of Food and Agriculture, Animal Health Branch, 1220 N Street, Room A-107, Sacramento, CA 95814, telephone (916) 654–1447.
- (f) The current updated list pursuant to subsection (b) shall constitute the "List of Reportable Conditions for Animals and Animal Products". With the adoption of the first of these updates, Title 3, California Code of Regulations, section 796 is inoperative.

NOTE: Authority cited: Sections 407 and 9101, Food and Agricultural Code. Reference: Sections 9101 and 9562, Food and Agricultural Code.

HISTORY

1. New section filed 3–26–2003; operative 3–26–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 13). For prior history of article 10 (section 797), see Register 85, No. 34.

Article 10. Cattle Health Advisory Task Force

§ 797.5. Cattle Health Advisory Task Force.

- (a) The Department's bovine disease control or eradication programs shall be reviewed on an annual basis by the Cattle Health Advisory Task Force.
- (b) The Cattle Health Advisory Task Force will advise the Department on administrative aspects of its control or eradication programs, on the effectiveness of its disease control requirements, and in the enforcement of regulations pursuant to section 10610 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 407 and 10610, Food and Agricultural Code. Reference: Sections 9166, 9167, 9562 and 10610, Food and Agricultural Code.

HISTORY

 Change without regulatory effect adopting new article 10 (section 797.5) and new section filed 4–23–2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 17).

Article 11. Emergency Control and Eradication of Animal Diseases

§ 798. Venezuelan Equine Encephalomyelitis.

NOTE: Authority cited: Sections 407 and 9570, Food and Agricultural Code.
HISTORY

- 1. New Article 11 (Section 798) filed 7-16-71 as an emergency; effective upon filing (Register 71, No. 29).
- 2. Certificate of Non–Compliance (repealer by operation of Sec. 11422.1, Gov. Code) filed 11–12–71 (Register 71, No. 46).

§ 798.1. Venezuelan Equine Encephalomyelitis: Control and Vaccination.

NOTE: Authority cited: Sections 407 and 9561, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–30–71 as an emergency; effective upon filing (Register 71, No. 31)
- 2. Amendment filed 9–13–71 as an emergency; effective upon filing (Register 71, No. 38).
- Repealer filed 12–13–71 as an emergency; effective upon filing (Register 71, No. 51).

§ 799. Vesicular Stomatitis.

- (a) All animals susceptible to vesicular stomatitis are prohibited entry into the State of California if they have been exposed to vesicular stomatitis during the past 30 days.
- (b) Prior to entering the State, all susceptible animals originating in states where vesicular stomatitis has been diagnosed in the past six (6) months may be required to obtain a permit of entry as the Department determines necessary to protect against the introduction of vesicular stomatitis. For each shipment, a determination of permit requirements must be obtained from, and permits will be issued by, the Animal Health Branch, California Department of Food and Agriculture, 1220 N Street, Room A–107, Sacramento, California 95814, Telephone (916) 654–1447. Permit requests may be made by telephone; however, a written application will be required when the information provided is not sufficient to include the following:
 - (1) owner
 - (2) shipping agent
 - (3) description and identification of the animals
 - (4) destination address
 - (5) person(s) receiving the shipment
 - (6) type of facility receiving the shipment
 - (7) name and phone number of veterinarian requesting the permit
- (c) The Department may authorize importation of animals from any area when restrictions as specified by the California State Veterinarian are determined adequate to protect against the introduction of vesicular stomatitis.

NOTE: Authority cited: Sections 407 and 9570, Food and Agricultural Code. Reference: Section 9570, Food and Agricultural Code.

HISTORY

- New section filed 7-24-92 as an emergency; operative 7-24-92 (Register 92, No. 30). A Certificate of Compliance must be transmitted to OAL 11-23-92 or emergency language will be repealed by operation of law on the following day.
- Repealer filed 9–23–92 as an emergency; operative 9–23–92 (Register 92, No. 39). A Certificate of Compliance must be transmitted to OAL 1–21–93 or emergency language will be repealed by operation of law on the following day.
- 3. New section filed 6-16-95 as an emergency; operative 6-16-95 (Register 95, No. 24). A Certificate of Compliance must be transmitted to OAL by 10-16-95 or emergency language will be repealed by operation of law on the following day.
- 4. Repealed by operation of Government Code section 11346.1(f) (Register 96, No. 17).

5. New section filed 9–23–97; operative 9–23–97 pursuant to Government Code section 11343.4(d) (Register 97, No. 39).

§ 800. Asiatic Newcastle Disease. [Repealed]

HISTORY

- 1. New section filed 12–13–71 as an emergency; effective upon filing (Register 71, No. 51).
- 2. Certificate of Compliance filed 3-10-72 (Register 72, No. 11).
- 3. Amendment of subsection (a) filed 8–8–72 as an emergency; effective upon filing (Register 72, No. 33).
- 4. Certificate of Compliance filed 12-4-72 (Register 72, No. 50).
- 5. Corrected Certificate of Compliance filed 12–14–72 (Register 72, No. 51).
- 6. Repealer filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 800.1. Asiatic Newcastle Disease Quarantine Area.

NOTE: Authority cited: Sections 407 and 9561, Food and Agricultural Code. Reference: Sections 9561–9569, Food and Agricultural Code.

HISTORY

- 1. New section filed 2–28–79 as an emergency; effective upon filing (Register 79, No. 9). For prior history see Register 77, No. 41.
- 2. Expired by own terms (Register 80, No. 34).
- 3. New section filed 9–19–80 as an emergency; effective upon filing (Register 80, No. 38). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed 1–18–81.
- 4. Repealed by operation of Section 11346.1(g), Government Code (Register 81, No. 16).
- 5. New section filed 4–14–81 as an emergency; effective upon filing (Register 81, No. 16). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8–12–81.
- Certificate of Compliance as to 4–14–81 ordered transmitted to OAL 8–11–81 and filed 8–21–81 (Register 81, No. 34).
- 7. Repealer filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 801. Duck Virus Enteritis. [Repealed]

HISTORY

- 1. New section filed 6–15–73 as an emergency; effective upon filing (Register 73, No. 26)
- 2. Certificate of Compliance filed 10-11-73 (Register 73, No. 41).
- 3. Repealer filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 802. Avian Influenza—Interstate Movement. [Repealed]

NOTE: Authority cited: Sections 407 and 9570, Food and Agricultural Code, Reference: Section 9570, Food and Agricultural Code.

HISTORY

- 1. New section filed 2-8-84 as an emergency; effective upon filing (Register 84, No. 7). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 6-9-84.
- 2. Repealer filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 802.1. Avian Influenza.

NOTE: Authority cited: Sections 407 and 9561, Food and Agricultural Code. Reference: Sections 9561–9569, Food and Agricultural Code.

HISTORY

- New section filed 4–9–84 as an emergency; effective upon filing (Register 84, No. 16). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8–7–84.
- 2. Repealed by operation of Government Code Section 11346.1(g) (Register 84, No. 42)

§ 802.2. Avian Influenza Quarantine Area.

NOTE: Authority cited: Sections 407 and 9561, Food and Agricultural Code. Reference: Sections 9561–9569, Food and Agricultural Code.

HISTORY

- New section filed 4-9-84 as an emergency; effective upon filing (Register 84, No. 16). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8-7-84.
- 2. Repealed by operation of Government Code Section 11346.1(g) (Register 84, No. 42)

§ 810. Contagious Equine Metritis.

The Director of Food and Agriculture finds that a foreign venereal disease of horses known as contagious equine metritis is detrimental to the equine industry.

While contagious equine metritis remains uncontrolled, the movement of stallions and mares, over 731 days of age, into California from any state where the disease occurs is prohibited. After the Director determines the disease is controlled, all stallions and mares entering California

Page 70.2

from such areas must be accompanied by a permit from the Bureau of Animal Health, California Department of Food and Agriculture. The permit will require an official health certificate indicating that the horse has been inspected, shows no symptoms of disease, and has not been exposed to contagious equine metritis. The permit may also specify other conditions that the Director considers necessary. The permit requirement may be removed when the Director determines that the disease has been eliminated.

NOTE: Authority cited: Sections 407, 9570 and 9572, Food and Agricultural Code. Reference: Section 9572, Food and Agricultural Code.

HISTORY

- New section filed 3-17-78 as an emergency; effective upon filing (Register 78, No. 11). For history of former Section 810, see Register 75, No. 17.
- 2. Certificate of Compliance transmitted to OAH 7-14-78 and filed 7-19-78 (Register 78, No. 29.)
- 3. Amendment filed 2–17–83; effective thirtieth day thereafter (Register 83, No. 8).

§ 810.1. Contagious Equine Metritis—Importation of Equidae from Countries Known to Have Contagious Equine Metritis.

- (a) The Director, in concurrence with the United States Secretary of Agriculture, finds that contagious equine metritis (CEM), an exotic venereal disease of equidae, exists among breeding horses in several foreign countries and is detrimental to the equine industry. The United States Department of Agriculture (USDA) has established, by regulations in 9 CFR Part 92, means to permit the entry of male and female horses (stallions and mares over 731 days of age) into the United States from countries affected with CEM when specific requirements to prevent the introduction of CEM into the United States are met. State of destination of such imported equidae is required to be approved by USDA under an agreement whereby the states agree to enforce state laws and regulations meeting federal standards to control movement and treatment in import facilities.
- (b) Each stallion or mare over 731 days of age imported into California under USDA permit from a foreign country where contagious equine metritis exists, pursuant to 9 CFR Part 92, shall be held at an approved facility, stated in paragraph (c), for inspections, treatment and testing required to determine the disease status of the stallion or mare. Such procedures shall be specified by the Director to accord with USDA regulations.

All costs of boarding (including procurement and maintenance of test mares), inspections, treatments and diagnostic testing shall be borne by the owner of the imported stallion or mare.

(c) Authorized facilities referred to in paragraph (b) are:

Animal Resource Services, Armstrong Tract, Equine Research Laboratory, T Buildings, University of California, Davis, California.

NOTE: Authority cited: Sections 407, 9570 and 9572, Food and Agricultural Code. Reference: Sections 9570 and 9572, Food and Agricultural Code.

HISTORY

- New section filed 12–17–80; effective thirtieth day thereafter (Register 80, No. 51).
- Amendment filed 5-17-82; effective thirtieth day thereafter (Register 82, No. 21).

Article 12. Bovine Trichomonosis Control Program

§ 820. Definitions.

- (a) As used in this article:
- (1) "Affected herd" means a group of cattle that are kept, fed or grouped together that contained, anytime within the last 12 months, an animal that had opportunity for sexual contact and was confirmed to be infected with *Tritrichomonas foetus*.
- (2) "Certificate of Veterinary Inspection" means a numbered interstate health certificate or a similar titled document that is a record of veterinary health inspection of one or more animals, issued on an official form by a USDA accredited and state licensed veterinarian from the state of ori-

- gin. The Certificate of Veterinary Inspection is valid for 30 days following the inspection of the animals described on the certificate.
- (3) "Certified Semen Services" means a subsidiary of the National Association of Animal Breeders, providing minimum requirements for the health monitoring and disease surveillance of bulls prior to entry, during an isolation period, and through residency at an artificial insemination facility.
- (4) "Exposed herd" means a herd adjacent to a premises occupied by an affected herd, herds sharing common pasture or having other contact with affected herds as determined by the State Veterinarian.
- (5) "Herd" means a group of cattle, under common ownership or supervision that is kept, fed and grouped together.
- (6) "Herdmate bull" means any bull in the herd that has been used for breeding.
- (7) "Herd of origin" means the herd in which a bovine animal had the opportunity for sexual contact at anytime within the last twelve months.
- (8) "Infected cattle" means cattle with a positive trichomonosis test and classified as infected by the State Veterinarian.
- (9) "Negative trichomonosis test" is a negative test result on a specimen collected from a bull after 10 days without contact with sexually mature female cattle.
- (10) "Official individual identification" means officially identifying an animal using devices or methods approved by the USDA, including, but not limited to, official tags, tattoos, and registration brands or a brand registration number when accompanied by a certificate.
- (11) "Specimen" means a sample taken from the preputial cavity of a bull, or the uterine contents of a bovine female, by a USDA accredited veterinarian.
- (12) "Trichomonosis" means a sexually transmitted disease of cattle caused by the protozoan parasite *Tritrichomonas foetus*.
- (13) "Trichomonosis approved laboratory" means a laboratory approved by the Department for diagnosing bovine trichomonosis.
- (14) "Trichomonosis approved veterinarian" means a USDA accredited and state licensed veterinarian who has successfully completed a training program approved by the Department for the sampling and handling of specimens for the diagnosis of trichomonosis.
- (15) "Trichomonosis confirmatory test" means a test conducted by a State diagnostic laboratory for the confirmation of positive trichomonosis tests
- (16) "Trichomonosis test" means a test for the detection of active infection with *Tritrichomonas foetus* from a specimen collected by or under the supervision of a trichomonosis approved veterinarian and conducted at a trichomonosis approved laboratory. The official identification of the animal tested must be recorded and accompany the sample to the laboratory. Trichomonosis test results must be recorded on forms approved by the Department for that purpose. Copies of test results shall be sent to the Department within 30 days of the test results. All trichomonosis tests are official tests.
- (17) "USDA" means the United States Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services. NOTE: Authority cited: Sections 407 and 10610, Food and Agricultural Code. Reference: Sections 9166, 9167, 9562 and 10610, Food and Agricultural Code.

HISTORY

- 1. New article 12 (sections 820–820.8) and section filed 8–21–2003; operative 9–20–2003 (Register 2003, No. 34).
- 2. Amendment filed 9-5-2007; operative 10-5-2007 (Register 2007, No. 36).

§ 820.1. Certificate of Veterinary Inspection.

- (a) A Certificate of Veterinary Inspection shall include all of the following:
 - (1) Description of the animals;
 - (2) Official individual identification;
- (3) Trichomonosis test date(s) and results;
- (4) Complete information on the consignor, consignee, origin, and destination; purpose of the movement;
- (5) Veterinarian's certification that the animals meet the trichomonosis testing requirements as specified in section 820.2; and,

- (6) Signed by the USDA accredited and state licensed veterinarian who examined the animals in the shipment.
- (b) A copy of a trichomonosis test record with a description of each animal, its official individual identification number, and trichomonosis test results may be attached to each copy of the Certificate of Veterinary Inspection instead of transferring that information onto the certificate.
- (c) The Certificate of Veterinary Inspection shall accompany each load or part of a shipment entering California where required and be available, with attachments, for examination en route and after arrival in California.
- (d) A copy of the completed Certificate of Veterinary Inspection shall be mailed to the Department within 15 days of examination to the following address: Department of Food and Agriculture, Animal Health Branch, 1220 "N" Street, Room A–107, Sacramento, California 95814.
- (e) The examining state licensed and accredited veterinarian shall indicate on the Certificate of Veterinary Inspection that each animal in the shipment meets California entry requirements.
- (f) The Department may require a Certificate of Veterinary Inspection for animals entering California because of a disease condition in another state, even though the animals may be exempt from obtaining a Certificate of Veterinary Inspection under this article.

NOTE: Authority cited: Sections 407 and 10610, Food and Agricultural Code. Reference: Sections 9166, 9167, 9562 and 10610, Food and Agricultural Code.

HISTORY

1. New section filed 8-21-2003; operative 9-20-2003 (Register 2003, No. 34).

§ 820.2. Interstate Livestock Entry Permits.

- (a) An Interstate Livestock Entry Permit may be required for the importation of animals into California pursuant to the requirements of this article.
- (b) An Interstate Livestock Entry Permit is a numbered document issued by the Department for approving the movement of animals that meet entry requirements into California.
- (c) Requests for Interstate Livestock Entry Permits shall be made to the Department's Animal Health Branch before the animals are transported to California. Requests for entry permits may be made by telephone, electronic transmission, or other means approved by the Department. Written application may be required when necessary to accomplish the purposes of this article.
- (d) Each Interstate Livestock Entry Permit shall have a unique number and the number may be issued to the applicant by telephone or other electronic means approved by the Department. A copy of the permit will not be sent to the applicant unless specifically requested or it is needed to accompany a shipment.
- (e) The applicant for the Interstate Livestock Entry Permit shall establish that all animals in the shipment meet California entry requirements, and possess a Certificate of Veterinary Inspection when required.
- (f) The applicant for the Interstate Livestock Entry Permit shall provide the Department with the following information:
- (1) Name, address, and telephone number of the shipper or importer, and the National Premises Identification Number, if available;
 - (2) Origin of the shipment;
- (3) The number and description of the animals being shipped including species, breed, age, sex, and purpose for which the animals will be used.
- (4) Name, mailing address, and telephone number of entity receiving the animals, or a geographic destination if animals are not being received at the destination mailing address, and the National Premises Identification Number, if available:
- (5) Name, address, and telephone number of a contact person in California, if not the owner; and the name, address, and telephone number of the person requesting the permit;
 - (6) Certificate of Veterinary Inspection number, if available;
 - (7) Name of the herd veterinarian, if available; and
- (8) Must meet the entry requirements for the type of animals entering California.

- (g) An Interstate Livestock Entry Permit is required for the entire shipment of animals, which may consist of one or more loads.
- (h) All animals shall be transported directly and without delay to the destination stated on the Interstate Livestock Entry Permit.
- (i) The State Veterinarian may deny the request for an Interstate Livestock Entry Permit pursuant to sections 9562 and 9570 of the Food and Agricultural Code.
- (j) Interstate Livestock Entry Permits shall expire 15 days after issuance.

NOTE: Authority cited: Sections 407 and 10610, Food and Agricultural Code. Reference: Sections 9166, 9167, 9562, 9570 and 10610, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-21-2003; operative 9-20-2003 (Register 2003, No. 34).
- 2. Renumbering of former section 820.2 to section 820.3 and new section 820.2 filed 9-5-2007; operative 10-5-2007 (Register 2007, No. 36).

§ 820.3. Requirements for Entry of Bulls into California.

- (a) Bulls 18 months of age and over shall have all of the following:
- (1) Official individual identification;
- (2) An Interstate Livestock Entry Permit;
- (3) Negative trichomonosis test results within 60 days prior to entry into California; and,
 - (4) A Certificate of Veterinary Inspection which states:
- (A) The bulls represented on this Certificate of Veterinary Inspection have been tested for and found to be negative for trichomonosis pursuant to subsection (a)(3) above and have been confined and have not had sexual contact with females since their last negative test; and
- (B) Trichomonosis has not been diagnosed in the herd of origin within the past 24 months.
- (b) Any bull originating from a herd in which trichomonosis has been diagnosed within the past 24 months shall have all of the following:
- (1) Three (3) consecutive negative trichomonosis tests conducted at least seven (7) days apart, but not more than 28 days apart, with the last test conducted within 60 days prior to entry; and
- (2) A Certificate of Veterinary Inspection which states that the requirements set forth in subsection (b)(1) above have been met.
- (c) Breeding bulls entering California as part of a herd that has been authorized entry into California via a Pasture to Pasture permit pursuant to section 753.1(f)(2)(A) through (H) of Title 3 of the California Code of Regulations, require one negative trichomonosis test within the 12 months prior to entry. The Pasture to Pasture permit shall include the date and test results or a copy of the test record may be attached to the permit, and the name and telephone number of the testing veterinarian.
- (d) Bulls may be exempt from the trichomonosis test requirements for entry into California under any one or all of the following conditions:
- (1) Used solely for exhibition purposes and remains under confinement at the location of the exhibition without having access to or allowed to commingle with sexually mature female cattle; or
- (2) Used solely for artificial insemination using semen extension and preservation protocols that meet Certified Semen Services standards; or
- (3) Consigned directly to slaughter without unloading prior to the arrival at slaughter plant.

 $NOTE: Authority\ cited:\ Sections\ 407\ and\ 10610, Food\ and\ Agricultural\ Code.\ Reference:\ Sections\ 9166,\ 9167,\ 9562\ and\ 10610,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. New section filed 8-21-2003; operative 9-20-2003 (Register 2003, No. 34).
- 2. Renumbering of former section 820.3 to section 820.4 and renumbering and amendment of former section 820.2 to section 820.3 filed 9–5–2007; operative 10–5–2007 (Register 2007, No. 36).

§ 820.4. Sale of Bulls within California.

- (a) Bulls entering California for sale purposes must meet the requirements as specified in section 820.3.
- (b) Bulls 18 months of age and over sold through a public livestock market shall be sold only to slaughter or to a feedlot designated only for slaughter unless accompanied by a negative trichomonosis test result from a sample taken by a trichomonosis approved veterinarian within 60 days prior to sale.

Page 70.4 Register 2008, No. 14; 4-4-2008

(c) Public saleyards shall post a sign or notice at least 11" x 14" in a prominent place containing the following statement: "All bulls 18 months of age and over sold for breeding must have a negative trichomonosis test or be consigned as slaughter only.", or post a sign as provided by the Department.

§ 820.5. Approval for Testing and Diagnosis.

- (a) USDA accredited California licensed veterinarians must successfully complete a training program approved by the Department for the sampling and handling of the specimens used in the diagnosis of trichomonosis before conducting any sampling.
- (b) Any testing, reading or diagnosing of trichomonosis samples must be performed in an approved laboratory under the direction of a person approved by the Department to perform such activities.
- (c) The Department shall maintain a list of trichomonosis approved veterinarians and trichomonosis approved laboratories.
- $Note: Authority\ cited: Sections\ 407\ and\ 10610, Food\ and\ Agricultural\ Code.\ Reference:\ Sections\ 9166, 9167, 9562\ and\ 10610, Food\ and\ Agricultural\ Code.$

- Renumbering of former section 820.5 to section 820.6 and renumbering and amendment of former section 820.4 to section 820.5 filed 9–5–2007; operative 10–5–2007 (Register 2007, No. 36).

§ 820.6. Reporting of Positive Test Results.

- (a) Trichomonosis is a reportable disease that must be reported to the Department within two days of discovery as specified on the List of Reportable Conditions for Animals and Animal Products pursuant to section 9101 of the Food and Agricultural Code.
- (b) All positive test results shall be reported to the Department within two (2) calendar days of reading the test.
- (c) Trichomonosis positive test specimens may have trichomonosis confirmatory testing when requested by the trichomonosis approved veterinarian or the animal owner.

Note: Authority cited: Sections 407 and 10610, Food and Agricultural Code. Reference: Sections 9166, 9167, 9562 and 10610, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-21-2003; operative 9-20-2003 (Register 2003, No. 34).
- Repealer of former section 820.6 and renumbering and amendment of former section 820.5 to section 820.6 filed 9–5–2007; operative 10–5–2007 (Register 2007, No. 36).

§ 820.7. Trichomonosis Infected Cattle.

- (a) The State Veterinarian shall impose a quarantine pursuant to Food and Agricultural Code section 9562 and serve a Notice of Required Action in accordance with section 1301.1 of Title 3 of the California Code of Regulations on the owner(s) of cattle as follows:
 - (1) Infected cattle.
- (A) Any trichomonosis infected cattle shall be held on the premises where found. Movement may be allowed only under written permission by the Department. If infected cattle are to be slaughtered, written confirmation of the slaughter is required.
 - (2) Affect Herds.
- (A) All herdmate bulls in an affected herd shall be held on the premises where found until three negative consecutive trichomonosis tests are complete. Any cattle determined to be infected will be restricted as defined in subsection (a)(1).
 - (3) Exposed herds.
- (A) The Department will conduct an epidemiological evaluation to identify exposed herds.
- (B) All herdmate bulls in a trichomonosis exposed herd shall be held on the premises where found until one negative trichomonosis test is complete. Any cattle determined to be infected will be restricted as de-

fined in subsection (a)(1) and the herd status will be changed to an affected herd and subject to the requirements of subsection (a)(2).

- (4) Herds entering California with an approved Pasture to Pasture Permit as specified in section 753.1(f)(2)(A) through (H) of Title 3 of the California Code of Regulations.
 - (A) Pasture to Pasture Permit affected herds.
- 1. Any trichomonosis infected cattle are not permitted to enter California
- 2. Any cattle determined to be infected will be restricted as defined in subsection (a)(1).
- 3. All herdmate bulls in an affected herd shall be held on the premises where found until three negative consecutive trichomonosis tests are complete; or
- 4. Return all herdmate bulls to their state of origin to complete three negative consecutive trichomonosis tests. The Department shall release the herdmate bulls from quarantine when the State Veterinarian from the state of origin notifies the Department that the required testing is complete.
 - (B) Pasture to Pasture Permit herds exposed to trichomonosis.
- 1. The Department will conduct an epidemiological evaluation to identify exposed herds.
- 2. All herdmate bulls in a trichomonosis exposed herd shall be held on the premises where found until one negative trichomonosis test is complete. Any cattle determined to be infected will be restricted as defined in subsection (a)(1) and the herd status will be changed to an affected herd and subject to the requirements of subsection (a)(4)(A); or
- 3. Return all herdmate bulls to their state of origin to complete one negative consecutive trichomonosis test. The Department shall release the herdmate bulls from quarantine when the State Veterinarian from the state of origin notifies the Department that the required testing is complete.
- (b) All trichomonosis testing shall be conducted at the expense of the owner(s) of the cattle.
- (c) Failure to complete the required testing within 60 days from the imposition of quarantine or a time period determined by the State Veterinarian will result in a quarantine of the whole herd.

NOTE: Authority cited: Sections 407 and 10610, Food and Agricultural Code. Reference: Sections 9166, 9167, 9562 and 10610, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-21-2003; operative 9-20-2003 (Register 2003, No. 34).
- 2. Change without regulatory effect repealing former section 820.7 and renumbering section 820.8 to section 820.7 filed 4–23–2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 17).
- 3. Renumbering of former section 820.7 to section 820.8 and new section 820.7 filed 9–5–2007; operative 10–5–2007 (Register 2007, No. 36).

§ 820.8. Violations.

- (a) Failure to comply with the provisions of this Article or Food and Agricultural Code section 10610 constitutes a violation punishable by a fine up to five hundred dollars (\$500) for each violation.
- (b) The Department may additionally act consistent with any other existing enforcement authority concurrently or at a later date unless otherwise prohibited. Existing remedies include, but are not limited to, the following:
- (1) Denial, suspension, or revocation of a license, registration, certificate, permit, exception, or other indicia of authority issued by the Department:
 - (2) Civil or administrative penalties;
- (3) Referral to the appropriate District Attorney or the Attorney General for criminal prosecution or other appropriate remedy; and,
- (4) Reimbursement to the Department for any costs incurred due to any violation of this article or Food and Agricultural Code section 10610. NOTE: Authority cited: Sections 407 and 10610, Food and Agricultural Code. Reference: Sections 9166, 9167, 9562 and 10610, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-21-2003; operative 9-20-2003 (Register 2003, No. 34).
- 2. Change without regulatory effect renumbering section 820.8 to section 820.7 filed 4–23–2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 17).

3. Renumbering of former section 820.7 to section 820.8 filed 9–5–2007; operative 10–5–2007 (Register 2007, No. 36).

Article 13. Interstate Movement of Poultry

§ 821. Definitions.

- (a) As used in this article:
- (1) "Animal" means poultry.
- (2) "Department" means the Department of Food and Agriculture.
- (3) "Poultry" means all chickens, turkeys, turkins, pheasants, Peafowl, guinea fowl, quail, ducks, geese, swans, gallinules, doves, pigeons, grouse, partridges, francolin, tinamou, ostriches and other ratites (including but not limited to the rhea, emu and cassowary) and hatching or embryonated eggs as such.
- (4) "Treatment" means to test, clean, decontaminate, disinfect, dip, medicate, vaccinate, or destroy a population of animals, animal product, and/or premises, equipment, and other materials that may have been contaminated by the condition affecting the population of animals, or animal product.
- (5) "USDA" means the United States Department of Agriculture. NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

 New article 13 (sections 821–821.5) and section filed 4–1–2008; operative 5–1–2008 (Register 2008, No. 14).

§ 821.1. General Requirements.

- (a) Certain conditions of avian species and poultry must be reported to the Department within specified timeframes, pursuant to section 9101 of the Food and Agricultural Code and section 797 of Title 3 of the California Code of Regulations. The List of Reportable Conditions for Animals and Animal Products may be obtained by contacting the Department, or by accessing the Department's Internet web site at http://www.cdfa.ca.gov.
- (b) The provisions of this article are in addition to other provisions that may be required for moving poultry into and within California as specified in statute or regulation.
- (c) Any person transporting poultry into or within California shall produce official documents upon request by the Department or other officials to prove that the requirements of this article are met. Official documents include a Certificate of Veterinary Inspection, and an Interstate Livestock Entry Permit number when required pursuant to section 821.4(c), with attachments, for each load or part of a shipment. Poultry in any load or part of a shipment may be inspected en route or after arrival. NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9101, 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

1. New section filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 821.2. Certificate of Veterinary Inspection.

- (a) A Certificate of Veterinary Inspection is a numbered interstate document that is a record of veterinary health inspection of one or more animals, issued on an official form of the state of origin and by a USDA accredited and state licensed veterinarian from the state of origin.
- (b) A Certificate of Veterinary Inspection shall include all of the following:
 - (1) Date of inspection;
 - (2) Number of animals in the consignment;
- (3) Description of the animals including the species, breed, age, weight, color, markings, and sex, and the official identification number(s) or registration tattoos;
- (4) Name, address, and telephone number of the consignor, consignee, and the origin and destination of the animals;
 - (5) Interstate livestock entry permit number, when required;
 - (6) Statement of the purpose for which the animals are being moved;
- (7) Statement that the imports and flock of origin are free of evidence of contagious diseases;

- (8) Signed by the USDA accredited and state licensed veterinarian who examined the animals in the shipment and acknowledging that the certificate is true and accurate:
- (c) A copy of the completed Certificate of Veterinary Inspection shall be mailed to the Department within 15 days of examination to the following address: Department of Food and Agriculture, Animal Health Branch, 1220 "N" Street, Room A–107, Sacramento, California 95814.
- (d) The examining USDA accredited and state licensed veterinarian shall indicate on the Certificate of Veterinary Inspection that each animal in the shipment meets California entry requirements.
- (e) As an alternative to official identification on a Certificate of Veterinary Inspection pursuant to subsection (b)(3), another animal identification document may be used if approved by the Department and the USDA.
- (f) The Department may require a Certificate of Veterinary Inspection for animals entering California because of a disease condition in another state, even though the animals are exempt from obtaining a Certificate of Veterinary Inspection under this article.
- (g) All animals shall be transported directly and without delay to the destination stated on the Certificate of Veterinary Inspection.
- (h) A Certificate of Veterinary Inspection shall be valid for 30 days following the inspection of the animals described.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

1. New section filed 4–1–2008; operative 5–1–2008 (Register 2008, No. 14).

§ 821.3. Interstate Livestock Entry Permits.

- (a) An Interstate Livestock Entry Permit may be required for the importation of animals into California pursuant to the requirements of this article.
- (b) An Interstate Livestock Entry Permit is a numbered document issued by the Department for approving the movement of animals that meet entry requirements into California.
- (c) Requests for Interstate Livestock Entry Permits shall be made to the Department's Animal Health Branch before the animals are transported to California. Requests for entry permits may be made by telephone, electronic transmission, or other means approved by the Department. Written application may be required when necessary to accomplish the purposes of this article.
- (d) Each Interstate Livestock Entry Permit shall have a unique number and the number may be issued to the applicant by telephone or other electronic means approved by the Department. A copy of the permit will not be sent to the applicant unless specifically requested or it is needed to accompany a shipment.
- (e) The applicant for the Interstate Livestock Entry Permit shall establish that all animals in the shipment meet California entry requirements, and possess a Certificate of Veterinary Inspection when required.
- (f) The applicant for the Interstate Livestock Entry Permit shall provide the Department with the following information:
 - (1) Name, address, and telephone number of the shipper or importer;
 - (2) Origin of the shipment;
- (3) The number and description of the animals being shipped including species, breed, age, sex, and purpose for which the animals will be used.
- (4) Name, mailing address, and telephone number of entity receiving the animals, or a geographic destination if animals are not being received at the destination mailing address;
- (5) Name, address, and telephone number of a contact person in California, if not the owner; and the name, address, and telephone number of the person requesting the permit;
 - (6) Certificate of Veterinary Inspection number, if available;
 - (7) Name of the flock veterinarian, if available; and
- (8) Must meet the entry requirements for the type of animals entering California.
- (g) When required, Interstate Livestock Entry Permits are issued for the entire shipment of animals, which may consist of one or more loads.

Page 70.6

Register 2008, No. 14; 4-4-2008

- (h) All animals shall be transported directly and without delay to the destination stated on the Interstate Livestock Entry Permit.
- (i) The State Veterinarian may deny the request for an Interstate Livestock Entry Permit pursuant to sections 9562 and 9570 of the Food and Agricultural Code.
- (j) Interstate Livestock Entry Permits shall expire 15 days after issuance.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

1. New section filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 821.4. Requirements for Entry of Poultry.

- (a) Poultry imported into California shall be free from evidence of Avian Influenza and Exotic Newcastle Disease, and all other contagious diseases.
- (b) All poultry imported into California require a Certificate of Veterinary Inspection, except:
- (1) Poultry originating from flocks rated or classified as Pullorum–Typhoid Clean or Free by the National Poultry Improvement Plan and the Auxiliary Provisions on the National Poultry Improvement Plan, and accompanied by VS Form 9–3 (Report of Sales of Hatching Eggs, Chicks, and Poults) in accordance with 9 CFR Part 145, Part 146, and Part 147 (2007), which are incorporated by reference including additional National Poultry Improvement Plan forms (if any) as provided by the USDA.
- (c) Pursuant to Food and Agricultural Code sections 9562 and 9570, the State Veterinarian may impose additional quarantine, Interstate Livestock Entry Permit, Certificate of Veterinary Inspection, or treatment requirements on imported poultry or poultry products because of a condition in another state, whether or not the animals are exempt under this article.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code; and 9 CFR Parts 145, 146 and 147 (2007).

HISTORY

1. New section filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

§ 821.5. Violations.

- (a) Failure to comply with any part of this article constitutes a violation.
- (b) The Department shall act consistent with any existing enforcement authority concurrently or at a later date unless otherwise prohibited. Such authority includes, but is not limited to, the following:
- (1) Denial, suspension, or revocation of a license, registration, certificate, permit, exception, or other indicia of authority issued by the Department:
 - (2) Civil or administrative penalties;
- (3) Referral to the appropriate District Attorney or the Attorney General for criminal prosecution or other appropriate remedy; and,
- (4) Reimbursement to the Department for any costs incurred due to any violation of this article.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 9561, 9562, 9570 and 9574, Food and Agricultural Code.

HISTORY

1. New section filed 4-1-2008; operative 5-1-2008 (Register 2008, No. 14).

Chapter 3. Livestock Identification

Article 1. Modified Point of Origin Inspection Areas

§ 850. Description of Modified Point of Origin Inspection Areas.

There are four (4) modified point-of-origin inspection areas within the state, described as follows:

Area Number 1: Yolo County.

Area Number 2: San Luis Obispo County.

Area Number 3: All of Modoc County, and in addition that part of Lassen County which lies within the following grazing allotments in the Bureau of Land Management and National Forest Land grazing areas: Sears Flat, Neilson Corral, Tulelake, Hall Field, Selk Alaska, and Tuledad.

Area Number 4: All of Del Norte County, all of Humboldt County, and the southwest portions of Trinity County consisting of the east boundary of Six Rivers National Forest to where it intersects the fifth standard parallel, then generally south along the west boundary of the Mendocino National Forest to the Mendocino County line.

NOTE: Authority cited: Sections 407, 20171 and 21111, Food and Agricultural Code. Reference: Sections 20017, 20021 and 21111, Food and Agricultural Code.

HISTORY

- 1. New article 1(§ 850) filed 12–4–73; effective thirtieth day thereafter (Register 73, No. 49). For prior history, see Register 60, No. 20.
- 2. Amendment filed 4–30–75; effective thirtieth day thereafter (Register 75, No. 18).
- 3. Repealer and new section filed 2–24–83; effective upon filing pursuant to Government Code section 11346.2(d) (Register 83, No. 9).
- 4. Amendment filed 6–5–84; effective upon filing pursuant to Government Code section 11346.2(d) (Register 84, No. 23).
- 5. Amendment of section and NOTE filed 3–15–94; operative 4–14–94 (Register 94, No. 11).

Article 2. Feed Lot Inspection of Cattle

§ 856. Records Required for Incoming Cattle at Registered Feed Lot.

Each registered feed lot defined in Section 20015 of the Food and Agricultural Code shall maintain records for each lot of cattle received that provides all the following information:

- (a) Name and address of owner or shipper;
- (b) Date the cattle were received;
- (c) Number of cattle received;
- (d) Location from which cattle were shipped;
- (e) Name of trucking firm that hauled the cattle;
- (f) A description of the cattle that includes the brand under which they are being shipped; and
 - (g) The lot numbers assigned to the cattle.

[The next page is 71.]

NOTE: Authority cited for Article 2: Sections 407 and 20171, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

HISTORY

1. Repealer of Article 2(§§ 856, 858, 859, 861–864, 866, 867, 869–874, 876) and new Article 2 (§§ 856 through 861) filed 12–4–73; effective thirtieth day thereafter (Register 73, No. 49). For prior history, see Register 18, Nos. 5 and 6; 19, Nos. 4, 5 and 7; 21, No. 7; 22, No. 2; 25, No. 1; 27, Nos. 1 and 5; 29, No. 5; 53, Nos. 16 and 18; 58, Nos. 10 and 13; 56, No. 2; 60, No. 20; 61, No. 11.

§ 857. Records Required for Cattle Shipped from Registered Feed Lot.

Each registered feed lot, defined in Section 20015 of the Food and Agricultural Code, shall maintain records for each lot of cattle shipped from the feed lot that provides the following information:

- (a) Name and address of the owner;
- (b) Date the cattle were shipped;
- (c) Name of the slaughter plant or other point to which the cattle were shipped;
 - (d) The lot numbers identifying the cattle;
- (e) A description of the cattle that includes the brand under which they were shipped;
 - (f) Number of cattle shipped; and
 - (g) Name of trucking firm that hauled the cattle.

§ 858. Records to Be Made Available to Inspector.

Upon the request of a brand inspector or peace officer, the records required by Sections 856 and 857 above shall be made available to such officer for inspection and copying by the operator of the registered feed lot or his representative.

§ 859. Cattle to Be Maintained Separately.

Cattle received at a registered feed lot shall be kept separate and not commingled with other cattle until inspected by the brand inspector.

§ 860. Brand Inspection Certificate Requirements.

A brand inspection certificate shall be prepared for all cattle received at a registered feedlot. Except for those certificates which represent cattle received from a California licensed or posted stockyard or from states other than California, the certificate shall contain the information which is required by Section 21203 of the Food and Agricultural Code.

Certificates on all cattle including those exempted above shall include the following information:

- (a) The place and date of inspection, and the name of consignor and consignee.
 - (b) The number, sex and breed of cattle.
 - (c) If the cattle are to be branded, the new brand shall be listed.
 - (d) The lot number, if any, assigned to the cattle.
- (e) The brand inspection certificate number, the health certificate number, or the serial number and date of any other document accompanying cattle described in the exemption above.

NOTE: Authority cited: Sections 407 and 20171, Food and Agricultural Code. Reference: Section 21203, Food and Agricultural Code.

HISTORY

1. Amendment filed 2–15–80; effective thirtieth day thereafter (Register 80, No. 7).

§ 861. No Charge for Feedlot Reinspection for the Same Owner.

The brand inspection fee required pursuant to Article 9 (commencing with Section 21281), Chapter 6, Division 10 of the Food and Agricultural Code, shall not be collected more than once from the same owner on the same cattle reinspected at a registered feedlot, provided as follows:

- (a) On cattle that reenter the original feedlot or a feedlot in the same modified or full point of origin area, with no change in ownership.
- (b) The feedlot operator shall maintain a record for this purpose which lists and describes all such cattle. The record shall also show where the cattle were pastured, the number of previously inspected cattle shipped from the original feedlot that remain within the modified or full point of

origin area. Any additional cattle will not be exempt from the inspection fees

(c) All cattle shall be inspected in all cases upon reentry as required by Section 21051(d) of the Food and Agricultural Code.

NOTE: Authority cited: Sections 407 and 20171, Food and Agricultural Code. Reference: Section 21281, Food and Agricultural Code.

HISTORY

1. Amendment filed 2–15–80; effective thirtieth day thereafter (Register 80, No. 7).

Article 3. Inspection at Slaughter

§ 870. Monitoring Inspections at Slaughterhouses.

Brand inspectors shall visit each licensed slaughterhouse and inspect cattle received from registered feed lots and licensed and posted cattle sales markets in accordance with the following monitoring procedures to assure that all cattle shipped from such points were inspected as required by Section 21051 of the Food and Agricultural Code:

- (a) A statistical sampling system for inspecting such cattle will be developed and utilized by the director that will provide the optimum degree of probability for detecting uninspected cattle. Each feed lot and cattle sales market shall have at least one of its shipments inspected once each month.
- (b) The sampling system developed shall result in the inspection prior to slaughter of at least five percent of the cattle slaughtered at licensed slaughterhouses.
- (c) Whenever it is determined by the director that any feed lot or cattle sales market is not obtaining the required inspection on all cattle handled, all cattle received for slaughter from such feed lots or sales markets are then subject to inspection prior to slaughter until the director is satisfied that compliance is being obtained.

NOTE: Authority cited for Section 870: Sections 407 and 20171, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

HISTORY

1. Repealer of Article 3(§§ 892, 893, 894) and new Article 3 (§§ 870, 872, 885–891) filed 12–4–73; effective thirtieth day thereafter (Register 73, No. 49). For prior history, see Registers 19, No. 4, 25, No. 1, 27, No. 1 and No. 5, 29, No. 5, 53, No. 16, 58, No. 10.

§ 871. Records Required—Licensed Slaughterers.

NOTE: Authority cited for Section 871: Sections 407, 20171 and 64562, Food And Agricultural Code. Reference: Division 10 and Section 64691.7, Food And Agricultural Code.

HISTORY

1. Repealer filed 10-21-83; effective thirtieth day thereafter (Register 83, No. 43).

§ 872. Collection and Payment of Beef Council Fees.

NOTE: Authority cited: Sections 407 and 20171, Food and Agricultural Code. Reference: Section 64691, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 2–15–80; effective thirtieth day thereafter (Register 80, No. 7).
- 2. Repealer filed 10-21-83; effective thirtieth day thereafter (Register 83, No. 43).

§ 873. Brand Inspection Certificate Requirements at Slaughter.

A brand inspection certificate shall be completed for all cattle inspected at licensed slaughter plants. Except for cattle received from states other than California that are accompanied by identifying documents, the brand inspection certificate shall contain all of the information required in Section 21203 of the Food and Agricultural Code. For those cattle received from states other than California with identifying documents, the brand inspection certificate shall show the name of the seller or consignor, the originating state, the number of cattle and serial number and date of document.

NOTE: Authority cited: Sections 407 and 20171, Food and Agricultural Code. Reference: Section 21203, Food and Agricultural Code.

HISTORY

1. New section filed 2–15–80; effective thirtieth day thereafter (Register 80, No. 7).

Page 71 (4-1-90)

§ 885. Hide and Carcass Identification Tag.

Hides and carcasses of bovine animals slaughtered on any premise other than the premises of a slaughterhouse licensed pursuant to Division 10, Chapter 10, Article 2, of the Food and Agricultural Code shall be identified with the special "Hide and Carcass Identification Tag," approved by the Bureau of Livestock Identification.

The Hide and Carcass Identification Tag shall contain the following properties, and information:

- (a) Be press numbered, so that each set of tags contains a corresponding number that is without duplication, and is traceable;
- (b) The name, address, and telephone number of both the person offering the animal for slaughter and the person performing the slaughter;
 - (c) Date of slaughter of the animal;
- (d) A description of the bovine animal slaughtered which shall include sex, breed, brand and brand location, and eartag numbers, if any. If the animal is unbranded, the description shall include the word "No" in the brand column, and the color of the animal if the breed is unknown;
 - (e) The exact location of the place of slaughter;
- (f) The name of the person or firm that will cut and wrap or otherwise process the carcass of the animal; and
- (g) The signature of the owner or his authorized representative and a declaration of ownership of the animal slaughtered and his willingness to defend title or adverse claim.

The person requested to slaughter the animal shall not be authorized to sign on behalf of the owner.

NOTE: Authority cited for Section 885: Sections 407, 20171 and 22004, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

§ 886. Responsibility for Tagging Hides and Carcasses.

- (a) Any person who slaughters a bovine animal on any premise other than the premises of a slaughterhouse licensed pursuant to Division 10, Chapter 10, Article 2, of the Food and Agricultural Code when the carcass, hide, or carcass and hide is to be removed from such premise for additional processing, shall immediately after slaughter, and before leaving such premise, do all of the following:
- (1) Fill out the Hide and Carcass Identification Tag completely, obtaining all of the information and the signature required in Section 885 above:
- (2) Securely fasten one of the two correspondingly numbered tear-off stub tags to the hide of the animal slaughtered. The tag is to be fastened in the area of the tail-head; and
- (3) Securely fasten the other correspondingly numbered tear–off stub tag to the carcass of the animal slaughtered. The tag may be fastened to any part of the carcass so long as it is conspicuous and can be readily observed on the carcass hanging in a cooler.
- (b) If a person delivers a carcass, or hide and carcass, to an operator of a licensed frozen food locker plant or processor pursuant to Section 22004 of the Food and Agricultural Code which is not tagged in accordance with subsection (a) above, the locker plant operator or processor shall do the following:
- (1) Fill out the Hide and Carcass Identification Tag and fasten it to the carcass and hide as specified in subsection (a) above; and
- (2) If the hide is not with the carcass, he shall give the person delivering the carcass the remaining correspondingly numbered tear-off stub tag with instructions to fasten it to the hide from the carcass delivered.

NOTE: Authority cited for Section 886: Sections 407, 20171 and 22004, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

§ 887. Part of Hide and Carcass Tag to Accompany the Hide.

The top part of the Hide and Carcass Identification Tag referred to in Sections 885 and 886 above shall accompany the hide until the hide is inspected by the brand inspector. This tag, when properly completed and signed, will be accepted for brand inspection purposes as the bill of sale from the person requesting the animal to be slaughtered. This provision does not, however, preclude the brand inspector from requesting addi-

tional bills of sale or proof of ownership from the person declaring ownership of the boyine animal which was slaughtered.

NOTE: Authority cited for Section 887: Sections 407, 20171 and 22004, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

§ 888. Brand Inspector's Responsibility for Hide and Carcass Identification Tags.

NOTE: Authority cited: Sections 407, 20171 and 22004, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–24–75; effective thirtieth day thereafter (Register 75, No. 30).
- 2. Repealer filed 7-25-83; effective thirtieth day thereafter (Register 83, No. 1).

§ 889. Control of Hide and Carcass Identification Tags.

The persons to whom the Hide and Carcass Identification Tags are issued shall keep records of each tag and its number. Such records should be sufficient to show all of the following:

- (a) Each tag number used and the corresponding name of the person owning the bovine animal of which the hide and carcass was tagged;
 - (b) Unused tag numbers; and
 - (c) Voided tag numbers.

Such information shall be furnished to the Bureau of Livestock Identification upon request.

NOTE: Authority cited for Section 889: Sections 407, 20171 and 22004, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

§ 890. Distribution of Hide and Carcass Identification Tags.

Hide and Carcass Identification Tags shall be provided upon request by the Bureau of Livestock Identification. There will be a charge by the Bureau for each tag in an amount sufficient to recover costs of the tags. NOTE: Authority cited for Section 890: Sections 407, 20171 and 22004, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

§ 891. Removal of Tags.

No person shall remove a tag from a hide or carcass tagged pursuant to Sections 885, 886, 887, or 888 above, except as follows:

- (a) The tag may be removed from the hide when the hide is being readied for tanning at the tannery.
- (b) The tag may be removed from the carcass when the cutting and wrapping process begins. Such tags shall be attached to and become part of the cutting orders of the locker plant or processor.

NOTE: Authority cited for Section 891: Sections 407, 20171 and 22004, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

Article 4. Branding and Inspection

§ 895. Branding Positions.

In the enforcement of Division 10, Chapter 4, Article 1, relating to the branding of cattle, there shall be six branding positions for the recordation of identification brands. Such positions shall include the shoulder, ribs and hip on each side of the animal.

NOTE: Authority cited for Section 895: Sections 407, 20171 and 20603, Food and Agricultural Code. Reference: Division 10, Food and Agricultural Code.

HISTORY

1. Amendment filed 12–4–73; effective thirtieth day thereafter (Register 73, No. 49). For prior history, see Register 53, No. 23.

§ 895.1. Cattle Record Branding Positions.

In addition to the positions for cattle record brands provided in Sections 20904 and 20905 of the Food and Agricultural Code, cattle record brands may be applied as follows:

- (a) Cattle record brands consisting of a number or a combination of numbers may be applied by the owner of a recorded brand on any of the six positions designated in Section 895 above for recorded brands, provided that such record brand is used in any one of such six positions in connection with and directly below such recorded brand.
- (b) Cattle record brands consisting of at least four digits which constitute a number greater than 1,000 may be applied on the left or right ribs of cattle.

Page 72 (4-1-90)

NOTE: Authority cited for Section 895.1: Sections 407, 20171 and 20603, Food and Agricultural Code. Reference: Sections 20904–20906, Food and Agricultural Code.

HISTORY

- Amendment filed 12-4-73; effective thirtieth day thereafter (Register 73, No. 49). For prior history, see Register 54, No. 11.
- Amendment filed 3–22–74; effective thirtieth day thereafter (Register 74, No. 12).

§ 895.2. Horse Record Branding Positions.

A "super-cold iron" brand, as defined in Section 23251.1 of the Food and Agricultural Code may be applied as a record brand only on the neck of horses. Such a brand may also be used on the other positions which are authorized for cattle brands.

NOTE: Additional authority cited: Section 23021, Food and Agricultural Code. Reference: Sections 20901, 20902 and 23251, Food and Agricultural Code.

HISTORY

 New section filed 2-6-78; effective thirtieth day thereafter. Printed in Register 78, No. 13 for technical reasons.

§ 896. Brand Registration Procedure.

HISTORY

- 1. Repealer filed 8-6-57; effective thirtieth day thereafter (Register 57, No. 12).
- 2. New section filed 1-12-78 as procedural and organizational; effective upon filing (Register 78, No. 2).
- 3. Repealer filed 7-25-83; effective thirtieth day thereafter (Register 83, No. 31).

§ 897. Special Modified Point of Origin Boundary Movement Permit.

A permit may be issued to a producer of cattle for movement of cattle across a modified point—of—origin boundary without brand inspection provided the following circumstances exist: the distance between origin and destination is forty (40) miles or less, by existing roadway; the cattle return only to the point of origin; and there is no change in ownership and the cattle are moved for pasture or feeding purposes only.

All cattle shipped in accordance with the permit shall be accompanied by a Cattle Movement Record and are subject to brand inspection.

The permit, based upon application by the producer, shall contain the following: name and address of the permittee; location of ranches covered by the permit; dates of issuance and expiration; maximum number of cattle to be shipped by the permit; and amount of fee.

A Livestock Movement Record, in an approved form, shall be completed by the permittee before movement, for each shipment of cattle shipped pursuant to the permit. Notice and verification shall be provided to the Bureau as required in the permit.

NOTE: Authority cited: Sections 407–409 and 20171, Food and Agricultural Code. Reference: Section 21059(d), Food and Agricultural Code.

HISTORY

1. New section filed 4–9–81; effective thirtieth day thereafter (Register 81, No. 15). For prior history, see Register 73, No. 49.

§ 897.1. Slaughterhouse Operators May Request Additional Inspection.

Slaughterhouses, except those specified in Section 21055 of the Food and Agricultural Code, will receive a basic brand inspection service by the brand inspector for cattle on hand at that time. This basic service is that amount of service being normally provided at the time these regulations are adopted. Inspection requirements beyond this basic service will be considered additional services.

NOTE: Authority cited for Sections 897.1, 897.2, 897.3 and 897.4, Sections 407 and 21061, Food and Agricultural Code.

HISTORY

1. New Sections 897.1, 897.2, 897.3 and 897.4 filed 3–15–71 as an emergency; effective upon filing. Certificate of Compliance included. (Register 71, No. 12). For former Section 897.1 see Register 61, No. 5.

§ 897.2. Conditions for Providing Additional Inspection Service at Slaughterhouses.

Additional brand inspection services will be provided under the following conditions:

- (a) Upon request in advance by the slaughterhouse operator to the inspector. Such requests shall be given at least one day in advance of the inspection.
- (b) The slaughterhouse operator shall pay the Director an amount sufficient to reimburse the Department for the cost of the inspection service provided.

Fees for additional service are an expense of the slaughterer and shall not be an added charge to the consignor or seller of the livestock.

- (c) Reimbursement will be based upon a pre-determined hourly rate, established under the provisions of Section 897.4 of this Code. The rate is to be charged from the time the brand inspector arrives at the slaughterhouse. There will always be a minimum charge of one hour.
- (d) All moneys due for such additional service shall be collected at the same time that brand inspection fees are collected as provided in Division 10, Chapter 6, Article 9 (commencing with Section 21281) of the Food and Agricultural Code.

§ 897.3. Contract for Brand Inspection.

A slaughterer, or group of slaughterers, may contract with the Department for the purposes of acquiring the full-time services of a brand inspector at the plant, or plants, provided the Department is fully reimbursed by the slaughterer, or slaughterers, for the full cost of the inspector. Reimbursement will be on a monthly basis.

§ 897.4. Authority for Establishing Charges.

Slaughterhouses receiving brand inspection services pursuant to Section 21061 of the Food and Agricultural Code shall pay to the Department, the current rate for such services, established by the Director. Said rate shall be uniform for all such establishments requesting the service. The rate shall be such as to reimburse the Department for the actual costs of providing brand inspection service, including overhead costs.

Persons receiving such inspection will be notified by the Director of the current rate. The Director may adjust said rate from time to time as necessary to reimburse the Department for actual costs in providing current services.

§ 898. Inspection of Hides.

HISTORY

1. Repealer filed 12–4–73; effective thirtieth day thereafter (Register 73, No. 49).

§ 898.1. Inspection of Reduction Hides.

No inspection is required on hides removed from carcasses at rendering plants or of carcasses with hides on at rendering plants or reduction works.

HISTORY

- 1. New section filed 11–1–60 as an emergency; effective upon filing (Register 60, No. 22).
- Certificate of Compliance—Section 11422.1, Government Code, filed 2–28–61 (Register 61, No. 5).

§ 899. Inspection of Cattle—Saleyards.

In the enforcement of Division 10, Chapter 8, Article 2, of the Food and Agricultural Code relating to public saleyards, all saleyards and stockyards shall be equipped with handling chutes which shall be so constructed as to make all branding positions of the animal visible to the brand inspector and shall be provided with electric outlets for the use of electric clippers. All such yards shall provide a holding pen to be used by brand inspectors for cattle awaiting clearance.

Assignment of inspectors to licensed public auction saleyards and licensed private cattle sales markets shall be made only on sales days approved by the Bureau of Livestock Identification. All cattle owners holding a dispersal sale of cattle shall be responsible for notification to the bureau of such sale and request inspection at least one week prior to the date of the sale, whereupon an inspector shall be assigned to such sale. NOTE: Authority cited: Sections 407, 20171 and 21746, Food and Agricultural Code. Reference: Sections 21743 and 21747, Food and Agricultural Code.

HISTORY

Amendment filed 10–6–77; effective thirtieth day thereafter (Register 77, No. 41).

§ 899.1. Hours of Inspection at Salesyards.

In the enforcement of Division 10, Chapter 6, Article 1 of the Food and Agricultural Code, licensed and posted public auction salesyards shall only receive brand inspection until 1600 hours (4:00 p.m.) each sale day. Cattle arriving too late to receive brand inspection shall not be sold at auction on this sale day. However, if a salesyard requests an inspector to stay past 1600 hours (4:00 p.m.) to inspect cattle that are on their way to the salesyard, the inspector must stay for a maximum of one (1) hour. The salesyard will be responsible for the cost of the inspector's extra time at overtime rate, with a minimum of one (1) hour.

 $NOTE: Authority\ cited: Sections\ 407\ and\ 21746,\ Food\ and\ Agricultural\ Code.\ Reference:\ Sections\ 21051,\ 21172\ and\ 21746,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. Amendment filed 6-24-71; effective thirtieth day thereafter (Register 71, No. 26).
- Amendment of section and Note filed 4–23–2002; operative 5–23–2002 (Register 2002, No. 17).

§ 899.2. Request for Change of Inspection Time.

A salesyard with established hours of sale time beginning after 1600 hours (4:00 p.m.) may request to have inspection between 1600 hours (4:00 p.m.) and 1800 hours (6:00 p.m.) and in no case will inspection be made after sunset. The request must be made to the Bureau of Livestock Identification at least sixty (60) days prior to the effective date of the change of inspection times.

NOTE: Authority cited: Sections 407 and 21746, Food and Agricultural Code. Reference: Sections 21051, 21172 and 21746, Food and Agricultural Code.

HISTORY

1. New section filed 4-23-2002; operative 5-23-2002 (Register 2002, No. 17).

Chapter 4. Meat Inspection

(Originally Printed 7-25-45)

Subchapter 1.

Article 1. Meat and Poultry Inspection

§ 900. Definitions.

- (a) As used in this subchapter, unless otherwise required by the context, the singular form shall also import the plural and the masculine form shall import the feminine, and vice versa.
- (b) Unless otherwise required by the context, the following terms shall be construed, respectively, to mean:
- (1) "Act" means the California Meat and Poultry Inspection Act, Chapter 4 (commencing with section 18650) and as supplemented by the California Meat and Poultry Supplemental Inspection Act, Chapter 4.1 (commencing with section 18940) of Part 3, Division 2 of the Food and Agricultural Code.
- (2) "Additive" means anything added to a meat or poultry product other than meat, poultry, or meat and poultry byproducts.
- (3) "Area" means a geographical region under the supervision of an Area Supervisor.
 - (4) "Area Supervisor" means the official in charge of an area.
- (5) "Biological residue" means any substance, including metabolites, remaining in livestock at time of slaughter or in any of its tissues after slaughter as the result of treatment or exposure of the livestock to a pesticide, organic or inorganic compound, hormone, hormone–like substance, growth promoter, antibiotic, anthelmintic, tranquilizer, or other therapeutic or prophylactic agent.
- (6) "California Condemned" means that the livestock so identified has been inspected by an inspector and found to be in a dying condition, or to be affected with any other condition or disease that would require condemnation of its carcass or its affected parts.
- (7) "California Inspected and Condemned" means that the carcass, viscera, other part of carcass, or other product so identified has been in-

spected by an inspector, found to be adulterated, and condemned under the regulations in this subchapter.

- (8) "California Inspected and Passed" means that the product so identified has been inspected by an inspector and passed under the regulations in this subchapter, and at the time it was inspected, passed, and identified, it was found to be not adulterated.
- (9) "California Rejected" means that the compartment, room, utensil, or piece of equipment so identified is unacceptable for use in the official establishment and cannot be used until the condition that renders it unacceptable is corrected and it has been reexamined and released by an inspector. This is accomplished by applying a red or green California Rejected tag to the compartment, room, utensil, or piece of equipment. The compartment, room, utensil, or piece of equipment is released by removal of the California Rejected tag.
- (10) "California Retained" means that the carcass, viscera, other part of carcass, or other product, or article so identified is held for further examination by a program employee to determine its disposal. This is accomplished by applying a red California Retained tag to the carcass, viscera, other part of carcass, or other product or article.
- (11) "California Suspect" means that the livestock so identified by an inspector is suspected of being affected with a disease or condition which may require its condemnation, in whole or in part, when slaughtered, and is subject to further examination by a program employee to determine its disposal.
- (12) "Capable of use as human food" applies to any carcass, or part or product of a carcass, of any livestock, unless it is denatured or otherwise identified as required by this subchapter to deter its use as a human food, or it is naturally inedible by humans such as hoofs or horns in their natural state.
- (13) "Carcass" means all parts, including viscera, of any slaughtered livestock or poultry.
- (14) "Chemical preservative" means any chemical that, when added to a meat, meat food product, poultry product, or poultry meat food product tends to prevent or retard deterioration thereof, but does not include common salt, sugars, vinegars, spices, or oils extracted from spices or substances added to meat, meat food products, poultry products, or poultry meat food products by exposure to wood smoke.
- (15) "Condemned" means the product or ingredient has been inspected and determined to be unfit for human food purposes.
- (16) "Consciousness" means the responsiveness of the brain to the impressions made by the senses.
- (17) "Dead livestock" means the body or cadaver of livestock that has died other than by slaughter.
- (18) "Denature" means to make an item visually, physically, and/or odoriferously unfit, through the use of an agent or process, for human consumption.
- (19) "Department" means the California Department of Food and Agriculture.
- (20) "Dying, diseased, or disabled livestock" is livestock that has or displays symptoms of having any of the following:
 - (A) Central nervous system disorder;
 - (B) Abnormal temperature (high or low);
 - (C) Difficult breathing;
 - (D) Abnormal swellings;
 - (E) Lack of muscular coordination;
 - (F) Inability to walk or stand;
- (G) Any of the conditions for which livestock is required to be condemned on ante-mortem inspection in accordance with the requirements under Article 4 of this subchapter.
 - (21) "Edible" means the product is intended for use as human food.
- (22) "Firm" means any partnership, association, or other unincorporated business organization.
- (23) "Immediate container" means the receptacle or other covering in which any product is directly contained or wholly or partially enclosed.
- (24) "Inedible" means adulterated, uninspected, or not intended for use as human food.

Page 74

- (25) The term "inhumane slaughter" or "inhumane handling in connection with slaughter" means the slaughter or handling in connection with slaughter not in accordance with the federal Humane Methods of Slaughter Act, 7 USC, section 1901 et seq.
- (26) "Inspector" means a Meat and Poultry Inspection Branchemployed Veterinary Medical Officer, Meat Food Inspector, Supervising Meat Inspector, or Branch Chief or an industry-employed and Department-licensed Livestock Meat Inspector or Processing Inspector.
- (27) "Label" means a display of written, printed, or graphic matter upon the immediate container (not including package liners) of any article.
- (28) "Labeling" means all labels and other written, printed, or graphic matter:
 - (A) Upon any article or any of its containers or wrappers; or
 - (B) Accompanying such article.
- (29) "Livestock" means cattle, sheep, swine, goats, and fallow deer or equine for pet food.
- (30) "Meat" means the part of the muscle of any cattle, sheep, swine, goats or fallow deer that is skeletal or that is found in the tongue, in the diaphragm, in the heart, or in the esophagus, with or without the accompanying and overlying fat, and the portions of bone, skin, sinew, nerve, and blood vessels that normally accompany the muscle tissue and that are not separated from it in the process of dressing. It does not include the muscle found in the lips, snout, or ears.
- (31) "Meat and Poultry Inspection Branch" or "MPI" means the Meat and Poultry Inspection Branch of the Department.
- (32) "Meat byproduct" means any part capable of use as human food, other than meat, that has been derived from one or more cattle, sheep, swine, goats, or fallow deer.
- (33) "Meat food product" means any article capable of use as human food that is made wholly or in part from any meat or other portion of the carcass of any cattle, sheep, swine, goats, or fallow deer. This does not include articles exempted from the definition of a meat food product by the Department in specific cases or by the requirements of this subchapter, upon a determination that they contain meat or other portions of such carcasses only in a relatively small proportion or historically have not been considered by consumers as products of the meat food industry. Such exempted articles shall comply with any requirements that are imposed in such cases or regulations to assure that the meat or other portions of such carcasses contained in such articles are not adulterated and that such articles are not represented as meat food products.
- (34) "Nonambulatory" means unable to stand or walk without assistance.
- (35) "Official device" means any device prescribed by section 903.17 of this subchapter for use in applying any official mark.
- (36) "Official establishment" means any slaughtering, curing, smoking, drying, rendering, or similar establishment at which inspection is maintained under the regulations in this subchapter.
- (37) "Official inspection legend" means any symbol prescribed by the regulations in this subchapter showing that an article was inspected and passed in accordance with the Act.
- (38) "Official mark" means the official inspection legend or any other symbol prescribed by the requirements of this subchapter to identify the status of any article or animal under the Act.
- (39) "Packaging material" means any cloth, paper, plastic, metal, or other material used to form a container, wrapper, label, or cover for meat and poultry products.
- (40) "Passed" means the product or ingredient has been inspected and determined to be fit for human food purposes.
 - (41) "Person" means any individual, firm, or corporation.
- (42) "Potentially Hazardous Product" means any meat and/or poultry product that is in a form capable of supporting rapid and progressive growth of infectious or toxigenic microorganisms that may cause food infections or food intoxications. "Potentially hazardous product" does not include meat and/or poultry products that have a pH level of 4.6 or below and/or a water activity (aw) value of 0.85 or less.

- (43) "Poultry" means domestic fowl and domesticated rabbit to be used for human food. "Fowl" includes chickens, turkeys, ducks, geese, squab, quail, pheasant, ratites, and other domesticated birds.
- (44) "Poultry Meat Food Product" means any article of food or any article intended or capable of being used as human food that is derived or prepared, in whole or in substantial and definite part, from any portion of poultry.
- (45) "Poultry Product" means dressed poultry, ready-to-cook poultry, edible poultry by-product, and poultry meat food product. However, the following items contain poultry ingredients only in a relatively small proportion or historically have not been considered by consumers as products of the poultry food industry. Therefore, the following items are exempt from the definition of "poultry product" and the requirements of the Act and the regulations applicable to poultry products, if they comply with the conditions specified in this subchapter:
- (A) Any human food product (in a consumer package) not provided for in subsection (B) of this section, if:
- 1. It contains less than 2 percent cooked poultry meat (deboned white or dark poultry meat, or both);
- 2. It contains less than 10 percent of cooked poultry skins, giblets, or fat, separately, and less than 10 percent of cooked poultry skins, giblets, fat, and meat (as meat is limited in this section) in any combination;
- 3. The poultry ingredients used in the product were prepared under federal inspection or were inspected under a foreign or state inspection system approved by the USDA or Department and imported in compliance with the Act and the requirements of this subchapter;
- 4. The immediate container of the product bears a label that shows the name of the product in accordance with this subchapter; and
- 5. The product is not represented as a poultry product. The aforementioned percentages of ingredients shall be computed on the basis of the moist, deboned, cooked poultry in the ready—to—serve product when prepared according to the serving directions on the consumer package.
- (B) Bouillon cubes, poultry broths, gravies, sauces, seasonings, and flavorings if:
- 1. They contain poultry meat or poultry fat only in condimental quantities:
- 2. They comply with the provisions of subsections (b)(45)(A) 3., 4., and 5. of this section in all respects; and
- 3. In the case of poultry broth, it will not be used in the processing of any poultry product in any official establishment.
- (C) Fat capsules and sandwiches containing poultry products if they comply with the provisions of subsections (b)(45)(A) 3., 4., and 5. of this section in all respects.
- (D) Products of the types specified in this section except those specified in subsections (b)(45)(A) and (C) of this section will be deemed to be represented as poultry products if the kind name of the poultry (chicken, turkey, etc.) is used in the product name of the product without appropriate qualification. For example, a consumer–packaged noodle soup product containing less than 2 percent chicken meat on a ready–to–serve basis may not be labeled "Chicken Noodle Soup" but, when appropriate, could be labeled as "Chicken Flavored Noodle Soup."
- (46) "Prepared" means slaughtered, cured, smoked, dried, rendered, or otherwise manufactured or processed.
- (47) "Process schedule" means a written description of processing procedures, consisting of any number of specific, sequential operations directly under the control of the establishment employed in the manufacture of a specific product, including the control, monitoring, verification, validation, and corrective action activities associated with production.
- (48) "Product" means any carcass, meat, meat byproduct, meat food product, poultry product, or poultry meat food product capable of use as human food.
 - (49) "Program" means the Meat and Poultry Inspection Branch.
- (50) "Renderer" means any person engaged in the business of rendering carcasses or parts or products of the carcasses of any livestock or poultry except rendering of products intended for human consumption and conducted under inspection.

- (51) "Restricted ingredient" means an additive for which the amount that can be used in a meat or poultry product is limited by this subchapter.
 - (52) "State" means the State of California.
- (53) "State Veterinarian" means an officially designated employee of the California Department of Food and Agriculture who has jurisdiction over livestock and poultry disease control, meat inspection, and dairy inspection.
- (54) "Subchapter" references mean the regulations contained in Subchapter 1 of Chapter 4, Division 2, of Title 3 of the California Code of Regulations.
- (55) "Supervision" means the controls, as prescribed in instructions to program employees, to be exercised by them over particular operations to insure that such operations are conducted in compliance with the Act and the requirements of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Chapter 4 (commencing with section 18650), Chapter 4.1 (commencing with section 18940); and Chapter 6 (commencing with section 19501), of Part 3, Division 9, and Chapter 3 (commencing with section 24951) of Part 1, Division 12, Food and Agricultural Code.

HISTORY

- 1. Repealer of Groups 1 and 2 (§§ 900 through 1175.2) and new Group 1 (§§ 900 through 904 and 920) filed 10–8–70 as an emergency; effective upon filing (Register 70, No. 41). For prior history, see Registers 58–23, 59–20, 61–10, 62–24, 65–1, 65–23, 65–24, 66–6, 66–23, 67–51, 68–26, 68–29, 68–31 and 70–20
- Certificate of Compliance—Section 11422.1, Gov. Code, filed 12–15–70 (Register 70, No. 51).
- Amendment filed 8–4–72; effective thirtieth day thereafter (Register 72, No. 32).
- 4. Repealer of former article 1 (sections 900–921) and section and new article 1 (sections 900–900.3) and section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 900.1. Incorporation by Reference.

- (a) The following Code of Federal Regulations (CFR), United States Code (USC), and the federal directives and policies, as specified in these regulations (Subchapter 1 of Chapter 4, Division 2, of Title 3 of the California Code of Regulations), are incorporated by reference:
- (1) 9 CFR Parts 301, 307, 309, 310, 311, 312, 313, 314, 316, 317, 318, 319, 320, 381, 416 and 424 (2006).

§ 900.2. Code of Federal Regulations (CFR) Terminology.

(a) The terminology used in 9 CFR (2006) shall mean the following corresponding terminology as used or referenced in this subchapter:

9 CFR (2006)	Subchapter 1 of Chapter 4, Division 2 of Title 3 of the California Code of Regulations
Secretary of Agriculture, United States Department of Agriculture, Food Safety and Inspection Service (FSIS)	Secretary of the California Department of Food and Agriculture or the Director of the California Department of Food and Agriculture, Division of Animal Health and Food Safety Services
Administrator	Director of the California Department of Food and Agriculture, Division of Animal Health and Food Safety Services, or the Chief of the Meat and Poultry Inspection Branch
Deputy Administrator, Meat and Poultry Inspection	Chief of the Meat and Poultry Inspection Branch
Circuit Supervisor	Area Supervisor of the Meat and Poultry Inspection Branch
Interstate Commerce	Intrastate Commerce within California
FSIS Inspection	California Inspection
Inspector in Charge or Veterinary Medical Officer	Meat Food Inspector or Supervising Meat Inspector or Veterinary Medical Officer of the Meat and Poultry Inspection Branch
US Condemned	California Condemned
US Suspect	California Suspect
US Retained	California Retained
US Rejected	California Rejected
US Inspected and Condemned	California Inspected and Condemned
US Inspected and Passed	California Inspected and Passed
Food Labeling Division or Regulatory Programs	Meat and Poultry Inspection Branch

(b) Any references to the Federal Food, Drug, and Cosmetic Act, 21 USC section 301 et seq., and the Federal Meat Inspection Act, 21 USC section 71 et seq., as amended by the Wholesome Meat Act 21 USC section 601 et seq., shall refer to the corresponding California Meat and Poultry Inspection Act, Chapter 4 (commencing with section 18650) of Part 3, Division 9, of the Food and Agricultural Code. However, any federal references to foreign commerce shall not be applicable to this subchapter.

(c) References to specific parts of 9 CFR (2006) shall refer to the articles or sections of this subchapter according to the following table:

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 900.3. Scope of Inspection.

(a) State inspection is required for those establishments and products subject to inspection pursuant to Chapter 4 (commencing with section 18650), Chapter 4.1 (commencing with section 18940), Chapter 4.5 (commencing with section 19051), Chapter 5 (commencing with section 19200), and Chapter 6 (commencing with section 19501), of Part 3, Division 9, Food and Agricultural Code, and Chapter 2 (commencing with section 24651), and Chapter 3 (commencing with section 24951), of Part 1, Division 12, Food and Agricultural Code, and that are not under inspection by the United States Department of Agriculture, or apply to the Department for an exemption pursuant to section 19020 of the Food and Agricultural Code. Applicants for exemption shall complete the Meat and Poultry Inspection Form 79–001(Rev. 12/04), Custom Exempt Registration Form, which shall be provided by the Department upon request.

(b) The following establishments and products therefrom, while operating and distributing products solely within California and while under exemption from federal inspection pursuant to 9 CFR sections 303.1 and 381.10 (2006), require state inspection:

- (1) The custom slaughter by any person of cattle, sheep, swine, or goats delivered by the owner thereof for such slaughter, and the preparation by such slaughterer and transportation in intrastate commerce of the carcasses, parts thereof, and meat and meat food products of such livestock, exclusively for use, in the household of such owner, by him, members of his household, and his nonpaying guests and employees.
- (2) The custom slaughter by any person of poultry delivered by the owner for such slaughter, and the processing by such slaughterer and transportation in intrastate commerce of the poultry products exclusively for use, in the household of such owner, by him, members of his household, and his nonpaying guests and employees.
- (3) Operations involving the preparation of products of cattle, sheep, swine, goats, or poultry traditionally and usually conducted at retail stores and restaurants, when conducted at any retail store, restaurant, or similar retail-type establishment, for sale in normal retail quantities or service of such articles to consumers at such establishments when involving curing, drying, smoking, or rendering. A normal retail quantity is an amount in accordance with 9 CFR section 303.1(d)(2)(ii) (2006).

- (c) State inspection is required, except where exempted by sections 24713, 24714, 25022, 25023, 25702, and 25704 of the Food and Agricultural Code, at every establishment that slaughters poultry and is not under inspection by the United States Department of Agriculture.
- (d) This section does not affect activities involving horsemeat and pet food pursuant to Chapter 5 (commencing with section 19200) of Part 3, Division 9, of the Food and Agricultural Code.
- (e) The following establishments that are not under inspection under the Federal Wholesome Meat Act are required to have state inspection pursuant to Chapter 4.1 (commencing with section 18940) of Part 3, Division 9 of the Food and Agricultural Code: establishments slaughtering fallow deer and/or preparing fallow deer products for transportation and/or sale.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Chapter 4 (commencing with section 18650), Chapter 4.1 (commencing with section 18940), Chapter 4.5 (commencing with section 19051), Chapter 5 (commencing with section 19200), and Chapter 6 (commencing with section 19501), of Part 3, Division 9, Food and Agricultural Code, and Chapter 2 (commencing with section 24651), and Chapter 3 (commencing with section 24951), of Part 1, Division 12, Food and Agricultural Code; and 9 CFR sections 303.1 and 381.10 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 2. Supplemental Requirements, Licensing and Inspection

§ 901. Authority of Livestock Meat Inspectors, Processing Inspectors, and Persons Responsible for Operation of Custom Livestock Slaughterhouses and Meat Processing Establishments.

- (a) No person licensed as a livestock meat inspector or processing inspector and no person responsible for the operation of a custom livestock slaughterhouse or meat processing establishment shall exercise the authority of the license:
- (1) To perform or allow the performance of any operation not in accordance with the requirements in this subchapter: or
- (2) Contrary to instructions of a Department inspector, including instructions relating to proper procedures, wholesomeness inspection, condemnation, or other disposition of diseased animals, carcasses, parts and adulterated or mislabeled meat and poultry products; sanitation inspection; and the maintenance of accurate records.
- (b) No person licensed as a livestock meat inspector or processing inspector and no person responsible for the operation of a custom livestock slaughterhouse or meat processing establishment shall allow establishment duties to interfere with livestock meat inspector and processing inspector official inspection duties.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18971, 18972, 18973 and 18974, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–3–85; effective thirtieth day thereafter (Register 85, No. 23).
- 2. Amendment filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- 3. Amendment relocating article 2 heading from section 927 to section 901 (thereby establishing article 2 as comprising sections 901–901.11), repealer of former section 901 and renumbering former section 927 to new section 901, including amendment of section heading, section and NOTE, filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 901.1. Condemnation and Retention of Product.

Violation of any provisions of Chapter 4 (commencing with section 18650) or of Chapter 4.1 (commencing with section 18940) of Part 3, Division 9 of the Food and Agricultural Code or this subchapter, shall be grounds for condemnation of affected product when in the judgment of a Department inspector such violation could affect the wholesomeness of such product. Other violations affecting the product or its packaging

shall be grounds for retention of the product until the violation is corrected.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18991, 19001, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 928 to new section 901.1, including amendment of section and NOTE, filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 901.2. Grounds for Disciplinary Action.

Violation of any provisions of Chapter 4 (commencing with section 18650) or of Chapter 4.1 (commencing with section 18940) of Part 3, Division 9 of the Food and Agricultural Code, or the requirements of this subchapter, shall be grounds for disciplinary action against the license or firm involved. Continued violation shall be grounds for permanent withdrawal of plant inspection.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 19017, 19030, 19035 and 19036, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 929 to new section 901.2, including amendment of section and Note, filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 901.3. Licenses.

- (a) Applicants for a Processing Inspector license shall complete the Meat and Poultry Inspection Branch Form 79–010A (Rev. 12/04), Processing Inspector License Application. Applicants for a Livestock Meat Inspector license shall complete the Meat and Poultry Inspection Branch Form 79–008A (Rev. 12/04), Livestock Meat Inspector License Application. The forms may be obtained by contacting the Department. Applicants for licensure or renewal shall submit the fees required by section 18980 of the Food and Agricultural Code.
- (b) License applicants, upon payment of the application fee, shall be furnished by the Department with a copy of extracts from the Food and Agricultural Code and the California Code of Regulations pertaining to meat and poultry inspection, the Department's Processing Inspector Handbook (5/03 Edition) or Livestock Slaughter Inspection Handbook (6/05 Edition), and other information that the applicant should know to pass the examination and properly conduct inspection activities. Duplicate materials shall be furnished at cost.
- (c) Each licensee shall maintain a current copy of the applicable state and federal statutes and regulations and Department handbook at each establishment where the inspector is performing inspection services.
- (d) Identification of livestock meat inspectors and processing inspectors. The current license renewal certificate or a copy thereof for each licensed livestock meat inspector or processing inspector shall be posted in a readily visible location at each official establishment where they are employed.
- (e) No person licensed as a livestock meat inspector or processing inspector shall purport to exercise license authority while not on official duty at an establishment subject to inspection.
- (f) Applicants for a license to operate a custom livestock slaughter establishment or a meat processing plant must complete MPI Form 79–002A (Rev. 12/04), Custom Livestock Slaughter or Meat Processing Plant License Application, provided by the Department. Applicants for license issuance or renewal shall submit the fees required by sections 19010 and 19011 of the Food and Agricultural Code.
- (g) If the license for a livestock slaughter establishment or meat processing establishment is issued to other than a natural person, the license shall also state the name of a natural person or persons responsible for operations under the license. Any change in ownership, authorized agent or location of a livestock slaughter establishment or meat processing establishment requires a new application fee and license. Any such change in ownership, authorized agent or location of a custom livestock slaughterhouse or meat processing establishment shall subject the establishment's facilities, equipment, and procedures to reassessment by the Department to determine the establishment's adequacy to produce wholesome product before issuance of a new license. Such reassessment

Page 76.2

shall be equivalent to that required by the Department for a newly proposed establishment.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961, 18962, 19010, 19011 and 19014, Food and Agricultural Code. Reference: Sections 18980, 18981, 18990 and 19000, Food and Agricultural Code.

HISTORY

 Renumbering of former section 931 to new section 901.3, including amendment of section and NOTE, filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 901.4. Examinations.

- (a) The Department shall conduct mandatory inductive training for persons desiring to become licensed pursuant to Chapter 4.1 (commencing with section 18940) of Part 3, Division 9, of the Food and Agricultural Code. The inductive training shall relate to subjects covered in license examinations and job requirements and shall include the following areas:
- (1) Livestock Slaughter Training for applicants to become livestock meat inspectors.
 - (A) Basic sanitation of equipment and facilities;
 - (B) Rodent and pest control;
 - (C) Sanitary dressing procedures and product handling;
 - (D) Records and record keeping;
 - (E) Ante-mortem and post-mortem inspection techniques;
- (F) Common generalized and localized conditions seen on ante-mortem and post-mortem inspection as outlined in the regulations; and
 - (G) Disposition of diseased carcasses and parts.
- (2) Meat Processing Inspection Training for applicants to become processing inspectors.
 - (A) Basic sanitation of equipment and facilities;
 - (B) Sanitary product handling;
 - (C) Records and record keeping;
 - (D) Recognizing localized disease conditions;
 - (E) Rodent and pest control;
 - (F) Proper formulation of meat food products;
 - (G) Fat and moisture control;
 - (H) Control of restricted ingredients;
 - (I) Trichina control; and
 - (J) Adulteration and mislabeling.
- (b) Plant management shall provide time and resources for the training of employees who apply to become livestock meat inspectors or processing inspectors. The time and resources provided shall be what are required to enable the applicant to acquire the knowledge and skills necessary to pass the written and oral/practical examinations required to become a livestock meat inspector or a processing inspector.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961, 18962 and 19014, Food and Agricultural Code. Reference: Sections 18982, 18983, 18990 and 19000, Food and Agricultural Code.

HISTORY

 Renumbering of former section 932 to new section 901.4, including amendment of section and Note, filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 901.5. Mandatory Maintenance Training.

- (a) The Department shall conduct mandatory annual maintenance training for licensed livestock meat inspectors and processing inspectors. The Department shall provide licensees with training information at least one month before scheduled training, including the location and dates of training classes throughout California.
- (b) Each licensed livestock meat inspector and processing inspector shall be responsible for attending formal annual maintenance training provided by the Department. The training shall cover topics such as sanitation, ante— and post—mortem inspections and dispositions, humane handling and slaughter of livestock, product formulation and restricted ingredient control, pathogen reduction, microbiology, and current topics in meat and poultry processing and inspection.
- (c) Failure of a livestock meat inspector or processing inspector to attend annual maintenance training, as specified in subsection (a) of this section shall be grounds for non-renewal, suspension, or revocation of the livestock meat inspector or processing inspector license.

(d) It is the responsibility of official establishment management and of licensed livestock meat inspectors and processing inspectors to make arrangements in the work schedule to attend annual maintenance training.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961, 18962 and 19014, Food and Agricultural Code. Reference: Sections 18982, 18983, 18990 and 19000, Food and Agricultural Code.

HISTORY

1. New section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 901.6. Animals Killed off Premises.

Livestock that have been killed or bled off the premises of a custom livestock slaughter establishment, or animals that have died other than by slaughter, with the exception of livestock that have died en route and are received with livestock for slaughter, shall not be brought on the premises of a custom slaughter establishment. Livestock that have died en route shall be immediately disposed of in accordance with section 907 of this subchapter and shall not enter edible product areas of the official establishment.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Section 18991, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 933 to new section 901.6, including amendment of section and Note, filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22)

§ 901.7. Presence of Inspector on Premises.

- (a) A livestock meat inspector shall be present on the premises of the livestock slaughter establishment during slaughter and shall supervise sanitary dressing procedures and perform post-mortem inspection of each carcass and part while the viscera is identified with the respective carcasses.
- (b) A processing inspector shall be present on the premises of a meat processing establishment when product is being formulated and when monitoring of weights or temperatures is required.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18991, 19000, 19001 and 19012, Food and Agricultural Code.

.. History

 Renumbering of former section 934 to new section 901.7, including amendment of section and Note, filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 901.8. Inspector Responsibilities.

- (a) Livestock meat inspectors and processing inspectors shall inspect slaughter and processing operations in official establishments to ensure that meat and poultry products are produced in compliance with applicable requirements of Chapter 4 (commencing with section 18650) or Chapter 4.1 (commencing with section 18940) of Part 3, Division 9, of the Food and Agricultural Code, and this subchapter.
- (b) Livestock meat inspectors and processing inspectors shall inspect official establishments to ensure they conduct operations that require state inspection on days and during hours specified on each establishment's current MPI Form 79–038 (Rev. 12/04), Schedule of Operations, unless different days or hours are approved in advance by the Department.
- (c) A processing inspector shall complete, at least once a year, an indepth review, on MPI Form 79–082 (Rev.12/04), In–Depth Review of Cooked Sausage, for each cooked sausage product and an in–depth review, on MPI Form 79–085 (Rev. 12/04), In–Depth Review of Cured, Cooked and Smoked Meats, for each cured, cooked, and smoked meat product produced in the meat processing establishment where the inspector is employed. The in–depth review forms shall be presented, upon completion, to a Department inspector for approval and signature.
- (d) When, during an in–depth review for a product, the processing inspector finds any deviation(s) from the requirements of Chapter 4 (commencing with section 18650) or Chapter 4.1 (commencing with section 18940) of Part 3, Division 9, of the Food and Agricultural Code, this subchapter, and the approved MPI Form 79–080 (Rev. 12/04), Label and Formulation Approval, for the product, the inspector shall place a

California Retained tag on the involved lot of product and immediately contact the Department. A program employee shall determine the disposition of the product and shall require the official establishment to take corrective measures, if necessary, to assure that the product conforms to its standard of identity and is wholesome and unadulterated before it is presented for sale. If the official establishment does not or cannot correct the deviation(s), the product shall be condemned and disposed of in accordance with section 907 of this subchapter.

- (e) The processing inspector shall review all labels and product formulations with the Department inspector before sending them, with a completed MPI Form 79–080 (Rev. 12/04), Label and Formulation Approval, to the Department for approval.
- (f) A processing inspector shall record the temperature of each lot of smoked product on MPI Form 79–086 (Rev. 12/04), Smokehouse Chart, and shall complete all items on a line on the smokehouse chart at least once a month.
- (g) A processing inspector shall notify the Department when the official establishment makes a change in product formulation or in product manufacturing procedures.
- (h) A processing inspector shall inspect the processing of each cured pork or cured beef product produced by the establishment at least once a month, using the following procedure:
- (1) Mark one or more pieces of uncured meat with its weight. This is called the green weight of the product.
- (2) Determine the weight of the cured product before it is cooked/smoked. This is called the pumped weight of the product. Check the pumped weight against the green weight to determine compliance with procedures in the approved MPI Form 79–080 (Rev. 12/04), Label and Formulation Approval, for the product.
- (3) Plant management shall notify the processing inspector of the time the establishment plans to cure or pump product. This is to provide opportunity for the inspector to record the green weight of the meat and the amount of curing solution uptake during processing.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18991, 19000, 19001 and 19012, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 901.9. Custom Livestock Slaughterhouse or Meat Processing Establishment: Approval of Plans, Notice of Approval, and Granting of a License.

- (a) Each applicant for a license to operate a custom livestock slaughterhouse or a meat processing establishment shall submit copies of plans, in triplicate, drawn to scale, not necessarily blueprints, and with specifications detailing the finish of all walls, floors, ceilings, doors, and door casings; ceiling heights; dimensions of doorways; diameter of floor drains and principal drainage lines; and slope of window sills. The plans shall show the locations of features such as walls, windows, doorways, principal pieces of equipment, floor drains, principal drainage lines, lavatories, hand washing basins, hose connections for cleanup purposes, and conveyor rails. The plans shall indicate the use of each room of the establishment. There shall also be a plot plan, drawn to scale, showing features such as the limits of the establishment's premises, locations in outline of buildings on the premises, cardinal points of the compass, locations of wells, locations of septic tanks and lagoons, and roadways and railroads serving the establishment.
- (b) Each applicant for a license to operate a custom livestock slaughterhouse or a meat processing establishment shall submit, along with the plans described in subsection (a) of this section, a completed MPI Form 79–039 (Est. 4/05), General Facility Notes. The applicant shall also submit a completed MPI Form 79–002A (Rev. 12/04), Custom Livestock Slaughter or Meat Processing Plant License Application. Ap-

plicants for licensure and renewal shall submit the fees required by sections 19010 and 19011 of the Food and Agricultural Code.

- (c) Each applicant for a license to operate a custom livestock slaughterhouse or a meat processing establishment shall submit official results of tests for potability of the establishment's water supply provided by the California Department of Health Services, from an agency or laboratory approved by the California Department of Health Services, or laboratory of the Department.
- (d) Persons intending new construction or major reconstruction may request information about plans, construction, and equipment from the Branch before submitting plans. Upon request, the Branch will provide the Meat Processing Establishment Plan Guidelines (Rev. 9/04), the Custom Livestock Slaughterhouse Plan Guidelines (Rev. 9/04), the Meat Processing Establishment Construction and Equipment Guidelines (Rev. 9/04), or the Custom Livestock Slaughterhouse Construction Guidelines (Rev. 9/04).
- (e) The Department shall provide a written notice to each applicant granted approval and licensure, specifying the establishment to which the same applies.
- (f) Each applicant shall provide written acknowledgement, such as a use permit, from the local zoning authority, that shows the zoning authority is aware of and approves the operation of a custom livestock slaughterhouse or a meat processing establishment at the proposed location

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961, 19014, 19010 and 19011, Food and Agricultural Code. Reference: Sections 18991, 19000, 19001 and 19012, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 901.10. Official Numbers; Separation from Non–licensed Plants.

- (a) An official number shall be assigned to each establishment granted a license by the Department. Such number shall be used to identify all products prepared in the establishment. More than one number shall not be assigned to an official establishment.
- (b) Each official establishment shall be physically separate and distinct from any non-licensed establishment in which any product is handled, and from any other non-licensed establishment at the direction of the Department.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18970, 18971, 19010, 19014 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 901.11. Schedule of Operations

- (a) Each licensed custom livestock slaughterhouse and each licensed meat processing establishment shall complete and submit to the Department an MPI Form 79–038 (Rev. 12/04), Schedule of Operations, specifying the days and weeks of the month and the hours of the day that the plant operates.
- (b) Each licensed custom livestock slaughterhouse and each licensed meat processing establishment shall complete and submit to the Department a new MPI Form 79–038 (Rev. 12/04), Schedule of Operations, whenever the establishment makes a permanent change in the frequency or times of its operations.
- (c) If a licensed custom livestock slaughterhouse or a licensed meat processing establishment plans to temporarily operate on days and/or at times other than those listed on its current MPI Form 79–038, the establishment management shall contact the area supervisor by telephone at least 24 hours in advance of such unscheduled operations to inform him of its intent.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18738, 18971, 18973, 18976, 19012, 19014 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 3. Facilities for Inspection and Sanitation

§ 902. General Requirements.

Each official establishment must be operated and maintained in a manner to prevent the creation of insanitary conditions and to ensure that product is not adulterated. When the establishment is not operating during scheduled hours of operation, as indicated on MPI Form 79–038 (Rev. 12/04), Schedule of Operations, all plant equipment and facilities shall be clean and sanitary.

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014. Food and Agricultural Code. Reference: Sections 18725, 18732, 18754, 18948, 18951, 18952, 18971, 18973, 19011 and 19017, Food and Agricultural Code.

HISTORY

1. New article 3 (sections 902–902.14) and repealer and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 902.1. Facilities for Inspection — Program Employees.

Office space, including desk space, a chair, file space, light, and heat shall be provided by official establishments, rent free, for the use of the inspector and other program employees while conducting official business.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 18961 and 19014, Food and Agricultural Code. Reference: Sections 18728 and 18732, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.2. Other Facilities and Conditions Provided by Official Establishments.

- (a) When required by the area supervisor, the following facilities and conditions, and such others as may be found to be essential to the conduct of inspection and maintenance of sanitary conditions, shall be provided by each official establishment.
- (1) Pens, equipment, and assistants for conducting ante-mortem inspection and for separating, marking, and holding livestock marked "California Suspect" or "California Condemned" apart from passed livestock. Pens, alleys, and runways shall be paved, drained, and supplied with hose connections for cleanup purposes.
- (2) Natural or artificial lighting or a combination of natural and artificial lighting in order to conduct inspections. The following measurements shall be taken at a height of 30 inches off the floor:
 - (A) At least 50 foot candles at post-mortem inspection stations.
- (B) At least 30 foot candles at ante-mortem inspection stations and in processing areas.
 - (C) At least 10 foot candles in all other areas of the establishment.
- (3) Racks, receptacles, or other suitable devices for retaining parts such as the head, tongue, tail, thymus gland, and viscera, and all parts and blood to be used in the preparation of meat food products or medical products, until after the post–mortem examination is completed, in order that they may be identified in case of condemnation of the carcass.
- (4) Equipment, trucks, and receptacles for the handling of viscera of slaughtered animals to prevent contact with the floor.
- (5) Tables, benches, and other equipment on which inspection is to be performed, of such design, material, and construction as to enable inspectors to conduct their inspections in an efficient and sanitary manner.
- (6) Watertight trucks or receptacles for holding and handling diseased carcasses and parts, so constructed as to be readily cleaned; such trucks or receptacles shall have the phrase "CONDEMNED" in letters not less than 2 inches high, and, when required by the area supervisor, shall be equipped with facilities for locking or sealing.
- (7) Liquid soap, cleansers, sanitizers, and hot water for cleansing and disinfecting hands and for sterilizing all implements used in dressing diseased carcasses, floors, and such other articles and places as may be con-

taminated by diseased carcasses or otherwise. Custom livestock slaughterhouses shall have a container of hot water near the eviscerating area that is maintained during all scheduled hours of operation at a temperature of 180°F or greater. This container of hot water shall be large enough to enable immersion of the blade of each knife, saw, or other similar implement used in skinning, evisceration, and splitting of livestock carcasses

- (8) Retention rooms, cages, or other compartments, and receptacles in which carcasses and product may be held for further inspection, shall be in such number and in such locations as the needs of inspection in the establishment require; shall be equipped for secure locking or sealing and shall be held under locks or official seals furnished by the Department; the keys of such locks shall not leave the custody of program employees. Every such room, compartment, or receptacle shall be marked with the phrase "RETAINED" in letters not less than 2 inches high; rooms or compartments for these purposes shall be locked or sealed and kept clean, including sanitary disposal of floor liquids; establishment employees shall not enter any retention rooms or compartments or open any retention receptacles unless authorized by program employees.
- (9) Facilities, equipment, and denaturing materials for the disposal of condemned articles in accordance with the regulations in this subchapter.
- (10) Docks and receiving rooms shall be designated by the operator of the official establishment and approved by the area supervisor for the receipt and inspection of all products.
- (b) In addition to any facilities required to accomplish sanitary dressing procedures, the following are required:
- (1) A minimum of 50 foot candles of shadow–free lighting at the inspection surfaces of the head, viscera, and carcass.
- (2) A hand wash lavatory (other than one which is hand operated) located adjacent to the inspector's work area and furnished with liquid soap, disposable single—use towels, a waste receptacle, and hot and cold-running water.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18728 and 18732, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.3. Inspectors.

Inspectors shall furnish their own work clothing and implements for conducting inspection and shall maintain their implements in sanitary condition as prescribed by section 902.5 of this article.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: 18661, 18726, 18736, 18941, 18942, 18943, 18952, 18973, 18991 and 19000, Food and Agricultural Code.

HISTORY

1. New section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 902.4. Official Establishment Grounds and Facilities.

Official establishment grounds and facilities shall be constructed and maintained in accordance with 9 CFR section 416.2 (2006).

Note: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18732, 18754, 18948, 18951, 18952, 18971, 18973, 19011 and 19017, Food and Agricultural Code; and 9 CFR section 416.2 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.5. Equipment and Utensils.

Equipment and utensils in official establishments shall be constructed and maintained in accordance with 9 CFR section 416.3 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18732, 18754, 18948, 18951, 18952, 18971, 18973, 19011 and 19017, Food and Agricultural Code; and 9 CFR section 416.3 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.6. Sanitary Operations.

Operations in official establishments shall be conducted in a sanitary manner in accordance with 9 CFR section 416.4 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18732, 18754,

18948, 18951, 18952, 18971, 18973, 19011 and 19017, Food and Agricultural Code; and 9 CFR section 416.4 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.7. Employee Hygiene.

Employee hygiene in official establishments shall be maintained in accordance with 9 CFR section 416.5 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18732, 18754, 18948, 18951, 18952, 18971, 18973, 19011 and 19017, Food and Agricultural Code; and 9 CFR section 416.5 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.8. Tagging Insanitary Equipment, Utensils, Rooms, or Compartments.

- (a) Red and green "California Rejected" tags are utilized by inspectors and program employees for rejecting equipment, utensils, rooms, or compartments or for retaining a product.
- (b) When an inspector finds that any equipment, utensil, room, or compartment at an official establishment is insanitary, or that its use could cause adulteration of product, the inspector will attach a red or green "California Rejected" tag as appropriate.
- (c) Equipment, utensils, rooms, or compartments so tagged shall not be used until made acceptable and released for use upon reinspection by an inspector.
- (d) Only a program employee may remove a red "California Rejected" tag. Livestock meat inspectors, processing inspectors, and program employees may remove a green "California Rejected" tag.

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18732, 18754, 18948, 18951, 18952, 18971, 18973, 18975, 19011 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.9. Development of Sanitation Standard Operating Procedures.

- (a) On or before January 1, 2010, each official establishment shall develop, implement, and thereafter maintain written sanitation standard operating procedures (Sanitation SOP's) in accordance with the requirements of this article.
- (b) Sanitation SOP's shall be developed in accordance with 9 CFR section 416.12 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18754, 18948, 18951, 18952, 18971 and 19017, Food and Agricultural Code; and 9 CFR section 416.12 (2006).

HISTORY

- 1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).
- 2. Amendment of subsection (a) filed 7–25–2008; operative 8–24–2008 (Register 2008, No. 30).

§ 902.10. Implementation of Sanitation SOP's.

Each official establishment shall implement Sanitation SOP's in accordance with 9 CFR section 416.13 (2006).

Note: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18754, 18948, 18951, 18952, 18971 and 19017, Food and Agricultural Code; and 9 CFR section 416.13 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.11. Maintenance of Sanitation SOP's.

Each official establishment shall maintain its Sanitation SOP's in accordance with 9 CFR section 416.14 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18754, 18948, 18951, 18952, 18971 and 19017, Food and Agricultural Code; and 9 CFR section 416.14 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.12. Corrective Actions.

Each official establishment shall take corrective actions in accordance with 9 CFR section 416.15 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18754, 18948, 18951, 18952, 18971 and 19017, Food and Agricultural Code; and 9 CFR section 416.15 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.13. Records Retention.

Each official establishment shall keep and retain records in accordance with 9 CFR section 416.16 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18727, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18754, 18948, 18951, 18952, 18971 and 19017, Food and Agricultural Code; and 9 CFR section 416.16 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 902.14. Department Verification.

The Department shall verify the adequacy and effectiveness of each official establishment's Sanitation SOP's in accordance with 9 CFR section 416.17 (2006).

NOTE: Authority cited: Sections 407, 18693, 18726, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18754, 18948, 18951, 18952, 18971 and 19017, Food and Agricultural Code; and 9 CFR section 416.17 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 4. Ante-Mortem Inspection

§ 903. Ante-Mortem Inspection in Pens of Official Establishments.

- (a) All livestock offered for slaughter in an official establishment shall be inspected on the day of and before slaughter unless prior arrangements acceptable to the Department have been made in specific cases for such inspection to be made on a different day before slaughter.
- (b) Ante-mortem inspection shall be made in pens on the premises of the establishment where the livestock are offered for slaughter before the livestock shall be allowed to enter into any section of the establishment where they are to be slaughtered or dressed or in which edible products are handled.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code.

c. History

1. New article 4 (sections 903–903.17) and repealer and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 903.1. Livestock Suspected of Being Diseased or Affected with Certain Conditions; Identifying Suspects; Disposition on Post–Mortem Inspection or Otherwise.

(a) Livestock suspected of being diseased or affected with certain conditions shall be handled in accordance with 9 CFR section 309.2 (2006). References in 9 CFR section 309.2 (2006) shall refer to the corresponding sections of this subchapter as follows:

9 CFR section 309.2 (2006)	Subchapter 1 of Chapter 4, Division 2 of Title 3 of the California Code of Regulations
Section 309.18	Section 903.17
Section 311.1	Section 905
Section 311.2	Section 905.1
Section 311.5	Section 905.3
Section 311.32	Section 905.29

(b) Nonambulatory livestock shall be identified and tagged by the inspector as California Suspect, immediately stunned and bled, and disposed of as provided in section 907 of this subchapter, unless they are required to be classed as condemned in accordance with 9 CFR section 309.3 (2006).

Page 76.6 Register 2008, No. 30; 7-25-2008

(c) No Custom Livestock Slaughterhouse shall receive nonambulatory livestock.

Note: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR sections 309.2, 309.3, 309.18, 311.1, 311.2, 311.5 and 311.32.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.2. Dead, Dying, Disabled, or Diseased Livestock.

Dead, dying, disabled, or diseased livestock shall be handled in accordance with 9 CFR section 309.3 (2006).

Note: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.3 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.3. Livestock Showing Symptoms of Certain Metabolic, Toxic, Nervous, or Circulatory Disturbances, Nutritional Imbalances, or Infectious or Parasitic Diseases.

Livestock showing symptoms of certain metabolic, toxic, nervous, or circulatory disturbances, nutritional imbalances, or infectious or parasitic diseases shall be handled in accordance with 9 CFR section 309.4 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.4 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.4. Swine; Disposal Due to Hog Cholera.

Swine infected with or exposed to hog cholera shall be handled in accordance with 9 CFR section 309.5 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.5 (2006).

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.5. Epithelioma of the Eye.

Any animal found on ante-mortem inspection to be affected with epithelioma of the eye shall be handled in accordance with 9 CFR section 309.6 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.6 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.6. Livestock Affected with Anthrax; Cleaning and Disinfection of Infected Livestock Pens and Driveways.

Livestock found on ante-mortem inspection to be affected with anthrax shall be handled in accordance with 9 CFR section 309.7 (2006). Infected livestock pens and driveways shall be cleaned and disinfected in accordance with 9 CFR section 309.7 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.7 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.7. Cattle Affected with Anasarca and Generalized Edema.

Cattle found on ante-mortem inspection to be affected with anasarca shall be handled in accordance with 9 CFR section 309.8 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.8 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.8. Swine Ervsipelas.

Swine found on ante-mortem inspection to be affected with acute swine erysipelas shall be handled in accordance with 9 CFR section 309.9 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.9 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.9. Onset of Parturition.

Livestock showing signs of the onset of parturition on ante-mortem inspection shall be handled in accordance with 9 CFR section 309.10 (2006)

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.10 (2006). HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.10. Vaccine Livestock.

Vaccine livestock shall be handled in accordance with 9 CFR section 309.11 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.11 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.11. Emergency Slaughter.

Emergency slaughter shall be conducted in accordance with 9 CFR section 309.12 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.12 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.12. Disposition of Condemned Livestock.

Condemned livestock shall be disposed of in accordance with 9 CFR section 309.13 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.13 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.13. Brucellosis-Reactor Goats.

Brucellosis—reactor goats shall be handled in accordance with 9 CFR section 309.14 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.14 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.14. Vesicular Diseases.

Livestock found on ante-mortem inspection to be affected with a vesicular disease shall be handled in accordance with 9 CFR section 309.15 (2006)

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 309.15 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.15. Livestock Suspected of Biological Residues.

(a) Except as provided by subsection (b) of this section, livestock suspected of having been treated with or exposed to any substance that may impart a biological residue that would make the edible tissues unfit for human food or otherwise adulterated shall be handled in compliance with the provisions of this paragraph. They shall be identified at official establishments as California Condemned by an inspector. These livestock may be held under the custody of a program employee or other official

designated by the Department until metabolic processes have reduced the residue sufficiently to make the tissues fit for human food and otherwise not adulterated. When the required time has elapsed, the livestock, if returned for slaughter, must be re–examined on ante–mortem inspection. To aid in determining the amount of residue present in the tissues, officials of the program may permit the slaughter of any such livestock for collecting tissues for analysis for the residue. Such analysis may include the use of in–plant screening procedures designed to detect the presence of antimicrobial residues in any species of livestock.

- (b) All carcasses and edible organs and other parts thereof, in which are found any biological residues that render such articles adulterated, shall be marked and tagged by an inspector as California Condemned and disposed of in accordance with Article 8 of this subchapter.
- (c) The names of all persons who sold or consigned each swine to the establishment shall be made available by the establishment to any program employee or other authorized employee of the Department upon that employee's request and presentation of his official credentials. Swine identification, by means approved by the Animal and Plant Health Inspection Service, USDA, shall be maintained throughout post–mortem inspection, in accordance with 9 CFR section 310.23 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code; and 9 CFR section 310.23 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.16. Livestock Used For Research.

No livestock used in any research investigation involving an experimental biological product, drug, or chemical shall be eligible for slaughter at an official establishment.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 903.17. Official Marks and Devices for Purposes of Ante-Mortem Inspection.

- (a) The devices described as follows shall be the official devices for identification of livestock required to be identified as California Suspect or California Condemned as provided in this article:
- (1) All livestock required by this article to be identified as California Suspect shall be tagged by the inspector with a serially numbered metal ear tag bearing the term California Suspect, except that cattle affected with epithelioma of the eye, actinomycosis, or actinobacillosis to such an extent that the lesions would be readily detected on post–mortem inspection, need not be individually tagged on ante–mortem inspection with the California Suspect tag, provided that such cattle are segregated and otherwise handled as California Suspect.
- (2) California Suspect swine must include the use of tattoos specified by the inspector to maintain the identity of the animals through dehairing equipment when such equipment is used.
- (3) All livestock required by this Article to be identified as California Condemned shall be tagged by the inspector with a serially numbered metal ear tag bearing the term California Condemned.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18721, 18722, 18943, 18945, 18949, 18972 and 18991, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 5. Post-Mortem Inspection

§ 904. Extent and Time of Post-Mortem Inspection.

Post–mortem inspection of livestock shall be handled in accordance with 9 CFR section 310.1(a) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18661, 18669, 18721, 18736, 18941,

18942, 18943, 18945, 18949, 18972, 18991 and 19012, Food and Agricultural Code; and 9 CFR section 310.1(2006).

HISTORY

- 1. Amendment filed 8-4-72; effective thirtieth day thereafter (Register 72, No. 32).
- 2. Amendment of subsections (a) and (c) filed 6-3-85; effective thirtieth day thereafter (Register 85, No. 23).
- 3. New article 5 (sections 904–904.20) and repealer and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 904.1. Identification of Carcass with Certain Severed Parts Thereof and with Animal From Which Derived

Identification of livestock carcasses and parts shall be in accordance with 9 CFR section 310.2 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18661, 18669, 18721, 18722, 18736, 18941, 18942, 18943, 18945, 18949, 18972, 18991 and 19012, Food and Agricultural Code; and 9 CFR section 310.2.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.2. Carcasses and Parts in Certain Instances to be Retained.

Carcasses and parts shall be retained in accordance with 9 CFR section 310.3 (2006).

Note: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18661, 18669, 18721, 18722, 18736, 18941, 18942, 18943, 18945, 18949, 18972, 18991 and 19012, Food and Agricultural Code; and 9 CFR section 310.3 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.3. Retained Carcasses and Parts; Identification and Tagging.

Retained carcasses and parts shall be identified and tagged in accordance with 9 CFR section 310.4 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18671, 18721, 18722, 18736, 18941 and 18972, Food and Agricultural Code; and 9 CFR section 310.4 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.4. Condemned Carcasses and Parts to be Marked; Tanking; Separation.

Condemned carcasses and parts shall be handled in accordance with 9 CFR section 310.5 (2006).

Note: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18661, 18669, 18721, 18722, 18728, 18736, 18941, 18942, 18943, 18972, 18991 and 19012, Food and Agricultural Code; and 9 CFR section 310.5 (2006).

HISTORY

1. New section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 904.5. Removal of Spermatic Cords, Pizzles, and Preputial Diverticuli.

Spermatic cords, pizzles, and preputial diverticuli shall be handled in accordance with 9 CFR section 310.7 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18726 and 18972, Food and Agricultural Code; and 9 CFR section 310.7 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.6. Passing and Marking of Carcasses and Parts.

Carcasses and parts found to be sound, healthful, wholesome, and otherwise not adulterated shall be passed and marked as provided in Article 9 of this subchapter. In all cases where carcasses showing localized lesions are passed for food and California Retained tags are attached to the carcasses, the affected tissues shall be removed and condemned before the tags are removed. Red California Retained tags may be removed only by program employees.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960 and 18961, Food and Agricultural Code. Reference: Sections 18652, 18655, 18661, 18721, 18722,

18724, 18736, 18847, 18941, 18972, 18973, 18991 and 19012, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.7. Anthrax; Carcasses Not to be Eviscerated; Disposition of Affected Carcasses; Hides, Hoofs, Horns, Hair, Viscera and Contents, and Fat; Handling of Blood and Scalding Vat Water; General Cleanup and Disinfection.

Livestock carcasses found to be affected with anthrax shall be handled in accordance with 9 CFR section 310.9 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18722, 18726, 18753, 18754, 18971, 18972, 18973, 19011, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 310.9 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.8. Carcasses with Skin or Hide On; Cleaning Before Evisceration; Removal of Larvae of Hypodermae, External Parasites and Other Pathological Skin Conditions.

Carcasses with skin or hide on shall be handled in accordance with 9 CFR section 310.10 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18726, 18753, 18971, 18972, 18973, 19011 and 19017, Food and Agricultural Code; and 9 CFR section 310.10 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.9. Cleaning of Hog Carcasses Before Incising.

The cleaning of hog carcasses before incising shall be handled in accordance with 9 CFR section 310.11 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18726, 18753, 18971, 18972, 18973, 19011 and 19017, Food and Agricultural Code; and 9 CFR section 310.11 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.10. Abdominal and Thoracic Viscera to be Removed; Sternum to be Split.

The abdominal and thoracic viscera shall be removed at the time of slaughter in order to allow proper inspection. The sternum shall be split to permit visual inspection of the thoracic cavity if such inspection is determined necessary by an inspector.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18726, 18753, 18971, 18972, 18973, 19011 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.11. Inflating Carcasses or Parts.

Establishments shall not inflate carcasses or parts of carcasses with air, except in accordance with 9 CFR section 310.13(a)(2) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18725, 18726, 18752, 18753, 18754, 18971, 18972, 18973, 19011 and 19017, Food and Agricultural Code; and 9 CFR section 310.13 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.12. Handling of Bruised Parts.

When only a portion of a carcass is to be condemned on account of slight bruises, either the bruised portion shall be removed immediately and disposed of in accordance with Article 8 of this subchapter, or the carcass shall be promptly placed in a retaining room and kept until chilled and the bruised portion shall then be removed and disposed of in accordance with Article 8 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18753, 18950, 18972 and 19012, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.13. Disposition of Lungs.

Lungs found to be affected with disease or pathology and lungs found to be adulterated with scald tank water or chemical or biological residue shall be condemned and identified as California Inspected and Condemned. Condemned lungs may not be saved for pet food or other nonhuman food purposes. Condemned lungs shall be maintained under inspectional control and disposed of in accordance with Article 8 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18728, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.14. Inspection of Mammary Glands.

Mammary glands shall be handled in accordance with 9 CFR section 310.17 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18728, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 310.17 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.15. Contamination of Carcasses, Organs, or Other Parts.

- (a) Carcasses, organs, and other parts shall be handled in a sanitary manner to prevent contamination with fecal material, urine, bile, hair, dirt, or foreign matter; however, if contamination occurs, it shall be promptly removed in a manner satisfactory to the inspector.
- (b) Brains, cheek meat, and head trimmings from animals stunned by lead, sponge iron, or frangible bullets shall not be saved for use as human food but shall be disposed of in accordance with Article 8 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.16. Inspection of Kidneys.

An employee of the establishment shall open the kidney capsule and expose the kidneys of all livestock at the time of slaughter for the purpose of examination by an inspector.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.17. Saving of Blood from Livestock as an Edible Product.

Official establishments that save blood from livestock as an edible product shall do so in accordance with 9 CFR section 310.20 (2006). NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18751, 18753, 18974, 18756, 18971–18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 310.20 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.18. Identification of Carcasses and Parts of Swine.

Identification of carcasses and parts of swine shall be in accordance with 9 CFR section 310.23 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18751, 18752, 18753, 18754, 18872, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 310.23 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 904.19. Specified Risk Materials from Cattle; Handling and Disposition.

Specified risk materials shall be handled in accordance with 9 CFR section 310.22 (2006). Reference to sections 314.1 and 314.3 in section 310.22 shall refer to Article 8 of this subchapter.

Note: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18751, 18752, 18753, 18754, 18872, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 310.22 (2006).

HISTORY

1. New section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 904.20. Transferring Caul or Other Fat.

Transferring the caul or other fat from a fat to a lean carcass is prohibited.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Section 18758, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 6. Disposal of Diseased or Otherwise Adulterated Carcasses and Parts

§ 905. Disposal of Diseased or Otherwise Adulterated Carcasses and Parts; General.

(a) Carcasses or parts of carcasses of all animals slaughtered at official establishments and found at the time of slaughter to be affected with any of the diseases or conditions named in this article shall be disposed of according to the section pertaining to the disease or condition: Provided that no product shall be passed for human food under any such section unless it is found to be otherwise not adulterated.

(b) In cases of doubt as to a condition, a disease, or the cause of a condition, or to confirm a diagnosis, representative specimens of the affected tissues, properly prepared and packaged, shall, upon approval by a program employee, be sent for examination to the California Animal Health and Food Safety System Laboratory or to a laboratory approved by the Department.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18669, 18721, 18722, 18724, 18728, 18751, 18752, 18753, 18754, 18945, 18949, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New article 6 (sections 905–905.36) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 905.1. Tuberculosis.

- (a) Carcasses of cattle may be passed for human food only when the carcass of an animal not identified as a reactor to a tuberculin test administered by a USDA Animal and Plant Health Inspection Service veterinarian, a State of California veterinarian, or a veterinarian accredited by the USDA or State of California:
- (1) Is found free of tuberculosis lesions during post-mortem inspection and:
- (2) Such testing is conducted in the tuberculosis eradication program of the Animal and Plant Health Inspection Service, USDA.
- (b) Swine carcasses found free of tuberculosis lesions during post—mortem inspection may be passed for human food. When tuberculosis lesions in any swine carcass are localized and confined to one primary seat of infection, such as the cervical lymph nodes, the mesenteric lymph nodes, or the mediastinal lymph nodes, the unaffected portion of the car-

cass may be passed for human food after the affected organ or other part is condemned.

(c) Carcasses of sheep, goats, and fallow deer found to be affected with tuberculosis lesions during post–mortem inspection shall be condemned and disposed of in accordance with Article 8 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.2. Hog Cholera.

Swine suspected or found to be affected with hog cholera shall be handled according to 9 CFR section 311.3 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.3 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.3. Swine Erysipelas.

Carcasses affected with swine erysipelas shall be handled in accordance with 9 CFR section 311.5 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.5 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.4. Diamond-Skin Disease.

Carcasses of hogs affected with diamond–skin disease shall be handled in accordance with 9 CFR section 311.6 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.6 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.5. Arthritis.

Carcasses affected with arthritis shall be handled in accordance with 9 CFR section 311.7 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.7 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.6. Cattle Carcasses Affected with Anasarca or Generalized Edema.

Cattle carcasses affected with anasarca or generalized edema shall be handled in accordance with 9 CFR section 311.8 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311 8 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.7. Actinomycosis and Actinobacillosis.

Livestock affected with actinomycosis and actinobacillosis shall be handled in accordance with 9 CFR section 311.9 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.9 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.8. Anaplasmosis, Anthrax, Babesiosis, Bacillary Hemoglobinuria in Cattle, Blackleg, Bluetongue, Hemorrhagic Septicemia, Icterohematuria in Sheep, Infectious Bovine Rhinotracheitis, Leptospirosis, Malignant Epizootic Catarrh, Strangles, Purpura Hemorrhagica, Azoturia, Infectious Equine Encephalomyelitis, Toxic Encephalomyelitis (Forage Poisoning), Infectious Anemia (Swamp Fever), Dourine, Acute Influenza, Generalized Osteoporosis, Glanders (Farcy), Acute Inflammatory Lameness, Extensive Fistula, and Unhealed Vaccine Lesions.

Carcasses of livestock affected with or showing lesions of anaplasmosis, anthrax, babesiosis, bacillary hemoglobinuria in cattle, blackleg, bluetongue, hemorrhagic septicemia, icterohematuria in sheep, infectious bovine rhinotracheitis, leptospirosis, malignant epizootic catarrh, strangles, purpura hemorrhagica, azoturia, infectious equine encephalomyelitis, toxic encephalomyelitis (forage poisoning), infectious anemia (swamp fever), dourine, acute influenza, generalized osteoporosis, glanders (farcy), acute inflammatory lameness, extensive fistula, and unhealed vaccine lesions shall be handled in accordance with 9 CFR section 311.10 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.10 (2006).

History

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.9. Neoplasms.

Carcasses, individual organs, or other parts of a carcass affected with a neoplasm shall be handled in accordance with 9 CFR section 311.11 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.11 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.10. Epithelioma of the Eye.

Carcasses of animals affected with epithelioma of the eye shall be handled in accordance with 9 CFR section 311.12 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.12 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.11. Pigmentary Conditions; Melanosis, Xanthosis, Ochronosis, (etc.).

- (a) Except as provided in section 905.17, carcasses of livestock showing generalized pigmentary deposits shall be condemned.
- (b) The affected parts of carcasses showing localized pigmentary deposits of such character as to be unwholesome or otherwise adulterated shall be removed and condemned.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.12. Abrasions, Bruises, Abscesses, Pus (etc.).

Abrasions, bruises, abscesses, pus, etc., on any organ or other part of a carcass shall be handled in accordance with 9 CFR section 311.14 (2006)

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972,

18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.14 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.13. Brucellosis.

Carcasses affected with brucellosis shall be handled in accordance with 9 CFR section 311.15 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.15 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.14. Carcasses So Infected That Consumption of the Meat May Cause Food Poisoning.

Carcasses of livestock so infected that consumption of the meat may cause food poisoning and equipment contaminated by contact with them shall be handled in accordance with 9 CFR section 311.16 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.16 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.15. Necrobacillosis, Pyemia, and Septicemia.

Carcasses of livestock affected with necrobacillosis, pyemia, or septicemia shall be handled in accordance with 9 CFR section 311.17 (2006). NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.17 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.16. Caseous Lymphadenitis.

- (a) As used in this section, the term "thin" does not apply to a carcass that is anemic or emaciated; and the term "lesions" refers to lesions of caseous lymphadenitis.
- (b) Any carcass showing well-marked lesions in the viscera and the skeletal lymph nodes, or a thin carcass showing extensive lesions in any part shall be condemned.
- (c) A thin carcass showing only slight lesions in the skeletal lymph nodes and in the viscera may be passed for human food.
- (d) A well-nourished carcass showing well-marked lesions in the viscera and with only slight lesions elsewhere or showing well-marked lesions confined to the skeletal lymph nodes with only slight lesions elsewhere may be passed for human food.
- (e) All affected organs and nodes of carcasses passed for human food shall be removed and condemned.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

§ 905.20. Hogs Affected with Urticaria, Tinea Tonsurans, Demodex Folliculorum, or Erythema.

Carcasses of hogs affected with urticaria (nettle rash), tinea tonsurans, demodex folliculorum, or erythema shall be handled in accordance with 9 CFR section 311.22 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.22 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.21. Tapeworm Cysts (Cysticercus Bovis) in Cattle.

Carcasses of cattle displaying lesions of Cysticercus bovis shall be condemned.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.22. Hogs Affected with Tapeworm Cysts.

Carcasses of hogs affected with tapeworm cysts (Cysticercus cellulosae) shall be condemned.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.23. Parasites Not Transmissible to Man; Tapeworm Cysts in Sheep; Hydatid Cysts; Flukes; Gid Bladder–Worms.

- (a) In the disposal of carcasses, edible organs, and other parts of carcasses showing evidence of infestation with parasites not transmissible to man, the following shall apply except as otherwise provided in this section:
- (1) If the lesions are localized in such manner and are of such character that the parasites and the lesions caused by them can be completely removed, the nonaffected portion of the carcass, organ, or other part of the carcass may be passed for human food after the removal and condemnation of the affected portions. If an organ or other part of a carcass shows numerous lesions caused by parasites, or if the character of the infestation is such that complete extirpation of the parasitic infestation or invasion renders the part in any way unfit for human food, the affected part shall be condemned.
- (2) If parasites are found to be distributed in a carcass in such a manner or to be of such character that their removal and the removal of the lesions caused by them is impracticable, no part of the carcass shall be passed for human food.
- (b) In the case of sheep carcasses affected with tapeworm cysts (Cysticercus ovis, so-called sheep measles, not transmissible to man), such carcasses may be passed for human food after the removal and condemnation of the affected portions. If, upon the final inspection of sheep carcasses retained on account of measles, the total number of cysts found embedded in muscular tissue, or in immediate relation with muscular tissue, excluding the heart, exceeds five, the entire carcass shall be condemned.

- (c) Carcasses found infested with gid bladder-worms (Coenurus cerebralis, Multiceps multiceps) may be passed for human food after condemnation of the affected organ (brain or spinal cord).
- (d) Organs or other parts of carcasses infested with hydatid cysts (echinococus) shall be condemned.
- (e) Livers infested with flukes or fringed tapeworms shall be condemned.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

§ 905.27. Livestock Suffocated and Hogs Scalded Alive.

Livestock suffocated and hogs scalded alive shall be handled in accordance with 9 CFR section 311.30 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012, 19017 and 19501, Food and Agricultural Code; and 9 CFR section 311.30 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.28. Livers Affected with Carotenosis; Livers Designated as "Telangiectatic," "Sawdust," or "Spotted."

Livestock livers affected with carotenosis and livestock livers designated as "telangiectatic," "sawdust," or "spotted" shall be handled in accordance with 9 CFR section 311.31(a) and (b) (2006).

NoTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.31 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.29. Vesicular Diseases.

- (a) Any carcass affected with vesicular disease shall be condemned if the condition is acute and if the extent of the condition is such that it affects the entire carcass or there is evidence of absorption or secondary change.
- (b) Any carcass affected with vesicular disease to a lesser extent than as described in subsection (a) of this section may be passed for human

food after removal and condemnation of the affected parts, if the carcass is otherwise healthy.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.30. Listeriosis.

Carcasses of livestock identified as California Suspects because of a history of listeriosis shall be passed for human food after condemnation of the head if the carcass is otherwise normal.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

§ 905.31. Anemia.

Carcasses of livestock affected with anemia shall be handled in accordance with 9 CFR section 311.34 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.34. (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.32. Muscular Inflammation, Degeneration, or Infiltration.

Livestock carcasses affected with muscular inflammation, degeneration, or infiltration shall be handled in accordance with 9 CFR section 311.35(a) and (b) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.35 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.33. Coccidioidal Granuloma.

Carcasses which are affected with coccidioidal granuloma shall be handled in accordance with 9 CFR section 311.36 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.36 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.34. Odors; Foreign and Urine.

Livestock carcasses that have a medicinal, chemical, or other foreign substance or urine odor shall be handled in accordance with 9 CFR section 311.37 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.37 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.35. Meat and Meat Byproducts from Livestock That Have Been Exposed to Radiation.

Meat and meat byproducts from livestock that have been exposed to radiation shall be handled in accordance with 9 CFR section 311.38 (2006.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18753, 19757, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.38 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 905.36. Biological Residues.

The presence of biological residues in carcasses shall be handled in accordance with 9 CFR section 311.39 (2006).

NoTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18751, 18752, 18753, 18972, 18973, 18991, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 311.39 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 7. Humane Slaughter of Livestock

§ 906. Humane Handling and Slaughter of Livestock.

Livestock shall be humanely handled and slaughtered in accordance with 9 CFR Part 313 section 313.1 et seq., (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18970, 18973, 18991, 19011 and 19017, Food and Agricultural Code; and 9 CFR Part 313 (2006).

HISTORY

1. New article 7 (sections 906–906.1) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 906.1. Safe and Humane Handling and Transportation of Fallow Deer to Custom Livestock Slaughter Establishments.

- (a) The following are general provisions for the safe and humane handling and transportation of fallow deer:
- (1) Deer shall be handled humanely and quietly, with care and patience.
- (2) Persons handling or transporting deer shall be knowledgeable about deer behavior and welfare and shall comply with these regulations.
- (3) It is recommended but not required that groups of deer intended for shipment be allowed to establish social relationships before loading.
- (4) It is recommended but not required that transportation of deer be by the most direct and appropriate route from point of origin to final destination and be completed without delay.
- (5) All rooms, compartments, alleyways, ramps, chutes and doors used for transporting, moving, and holding deer shall be free from dangerous projections, such as nails and bolts, and sharp edges that might cause pain and/or injury.
- (6) All rooms, pens, compartments, alleyways, ramps, chutes and doors used for transporting, moving, and holding deer shall be constructed in a way that prevents deer from jumping out of the area.
- (7) All rooms, vehicle compartments, pens, alleyways, ramps and chutes used for transporting, moving, and holding deer shall have secure footing and shall be properly drained.
- (8) If deer are held longer than one hour, clean bedding material shall be provided in deer areas in transportation vehicles and in holding pens. Deer held in excess of 24 hours shall be provided new or additional clean bedding.
- (9) There shall be no gaps between floors and walls, ramps and vehicles, gates and walls or other such objects which would probably result in injury to deer.
- (10) Downers (deer unable to stand even with assistance) shall not be brought onto a custom livestock slaughter establishment premises, unless they became disabled during transport to the establishment. In that case, they shall be immediately stunned on the vehicle and removed from the vehicle and bled prior to regaining consciousness.
- (b) Loading Equipment. All ramps, chutes, doors, and gates used for loading and unloading deer shall be constructed and maintained in a manner that prevents injury or suffering.
- (1) Doors and gates shall be sufficiently wide to permit deer to pass through readily, without bruising or injury.
 - (2) The bottom edge of drop gates shall be padded.
- (c) Transportation Vehicles. Vehicles used to transport deer shall permit easy loading and unloading and shall provide for the safety of deer and personnel during loading, transport and unloading.

- (1) Vehicles shall be constructed in a manner that prevents injury to deer, including ensuring that no deer limbs or heads can project from the vehicle.
 - (2) Vehicles shall have doors that close firmly and securely.
- (3) Vehicles shall be constructed to provide deer with adequate ventilation at all times, while avoiding drafts. Care shall be taken to minimize entry of vehicle exhaust into areas containing deer.
- (4) If deer are kept in the transport vehicle for greater than one hour, sufficient floor space to allow all animals to lie down comfortably at the same time shall be provided.
 - (5) Deer shall be loaded only into vehicles that are clean.
- (6) Deer shall be protected from extremes of temperature during transport.
- (d) Water and Feed. Deer shall be fed and watered before loading for transport. For trips longer than 12 hours, feed and water shall be provided every four hours. Holding pens shall provide deer with access to clean water at all times and with feed if they are held in excess of 12 hours.
- (e) Unloading. Deer shall be unloaded as soon as it is reasonable and practical to do so upon arrival at the custom livestock slaughter establishment, but not later than 12 hours after arrival.
- (f) Humane Handling at Custom Livestock Slaughter Establishments. Operators of all custom livestock slaughter establishments are responsible for humane handling of deer on the plant premises.
- (1) Sufficient pens shall be provided to prevent overcrowding, to permit necessary segregation of animals, and to enable all animals to lie down at the same time.
- (2) Deer pens shall be segregated from those holding other species of food animals.
 - (3) Holding facilities shall protect deer adequately from the elements.
- (4) Holding pens shall be adequately ventilated to minimize stress to animals and to prevent excessive accumulation of odors and condensation
- (5) Deer that are sick, injured, or disabled shall immediately be separated from healthy animals.
- (6) Objects that might cause pain and/or injury, such as sticks, boards, canes, or electric prods, shall not be used on deer. However, a staff or similar object may be used judiciously to assist in guiding deer or for safety when handling larger or aggressive deer.

NOTE: Authority cited: Sections 18960 and 18963, Food and Agricultural Code. Reference: Section 18963, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of former sections 950, 951, 952, 953, 954 and 955 to new section 906.1 filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

Article 8. Handling and Disposal of Condemned or Other Inedible Products at Official Establishments

§ 907. Disposition of Condemned Products at Official Establishments.

(a) Carcasses, parts of carcasses, and other products condemned at an official establishment shall, except as provided in subsection (b) of this section or in this article, be destroyed in the presence of an inspector by incineration or denatured with crude carbolic acid; cresylic disinfectant; a formula consisting of one part FD&C No. 3 green coloring, 40 parts water, 40 parts liquid detergent, and 40 parts oil of citronella; or any other proprietary material approved by the Department in specific cases. When such product is to be denatured, it shall be freely slashed before the denaturing agent is applied, except that, in the case of dead animals that have not been dressed, the denaturant may be applied by injection. The denaturant must be deposited in all portions of the carcass or product to the extent necessary to preclude its use for food purposes.

- (b) All carcasses and parts condemned because of anthrax, as identified in section 904.7 of this subchapter, at official establishments shall be disposed of by:
 - (1) Complete incineration or
- (2) Thorough denaturing with crude carbolic acid or cresylic disinfectant and then disposed of in accordance with the requirements of the appropriate state or municipal authorities, who shall be notified immediately by the area supervisor.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18722, 18728, 18813, 18850, 18972, 18991, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New article 8 (sections 907–907.4) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 907.1. Carcasses of Livestock Condemned on Ante-Mortem Inspection.

Carcasses of livestock that have been condemned on ante-mortem inspection shall be handled in accordance with 9 CFR section 314.7 (2006). NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18723, 18732, 18972, 18991, 19014 and 19017, Food and Agricultural Code; and 9 CFR section 314.7 (2006).

HISTORY

1. New section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 907.2. Dead Animal Carcasses.

- (a) With the exception of dead livestock that have died en route and are received with livestock for slaughter at an official establishment, no dead animal or part of the carcass of any livestock that died otherwise than by slaughter may be brought on the premises of an official establishment
- (b) Under no circumstances shall the carcass of any animal that has died otherwise than by slaughter, or any part thereof, be brought into any room or compartment in which any edible product is prepared, handled, or stored.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18669, 18674, 18723, 18732, 18732, 18754, 18851, 18873 and 18949, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 907.3. Specimens for Educational, Research, and Other Non-Food Purposes.

Collection of specimens for educational, research, and other non-food purposes shall be in accordance with 9 CFR section 314.9 (2006). Reference to Form MP-403-10 in section 314.9 shall refer to MPI Form 79-014 (Rev. 12/04), Application and Permit to Obtain Specimens from Official Meat Inspection Establishment.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18721, 18725, 18726, 18727 and 18971, Food and Agricultural Code; and 9 CFR section 314.9 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 907.4. Livers Condemned Because of Parasitic Infestation and for Other Causes; Conditions for Disposal.

- (a) Livers condemned on account of hydatid cysts shall be destroyed pursuant to the provisions of section 907 of this subchapter.
- (b) Livers condemned because of parasites other than hydatid cysts; and livers condemned because of telangiectasis, angioma, "sawdust" condition, cirrhosis, carotenosis, or other nonmalignant change, benign abscesses, or contamination, shall be placed in containers marked "INEDIBLE" printed legibly.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18722, 18726, 18728, 18850, 18851, 18971 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 9. Marking Products and Containers

§ 908. Approval Required for Official Marks.

No device containing any official mark shall be made or caused to be made for use on any product until it has been approved by the Department.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18671, 18722, 18846, 19015 and 19016, Food and Agricultural Code.

HISTORY

1. New article 9 (sections 908–908.11) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 908.1. Use of Official Marks.

- (a) No person shall affix or place, or cause to be affixed or placed, the official inspection legend or any other official mark, or any abbreviation or simulation of any official mark, to or on any product, or container thereof, except under the supervision of an inspector, or as authorized by Article 10 of this subchapter in connection with the manufacture of containers.
- (b) No person shall fill, or cause to be filled, in whole or in part, with any product, any container bearing or intended to bear any official mark, or any abbreviation or simulation of any official mark, except under the supervision of an inspector.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18656, 18661, 18664, 18665, 18670–18672, 18724, 18730, 18737, 18781, 18847, 18974, 18991, 19001, 19015, 19016 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.2. Marking Devices.

- (a) The operator of each official establishment shall furnish such ink brands, burning brands, and any other device for marking products with official marks as the Department may determine are necessary for marking products at such establishment. The official inspection legend on such a device shall be as prescribed in this article.
- (b) All official devices for marking products with the official inspection legend, or other official inspection marks, including self-locking seals, shall be used only under supervision of an inspector.
- (c) No brand or other marking device shall be false or misleading. The letters and figures thereon shall be of such style and type as will make a clear and legible impression. All markings to be applied to products in an official establishment shall be approved prior to use by the Department as provided for in section 909.3 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18661, 18664, 18665, 18668, 18670, 18671, 18724, 18730, 18789, 18847, 18973, 18974, 18991, 19001, 19015, 19016 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.3. Branding Ink.

Ink used for marking products shall be used in accordance with 9 CFR section 316.5 (2006). Program laboratory shall refer to a laboratory selected by the Program.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18669, 18671, 18673, 18722, 18752, 18788, 18991 and 19015, Food and Agricultural Code; and 9 CFR section 316.5 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.4. Products Shall Not be Removed from Official Establishments Unless Marked in Accordance with the Regulations.

Products shall not be removed from official establishments unless marked in accordance with 9 CFR section 316.6 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18669, 18671,

18722, 18724, 18789, 18944, 18949, 18991, 19001, 19015, 19016 and 19017, Food and Agricultural Code; and 9 CFR section 316.6 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.5. Products Marked with Official Marks.

- (a) Custom processed carcasses and parts passed for human food at custom livestock slaughter establishments shall be stamped on each quarter or part with:
- (1) The approved California identification number, which shall be the letter "C" followed by a hyphen and the establishment number. The letter and number shall be in the same prominence, size and style of print and at least one—half of an inch in height;
- (2) The words "Not for Sale" in letters at least three-eighths of an inch in height.

For example:

NOT FOR SALE C-381

(b) Carcasses and parts from fallow deer passed for human food and for transportation and/or sale shall be stamped on each quarter or part with a facsimile of the following mark of inspection:¹

This official inspection mark shall be of sufficient size and of such color as to be conspicuously displayed and readily legible. This official inspection mark shall be applied with approved edible ink.

¹The number "38" is given as an example only. The establishment number of the licensed custom livestock slaughterhouse where the product is prepared shall be used in lieu thereof.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18669, 18671, 18722, 18724, 18730, 18731, 18783, 18846, 18789, 18946, 18991, 19015, 19016 and 19017, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 930 to new section 908.5, including amendment of section heading, section and NOTE, filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 908.6. Marking of Meat Food Products and Poultry Meat Food Products.

(a) Labeled product passed for human food, processed in meat processing establishments licensed under Food and Agricultural Code section 19010, derived from United States Department of Agriculture–inspected product or from fallow deer products inspected and passed at a custom livestock slaughterhouse shall bear the following official inspection legend:

(b) Inspected and passed sausages and other products in casings or in link form of the ordinary "ring" variety or larger shall be marked with the official inspection legend and list of ingredients in accordance with Article 12 of this subchapter. The official marks required by this section shall be branded near each end of the sausage or similar product prepared

in casings when the product is of a size larger than that customarily sold at retail intact.

- (c) Inspected and passed sausage and other products, in casings or in link form, of the smaller varieties, shall bear the official inspection legend and one or more lists of ingredients in accordance with Article 12 of this subchapter.
- (d) The list of ingredients may be applied by stamping, printing, using paper bands, tags, or tissue strips, or other means approved by the Department in specific cases.
- (e) All cured products shall be marked with the list of ingredients in accordance with Article 12 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18669, 18671, 18722, 18724, 18730, 18731, 18782, 18783, 18786, 18789, 18944, 18949, 19001, 19015, 19016 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.7. Special Markings for Meat Food Products and Poultry Meat Food Products.

The meat food products and poultry food products listed in 9 CFR section 316.11 (2006) shall be marked in accordance with section 316.11. NOTE: Authority cited: Sections 407, 18693, 18735, 18960. 18961 and 19014. Food and Agricultural Code. Reference: Sections 18664, 18665, 18669, 18671, 18722, 18724, 18730, 18731, 18781, 18782, 18783, 18786, 18949, 19001, 19015 and 19017, Food and Agricultural Code; and 9 CFR section 316.11 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.8. Marking of Outside Containers.

Outside containers of inspected and passed product shall be marked in accordance with 9 CFR section 316.13(a), (b), (d) and (g) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18669, 18671, 18722, 18724, 18730, 18731, 18782, 18783, 18786, 18789, 18944, 18949, 19001, 19015, 19016 and 19017, Food and Agricultural Code; and 9 CFR section 316.13 (2006)

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.9. Marking Outside Containers of Inedible Grease, Inedible Tallow, or Other Inedible Animal Fat or Mixtures.

Outside containers of inedible grease, inedible tallow, or other inedible animal fat or mixtures of fat shall be marked in accordance with 9 CFR section 316.15 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18669, 18724, 18730, 18731, 18813, 18850, 18949, 19001 and 19017, Food and Agricultural Code; and 9 CFR section 316.15 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 908.10. Unmarked Inspected Products.

Products that have been inspected and passed but do not bear the official inspection legend may be removed from an official establishment in closed containers bearing the official inspection legend and all other information required by this part and Article 10 of this subchapter: Provided that upon removal from such closed container the product may not be further transported in commerce unless such removal is made under the supervision of an inspector and such product is reinspected by an inspector and packed under his supervision in containers bearing the official inspection legend and all other information required by this part and Article 10 of this subchapter: And provided further, that unmarked product shall not be brought into an official establishment in an open container.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18656, 18661, 18662, 18664, 18665, 18669, 18670, 18676, 18722, 18724, 18730, 18731, 18845, 18941, 18942, 18942.2, 18944, 18974, 18949, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 908.11. Carcass Identification.

Each custom slaughtered carcass held in a cooler at an official establishment shall be accompanied by identification, attached to the carcass or to the device or container holding the carcass, that lists the owner of the carcass and the date on which it was slaughtered.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014. Food and Agricultural Code. Reference: Sections 18669, 18722, 18727, 18732, 18845, 18972 and 18949, Food and Agricultural Code.

Article 10. Labeling, Marking Devices, and Containers

§ 909. Definition and Required Features.

section 317.2 (2006).

Label definitions and label features shall comply with 9 CFR section 317.2 (2006) and with Directive 7220.1, Food Labeling Division Policy Memoranda, (August 2, 2005), published by the United States Department of Agriculture (USDA), Food Safety and Inspection Service. Copies of USDA directives may be found at http://www.fsis.usda.gov. NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18656, 18661, 18662, $18664, 1866\overline{5}, 18669, 18722, 18724, 18730, 18731, 18736, 18737, 18751, 18752, \\$ 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18842, 18843, 18941, 18942,

18942.2, 18944, 18949, 18974 and 19017, Food and Agricultural Code; and 9 CFR HISTORY

1. New article 10 (sections 909-909.14) and new section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.1. Requirements; Supervision by Inspector.

- (a) Labels are required on inspected and passed products placed in containers or coverings in accordance with 9 CFR section 317.1 (2006).
- (b) Fresh products packaged for retail sale shall conform to the labeling requirements of this article except that their labels do not require the official mark of inspection.
- (c) Bulk product displayed unwrapped or in clear packages that require a meat processing establishment employee to serve the customer by bringing the product to the customer, i.e. a service sale, does not require a label on the packaging or container of product. Clear plastic or shrink-wrap is considered a protective device, not a container, in this
- (1) If bulk product is not on display, it must be wrapped in the presence of the customer to be considered a service sale not requiring full labeling. Sale of product pre-wrapped in butcher paper or similar opaque wrap is not considered a service sale and such product shall be fully labeled.
- (2) The display for bulk product sold by service sale shall have a placard identifying the product and, if the product is fabricated with two or more ingredients, a list of product ingredients.
- (d) Products sold in a manner that allows customers to serve themselves by direct access to the product (self-service sale) shall be fully labeled.
- (e) Meat and poultry products processed under USDA Meat and Poultry Inspection and repacked in a meat processing establishment shall be labeled. However, the label does not require a mark of inspection.
- NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18656, 18661, 18662, 18664, 18665, 18669, 18722, 18724, 18730, 18731, 18736, 18737, 18751, 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18842, 18843, 18941, 18942, 18942.2, 18944, 18949, 18974 and 19017, Food and Agricultural Code; and 9 CFR section 317.1 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Page 76.16

¹ The number "38" is given as an example only. The establishment number of the meat processing establishment where the product is prepared shall be used in lieu thereof.

§ 909.2. Approval of Abbreviations of Marks of Inspection.

Abbreviations of marks of inspection shall be submitted to the Department for approval prior to use. Such abbreviations shall have the same force and effect as the respective marks for which they are authorized abbreviations.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18670, 18671 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.3. Labeling Approval.

- (a) No final labeling shall be used on any product unless the sketch labeling of such final labeling has been submitted to the Department for approval, with a completed MPI Form 79–080 Label and Formulation Approval (Revision 12/04), and has been approved by the Department. The management of the official establishment must maintain a copy of all labeling used, along with the product formulation and processing procedures. Such records shall be made available to any duly authorized representative of the Department upon request.
- (b) The Department shall permit submission for approval of only sketch labeling, as defined in subsection (d) of this section, for all products, except as provided in section 909.13 of this Article and except for temporary use of final labeling as prescribed in subsection (f) of this section.
- (c) All labeling required to be submitted for approval as set forth in subsection (a) of this section shall be submitted, with a completed MPI Form 79–080 Label and Formulation Approval (Revision 12/04), in duplicate to the Department.
- (d) "Sketch" labeling is a printer's proof or equivalent which clearly shows all labeling features, size, location, and indication of final color, as specified in 9 CFR section 317.2 (2006) and in Directive 7220.1, Food Labeling Division Policy Memoranda, Revision 3 (August 2, 2005), published by the United States Department of Agriculture (USDA), Food Safety and Inspection Service. Copies of USDA directives and notices may be found at: http://www.fsis.usda.gov. The Department will accept sketches that are hand drawn, computer generated, or other reasonable facsimiles that clearly reflect and project the final version of the labeling. Indication of final color may be met by: submission of a color sketch, submission of a sketch which indicates by descriptive language the final colors, or submission with the sketch of previously approved final labeling that indicates the final colors.
- (e) Inserts, tags, liners, pasters, and like devices containing printed or graphic matter for use on, or to be placed within, containers and coverings of product shall be submitted for approval in the same manner as provided for labeling in subsection (a) of this section, except that such devices which contain no reference to product and bear no misleading features shall be used without submission for approval as prescribed in 9 CFR section 317.5(b)(7) (2006).
- (f) Consistent with the requirements of this section, temporary approval for the use of a final label or other final labeling that may otherwise be deemed deficient in some particular may be granted by the Department. Temporary approvals may be granted for a period not to exceed 180 calendar days, under the following conditions:
 - (1) The proposed labeling would not misrepresent the product;
- (2) The use of the labeling would not present any potential health, safety, or dietary problems to the consumer;
 - (3) Denial of the request would create undue economic hardship; and
- (4) An unfair competitive advantage would not result from the granting of the temporary approval.
- (5) Extensions of temporary approvals may also be granted by the Department provided that the applicant demonstrates that new circumstances, meeting the above criteria, have developed since the original temporary approval was granted.
- (g) The Department shall approve meat carcass ink brands and meat food product ink and burning brands, which comply with Article 9 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18670, 18671 and 19017, Food and Agricultural Code; and 9 CFR section 317.5 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.4. Approved Labels to be Used Only on Products to Which They Are Applicable.

Labels shall be used only on products for which they are approved, and only if they have been approved for such products in accordance with section 909.3 of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18662, 18664, 18665, 18724, 18730, 18731, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 18789, 18847, 18944, 18974, 19015, 19016 and 19017, Food and Agricultural Code.

History

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.5. False or Misleading Labeling or Practices.

- (a) No product or any of its wrappers, packaging, or other containers shall bear any false or misleading marking, label, or other labeling and no statement, word, picture, design, or device that conveys any false impression or gives any false indication of origin or quality or is otherwise false or misleading shall appear in any marking or other labeling. No product shall be wholly or partly enclosed in any wrapper, packaging, or other container that is so made, formed, or filled as to be misleading.
- (b) When a product is labeled with a specific smoke (e.g. Hickory Smoked), then it must be smoked 100% with that particular wood. All smoke must be generated from hardwood, hardwood sawdust, corncobs, or from natural liquid smoke that has been transformed into a true gaseous state by the application of direct heat.
- (c) Labels and containers of products shall comply with the requirements of 9 CFR section 317.8(b) (2006). Reference in section 317.8(b) to section 317.4 shall be deemed to refer to section 909.3 of this subchapter

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18662, 18664, 18665, 18724, 18730, 18731, 18781, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 18789, 18842, 18843, 18846, 18847, 18944, 18972, 18974 19015, 19016 and 19017, Food and Agricultural Code; and 9 CFR section 317.8 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.6. Reuse of Official Inspection Marks and Containers.

Reuse of official inspection marks and containers shall be in accordance with 9 CFR section 317.10 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18661, 18662, 18664, 18665, 18670, 18671, 18724, 18730, 18731, 18781, 18846, 18847, 18941, 189042, 18942, 18944, 18974, 19015 and 19017, Food and Agricultural Code; and 9 CFR section 317.10 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.7. Labeling, Filling of Containers, Handling of Labeled Products.

Labeling, filling of containers, and handling of labeled products shall be in accordance with 9 CFR section 317.11 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18656, 18661, 18662, 18664, 18665, 18669, 18672, 18674, 18722, 18724, 18730, 18731, 18751, 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18871, 18941, 18942, 18942, 18944, 18949, 18974, 19015 and 19017, Food and Agricultural Code; and 9 CFR section 317.11 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.8. Product Relabeling Requirements.

Relabeling of product shall be in accordance with 9 CFR section 317.12 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18661, 18662, 18664, 18665, 18669, 18671, 18722, 18724, 18941, 18942, 18942.2, 18944, 18949, 18974, 19015 and 19017, Food and Agricultural Code; and 9 CFR section 317.12 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.9. Custom Prepared Products.

Products that are custom prepared under provisions of 9 CFR section 303.1(a)(2) (2006) must be packaged immediately after preparation and must be labeled (in lieu of information otherwise required by Article 10) with the words "Not For Sale" in lettering not less than three–eighths inch in height. Such exempted custom prepared products or their containers may bear additional labeling provided such labeling is not false or misleading.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18662, 18669, 18944, 18946, 18974, 19015, 19016 and 19017, Food and Agricultural Code; and 9 CFR section 303.1 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.10. Cured Products.

Cured products shall be labeled in accordance with 9 CFR section 317.17 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18662, 18664, 18665, 18676, 18724, 18784, 18786, 18789, 18944, 18974, 19015 and 19017, Food and Agricultural Code; and 9 CFR section 317.17 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.11. Packaging Materials.

Packaging materials and their use in official establishments shall comply with requirements of 9 CFR section 317.24(a), (b), (c), (d), (e) and (g) (2006)

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18656, 18661, 18664, 18665, 18669, 18672, 18676, 18724, 18727, 18730, 18731, 18732, 18751, 18753, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18843, 18944, 18949, 18974, 19015 and 19017, Food and Agricultural Code; and 9 CFR section 317.24 (2006). HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.12. Storage and Distribution of Labels and Containers Bearing Official Marks.

Labels, wrappers, and containers bearing any official marks, with or without the establishment number, may be transported from one official establishment to another official establishment provided such shipments are made with the prior authorization of the inspector at point of origin, who will notify the inspector at destination concerning the date of shipment, quantity, and type of labeling material involved. No such material shall be used at the establishment to which it is shipped unless such use conforms to the requirements of this subchapter.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18656, 18661, 18662, 18669, 18671, 18724, 18727, 18847, 18941, 18942, 18942.2, 18949, 18974, 19015 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.13. Generically Approved Labeling.

(a) An official establishment is authorized to use generically approved labeling, as defined in subsection (c) of this section, without such labeling being submitted for approval to the Department, provided the labeling is in accordance with this section and shows all mandatory features in a prominent manner as required in 9 CFR section 317.2 (2006) and in Directive 7220.1, Food Labeling Division Policy Memoranda, Revision 3 (August 2, 2005), published by the United States Department of Agriculture (USDA), Food Safety and Inspection Service, and is not otherwise false or misleading. Copies of USDA directives and notices may be found at: http://www.fsis.usda.gov.

(b) The Department shall select samples of generically approved labeling from records maintained by official establishments as required in section 909.3 of this article, to determine compliance with labeling requirements.

(c) Generically approved labeling is labeling that complies with the requirements of 9 CFR sections 317.5(b)(1), (2), (4), (7), and (9)(i), (ii), (iii), (iv), (v), (vii), (viii), (ix), (x), (xi), (xii), (xiii), (xiv), (xv), (xvii, (xviii), (xviii), (xx), (xx), (xxiii), and (xxiii) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18670, 18671, 18724, 18731, 18781, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 18789, 18944, 18974, 19015, 19016 and 19017, Food and Agricultural Code; and 9 CFR sections 317.2 and 317.5 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 909.14. Rescindment of Labels.

Once a year each official establishment shall submit to the Branch Chief, in quadruplicate, a list of approvals for labels that have become obsolete, accompanied by a statement that such approvals are no longer desired. The approvals shall be identified by number, date of approval, and name of the product.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18724, 18730, 18845, 18846, 18949 and 18974, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 11. Entry Into Official Establishments; Reinspection and Preparation of Products

§ 910. Products and Other Articles Entering Official Establishments.

(a) Products and certain other articles listed in 9 CFR section 318.1(b), (c), (d), (e), (g), and (h) (2006) entering official establishments shall comply with requirements of 9 CFR section 318.1(a), (b), (c), (d), (e), (g), (h)(1), (i), and (j) (2006). References in section 318.1 to sections 318.2 and 318.3 shall be deemed to refer to section 910.2 of this article.

(b) Inspected product may be returned to an official establishment only if the establishment has written procedures, approved by the Department, for handling returned product.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18658, 18659, 18660, 18661, 18662, 18664, 18665, 18666, 18669, 18670, 18676, 18721, 18722, 18723, 18724, 18725, 18726, 18727, 18730, 18731, 18732, 18751 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18781, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 18789, 18812, 18813, 18843, 18845, 18872, 18941, 18942, 18942, 2, 18944, 18947, 18948, 18949, 18971, 18972, 19001, 19013, 19017 and 19020, Food and Agricultural Code; and 9 CFR section 318.1 (2006).

HISTORY

1. New article 11 (sections 910–910.18) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 910.1. Reinspection, Retention, and Disposal of Meat and Poultry Products at Official Establishments.

Reinspection, retention, and disposal of meat and poultry products at official establishments shall be in accordance with 9 CFR section 318.2(a), (b), and (d) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18656, 18664, 18665, 18666, 18669, 18670, 18671, 18676, 18721, 18722, 18723, 18732, 18751 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18781, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 1878, 18843, 18845, 18872, 18941, 18942, 18942, 18944, 18947, 18949, 18950, 18972, 18974, 18976, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 318.2 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.2. Designation of Places for Receipt of Products and Other Articles for Reinspection.

Every official establishment shall designate, with the approval of the area supervisor, a dock or place where products and other articles subject to reinspection under section 910.1 of this article shall be received, and such products and articles shall be received only at such dock or place.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.3. Preparation of Products; Supervision; Responsibilities of Official Establishments.

- (a) All processes used in curing, pickling, rendering, canning, or otherwise preparing any product in official establishments shall be supervised by an inspector unless such preparation is conducted as a custom operation exempted from inspection under provisions of 9 CFR section 303.1(a)(2) (2006).
- (b) It shall be the responsibility of the operator of every official establishment to comply with the Act and the regulations in this subchapter. In order to carry out this responsibility effectively, the operator of the establishment shall institute appropriate measures to assure the maintenance of the establishment and the preparation, marking, labeling, packaging and other handling of its products strictly in accordance with the sanitary and other requirements of this subchapter. The effectiveness of such measures will be subject to review by the Department.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18664, 18665, 18666, 18669, 18671, 18676, 18725, 18726, 18732, 18751 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18812, 18845, 18944, 18947, 18949, 18970, 18971, 18974, 19012 and 19017, Food and Agricultural Code; and 9 CFR section 303.1 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.4. Product Procedures and Requirements.

- (a) Care shall be taken to assure that product is not adulterated when placed in freezers. If there is doubt as to the soundness of any frozen product, the inspector will require defrosting and reinspection of a sufficient quantity thereof to determine its actual condition.
- (b) Frozen product may be defrosted in water or pickle in a manner and with the use of facilities that are acceptable to the inspector. Before such product is defrosted, a careful examination shall be made to determine its condition. If necessary, this examination shall include defrosting of representative samples by means other than in water or pickle.
- (c) Product, such as pork tenderloins, brains, sweetbreads, stew, or chop suey, shall not be packed in hermetically sealed metal or glass containers, unless subsequently heat processed or otherwise treated to preserve the product in a manner approved by the Department in specific cases
- (d) Care shall be taken to remove bones and parts of bones from product that is intended for chopping.
- (e) Heads for use in the preparation of meat food products shall be split and the bodies of the teeth, the turbinated and ethmoid bones, the ear tubes, and the horn butts shall be removed. The heads shall then be thoroughly cleaned.
- (f) Kidneys to be used in the preparation of meat food products shall first be freely sectioned and then thoroughly soaked and washed. All detached kidneys, including beef kidneys with detached kidney fat, shall be inspected before being used in or shipped from the official establishment.
- (g) Cattle paunches and hog stomachs for use in the preparation of meat food products shall be thoroughly cleaned on all surfaces and parts immediately after being emptied of their contents, which shall promptly follow their removal from the carcasses.
- (h) Clotted blood shall be removed from hog hearts before they are shipped from the official establishment or used in the preparation of meat food products.
- (i) Beef bungs, beef bladders, hog bungs, hog middles, and hog stomachs that are to be used as containers of any meat food product shall be presented for inspection, turned with the fat surface exposed.
- (j) Portions of casings that show infection with Oesophagostomum or other nodule-producing parasites, and weasands infected with the larvae of Hypoderma lineatum, shall be rejected, except that when the infesta-

tion is slight and the nodules and larvae are removed, the casing or weasand may be passed.

- (k) Cover pickle that is clear, free of sediment by filtration, and does not show evidence of decomposition may be reused.
- (*l*) Rework product shall be used only in similar products at levels specified in the appropriate approved in–depth review, MPI Form 79–082 (Rev. 12/04), In–Depth Review of Cooked Sausage, or MPI Form 79–085 (Rev. 12/04), In–Depth Review of Cured/Cooked and Smoked Means
- (m) Beef, pork, poultry, and sheep and goat meat shall be kept separate in storage and processing, except when incorporated in a multi-species product. Processing equipment shall be cleaned between species.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18652, 18661, 18664, 18665, 18666, 18669, 18676, 18751 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18845, 18941, 18942, 18942.2, 18944, 18947, 18949, 18972, 19014 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.5. Ingredients and Other Articles Used in Preparation of Products.

- (a) Ingredients and articles listed in 9 CFR section 318.6(b)(1) through (12) (2006) shall be used in accordance with section 318.6(a) and (b)(1) through (12). Reference in section 318.6 to section 317.8(b)(3) shall be deemed to refer to section 909.5 of this subchapter.
- (b) Letters of guarantee obtained from manufacturers and suppliers shall be on file in the official establishment for non-meat ingredients and dairy products that were not produced in a USDA inspected plant or labeled as "Food Grade" or "Food Chemical Codes."
- (c) Non-meat ingredients shall be identified and labeled at all times prior to use.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.6. Samples of Products, Water, Dyes, Chemicals, etc., to Be Taken for Examination.

Samples of products, water, dyes, chemicals, preservatives, spices, or other articles in any official establishment may be taken for examination as often as deemed necessary by the Department for the efficient conduct of inspection.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18669, 18676, 18721, 18944, 18947, 18949 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.7. Prescribed Treatment of Pork and Pork Products to Destroy Trichinae.

- (a) Pork and pork products shall be treated to destroy trichinae in accordance with 9 CFR section 318.10(a) and (b) (2006).
- (b) Treatment or pork and pork products to destroy trichinae shall consist of heating, refrigerating, or curing, as follows:
- (1) Pork and pork products may be treated to destroy trichinae by heating in accordance with 9 CFR section 318.10(c)(1) (2006).
- (2) Pork and pork products may be treated to destroy trichinae by refrigerating in accordance with 9 CFR sections 318.10(c)(2)(i), (ii), (iii) and (iv) (2006).
- (A) During the period of refrigeration the product shall be kept separate from other products and in rooms or compartments equipped and made secure with locks or seals.
- (B) The product shall be in boxes sealed with fibrous tape across the length and width of the boxes and the mark of inspection applied at the junction of the tape. The boxes shall also be stamped with the lot number, if any, and the date of entry into the retention freezer.

- (C) The rooms or compartments containing product undergoing freezing shall be equipped with accurate "high–low" or recording thermometers placed at or above the highest level at which the product undergoing treatment is stored and away from refrigerating coils.
- (D) After completion of the prescribed freezing of pork to be used in the preparation of product covered by subsection (b) of this section, the pork shall be kept under close supervision of an inspector until it is so used. If separate facilities for preparing meat food products containing treated pork are not used, the equipment and facilities used for making products containing treated pork shall be thoroughly cleaned and free of any particles of untreated pork prior to such use.
- (E) Official establishments that treat pork for trichina by refrigeration shall provide the Department with written procedures for such treatment and shall keep accurate records of such treatment on MPI Form 79–087 (Rev. 12/04), Plants Freezing Pork to Destroy Trichina. After completion of the prescribed treatment period, and at the time of release, an inspector shall review Form 79–087 to assure that time and temperature requirements for the lot are met and the pork is eligible for release for plant use
- (F) Official establishments that use pork treated for trichina by refrigeration shall maintain a record, on MPI Form 79–088 (Rev. 12/04), Plant Certified Pork Use Record, of the use made of certified products.
- (G) Boxes of certified pork shall remain sealed until opened for use and must bear the statement "Pork Product _______ Degrees F ______ Days Refrigeration"
- (H) An inspector shall check the temperature inside the freezer at least weekly during the retention period and at the termination of the retention period. Results shall be listed on the MPI Form 79–030 (Rev. 12/04) Plant Inspection Report and on MPI Form 79–087 (Rev. 12/04) Plants Freezing Pork to Destroy Trichina.
- (3) Pork and pork products may be treated to destroy trichinae by curing in accordance with 9 CFR section 318.10(c)(3) (2006).
- (4) The Department shall consider additional processing methods in accordance with 9 CFR section 318.10(c)(4) (2006).
- (c) Smokehouses, drying rooms, and other compartments used in the treatment of pork by heating or by curing to destroy live trichinae shall be equipped with accurate automatic recording thermometers in accordance with 9 CFR section 318.10(d) (2006).
- (d) The pooled sample digestion technique to analyze pork for the presence of trichina cysts shall be used in accordance with 9 CFR section 318.10(e) (2006).
- (e) The Department shall consider any additional analytical method for trichinosis upon petition by an official establishment, and may approve that method upon the determination that it will detect at least 98 percent of swine bearing cysts present at a tissue density equal to or less than one cyst per gram of muscle from the diaphragm pillars at a 95 percent confidence level. Any such petitions shall be supported by any data and other information that the Department finds necessary.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.8. Adulteration of Product by Polluted Water.

An official establishment and all products contained therein that are contaminated with polluted water, including but not limited to flood water, shall be handled in accordance with 9 CFR section 318.14(a) and (b) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18652, 18656, 18661, 18662, 18664, 18665, 18669, 18676, 18721, 18722, 18728, 18736, 18751 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18845, 18941, 18942, 18942.2, 18944, 18947, 18949, 18973, 19014 and 19017, Food and Agricultural Code; and 9 CFR section 318.14 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.9. Tagging Chemicals, Preservatives, Cereals, Spices, etc., California Retained.

When any chemical, preservative, cereal, spice, or other substance is intended for use in an official establishment, it shall be examined by an inspector and, if found to be unfit or otherwise unacceptable for the use intended or if final decision regarding acceptance is deferred pending laboratory or other examination, the inspector shall attach a California Retained tag to the substance or container thereof. The substance so tagged shall be kept separate from other substances as the area supervisor may require and shall not be used until the tag is removed, and such removal shall be made only by a program employee after a finding that the substance can be accepted or, in the case of an unacceptable substance, when it is removed from the establishment.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18661, 18669, 18721, 18736, 18845, 18947, 18949, 18972, 18973, 19014 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.10. Pesticide Chemicals and Other Residues in Products.

Pesticide chemicals and other residues in products shall comply with requirements of 9 CFR section 318.16(a) and (b) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18652, 18661, 18664, 18665, 18672, 18673, 18676, 18736, 18751 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18843, 18845, 18941, 18942, 18942.2, 18947, 18972, 19014 and 19017, Food and Agricultural Code; and 9 CFR section 318.16 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.11. Requirements for the Production of Cooked Beef, Roast Beef, and Cooked Corned Beef Products.

- (a) Cooked beef and roast beef, including sectioned and formed roasts and chunked and formed roasts, and cooked corned beef shall be prepared by one of the time and temperature combinations in the following table. The stated temperature is the minimum that shall be produced and maintained in all parts of each piece of meat for at least the stated time:
- (1) Table for Time/Temperature Combination for Cooked Beef, Roast Beef, and Cooked Corned Beef.

Beer, and Cooked Con	ieu Beel.	
Minimum internal tempero	ature	Minimum processing time in minutes after minimum temperature is reached
Degrees Fahrenheit (°F)	Degrees Centigrade (°C	()
130	54.4	121
131	55.0	97
132	55.6	77
133	56.1	62
134	56.7	47
135	57.2	37
136	57.8	32
137	58.4	24
138	58.9	19
139	59.5	15
140	60.0	12
141	60.6	10
142	61.1	8
143	61.7	
144	62.2	6 5
145	62.8	Instantly

- (b) Cooked beef, including sectioned and formed roasts and chunked and formed roasts, and cooked corned beef shall be moist cooked throughout the process or, in the case of roast beef or corned beef to be roasted, cooked as provided in paragraph (c) of this section. The moist cooking may be accomplished by (1) placing the meat in a sealed, moisture impermeable bag, removing the excess air, and cooking; (2) completely immersing the meat, unbagged, in water throughout the entire cooking process; or (3) using a sealed oven or steam injection to raise the relative humidity above 90 percent throughout the cooking process.
- (c) Roast beef or corned beef to be roasted shall be cooked by one of the following methods:

- (1) Heating roasts of 10 pounds or more in an oven maintained at 250 °F (121 °C) or higher throughout the process;
- (2) Heating roasts of any size to a minimum internal temperature of 145 °F (62.8 °C) in an oven maintained at any temperature if the relative humidity of the oven is maintained either by continuously introducing steam for 50 percent of the cooking time or by use of a sealed oven for over 50 percent of the cooking time, or if the relative humidity of the oven is maintained at 90 percent or above for at least 25 percent of the total cooking time, but in no case less than 1 hour; or
- (3) Heating roasts of any size in an oven maintained at any temperature that will satisfy the internal temperature and time requirements of subsection (a) of this section if the relative humidity of the oven is maintained at 90 percent or above for at least 25 percent of the total cooking time, but in no case less than 1 hour. The relative humidity may be achieved by use of steam injection or by sealed ovens capable of producing and maintaining the required relative humidity.
- (d) Except as provided in subsection (d)(1) of this section, establishments producing cooked beef, roast beef, or cooked corned beef shall have sufficient monitoring equipment, including recording devices, to assure that the time (within 1 minute), the temperature (within 1 °F), and relative humidity (within 5 percent) limits of these processes are being met. Data from the recording devices shall be made available to a program employee upon request.
- (1) In lieu of recording devices, establishments may propose, in the written procedures prescribed in subsection (f) of this section, an alternative means of providing inspection personnel with evidence that finished product has been prepared in compliance with the humidity requirements of subsections (b) and (c) of this section, and the 145 °F (62.8 °C) temperature requirement of subsection (a) of this section.
- (e) Each package of finished product shall be plainly and permanently marked on the immediate container with the date of production either in code or with the calendar date.
- (f) In order to assure that cooked beef, roast beef, and cooked corned beef are handled, processed, and stored under sanitary conditions, the establishment shall submit a set of written procedures for approval by the Department. The written procedures shall include the following information:
- (1) The temperature to which raw frozen product is thawed and the time required.
- (2) The lot identification procedure for lots of product during processing.
- (3) The storage time and temperature combinations that the establishment intends to use before cooking, the cooking time and temperature the establishment intends to use, and the time, if any, the establishment intends to wait after cooking and before cooling.
- (4) If a code, instead of the calendar date, is used on the immediate container of the finished product, its meaning shall also be included.
- (5) Any other steps in the procedures that could affect the safety of the product and where control can be applied to prevent, eliminate, or reduce potential food safety hazards.
- (6) In lieu of recording devices, the alternate means permitted by section 910.11(d)(1) of providing evidence to inspection personnel that the finished product will be prepared in compliance with temperature or humidity requirements.
 - (7) Any other alternate procedure used that is permitted in this section.
- (g) The establishment shall maintain records and reports that document the time, temperature, and humidity at which any cooked beef, roast beef, or cooked corned beef is cooked and cooled at the establishment. Such records shall be kept by the establishment for 6 months or for such further period as the Department may require for purposes of any investigation or litigation under the Act, by written notice to the person required to keep such records. Such records shall be made available to the inspector or any duly authorized representative of the Department upon request.

- (h) The handling and processing of cooked beef, roast beef, and cooked corned beef before, during, and after cooking shall be such as to prevent the finished product from being adulterated. As a minimum, they shall be controlled as follows:
- (1) The establishment shall notify the inspector which processing procedure will be used on each lot, including time and temperature.
- (2) In order to assure uniform heat penetration and consequent adequate cooking of each piece of beef, individual pieces of raw product in any one lot shall either not vary in weight by more than 2 pounds or not vary in thickness by more than 2 inches at the thickest part. Alternate methods of assuring uniform heat penetration may be submitted in writing for approval to the Department.
- (3) A water-based solution that is used for injecting or immersing the meat shall be refrigerated to 50 °F (10 °C) or lower from the time it contacts the meat, and shall be filtered each time it is recirculated or reused.
- (4) Any non-meat ingredient, including the water-based solution in subsection (h)(3) above, that has contacted meat shall be discarded at the end of that day's production unless it is in continuous contact with one batch of product.
- (5) Product prepared for cooking shall be entered into the cooking cycle within 2 hours of completion of precooking preparation, or be placed immediately in a cooler at a temperature of 40 °F (4.4 °C) or lower.
- (6) The time and temperature requirements shall be met before any product in the lot is removed from the cooking units. Unless otherwise specified in the written procedures approved in accordance with subsection (f) of this section, the heat source shall not be shut off until these requirements are met.
- (7) Other than incidental contact caused by water currents during immersion cooking or cooling, product shall be placed so that it does not touch or overlap other products. This provision does not apply to product that is stirred or agitated to assure uniform heat transfer.
- (8) Temperature sensing devices shall be so placed that they monitor product in the coldest part of the cooking unit; and when an oven temperature is required by paragraph (c) of this section, the oven temperature shall also be monitored in the coldest part of the cooking unit.
- (9) If a humidity sensing device is required in an oven, it shall be placed so that it measures humidity in either the oven chamber or at the exit vent.
- (10) Chilling shall begin within 90 minutes after the cooking cycle is completed.
- (A) All product shall be chilled from 120 °F (48.8 °C) to 55 °F (12.7 °C) in no more than 6 hours.
- (B) Chilling shall continue and the product shall not be packed for shipment until it has reached 40 °F (4.4 °C).
- (11) Any establishment that has experienced a cooking process deviation during preparation of product may either reprocess the product completely, continue the heating to 145 °F (62.8 °C), or contact the Department for a review of the process schedule for adequacy and, if needed, for a cooking schedule to finish that one batch of product.
- (12) An establishment that has experienced a cooling deviation after the product has been cooked shall contact the Department to determine the disposition of that retained product.
- (13) Cooked beef, roast beef, and cooked corned beef shall be so handled as to assure that the product is not recontaminated by direct contact with raw product. To prevent direct contamination of the cooked product, establishments shall:
- (A) Physically separate areas where raw product is handled from areas where exposed cooked product is handled, using a solid impervious floor to ceiling wall; or
- (B) Handle raw and exposed cooked product at different times, with a cleaning of the entire area after the raw material handling is completed and prior to the handling of cooked product in that area; or

- (C) Submit a written procedure for approval to the Department detailing the steps to be taken which would avoid recontamination of cooked product by raw product during processing.
 - (14) To prevent indirect contamination of cooked product:
- (A) Any work surface, machine, or tool that contacts raw product shall be thoroughly cleaned and sanitized with a solution germicidally equivalent to 50 ppm chlorine before it contacts cooked product;
- (B) Employees shall wash their hands and sanitize them with a solution germicidally equivalent to 50 ppm chlorine whenever they enter the heat processed product area or before preparing to handle cooked product, and as frequently as necessary during operations to avoid product contamination; and
- (C) Outer garments, including aprons, smocks, and gloves, shall be specially identified as restricted for use in cooked product areas only, changed at least daily, and hung in a designated location when the employee leaves the area.
- (15) Cooked product shall not be stored in the same room as raw product unless it is first packaged in a sealed, watertight container or is otherwise protected by a covering that has been approved, upon written request, by the Department.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18652, 18656, 18661, 18664, 18665, 18669, 18676, 18724, 18725, 18726, 18727, 18730, 18731, 18736, 18737, 18751, 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18845, 18941, 18942, 18942, 2, 18947, 18948, 18970, 18971, 18972, 18973, 19011, 19012, 19013, 19014, 19015 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.12. Compliance Procedure for Cured Pork Products.

- (a) Definitions. For the purposes of this section:
- (1) A product is that a cured pork article that is contained within one Group as defined in subsection (a)(2) of this section and that purports to meet the criteria for a single product designated under the heading "Product Name and Qualifying Statements" in the charts in 9 CFR sections 319.104 or 319.105 (2006).
 - (2) A Product Group or a Group means one of the following:
- (A) Group I, consisting of cured pork products that have been cooked while imperviously encased. Any product that fits into the Group will be placed in this Group regardless of any other considerations.
- (B) Group II, consisting of cured pork products that have been water cooked. Any product that does not fit into Group I but does fit into Group II will be placed into Group II regardless of any other considerations.
- (C) Group III, consisting of boneless smokehouse heated cured pork products. Any boneless product that does not fit into Group I or Group II shall be placed in Group III.
- (D) Group IV, consisting of bone-in or semi-boneless smokehouse heated cured pork products. Any product that is not completely boneless or still contains all the bone that is traditional for bone-in product, and does not fit into Group I, Group II, or Group III shall be placed in this Group.
 - (3) A lot is that product from one production shift.
- (4) A production rate is frequency of production, expressed in days per week.
- (5) Protein fat free percentage, protein fat free content, PFF percentage, PFF content or PFF of a product means the meat protein (indigenous to the raw, unprocessed pork cut) content expressed as a percent of the non-fat portion of the finished product.
- (b) Normal Compliance Procedures. The Department may collect samples of cured pork products and analyze them for their PFF content. Analyses shall be conducted by the Department's Center for Analytic Chemistry Laboratory or another laboratory approved by the Department.
- (c) Each analytical result shall be recorded and evaluated to determine if the affected lot and subsequent production of like product shall be California Retained as provided in subsection (e) of this section.
 - (d) Rules for Rounding:

- (1) Laboratory results for percent meat protein and fat will be reported to the second decimal place (hundredths).
- (2) PFF for charting purposes will be calculated from the reported laboratory results to the second decimal place. Rounding of calculations to reach two decimal places will be done by the following rule:
- (3) All values of five-thousandths (0.005) or more will be rounded up to the next highest hundredth. All values of less than five-thousandths (0.005) will be dropped.
- (4) For compliance with the Absolute Minimum PFF requirements, the PFF will be rounded to the first decimal place (tenths). Rounding of calculations to reach one decimal place will be done by the following rule: All PFF values of five-hundredths (0.05) or more will be rounded up to the next highest tenth. All PFF values of less than five-hundredths (0.05) will be dropped.
- (5) For product disposition (pass–fail of a minimum PFF standard for retained product) the average PFF calculation will be rounded to the first decimal place. Individual PFF Values will be calculated to the nearest hundredth as in (B) above. The average, however, will be rounded to the nearest tenth as in (C) above.
- (e) Criteria for California retention of cured pork products for further
- (1) When an analysis of an individual sample indicates a PFF content below the applicable minimum requirement of 9 CFR section 319.104 or section 319.105 (2006) by 2.3 or more percentage points for a Group I or II product, or 2.7 or more percentage points for a Group III or IV product, the lot from which the sample was collected shall be California Retained
- (2) Any subsequently produced lots of like product and any lots of like product for which production dates cannot be established shall be California Retained.
- (3) Disposition of such California Retained product shall be in accordance with subsections (f) and (g) of this section.
 - (f) Compliance procedure during product retention.
- (1) When a product lot is California Retained under the provisions of subsections (e)(1) and (2) of this section, the Department shall collect three randomly selected samples from each such lot and analyze them individually for PFF content. The PFF content of the three samples shall be evaluated to determine disposition of the lot as provided in subsection (e)(1) of this section and the action to be taken on subsequently produced lots of like product as provided in subsection (e)(2) of this section.
- (2) If the processor does not wish to have the product evaluated in this manner, alternate sampling plans may be used provided such plans have been formulated by the processor and approved by the Department prior to evaluation by the three–sample criteria, and provided the analyses specified in such plans are performed at the expense of the processor.
- (A) A product lot that is California Retained under the provisions of subsection (e)(1) of this section may be released for entry into commerce provided one of the following conditions is met:
- 1. The average PFF content of the three samples randomly selected from the lot is equal to or greater than the applicable minimum PFF percentage required by 9 CFR section 319.104 or section 319.105 (2006). Further processing to remove moisture for the purpose of meeting this provision is permissible. In lieu of further analysis to determine the effects of such processing, each 0.37 percent weight reduction due to moisture loss resulting from the processing may be considered the equivalent of a 0.1 percent PFF gain.
- 2. The lot of the product is relabeled to conform to the provisions of 9 CFR section 319.104 or section 319.105 (2006), under the supervision of an inspector.
- 3. The lot is one that has been prepared subsequent to preparation of the lot that, under the provisions of subsection (e)(2) of this section, resulted in discontinuance of California retention of new lots of like product. Such lot may be released for entry into commerce prior to receipt of analytical results for which sampling has been conducted. Upon receipt of such results, they shall be subjected to the provisions of subsection (e)(1) of this section.

(g) Products not meeting specified PFF requirements, determined according to procedures set forth in this section, may be deemed adulterated under the Federal Food, Drug, and Cosmetic Act, 21 USC section 601(m)(8) and misbranded under section 601(n).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18652, 18662, 18664, 18665, 18666, 18669, 18676, 18721, 18724, 18727, 18730, 18845, 18944, 18947, 18973, 19014 and 19017, Food and Agricultural Code; 9 CFR sections 319.104 and 319.105 (2006); and Federal Food, Drug, and Cosmetic Act, 21 USC section 601.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.13. Use of Animal Drugs.

Animal drug residues are permitted in meat and meat food products if such residues are from drugs that have been approved by the Food and Drug Administration and any such drug residues are within tolerance levels approved by the Food and Drug Administration, unless otherwise determined by the Department and listed herein.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Section 18752, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.14. Determination of Added Water in Cooked Sausages.

Determination of added water in cooked sausages shall be in accordance with 9 CFR section 318.22 (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18972 and 19014, Food and Agricultural Code; and 9 CFR section 318.22 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.15. Cooling of Heated Potentially Hazardous Products.

- (a) To avoid product adulteration, processors shall rapidly and continuously cool all potentially hazardous products not included in subsection (b) using the following cooling rates:
- (1) During cooling, the product's internal temperature shall not remain between 135 °F and 70 °F for more than 2 hours and shall not remain between 70 °F and 41 °F for more than 4 hours.
- (2) Product consisting of pieces of intact muscle, such as turkey breast or pork loin, may be cooled according to the requirements for cooked beef, roast beef, and cooked corn beef products in section 910.11(h)(10) of this article.
- (b) Processors may slowly cool cured products if the product, such as cooked sausage, smoked ham, and bacon satisfies condition (1), one of the two choices in condition (2), and one of the three choices in condition (3) below.
- (1) The internal temperature does not remain between 120 °F and 40 °F for more than 20 hours.
 - (2) The cooling process:
 - (A) Causes a continuous drop in product temperature; or
- (B) Controls the product's surface temperature so that it does not stay between 120 °F and 80 °F for more than 2 hours; and
 - (3) The product is formulated:
- (A) With no less than 120 ppm of sodium nitrite or its equivalent (e.g. in ppm KNO2) and a brine concentration of 3.5 percent or more; or
- (B) With no less than 40 ppm of sodium nitrite or its equivalent (e.g., in ppm KNO2) and a brine concentration of 6 percent or more; or
- (C) With or without nitrite (such as salt cured product), but with a maximum water activity of 0.92.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18732, 18950, 18972, 19012 and 19014, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.16. Cooled Uncured Potentially Hazardous Product Holding Temperatures.

Uncured potentially hazardous processed product, if stored for any period of time longer than one week, shall be held at or below 41°F.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18732, 18950, 18972, 19012 and 19014, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.17. Hot Uncured Cooked Potentially Hazardous Product Holding Temperatures.

- (a) Hot uncured cooked potentially hazardous products may be held if kept at or above $135\,^{\rm o}F$.
- (b) If the product temperature drops below $135\,^{\rm o}{\rm F}$ for over 30 minutes, the processor shall either continuously cool the product to meet the times and temperatures in Section 910.15(b) of this subchapter, immediately reheat it to $165\,^{\rm o}{\rm F}$, or discard it.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18732, 18950, 18972, 19012 and 19014, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 910.18. Methods of Rapid Cooling.

- (a) Rapid cooling of products shall be accomplished by one or more of the following methods:
 - (1) Placing the product in shallow, heat-conducting pans.
 - (2) Separating the food into smaller or thinner portions.
 - (3) Using rapid-cooling equipment.
 - (4) Using containers that facilitate heat transfer.
- (5) Utilizing other effective means that have been approved by the Department
- (b) When product is placed in cooling or cold-holding equipment, containers in which the product is being cooled shall be:
- (1) Arranged in the equipment, to the extent practicable, to provide maximum heat transfer through the container walls.
- (2) Loosely covered, or uncovered if protected from overhead contamination, to facilitate heat transfer from the surface of the food.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18732, 18950, 18972, 19012 and 19014, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 12. Definitions and Standards of Identity or Composition

§ 911. Product Definitions and Standards of Identity or Composition.

Product definitions and standards of identity or composition shall be in accordance with 9 CFR Part 319, section 319.1, et seq. (2006), 9 CFR Part 381, section 381.55, et seq. (2006), and the Food Standards and Labeling Policy Book (August 2005), published by the United States Department of Agriculture, Food Safety and Inspection Service, Office of Policy Program Development. A copy may be found at: http://www.fsis.usda.gov.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18662, 18664, 18665, 18676, 18724, 18730, 18731, 18944, 18974, 18972 and 19017, Food and Agricultural Code; and 9 CFR Parts 319 and 381 (2006).

HISTORY

1. New article 12 (sections 911–911.1) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 911.1. Mexican Style Chorizo.

(a) Mexican style chorizo is a non-fermented, cured or uncured, perishable sausage that is uncooked, semidried in an atmospherically controlled drying chamber, and prepared with fresh or frozen meats and meat fat with the meat fat constituting not more than thirty percent of the finished product. It is seasoned with one or more types of peppers. No binders or extenders are allowed.

- (b) The following are standards for specific types of Mexican style chorizo:
- (1) "Mexican Style Chorizo" shall be prepared with fresh or frozen pork or fresh or frozen pork and pork fat.
- (2) "Mexican Style Chorizo with Beef," "Mexican Style Chorizo with Veal," and Mexican Style Chorizo with Beef and Veal" shall be prepared with fresh or frozen pork and with beef and/or veal. Pork shall constitute the major portion of the meat content.
- (3) "Mexican Style Beef Chorizo" shall be prepared with fresh or frozen beef or and fresh or frozen beef and beef fat.
- (4) "Mexican Style Veal Chorizo" shall be prepared with fresh or frozen veal or fresh or frozen veal and veal fat.
 - (c) Optional ingredients in Mexican style chorizo include:
 - (1) Spices (including paprika, oregano, and cumin) and flavorings.
- (2) Water or ice to facilitate chopping or mixing, but not to exceed three percent of the total weight of all ingredients, including water.
- (3) One or more types of chili peppers, such as red or green peppers, jalapeño peppers, chili pepper, green chilies, cayenne peppers, chili powder, jalapeño powder, or the various varieties of dried pepper pods that have been soaked and ground or made into a sauce.
- (4) Cider vinegar, wine vinegar, or apple cider vinegar. The vinegar used shall have a concentration of no less than four grams of acetic acid per 100 cubic centimeters (20 °C).
- (5) Orange juice or pineapple juice or a combination of orange juice and pineapple juice. These may be from concentrate.
- (6) Dehydrated, powdered, or fresh garlic, onions, or a combination of garlic and onions.
 - (7) Sugar, dextrose, corn syrup, corn syrup solids, and glucose syrup.
 - (8) Monosodium glutamate.
- (9) Antioxidants and oxygen interceptors listed in 9 CFR section 424.21 (2006), and Directive 7120.1, Safe and Suitable Ingredients Used in the Production of Meat and Poultry Products, Amendment 10 (January 18, 2007), published by the United States Department of Agriculture (USDA), Food Safety and Inspection Service, such as BHA (butylated hydroxyanisole), BHT (butylated hydroxytolene), propyl gallate, TBHQ (tertiary butythydroquinone).
- (10) Bacterial growth inhibitors listed in 9 CFR section 424.21 (2006), and Directive 7120.1, Safe and Suitable Ingredients Used in the Production of Meat and Poultry Products, Amendment 10 (January 18, 2007), published by the United States Department of Agriculture (USDA), Food Safety and Inspection Service, such as sodium lactate.
 - (11) Beef, veal, beef and veal, and/or beef fat.
- (12) Sodium or potassium nitrite not to exceed 1/4 ounce per 100 pounds of meat and meat by products (7 grams per 45000 grams =150 ppm). If nitrite is used in the product formulation, the product shall be labeled with the word "cured" in the product name, such as "Cured Mexican Style Chorizo." The word "cured" shall be displayed on the product label in the same size and style of lettering as other words in the product name.
- (13) If sodium or potassium nitrite is used, curing accelerators listed in 9 CFR section 424.21 (2006), and Directive 7120.1, Safe and Suitable Ingredients Used in the Production of Meat and Poultry Products, Amendment 10 (January 18, 2007), published by the United States Department of Agriculture (USDA), Food Safety and Inspection Service, such as sodium erythorbate or sodium ascorbate.
- (d) Finished Mexican style chorizo shall meet one the following standards:
 - (1) A water activity of 0.95 or less and a pH level of 5.0 or less.
- (2) A moisture to protein ratio of 3.1 to 1 or below with a pH level of 5.0 or less.
 - (3) A pH level of 4.5 or less.
- (e) If Mexican style chorizo contains pork, one of the following is required:

- (1) The pork shall be treated for the destruction of trichinae in accordance with section 910.7 of this subchapter;
- (2) If displayed in a self-service counter, the product shall be clearly labeled "Raw Product Cook Thoroughly Before Serving;" or
- (3) If not labeled and handed to the customer by an establishment employee, the product shall be accompanied by a handout instructing the customer to thoroughly cook it before serving.
- (f) Copies of USDA directives and notices may be found at: http://www.fsis.usda.gov.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections, 18662, 18664, 18665. 18676, 18724, 18730, 18731, 18944, 18974, 18972 and 19017, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 13. Preparation and Processing Operations

§ 912. Purpose and Scope.

This article prescribes rules for the preparation of meat and the processing of poultry products to prevent the adulteration or misbranding of meat and poultry products at official establishments. Articles 11 and 12 of this subchapter and 21 CFR Part 170, section 170.3 et seq. (2006), specify rules for the use of certain food ingredients (e.g., food additives and color additives) that may render meat or poultry products adulterated or misbranded.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Section 18652, 18664, 18665, 18666, 18669, 18676, 18751, 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18781, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 18789, 18843, 18944, 18947, 18949, 19000 and 19017, Food and Agricultural Code; and 21 CFR Part 170 (2006).

HISTORY

1. New article 13 (sections 912–912.3) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 912.1. Use of Food Ingredients.

The use of food ingredients in meat and poultry products shall be in accordance with 9 CFR section 424.21 (2006), and Directive 7120.1, Safe and Suitable Ingredients Used in the Production of Meat and Poultry Products, Amendment 10 (January 18, 2007), published by the United States Department of Agriculture (USDA), Food Safety and Inspection Service. Copies of USDA directives and notices may be found at: http://www.fsis.usda.gov.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Section 18652, 18664, 18665, 18666, 18669, 18676, 18751, 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18781, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 18789, 18843, 18944, 18947, 18949, 19000 and 19017, Food and Agricultural Code; and 9 CFR section 424.21 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 912.2. Other Permitted Additives and Uses.

Other permitted additives shall be used in accordance with 9 CFR section 424.22(a) and (b) (2006).

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Section 18652, 18664, 18665, 18666, 18669, 18676, 18751, 18752, 18753, 18754, 18755, 18756, 18757, 18758, 18759, 18781, 18782, 18783, 18784, 18785, 18786, 18787, 18788, 18789, 18843, 18944, 18947, 18949, 19000 and 19017, Food and Agricultural Code; and 9 CFR section 424,22 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 912.3. Prohibited Uses.

The use of additives listed in 9 CFR section 424.23 (2006) shall be prohibited in accordance with section 424.23.

NOTE: Authority cited: Sections 407, 18693, 18735, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18676, 18731, 18944 and 19014, Food and Agricultural Code; and 9 CFR section 424.23 (2006).

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

Article 14. Records and Reports

§ 913. Custom Livestock Slaughter Reports.

- (a) Plant management at each custom livestock slaughterhouse shall complete the following reports:
- (1) MPI Form 79–072 (Rev. 12/04) Daily Livestock Slaughter Report. For each livestock animal slaughtered the following information shall be entered on the day of slaughter:
 - (A) Date of slaughter.
 - (B) Name and address of the owner of the animal.
 - (C) Species and live weight in pounds.
- (D) The inspector's dispositions on ante- and post-mortem inspections.
 - (E) Weight, in pounds, of carcasses and parts condemned.
- (2) MPI Form 79–073 (Rev. 12/04) Monthly Summary Livestock Slaughtered and Inspected. This form shall be completed for the preceding month, using data from all MPI Forms 79–072 (Rev. 12/04) Daily Livestock Slaughter Report completed that month. The completed form shall be sent to the Sacramento headquarters office by the tenth day of the month.

NOTE: Authority cited: Sections 407, 18693, 18727, 18735, 18901, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18663, 18664, 18672, 18721, 18722, 18731, 18943, 18945, 18946 and 19014, Food and Agricultural Code.

HISTORY

1. New article 14 (sections 913–913.1) and new section filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 913.1. Meat Processing Reports.

- (a) Plant management at each meat processing establishment shall complete the following reports:
- (1) MPI Form 79–070 ($\dot{R}ev.~12/04$) Daily and Monthly Processing Report.
- (2) Under the headings Meat Products, Poultry Products, Custom Products, and Re-Inspection, a column shall be completed for each day the establishment conducts processing operations.
- (3) The weight, in pounds, for all products produced and/or condemned on re–inspection shall be entered in the appropriate space.
- (4) MPI Form 79–071 (Rev. 12/04) Monthly Report Processing Operations at State Inspected Meat and Poultry Official Establishments. This form shall be completed for the preceding month, using data from all MPI Forms 79–070 (Rev. 12/04) Daily and Monthly Processing Report completed that month. The completed form shall be sent to the Sacramento headquarters office by the tenth day of the month.

NOTE: Authority cited: Sections 407, 18693, 18727, 18735, 18901, 18960, 18961 and 19014, Food and Agricultural Code. Reference: Sections 18664, 18665, 18672, 18674, 18676, 18721, 18722, 18944, 18947 and 19014, Food and Agricultural Code.

HISTORY

1. New section filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 920. Amendment to Incorporation by Reference.

HISTORY

- Amendment filed 12-5-70 as an emergency; effective upon filing (Register 70, No. 49).
- Certificate of Compliance—Sec. 11422.1, Gov. Code, filed 1–21–71 (Register 71, No. 4).
- 3. Repealer filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 921. Mark of Inspection on Labels for Meat Food Products.

HISTORY

- 1. New section filed 1–20–78; effective thirtieth day thereafter (Register 78, No. 3).
- 2. Repealer filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 927. Authority of Livestock Meat Inspectors, Processing Inspectors and Persons Responsible for Operation of Livestock Establishments.

NOTE: Authority cited: Sections 407 and 18960, Food and Agricultural Code. Reference: Sections 18971, 18972, 18973 and 18974, Food and Agricultural Code.

HISTORY

- 1. New Article 2 (Sections 927–934) filed 8–2–83; effective thirtieth day thereafter (Register 83, No. 32).
- 2. Amendment of section heading and section filed 12–26–2001; operative 1–25–2002 (Register 2001, No. 52).
- Amendment relocating article 2 heading from section 927 to section 901 and renumbering former section 927 to new section 901 filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 928. Condemnation and Retention of Product.

NOTE: Authority cited: Sections 407 and 18960, Food and Agricultural Code. Reference: Sections 18991, 19001, 19012 and 19017, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 928 to section 901.1 filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 929. Grounds for Disciplinary Action.

NOTE: Authority cited: Sections 407 and 18960, Food and Agricultural Code. Reference: Sections 19017, 19030, 19035 and 19036, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 929 to section 901.2 filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 930. Required Marking.

NOTE: Authority cited: Sections 407, 18960 and 18963, Food and Agricultural Code. Reference: Sections 18991 and 19001, Food and Agricultural Code.

HISTORY

- 1. Amendment of section and Note filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- 2. Editorial correction restoring misplaced footnote.
- 3. Renumbering of former section 930 to section 908.5 filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 931. Licenses.

NOTE: Authority cited: Sections 407 and 18960, Food and Agricultural Code. Reference: Sections 18980, 18981, 18990 and 19000, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- Editorial correction removing misplaced footnote.
- 3. Renumbering of former section 931 to section 901.3 filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 932. Examinations.

NOTE: Authority cited: Sections 407 and 18960, Food and Agricultural Code. Reference: Sections 18982, 18983, 18990 and 19000, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 932 to section 901.4 filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 933. Animals Killed off Premises.

NOTE: Authority cited: Sections 407 and 18960, Food and Agricultural Code. Reference: Section 18991, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 933 to section 901.6 filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 934. Presence of Inspector on Premises.

NOTE: Authority cited: Sections 407 and 18960, Food and Agricultural Code. Reference: Section 18991, Food and Agricultural Code.

HISTORY

1. Renumbering of former section 934 to section 901.7 filed 5-31-2007; operative 6-30-2007 (Register 2007, No. 22).

§ 950. General Provisions.

NOTE: Authority cited: Sections 18960 and 18963, Food and Agricultural Code. Reference: Sections 18963, Food and Agricultural Code.

HISTORY

- 1. New article 3 (sections 950–955) and section filed 12–26–2001; operative 1–25–2002 (Register 2001, No. 52).
- 2. Repeal of former article 3 heading and renumbering of former section 950 to section 906.1, subsections (a)–(a)(10) filed 5–31~2007; operative 6–30–2007 (Register 2007, No. 22).

§ 951. Loading Equipment.

NOTE: Authority cited: Sections 18960 and 18963, Food and Agricultural Code. Reference: Sections 18963, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- 2. Renumbering of former section 951 to section 906.1, subsections (b)–(b)(2) filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 952. Transportation Vehicles.

NOTE: Authority cited: Sections 18960 and 18963, Food and Agricultural Code. Reference: Section 18963, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- 2. Renumbering of former section 952 to section 906.1, subsections (c)–(c)(6) filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 953. Water and Feed.

NOTE: Authority cited: Sections 18960 and 18963, Food and Agricultural Code. Reference: Sections 18963, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- 2. Renumbering of former section 953 to section 906.1, subsection (d) filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 954. Unloading.

NOTE: Authority cited: Sections 18960 and 18963, Food and Agricultural Code. Reference: Section 18963, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- 2. Renumbering of former section 954 to section 906.1, subsection (e) filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

§ 955. Humane Handling at Custom Livestock Slaughter Establishments.

NOTE: Authority cited: Sections 18960 and 18963, Food and Agricultural Code. Reference: Sections 18963, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-26-2001; operative 1-25-2002 (Register 2001, No. 52).
- 2. Renumbering of former section 955 to section 906.1, subsections (f)–(f)(6) filed 5–31–2007; operative 6–30–2007 (Register 2007, No. 22).

Subchapter 2.

Article 36. Definitions and General Provisions

§ 1180. Definitions.

The definitions in Sections 19200–19214 of the Agricultural Code apply to this group, unless otherwise apparent from their context, and in addition.

- (a) Dead animal means an animal which has died other than by slaughter.
- (b) Inspected horsemeat means horsemeat produced in a slaughtering establishment under inspection by the Secretary, the Director, or a municipal inspection service approved by the Director.
- (c) Secretary means the Secretary of the United States Department of Agriculture.
- (d) Chief of the Bureau means the Chief of the Bureau of Meat Inspection or any officer or employee of the California Department of Agriculture whose authority has heretofore been delegated or may hereafter be delegated to act in his stead.
 - (e) Cow means all cattle.
- (f) Denature means to render unfit for human food by the use of approved denaturing agents in accordance with Section 1180.34.
- (g) Director means the Director of the California Department of Agriculture or his delegate.
- (h) Licensed premises of a dead hauler means the premises on which he maintains a collection station and/or the premises where his trucks and other vehicles are parked over night and on weekends.
- (i) Meat food product means any article intended for and capable of being used as pet food which is derived or prepared in whole or substantial and definite part, from any portion of any animal.
 - (j) Pack means to pack, repack, label, or relabel.
- (k) Pet food means any product intended for use as food for dogs, cats, or other carnivora derived wholly or in part from the carcasses or parts or products of the carcasses of animals.
 - (1) Place of business of a dead hauler means the licensed premises.
- (m) Prepare means to slaughter, cut up, bone, recut, pack, repack, label or relabel fresh or frozen pet food or horsemeat intended for human use subject to the control of the California Department of Agriculture.
- (n) Processing for use as pet food means chilling, freezing, packing, repacking or otherwise handling any meat, meat food product or meat by-product, or horsemeat, horsemeat food product or horsemeat byproduct destined for use as pet food.
- (o) Packing house waste shall include shop fat and bones from any source.
- (p) The meaning of the term "adulterated" is as set forth in Section 27030 of the California Health and Safety Code.

NOTE: Authority for Group 3 cited: Sections 407, 18681, 18682, 19380–19385, Agricultural Code. Reference: Sections 19200 through 19444 Agricultural Code.

- 1. New Group 3 (§§ 1180, 1180.1 through 1180.37) filed 1–14–70 as an emergency; effective upon filing. Approved by State Building Standards Commission. (Register 70, No. 3).
- 2. Certificate of Compliance—Sec. 11422.1, Gov. C., filed 3–12–70 (Register 70, No. 11).
- 3. Renumbering of Group 3 as Group 2 filed 10–8–70 as an emergency; effective upon filing (Register 70, No. 41).
- Change without regulatory effect amending subsection (a) filed 5–27–2004 pursuant to section 100, title 1, California Code of Regulations (Register 2004, No. 22).

Article 37. Licenses

§ 1180.1. Licensing.

- (a) Every person required to be licensed pursuant to Sections 19240, 19260, 19280, 19300 and 19320 of the Agricultural Code shall obtain a license for his principal place of business and an additional license for each branch location where any of the business practices requiring the license will be carried on.
- (b) License applications shall contain the information required by Sections 19241, 19261, 19281, 19301 and 19321, as applicable, and in addition, as required by the Director,
- (1) description of the premises by photographs, floor plans, drawings or otherwise,
- (2) description of facilities by listings and photographs of stationary and mobile equipment,
- (3) description of the record keeping system that will be maintained to show purchase and sale transactions, inventory, payrolls, purchase and use of supplies and equipment and other related records as required,
- (4) personal fitness of the applicant and executive officers and employees.
- (c) A penalty fee of twenty—five dollars (\$25) shall be assessed upon all renewal applications that are not received by the Cashier on or before the expiration date of the license for which the renewal is required.

§ 1180.2. Change of Ownership.

- (a) Each licensee shall report to the Director any proposed change of ownership of the licensed business, including any proposed transfer of stock if the licensee is a corporation.
- (b) The licensed business of a sole proprietorship or partnership may not be operated under ownership differing from that registered with the Director in the application.
- (c) A corporate licensee may not exercise the privileges of the license under stock ownership differing from that registered with the Director in the application, unless the licensee has first notified the Director pursuant to subparagraph (a) and the Director has approved such operation following investigation consistent with Section 1180.1. This section does not apply to stock transfer made pursuant to the order of any court; provided, however, notice of each such transfer shall be given to the Director before the transfer is made.

§ 1180.3. Change of Executive Officers and Employees.

Each licensee shall report to the Director within 10 days each change of executive officers and management employees.

Article 37.1. Enforcement Fees for Renderers, Collection Centers, and Transporters of Inedible Kitchen Grease

§ 1180.3.1. Enforcement Fees.

Pursuant to sections 19227 and 19315 of the Food and Agricultural Code, effective January 1, 2008, the annual enforcement fees are set as follows:

- (a) The fee for rendering establishments shall be \$3,000.
- (b) The fee for collection centers shall be \$1,500, plus \$300 per vehicle, up to a maximum total of \$3,000 per collection center.
- (c) The fee per registered transporter of inedible kitchen grease shall be \$300 per single vehicle, not to exceed \$3,000 for 10 or more vehicles.
- (d) The Department shall reevaluate the fees in this regulation annually. Fees will be recalculated, if necessary, to cover the actual expenditures of the enforcement program based upon the prior—year revenue and expenditure budget report.

NOTE: Authority cited: Sections 407, 19227 and 19315, Food and Agricultural Code. Reference: Sections 19227, 19228 and 19315, Food and Agricultural Code.

HISTORY

- 1. New article 37.1 (sections 1180.3.1–1180.3.2) and section filed 7–1–2002; operative 7–31–2002 (Register 2002, No. 27).
- Amendment of first paragraph and subsections (a)–(c) filed 1–7–2008; operative 1–7–2008 pursuant to Government Code section 11343.4 (Register 2008, No. 2).

§ 1180.3.2. Method for Collection.

- (a) Every licensed rendering establishment, licensed collection center, and registered transporter of inedible kitchen grease shall submit the fees required pursuant to sections 19227 and 19315 of the Food and Agricultural Code, and section 1180.3.1, to the Department upon license or registration renewal.
- (b) Penalties for any late enforcement fees shall be assessed pursuant to sections 19227(c) and 19315(c) of the Food and Agricultural Code.
- (c) All enforcement fees must be submitted to the Department along with the following information:
 - (1) Name, address, and license number of the rendering plant;
 - (2) Name, address, and license number of the collection center;
- (3) Name, address, registration number, and number of transportation vehicles for transporters of inedible kitchen grease;
 - (4) Fee amount paid.

NOTE: Authority cited: Sections 407, 19227 and 19315, Food and Agricultural Code. Reference: Sections 19227, 19228 and 19315, Food and Agricultural Code.

HISTORY

1. New section filed 7-1-2002; operative 7-31-2002 (Register 2002, No. 27).

Article 38. Horsemeat and Pet Food Importers

§ 1180.4. Shipping Permits.

- (a) Each shipment of fresh or frozen meat, meat byproducts, horse-meat, horsemeat byproducts, poultry meat, or poultry meat byproducts for pet food imported into California must originate in an establishment under inspection of the Secretary or an approved state or local health agency and must be sealed at the point of origin under the supervision of the inspector in charge of the establishment. A permit for shipment must be secured from the Director, and each lot or shipment must be accompanied by a numbered certificate signed by the federal, state or local health agency inspector—in—charge showing:
- 1. Name, address, and number of the establishment where material originates.
- 2. All material was inspected and passed as fit for animal (pet) food by the United States Department of Agriculture, or an approved state meat inspection service, or an approved local health agency, and did not originate from animals that died other than by slaughter.
 - 3. The product has been denatured and the method of denaturing.
 - 4. The amount and type of product shipped.
 - 5. The product has been sealed and the seal number or numbers.
 - 6. The car or truck number of the vehicle hauling the product.
- The name and address of the pet food plant to which it is being shipped.
 - 8. The estimated date and time of arrival.
- 9. The permit number (from the California Department of Agriculture) of the shipment.
- 10. The dated signature of the Federal meat inspector, the state inspector, or the local health agency in charge at the plant of origin certifying to the above information as an official record.
- (b) When certificates are signed by a state or local health agency inspector, the inspector must be an employee of a state or local health agency which has requirements equal to those which are provided for in these regulations and such out-of-state requirements have been approved by the Director.
- (c) The certificate required by this section may be designed and printed by the shipper, but must be serial numbered with at least three sheets to a set and provide space for the required information. The Director may require a particular form if form submitted is not satisfactory.

- (d) Serially numbered seals, acceptable to the Director, shall be furnished by the shipper for use in sealing the product to be shipped into California. Such seals shall also bear the shipper's name and address or such other means of identification as approved by the Director and be of such manufacture that the seal is destroyed at the time of its removal.
- (e) Compliance with the requirements of this section does not relieve the shipper, importer, or other persons from the responsibility of complying with the applicable requirements of the Secretary concerning the labeling, reporting, certifying, denaturing, and handling of any product inedible by man which is moved in commerce.
- (f) The Director may refuse to permit any imported shipment to be used for pet food and require such shipment to be rendered pursuant to Section 1180.25 whenever he determines that there is a lack of documentation that such shipment meets all of the requirements of the Agricultural Code and this Group for use as pet food.

§ 1180.5. Equine Meat, Identification.

HISTORY

1. Repealer filed 5–7–97; operative 6–6–97 (Register 97, No. 19).

Article 39. Horse Slaughter for Human Food

§ 1180.6. Horse Slaughterer.

Every person engaged in the business of slaughtering horses for human food purposes shall comply with the requirements set forth in Article 23, Group 1, Subchapter 4, Title 3 of the California Administrative Code and other provisions of law and these regulations.

Article 40. Pet Food

§ 1180.7. Facilities and Conditions to Be Provided by Pet Food Slaughterers and Processors.

When required by the Director, the following facilities and conditions, and such others as may be essential to efficient conduct of inspection and maintenance of sanitary conditions shall be provided by each licensed establishment of a pet food slaughterer or processor.

- (a) Pet food slaughterers and processors shall comply with the following requirements of the United States Department of Agriculture Meat Inspection Regulations, Code of Federal Regulations, Title 9, Sections 307.1, 307.2 and 308.1–308.15.
- (b) The facilities for sewage disposal shall be approved by the county or city health officer.

HISTORY

- 1. Amendment filed 12–4–70 as an emergency; effective upon filing (Register 70, No. 49).
- Certificate of Compliance—Sec. 11422.1, Gov. Code, filed 1–21–71 (Register 71, No. 4).

§ 1180.8. Commingling of Foods.

HISTORY

1. Repealer filed 5-7-97; operative 6-6-97 (Register 97, No. 19).

§ 1180.9. Movement of Non-Denatured Products.

NOTE: Authority cited: Sections 407 and 19380, Food and Agricultural Code. Reference: Section 19384, Food and Agricultural Code.

HISTORY

1. Repealer filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1180.10. Possible Conditions.

- (a) The carcasses of animals affected with the following conditions may be used for pet food: anasarca, ocular squamous cell carcinoma (after removal of neoplastic tissue), emaciation, eosinophilic myositis, immaturity, nonseptic bruises and injuries (after removal of abnormal tissues), sarcosporidiosis, and unborn calves.
- (b) Any animal in an unconscious or dying condition or affected with any infectious or contagious disease or a condition specified in the Meat Inspection regulations of the Secretary or the Director that would render

Page 78

the meat unfit for food purposes shall be condemned and denatured so as to render it unfit for human or pet food.

§ 1180.11. Dead Animals.

No dead or unconscious animal shall be brought upon the premises of a pet food slaughterer except as provided for in Section 19342 of the Agricultural Code. In such case, the establishment shall immediately notify the state inspector or his area supervisor or the Chief of the Bureau by personal contact, or by telephone explaining the circumstances. If, upon consideration of the circumstances and examination of the carcass, the meat is found to be fit for pet food, it shall be so passed by the inspector. The licensee shall within 12 hours of receipt of the animal submit a written report to the inspector confirming the circumstances of the matter.

§ 1180.12. Labeling.

- (a) The immediate and master containers of all fresh or frozen meat, horsemeat, meat food product and meat by-products intended for sale as pet food shall be labeled to show:
 - (1) The common or usual name of the edible product;
- (2) The name and address of the packer or distributor, and when the name of the distributor is shown, it shall be qualified by such terms as "packed for," "distributed by," or "distributors;"
 - (3) A statement of the net weight of the product;
- (4) The establishment number of the establishment in which the product was processed in conjunction with the words "Processed in Establishment No.:"
- (5) A statement of ingredients, if the edible product is made up of two or more ingredients. Such ingredients shall be listed by their common or usual names in the order of descending proportion;
- (6) The words "Not For Human Food" or other wording required by the Secretary.
- (b) Four copies of each label used in licensed establishments shall be submitted to and approved by the Director before they are used.
- (c) A product consisting of two or more ingredients shall bear a list of the ingredients, giving the common or usual names of the ingredients arranged in order of their predominance.
- (d) Copies of each trade label submitted for approval pursuant to these regulations shall, when the Director requires, be accompanied by a statement showing the kinds and percentages of the ingredients comprising the edible product with respect to which the label is used. Approximate percentages may be given in cases where the percentages of ingredients may vary from time to time, if the limits of variation are stated.
- (e) False, deceptive or misleading statements, marks, brands or designs shall not appear on labeling material.
- (f) Each vehicle used for the transportation of fresh or frozen pet food, except a vehicle used as a substitute for a vehicle disabled en route, shall be clearly and legibly marked with the name, address and pet food slaughterer or processor's license number in letters not less than four inches in height on the left side of the cab or body.

Article 41. Transportation of Dead Animals

§ 1180.13. Transporting Dead Animals.

No person shall transport any dead animal to any place except to a place on his own premises for burial, to a licensed rendering plant, a licensed collection center, a state or county diagnostic laboratory or crematory. No dead animal may be unloaded at any place ineligible to receive such animal except that dead animals may be transferred from a wrecked, disabled transportation vehicle to another transportation vehicle for delivery to a licensed rendering plant, a licensed collection station, or a state or county diagnostic laboratory or crematory. No slaughterer shall pick up any dead animal pursuant to Section 19342 of the Agricultural Code unless he is licensed as a dead hauler.

In case a vehicle is disabled en route and the transporter of dead animals finds it necessary to unload the animals and reload them into an op-

erable vehicle, he shall report the transfer and facts by letter or telephone to the Secretary within five working days.

NOTE: Authority cited: Section 19380, Food and Agricultural Code. Reference: Section 19348, Food and Agricultural Code.

HISTORY

1. Amendment of section and new NOTE filed 5–7–97; operative 6–6–97 (Register 97, No. 19).

§ 1180.14. Restrictions on Hauling.

Dead haulers shall not load into any means of conveyance containing any dead animals, any other products, or other commodities.

§ 1180.15. Records.

Each dead hauler shall keep in a bound book, separate and distinct from all other records, serially numbered entries in ink which shall show as to all animals:

Date and time of pic	k up	
Name and address o	f person from which the animal(s)	
were obtained	· · · · · · · · · · · · · · · · · · ·	_
Species	Number	_
Breed		
Sex		
Name of person or f	irm whom delivered	
Time and date of de	livery	
	payment for the animal(s),	
given or received		

All such records shall be produced upon demand of the Director. The records shall be maintained for 1 year.

§ 1180.16. Skin Removal Prohibited.

No person shall buy, sell, possess, receive, or transport any dead animal from which the hide or skin has been removed unless the meat and meat byproducts from such dead animal has been denatured with crude carbolic acid or cresylic disinfectant as specified in Section 1180.34, or other agents or methods approved by the Director for denaturing such dead animals.

§ 1180.17. Vehicles Used in Hauling.

- (a) All vehicles and other means of conveyance used by dead haulers for transporting any dead animal shall be leakproof and so constructed of impervious material as to permit thorough cleaning and sanitizing and shall be equipped to assure the control of insects and odors and prevent the spread of disease. All vehicles which have been used for the transportation of dead animals shall be thoroughly cleaned and disinfected at the end of each day's operation during which the vehicle or other means of conveyance was used. The cleaning procedure shall include the complete removal from the means of conveyance of any fluid, parts or product of such dead animals.
- (b) Vehicles and other means of conveyance used for the transporting of dead animals shall be completely unloaded, cleaned and disinfected prior to any other use. Substances permitted for use as disinfectants are: (a) Liquefied phenol (U.S.P. strength 87 percent phenol in the proportion of at least six fluid ounces to one gallon water). (b) Cresylic disinfectant in the proportion of not less than four ounces to one gallon water. (c) Any other disinfectant approved by the Secretary.
- (c) Each dead hauler shall attach to his application for a license a list describing each vehicle used for the hauling of dead animals and photographs of each vehicle showing front, rear and views of both sides. The description shall include the make, size, and year manufactured and the license number of each vehicle. The Secretary shall be notified within 10 days whenever a vehicle is added to or removed from this function. A description of the vehicle added and required photographs shall be included with the report.

NOTE: Authority cited: Section 19380, Food and Agricultural Code. Reference: Sections 19321, 19350 and 19354, Food and Agricultural Code.

HISTORY

1. Amendment of subsections (b) and (c) and new Note filed 5–7–97; operative 6–6–97 (Register 97, No. 19).

§ 1180.18. Vehicle Identification.

Each vehicle used for the transportation of dead animals, except a vehicle used as a substitute for a vehicle disabled en route, shall be clearly and legibly marked with the name, address and transporter's license number on the left side of the cab or body. Nothing in this section shall prohibit a farmer from transporting his own dead animal in a vehicle not so identified to a licensed renderer, state or county diagnostic laboratory or crematory.

§ 1180.19. Premises.

Licensed premises of a dead hauler shall be maintained in such a manner that it does not create a public or animal health problem or nuisance. The Director may at any time require the licensee to obtain a certificate from the local health officer that the premises are being maintained in compliance with local health ordinances.

Article 42. Collection Centers and Facilities

§ 1180.20. Facilities.

NOTE: Authority cited: Sections 407 and 19380, Food and Agricultural Code. Reference: Sections 19302, 19322 and 19382, Food and Agricultural Code.

HISTORY

1. Repealer filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1180.21. Buildings and Facilities.

- (a) Collection centers shall be constructed in accordance with standards prescribed in Section T3–1180.20 and related sections in Title 24.
- (b) Collection centers shall be operated so buildings used for the temporary storage of animal carcasses, packing house wastes, and other products before transportation to a licensed rendering plant are kept clean and in good repair and maintained so as to be susceptible of being thoroughly cleaned and protected from the entrance or harboring of vermin.
- (c) Carcasses or packing house waste or containers of packing house waste unloaded at collection centers shall be unloaded in the holding building or on a slab of sufficient size to hold such material.
- (d) Slabs or aprons used as dead haul vehicle washing areas and floors of rooms in which carcasses and packing house wastes are received or stored shall be kept cleaned and maintained to permit runoff of water with no standing water. The drainage and plumbing systems shall be operated and maintained to permit the quick runoff of all water from buildings and disposal of such water to prevent a nuisance or health hazard.
- (e) The plumbing and drainage systems of collection centers shall be operated and maintained so all solid and liquid waste from the various cleaning operations, including sanitizing and washing vehicles used for hauling dead animals, and surface water around the center and the premises, shall be disposed in a manner as to prevent a nuisance or human or animal health hazard.

NOTE: Authority cited: Sections 407, 19380 and 19384, Food and Agricultural Code. Reference: Section 19384, Food and Agricultural Code.

HISTORY

1. Repealer and new section filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1180.22. Operations.

- (a) Carcasses and packing house waste shall be removed from collection centers as rapidly as possible and shipped only to licensed renderers.
- (b) Carcasses shall not be skinned prior to delivery to a licensed renderer unless the carcasses have been denatured with crude carbolic acid or cresylic disinfectant or other agents approved by the Director. The denaturant shall be applied by injection and must be deposited in all portions of the carcass before skinning the carcass to the extent necessary to preclude their use for food purposes. In such cases where skinning of carcasses is conducted at a collection center, all sales or transactions of meat or meat byproducts received at the collection center shall be to one rendering plant specified in the license application. Transporting of the meat and meat byproducts shall be made in trucks owned and operated by the licensed operator of the collection center, or of the one rendering plant specified to receive the material and who is licensed as required by Sec-

- tion 1180.1(a). The transportation from the collection center to the rendering plant shall be by the most direct route and there shall be no unloading or loading except at the collection center and at the one rendering plant specified. The transportation of the material shall in all respects be handled in the same manner and under the same restrictions as for the transportation of dead animals as specified in Article 41 (Sections 1180.13 to 1180.19, inclusive)of this Group. The Chief of the Bureau may approve other methods of supplying the denaturant before the carcasses are skinned when he finds that the methods will prevent the use of dead animals for food purposes.
- (c) Equipment which may be used for skinning, eviscerating, cutting up or processing meat shall not be brought into, or used, or stored in any collection center unless the licensed operator has been approved by the Director to skin carcasses that are denatured as specified in (b) of this section
- (d) All rooms, compartments, places, and equipment used for storing or handling any dead carcasses and/or packing house wastes shall be kept clean.

§ 1180.23. Vermin Control.

- (a) Every practicable precaution shall be taken to keep the storage building free of flies, birds, rats, mice and other vermin and dogs and cats and other pets.
- (b) Any condition within the immediate vicinity of any licensed establishment which may constitute an attractant, breeding place or harborage for rodents, insects and other pests shall be eliminated.

§ 1180.24. Records.

Each collecting center shall keep a record in ink. These records shall be kept for a period of one year in a bound book, separate and distinct from all other records, and shall be in the following form:

Serial Entry Number	
Enter date and time of pick i	ıp
Name and address of person were obtained	from which the animal(s)
Species	Number
Breed	
Sex	
Name of person or firm to w	hom delivered
Time and Date of delivery	
Amount and date of paymen given or received	
	duced upon demand of the Director

Article 43. Renderers

§ 1180.25. Separation from Other Businesses.

Every licensed rendering establishment shall be separate and distinct from any other nonlicensed establishment in which any meat or meat byproducts are handled and from any other nonlicensed business at the discretion of the Director.

§ 1180.26. Method of Rendering.

- (a) Only such methods of rendering shall be used as will produce products which are free of microorganisms which are pathogenic to man or animals. To this end, the Director may require the installation of recording devices such as recording thermometers and the taking of samples for laboratory examination. If such examinations reveal that the method of rendering used is not satisfactory, or if information on recording devices reveal that the rendering procedure is not satisfactory, or if recording devices are not installed when required, the Director may condemn the product so processed.
- (b) All recording devices shall record correctly the lowest and highest temperature of the material being rendered and the time of the rendering operation.
- (c) A record of each rendering operation shall be recorded by the renderer and retained for a period of one year.

Page 80

§ 1180.27. Vehicle Cleaning Area.

- (a) The vehicle cleaning area shall be constructed in accord with provisions of Section T3–1180.27 and related sections of Title 24, California Administrative Code.
- (b) The vehicle cleaning and sanitizing area shall be maintained and operated so that the waste from such operation is disposed in a manner as to prevent a nuisance or human or animal health hazard.
- (c) Vehicles shall be cleaned and sanitized with live steam or other suitable method.

NOTE: Authority cited: Sections 407, 19380, 19382 and 19384, Food and Agricultural Code. Reference: Sections 19382 and 19384, Food and Agricultural Code.

HISTORY

Repealer and new section filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1180.28. Cans and Other Receptacles.

Watertight cans and other receptacles used for holding industrial or packing house wastes being transported to the rendering establishment shall be so constructed as to be readily cleaned and they are to be cleaned and sanitized after each use. Cans and other receptacles found to be uncleaned and unsanitized after each use or in such state of disrepair that they cannot be readily cleaned and sanitized or which are not watertight

shall be tagged "reject" by any Bureau of Meat Inspection employee when found in such condition. Such tagged receptacles shall not be used again by the rendering company until they are brought into compliance and the reject tag is removed by a bureau employee. Any product placed in such unclean cans or receptacles shall be condemned. If it cannot be accurately determined which product was placed in such cans or receptacles, all products which could have been so placed shall be condemned.

§ 1180.29. Removal Permit.

Carcasses, meat, meat byproducts, meat food products, horsemeat and horsemeat byproducts shall be promptly rendered and shall not be removed from rendering establishments or their premises except on special permit from the Director and under the condition he may prescribe to prevent the improper use of such products.

§ 1180.30. Records.

Each renderer shall keep in a bound book, separate and distinct from all other records, serially numbered entries in ink which shall show as to all animals:

Name and address of	of person from which the animal(s)
were obtained	
Species	Number

[The next page is 81.]

Breed				 		
Sex _						
A	 -1	1.	- 6		- 1	

Amount and date of payment for the animal(s), given

or received

All such records shall be produced upon demand of the Director. The records shall be maintained for one year.

Article 44. Retaining and Rejecting

§ 1180.31. Retaining and Condemning Products.

(a) Any meat, meat byproduct, meat food product, horsemeat, horsemeat byproducts or horsemeat food product which is slaughtered, prepared, handled, or transported under authority of these regulations shall be inspected as often as the Director deems it necessary in order to ascertain whether such product is adulterated or is otherwise not in compliance with law or regulations. Upon any such inspection, if any such product or portion thereof is found to be adulterated or not in compliance, such product or portion thereof shall be condemned. If the violation is minor in nature and the Director determines that the risk of diversion of the product is not substantial the Director may, upon request of the licensee in writing, permit the salvaging of the product which is subject to condemnation. In such cases the product shall be tagged with a retained tag and the owner notified of such tagging and the Director shall make necessary arrangements with the owner so that an employee of the Bureau of Meat Inspection may be present when the product so tagged is to be processed for salvage or otherwise handled. No tagged product shall be handled or moved unless the tag is removed by an employee of the Director or permission is obtained from the Director allowing movement under permit and seal to a point where the product can be reprocessed or otherwise handled. Reprocessing shall only be done in an establishment licensed by either the Department of Public Health or the Director.

(b) Condemned product shall be denatured so as to render it unfit for human or pet food.

§ 1180.32. Tagging Reject.

All rooms, compartments, facilities, vehicles, or equipment found to be unclean or not so constructed or equipped, as required by law and these regulations shall be tagged "reject" and such tagged rooms, compartments, facilities, or equipment shall not be used until they are cleaned, sanitized or so repaired as to bring them into compliance and the tag is removed by the Director. The Director, upon finding any such violation, may, in lieu of tagging specific equipment or facilities, prohibit the operation of the entire facility until the defect is corrected and the Director has reinspected the facilities and equipment and permitted the resumption of operations.

§ 1180.33. Slaughtering of Animals for Zoo Use.

(a) When the Director finds that there is no ready supply of raw animal meat available for use in the feeding of zoo animals, he may, after investigation of the slaughtering facilities, exempt the licensed slaughterer from specific provisions of these regulations under condition which will not conflict with the purposes of Chapter 5 (commencing with Section 19200) of Part 3 of Division 9 of the Agricultural Code. Providing: That such slaughterer notifies the Chief of the Bureau as to where and at what time each animal is to be slaughtered and that such slaughtering and handling is conducted in such a manner that it does not create a public nuisance and all meat or horsemeat resulting from such slaughter is moved immediately (on the same day) after slaughter to the zoo. No meat from such slaughtering operation shall be used for any other purpose than for sale to a zoo. Each such slaughterer shall keep in a bound book, separate and distinct from all other records, serially numbered entries in ink which shall show as to all animals:

Date and time of j	oickup
Name and address	of person from which the animal(s)
were obtained	
Species	Number

Breed
Sex
Name of person or firm to whom delivered
Amount and date of payment for the animal(s), given or
received

Receipt of delivery from zoo to whom the animal was sold shall be attached.

All such records shall be produced upon demand of the Director. The records shall be maintained for one year. Any such operation shall be approved by the local health officer in writing at least every 90 days.

Article 46. Denaturing

§ 1180.34. Meat Inedible by Humans—Identification.

- (a) Horsemeat, horsemeat byproducts, meat, meat byproducts, meat food product, or raw animal fat which have been condemned for human and pet food, or meat or meat byproducts from dead animals, or meat or meat byproducts which have not been prepared in an establishment under State or Federal Meat Inspection, or in an establishment licensed to manufacture or process pet food in accordance with this Group shall be, if more than four inches in diameter, freely slashed, and immediately thereafter one of the following approved denaturing agents, unless certain agents are specified elsewhere in this Group, shall be liberally applied to all surfaces of such meat and products, whether or not slashed: Crude carbolic acid, Cresylic disinfectant, or No. 2 fuel oil.
- (b) Horsemeat, horsemeat byproducts, meat, meat byproducts, meat food products, or raw animal fat which are to be used for pet food unless identified and handled in accordance with Section 1180.13 shall be, if more than four inches in diameter, freely slashed and immediately thereafter one of the following denaturing agents shall be liberally applied to all surfaces of such meat and products, whether or not slashed:
 - (1) (A) Unrefined (malodorous) fish oil.
- (B) Federal Food, Drug, and Cosmetic Act Green No. 3 coloring, FD&C Blue No. 1 coloring, FD&C Blue No. 2 coloring, or FD&C Violet No. 1 coloring used separately or in combination with a formula consisting of one part dye to 40 parts by weight of water, 40 parts liquid detergent and 40 parts oil of citronella. This concentrate is further diluted by using one part concentrate to 32 parts of water.
 - (C) Any other agent approved by the Chief of the Bureau.
 - (2) Provided however:
- (A) That, if the meat, meat byproduct, or meat food products or raw animal fat are in small pieces (four inches in diameter or less) slashing will not be necessary.
- (B) That tripe may be denatured by dipping it in a six percent solution of tannic acid for one minute followed by immersion in a water bath, then immersing it for one minute in a solution of .002 percent FD&C Yellow No. 5 coloring.
- (C) That meat may be denatured by dipping it in a solution of .625 percent tannic acid followed by immersion in a water bath, then dipping it in a solution of .625 percent ferric acid (ferric acetate); and
- (D) That when the meat, meat byproduct, or meat food product is ground, four percent by weight of coarsely ground hard bone uniformly incorporated with the meat or product may be used in lieu of the agents prescribed above. The size of bone shall be no less than the opening size for No. 5 mesh (U.S. Bureau of Standards).
- (3) Rendered animal fat derived from inedible or condemned materials and possessing the physical characteristics of color, odor, and taste of an edible product shall be denatured to effectually distinguish it from an edible product either with low grade offal during the rendering or by adding to, and mixing thoroughly with, such fat denaturing oil, No. 2 fuel oil, or brucine dissolved in a mixture of alcohol and the pine oil or oil of rosemary.
- (4) In addition to the application of the denaturing agents listed in subparagraphs (1), (2), and (3) above, such meat or product shall be properly identified such as "Beef not for Human Consumption—Denatured with

Page 81 (4-1-90)

- _____," bear a true and correct statement of the net weight and the name and address of the processor or manufacturer.
- (5) The application of any of the denaturing agents listed in (a) or (b) of this section to the outer surfaces of molds or blocks of boneless meat, meat byproducts, or meat food products shall not be considered adequate. The denaturing agent must be mixed intimately with all of the material to be denatured and must be applied in such quantity and manner that it cannot easily and readily be removed by washing or soaking. A sufficient amount of the chosen denaturant of subparagraphs (1) or (2) of paragraphs (b) shall be used to give the meat, meat byproduct, raw animal fat, or rendered animal fats and oils, a distinctive color, odor or taste so that such material cannot be confused with an article of human food.
- (c) All denaturing shall be done immediately upon condemnation of the meat or product, or in the case of (b) of this section, immediately after the meat or product is prepared.

Article 47. Hours of Operation and Overtime

§ 1180.35. Hours of Operation.

Each owner of a pet food slaughtering establishment or pet food processing establishment shall advise the Director, in writing, their establishment's regular schedule work days and time of operation. Any deviation from this schedule shall be approved by the area supervisor or the Chief of the Bureau prior to the deviation.

§ 1180.36. Overtime Work of Bureau Employees.

The management of a licensed establishment desiring to work under conditions which will require the services of an employee of the Bureau on any Saturday, Sunday, or holiday, or for more than eight hours on any other day, shall sufficiently in advance of the period of overtime, request the inspector to furnish inspection service during such overtime period, and shall pay the Director therefor an amount sufficient to reimburse the Department for the cost of the inspection services so furnished. The request shall provide that if the overtime charge is not paid within 10 days of billing therefor, the Director may bring an action for collection of such fees, including attorney fees and other costs of collection. A minimum charge for four hours work time shall be assessed the establishment in cases when the time worked by the inspector is less than four hours. Failure on the part of an establishment to pay overtime fees within 10 days after they have been billed for such fees shall be sufficient cause for the Director to refuse to furnish further overtime inspection.

Article 48. General Provisions

§ 1180.37. Licensing Provisions.

- (a) During the period of 60 days following the adoption of this Group, the Director may issue licenses pursuant to this Group to persons who on the date of adoption were engaged in a business required to be licensed hereunder and whose facilities did not meet all of the standards so required; provided, however, the Director shall require the applicant to agree to time-phased plans for meeting said facility standards within 6 months from the date of issuance of the license. Any license so issued shall be conditioned upon time-phased compliance, which may include dates for the following: submission of plans, contracts for construction and approvals of government officials concerned, start of construction and satisfactory continuance of construction, periodic inspections and approvals during construction and final inspection and approval. If the Director finds the licensee has failed to comply with any such condition he may, upon notice, take action to withdraw the privileges of the license.
- (b) The licensing provisions of this Group 3 shall not apply to a retail store which (1) repacks for sale at the retail store properly labeled and denatured fresh or frozen pet food into properly labeled consumer sized containers or (2) sells at retail properly labeled pet food made at the retail store entirely from nonadulterated meat and meat byproducts.

- (c) The Director may require any person licensed or seeking a license under this Group 3 to provide to him statements under penalty of perjury concerning any operation authorized by the license or violation of law or regulations. If the statements do not adequately deal with the matter, the Director may require further statements under penalty of perjury as to such additional matters. Failure of the licensee to provide the Director with such statements and any supporting documents or materials called for shall be grounds for disciplinary action against the license, and where further violations may be introduced, from preventing operation of the licensed facility.
- (d) Notwithstanding any other provisions of this Group 3, whenever there is reason to believe a product has not been handled in accordance with laws and these regulations, the Director may stop the operation involved, hold the product, and require the operator, licensee or person in possession to show such compliance, and failing the showing of such compliance, the Director may condemn the product and require the operator, licensee or person in possession to pay the cost of such condemnation.

§ 1180.38. Inspection of Raw Product on Request of Horsemeat and Pet Food Importers.

- (a) The Director will provide inspection of raw product in the possession of persons holding a license as a horsemeat and pet food importer pursuant to Sections 19280 et seq. of the Food and Agricultural Code under the following conditions:
 - (1) Facilities and inspection personnel are currently available.
 - (2) The product is readily accessible to Department personnel.
- (3) A charge, equal to the cost of inspection, is paid by the licensee for the inspection. The Director may require that an advance deposit for such inspection be made based upon his estimate of the resulting charge.
- (b) Such inspection shall be limited to determining whether the product at the time and place of inspection is acceptable for processing into or use as pet food. The Department will conduct such tests and procedures as are determined suitable in the particular case. A determination that the product at the time of testing is acceptable shall not be a bar to the Department's determination at a later time that the product is no longer acceptable.

Such product shall at all times be subject to inspection as provided in Section 1180.31.

HISTORY

- 1. New section filed 1–25–72 as an emergency; effective upon filing (Register 72, No. 5).
- 2. Certificate of Compliance filed 3-10-72 (Register 72, No. 11).

§ 1180.39. Disposal of Parts or Products of Animals Not Intended for Use as Human Food.

Any parts or products of animals disposed of by inspected establishments, retail stores, custom slaughterers and custom processors and which are not intended for use as human food shall be disposed of through licensed renderers, licensed pet food processors, licensed collection centers or other method approved by the Director.

 $Note: Authority\ cited: Sections\ 407, 19380, 19383\ and\ 19384, Food\ and\ Agricultural\ Code.$ Reference: Sections 19200–19444, Food\ and\ Agricultural\ Code.

HISTORY

1. New section filed 1–13–78; effective thirtieth day thereafter (Register 78, No. 2).

§ 1180.40. Permit for the Removal of Inedible or Condemned Meat and Poultry Products.

Every establishment under federal or state meat or poultry inspection disposing of inedible or condemned material from the premises shall obtain a permit from the Director of Food and Agriculture.

The application for a permit shall be in a form which is prescribed by the Director and shall contain the following:

1. The name and address of the licensed renderer, licensed pet food processor, licensed collection center, mink farm or specify another approved method of disposal of the inedible or condemned material.

Page 82 (4-1-90)

2. The name of the transportation company that will transport the material.

The Director may refuse or revoke a permit if it is found that the inedible or condemned material has not been disposed of in accordance with all applicable laws and regulations. The permittee shall notify the Director of any changes in the information contained in the application for the

The Director may suspend the permit without hearing upon determining that the permittee has violated the provisions of this Article and that there is good reason to believe such violation is continuing, pending the filing of an accusation and hearing thereon. The accusation shall be filed within fifteen days of the suspension.

HISTORY

1. New section filed 1–13–78; effective thirtieth day thereafter (Register 78, No. 2).

§ 1180.41. Registration of Transporters.

Transporters of parts or products of animals, which are not intended for use as human food, including those operating under public authority, shall register with the Director the destination and method of disposal of the inedible and condemned material.

Vehicles and containers used by transporters shall be kept clean.

HISTORY

1. New section filed 1-13-78; effective thirtieth day thereafter (Register 78, No.

Chapter 5. Poultry Inspection

Subchapter 1. General Provisions

Article 1. Definitions

§ 1200. Definitions.

For the purpose of these regulations the following words, phrases, names, and terms shall be construed respectively to mean:

- (a) Bureau. The Bureau of Meat Inspection of the California Department of Agriculture.
- (b) Bureau Employee. An employee of the Bureau of Meat Inspection who is authorized by the chief of the bureau to do any work or perform any duty in connection with plant sanitation or poultry meat inspection.
- (c) Condition. Any condition, including, but not being limited to, the state of preservation, cleanliness, or soundness of any product; or any condition, including but not limited to, the processing, handling, or packaging which affects such product.
 - (d) Department. The California Department of Agriculture.
- (e) Dressed Poultry. Poultry which has been slaughtered for human food with head, feet, and viscera intact and from which the blood and feathers have been removed.
- (f) Edible Poultry By-products. Any giblets or any edible part of dressed poultry other than eviscerated poultry.
- (g) Free From Protruding Pinfeathers and Hair. Pinfeathers and vestigial feathers (hair or down as the case may be) have been removed so that the carcass is free from protruding pinfeathers and vestigial feathers which are visible to a poultry meat inspector or bureau employee during an examination of the carcass at normal operating speed. However, a carcass may be considered as free from protruding pinfeathers or vestigial feathers if it has a generally clean appearance (especially on the breast) and if not more than an occasional protruding pinfeather is in evidence during a more careful examination of the carcass.
- (h) Giblets. The live from which the bile sac has been removed, the heart from which the pericardial sac has been removed and the gizzard from which the lining and contents have been removed: provided, that each such organ has been properly trimmed and washed.

- (i) Immediate Container, or True Container. The unit, can, pot, tin, or other receptacle or covering in which any poultry meat or product is customarily packed or shipped.
- (j) Inspected and Condemned, or Any Authorized Abbreviation Thereof. That the poultry carcasses, parts of carcasses, poultry meat products or poultry meat food products so designated have been inspected by a poultry meat inspector or bureau employee and found to be unsound, unhealthful, unwholesome, or otherwise unfit for human food.
- (k) Inspected for Wholesomeness Under Supervision of the California Department of Agriculture, or Any Authorized Abbreviation Thereof. That the poultry or poultry meat, poultry meat products, or poultry meat food products so marked have been inspected under these regulations, and that at the time they were inspected and so marked they were free from:
 - (1) Physical evidence of disease injurious to human health;
- (2) Pathological conditions which have rendered or would render the poultry meat unsuited for human food;
 - (3) Serious destruction of the flesh by disease or injury; or
 - (4) Contamination by any substance injurious to human health.
- (1) Inspection Mark. A mark or statement, authorized by these regulations, on a product or on the container of a product, indicating that the product has been inspected for wholesomeness by an inspector.
- (m) Inspector. Poultry meat inspector who has been issued a valid license by the Director to inspect poultry meat for wholesomeness.
- (n) Official Plant. Any premises licensed by the department where poultry is slaughtered or otherwise prepared for food purposes, cannery, factory or similar place, where state inspection is maintained under these regulations.
- (o) Potable Water. Water which is free from disease producing organisms and injurious chemicals. It does not possess obnoxious tastes or odors, and is not turbid or colored to a degree that it is rendered repugnant to the consumer. Standards of tests to be used in determining potability shall be the same as the standards of the State Department of Public Health.
- (p) Poultry. Domestic fowl and domesticated rabbit to be used for human food. "Fowl" includes chickens, turkeys, ducks, geese, and other domesticated birds.
- (q) Poultry Meat Food Product. Any article of food, or any article intended or capable of being used as human food which is derived or prepared, in whole or in substantial and definite part from any portion of poultry.
- (r) Product. Dressed poultry, ready-to-cook poultry, edible poultry by-product and poultry meat food product.
- (s) Ready-to-Cook Domestic Rabbits. Any domestic rabbit which has been slaughtered for human food, from which the head, blood, skin, feet, and inedible viscera has been removed, that is ready to cook without need of further processing, or any cut-up or disjointed portion of such domestic rabbit.
- (t) Ready-to-Cook Poultry. Any dressed poultry which is free from protruding pinfeathers, vestigial feathers (hair or down as the case may be), and from which the head, shanks, crop, preen gland, trachea, esophagus, entrails, reproductive organs and lungs have been removed, and with or without the giblets, is ready to cook without need of further processing. Ready-to-cook poultry also means any cut-up or disjointed portion of poultry prepared as described in this paragraph.
- (u) Regulations or These Regulations. Regulations contained in Subchapter 5, Chapter 2, Title 3, of the California Administrative Code.
- (v) Retained for Further Inspection. That each carcass, including all parts thereof so marked or identified, is held for further examination by an inspector or bureau employee to determine its disposal.
- (w) Shipping Container, or Outside Container. The box, bag, barrel, crate, or other receptacle or covering inclosing any product packed in one or more immediate or true containers.
- (x) Soundness. Freedom from external evidence of any disease or condition which may render a carcass unfit for food.

Page 83 (4-1-90) (y) Major Reconstruction. Major reconstruction shall be construction other than that associated with normal or routine maintenance activities. NOTE: Authority cited for Subchapter 5: Sections 407, 24561, 24562, 24563, 24681 and 24991, Agricultural Code. Reference: Section 24651–25151, Agricultural Code.

HISTORY

- New Subchapter 5 (§§ 1200 through 1272) filed 5–31–56; designated effective July 1, 1956 (Register 56, No. 10).
- 2. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2)
- 3. Amendment of subsections (a) and (b) filed 1–9–70; effective thirtieth day thereafter (Register 70, No. 2).

Article 2. Applicability of Regulations

§ 1201. Applicability of Regulations.

Unless inapplicable, the provisions of these regulations shall apply equally to domesticated fowl and domesticated rabbit used for human food

Article 3. Scope of Inspection

§ 1202. Scope of Inspection.

- (a) Every poultry plant in which poultry is slaughtered, dressed, or drawn, or in which poultry meat, poultry meat by–products, or poultry meat food products of, or derived from poultry, is wholly or in part cut up, recut, packed or repacked, canned, cooked, cured, smoked, salted, rendered, or otherwise prepared, which are capable of being used as food for man, shall have inspection under these regulations as provided by Division 3, Chapter 3, Articles 1 and 2 of the Agricultural Code.
- (b) All poultry and all poultry meat, and products entering a plant at which inspection is required by these regulations, and all products prepared, in whole or in part, therein, shall be inspected, handled, prepared, marked and labeled as required by these regulations.

HISTORY

1. Subsection (c) expired by own terms (Register 72, No. 51).

Article 4. Organization of Force

§ 1203. Appointments: Promotions.

Poultry inspection is conducted under the direction of the Director of Agriculture through the Bureau of Meat Inspection. All permanent bureau employees engaged in the work of poultry meat inspection and poultry plant sanitation inspection are appointed upon certification of the State Personnel Board that they have passed the examination prescribed by that board. Promotions are made on the basis of efficiency, deportment, and length of service.

HISTORY

1. Amendment filed 1-9-70; effective thirtieth day thereafter (Register 70, No. 2).

Article 5. Application for Poultry Plant License

§ 1204. Licensing: Poultry Plant.

(a) The director may disapprove application for initial license if it is determined after inspection that the plant facilities or procedures are of an insanitary nature.

The director may also disapprove application for initial license if the plant involved has been constructed without prior approval of plans and does not conform with these regulations.

(b) The application for license, accompanied by the fee of \$40 prescribed by law, shall be remitted by cash, check or money order, and shall be mailed, paid or delivered to: Cashier, State Department of Agriculture, 1220 N Street, Sacramento 95814, California.

- (c) In cases of change of ownership or change of location, a new application and fee shall be submitted.
- (d) The form used for making application shall be provided by the Director of Agriculture.

HISTORY

 Amendment of subsection (d) filed 1-9-70; effective thirtieth day thereafter (Register 70, No. 2).

§ 1205. Approval: Plans, Information to Be Furnished, Subsidiary Plants, Notice of Approval and Granting of License.

- (a) Triplicate copies of complete plans, not necessarily blue prints, with specifications, consisting of floor plans showing the locations of such features as the principal pieces of equipment, route of edible products and inedible viscera, floor drains, principal drainage lines, hand washing basins, and hose connections for cleanup purposes; roof plans; elevations; cross and longitudinal sections of the various buildings, showing such features as principal pieces of equipment, heights of ceilings, conveyor rails, and character of floors and ceilings; and a plot plan showing such features as the limits of the plant's premises, locations in outline of buildings on the premises, cardinal points of the compass and roadways and railroads serving the plant, properly drawn to scale, shall be submitted for any intended new construction or major reconstruction. The source of water, and official results of test for potability by the State Department of Health, or from an agency or laboratory approved by the State Department of Health, or laboratory of the department shall be submitted. Persons intending construction or major reconstruction may request information from the Bureau of Meat Inspection, 1220 "N" Street, Sacramento, California 95814, concerning the requirements before submitting plans.
- (b) Each application shall specify the names, addresses, and forms of organization of subsidiaries for which a license is requested to do any business described in Section 1202.
- (c) Notice in writing shall be given to each applicant granted approval and license, specifying the plant to which the same applies.

HISTORY

- 1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).
- Amendment of subsection (a) filed 1-9-70; effective thirtieth day thereafter (Register 70, No. 2).

Article 6. Official Numbers and Compliance with Regulations

§ 1206. Official Numbers: Subsidiary Plants.

- (a) To each plant granted a license an official number shall be assigned. Such number shall be used to identify all poultry meat and products prepared in the plant. More than one number shall not be assigned to a plant.
- (b) Two or more official plants under the same ownership or control may be granted the same official number, provided a serial letter is added in each case to identify each plant and the products thereof.
- (c) No poultry meat or products shall be handled or prepared in an official plant for a subsidiary of the proprietor or operator, nor shall any article handled or prepared therein be sold by or in the name of a subsidiary of the proprietor or operator, unless such subsidiary is named in an application of the plant, for approval and license, and is granted license in such plant, under these regulations.
- (d) Each official plant shall be separate and distinct from any nonlicensed plant in which any product is handled, and from any other nonlicensed plant, at the discretion of the chief of the bureau.

§ 1207. Drawings and Specifications to Be Furnished in Advance of Construction.

Triplicate copies of drawings and specifications complete as contemplated in Section 1205 of these regulations for major reconstruction of official plants and for new structures shall be submitted to the Bureau of Meat Inspection, California Department of Agriculture, 1220 "N" Street,

Page 84 (4-1-90)

Sacramento, California 95814 and approval obtained for the plans in advance of construction.

HISTORY

- Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).
- 2. Amendment filed 1-9-70; effective thirtieth day thereafter (Register 70, No. 2).

§ 1208. Compliance with Regulations.

- (a) Each licensed plant shall adopt and enforce all measures necessary for carrying out the purposes of these regulations as the chief of the bureau may prescribe.
- (b) For the purpose of any examination or inspection necessary to enforce any of the provisions of these regulations, bureau employees shall have right of access at all times, by day or night, whether the plant is operating or not, to every part of any official plant under their jurisdiction.
- (c) No person shall resist, intimidate, delay, obstruct, hamper, abuse, or interfere with any bureau employee in the discharge, or attempt to discharge any duty of his office, nor shall any person attempt by means of any bribe, threat, or violence to deter or prevent any bureau employee from performing his duty.

Article 7. Buildings and Plant Facilities

§ 1209. Construction of Buildings.

HISTORY

1. Repealer filed 6-4-85; effective thirtieth day thereafter (Register 84, No. 23).

§ 1210. Construction and Use of Poultry Processing Plants.

General Requirements.

- (a) Construction requirements for poultry processing plants, including requirements for separate rooms for processing operations, are provided in Title 24, California Administrative Code, Section T3–901 et seq., and related provisions.
- (b) The plant shall be operated in accordance with the plan design for facility use, unless specific permission for deviation is obtained from the director.
- (c) The plant shall be maintained in a sanitary manner and all operations shall be performed in a sanitary manner. Specific use and sanitation requirements include the following:
- (1) Live poultry and edible product shall not be held or slaughtered in any room where inedible product is held. Rooms and compartments in which any poultry, meat, or product is prepared or handled shall be kept free from dust and odors from dressing and toilet rooms; catch basins; pelt rooms; inedible tank and fertilizer rooms; and holding, feeding, and receiving rooms.
- (2) The following two operations shall be conducted only within separate rooms conforming with plant construction requirements: killing, scalding, roughing, finishing, pinning and/or skinning operations; and pinning, finishing, chilling and packing operations for dressed poultry.
- (3) Final pinning of dressed poultry and chilling and packaging of edible products may not be performed in the eviscerating room.
- (4) Separate rooms, or other adequate facilities suitable to the operations, shall be maintained in eviscerating plants and in other plants where accumulation of refuse occurs. In no case shall receiving or feeding of live fowl be permitted in rooms in which eviscerating operations are performed.

NOTE: Authority cited: Sections 407, 24561, 24562 and 24681, Food and Agricultural Code. Reference: Sections 24749, 24771 and 24772, Food and Agricultural Code.

HISTORY

1. Repealer and new section filed 6–4–85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1211. Floors, Walls, Ceilings, Etc.

(a) The floors, walls, and ceilings in a poultry plant shall be constructed in accordance with standards prescribed in Section T3–903 and related sections of Title 24, California Administrative Code.

§ 1214

(b) Poultry plants shall be operated and maintained in a manner to keep floors, walls, and ceilings and other parts of all compartments in good repair and susceptible of being readily and thoroughly cleaned.

NOTE: Authority cited: Sections 407, 24561, 24562 and 24681, Food and Agricultural Code. Reference: Sections 24741–24750, 24771 and 24772, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).
- 2. Repealer and new section filed 6–4–85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1212. Blood Disposal.

- (a) Adequate facilities shall be provided for the disposal of blood in a sanitary manner.
- (b) When bleeding troughs are used they shall be long enough to catch the blood during the bleeding process and shall be cleaned daily. Such troughs shall be installed so as to pitch at least one-half inch per foot toward a smooth metal catch basin or basins, of sufficient capacity for a day's operation at peak production, or shall be flushed continuously.

§ 1213. Draining and Plumbing.

- (a) Draining and plumbing systems in a poultry plant shall be constructed in compliance with the standards in Title 24, California Administrative Code.
- (b) The plant shall be operated and maintained in a manner to permit the quick runoff of all water from the plant buildings and surface water around the plant premises, and disposal of all such water in a manner to prevent stoppage and surcharging of the sewage system and generally to prevent a nuisance or sanitation hazard for the plant or surrounding area. NOTE: Authority cited: Sections 407, 24561, 24562 and 24681, Food and Agricultural Code. Reference: Sections 24741–24750, 24771 and 24772, Food and Agricultural Code.

HISTORY

Repealer and new section filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1214. Water Supply.

- (a) The water supply shall be ample, clean and potable, with adequate facilities for its distribution in the plant and its protection against contamination and pollution.
- (b) Every plant shall make known and, whenever required, shall afford opportunity for inspection of the source of its water supply, the storage facilities, and the distribution system.
- (c) Equipment using potable water shall be so installed as to prevent back-siphonage into the potable water system.
- (d) Nonportable water is permitted only in those parts of an official plant where no edible product is handled or prepared, and then only for limited purposes such as on refrigerating condensers not connected with the potable water supply, in vapor lines serving inedible products rendering tanks, in connection with equipment used for lashing and washing inedible products preparatory to tanking and in sewer lines for moving heavy solids in the sewage.
- (e) Nonpotable water is not permitted for washing floors, areas, or equipment involved in trucking materials to and from edible products departments, nor is it permitted in poultry scalding vats, mechanical pickers or for clean—up of shackling areas, bleeding area or runways within the slaughtering department.
- (f) In all cases nonpotable water lines shall be clearly identified and shall not be cross—connected with the potable water supply unless this is necessary for fire protection and such connection is of a type with an adequate break to assure against accidental contamination, and is approved by local authorities and by the chief of the bureau.
- (g) Inspectors may permit the reuse of water in vapor lines leading from deodorizers used in the preparation of edible products and in equipment used for chilling of canned products after retorting, provided the re-

Page 85 (4-1-90)

use is for the identical original purpose and the following precautions are taken to protect the water that is reused:

- (1) All pipelines, reservoirs, tanks, cooling towers, and like equipment employed in handling the reused water are so constructed and installed as to facilitate their cleaning and inspection.
- (2) Complete draining and disposal of the reused water, effective cleaning of equipment, and renewal with fresh, potable water is accomplished at such intervals as may be necessary to assure an acceptable supply of water for the purpose intended.
- (3) Effective chlorination (not less than approximately one part per million of residual chlorine at any point within the cooling system) of the reused water utilized for cooling any canned product is maintained, but with the understanding that chlorination alone is not to be relied upon entirely or to be accepted in lieu of the requirements listed in subparagraph (1) and (2) of this paragraph.
- (h) An ample supply of water at not less than 180°F, shall be furnished when used for sanitizing purposes. Whenever necessary to determine compliance with this requirement, conveniently located thermometers shall be installed to show the temperature of the water at the point of use as the chief of the bureau may direct. An adequate supply of hot water for cleaning purposes shall be available.
- (i) Hose connections with steam and water mixing valves or hot water hose connections shall be provided at convenient locations throughout the plant for cleaning purposes.
- (j) Before chemicals, drugs, or antibiotics may be added to potable water used in the processing of poultry, the chief of the bureau must be notified in order that facilities, procedures and acceptable labeling material can be checked and approved.

HISTORY

1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).

§ 1215. Sanitary Facilities and Accommodations: Specific Requirements.

- (a) Dressing rooms, toilet rooms, lavatories, and urinals shall be constructed in accordance with standards prescribed in Sections T3–906 and related sections of Title 24, California Administrative Code.
- (b) The plant shall be operated so that dressing rooms, toilet rooms, and urinals are maintained sufficient in number, ample in size, and conveniently located. They shall be separate from the rooms and compartments in which products are prepared, stored, or handled. Depending upon limited size and characteristics of operations conducted by the plant, other facilities may be used in place of dressing rooms. Such facilities shall be so maintained that their presence and use does not interfere with the sanitary operation of the plant.

NOTE: Authority cited: Sections 407, 24561, 24562 and 24681, Food and Agricultural Code. Reference: Sections 24741–24750, 24771 and 24772, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2)
- Repealer and new section filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1216. Lighting and Ventilation.

- (a) Lighting and ventilation requirements of a poultry plant shall be provided in accordance with Section T3–907 and related sections of Title 24, California Administrative Code.
- (b) Lighting fixtures and windows shall be maintained and operated to provide adequate lighting to ensure sanitary conditions.
- (c) Ventilation equipment shall be maintained and operated to eliminate objectionable odors and minimize moisture condensation to ensure sanitary conditions.

NOTE: Authority cited: Sections 407, 24561, 24562, 24681 and 24991, Food and Agricultural Code. Reference: Sections 24561, 24562, 24749, 24771 and 24772, Food and Agricultural Code.

HISTORY

Repealer and new section filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1217. Equipment and Utensils to Be Easily Cleaned: Those for Inedible Products to Be Marked.

- (a) Equipment and utensils used for preparing, processing, and otherwise handling any product shall be of such materials and construction so as to permit thorough cleaning and such as will insure strict cleanliness in the preparation and handling of all products. So far as is practicable, such equipment shall be made of metal or other approved impervious material. Trucks and receptacles used for inedible materials shall be of similar construction and shall bear some conspicuous and distinctive mark, and shall not be used for handling edible products.
- (b) Live poultry holding pens shall be so constructed as to permit proper cleaning.
- (c) Batteries should be constructed entirely of metal and have metal dropping pans so as to permit proper and complete washing and cleaning. All batteries shall be replaced with batteries constructed of metal or other suitable, impervious material whenever replacement becomes necessary.
- (d) Metal refuse containers with covers shall be provided, and such containers shall be kept covered.
- (e) Chilling vats or tanks used for chilling dressed poultry shall be made of metal or other hard–surfaced impervious material.
 - (f) Ice shovels shall be smooth surfaced and made of metal.
 - (g) Scalding Equipment.
- (1) Scalding equipment, tank or spray type, shall be made of metal and have a smooth surface, and be of such construction as to permit proper and complete washing and cleaning.
- (2) The scalding tanks, when used, shall be constructed as to prevent contamination of potable water lines and to permit water to enter continuously at the rate of 1/4 gallon per bird per minute and to flow out through an overflow.
- (3) Scalding tanks under 100 gallons shall be so constructed that the water can and shall be changed at least twice each day used.
- (4) The overflow outlets in scalding equipment shall be of sufficient size to permit feathers and water to be carried off.
- (5) The overflow, draw-off valves, and sediment basin drain shall discharge into a floor or valley drain, or onto the floor in close proximity to a floor or valley drain.
- (h) When necessary, safety guards shall be installed around moving machine parts of mechanical pickers, and such guards shall be of such construction as not to be difficult or laborious to remove or to keep clean. Sheet metal or metal grills fastened down with sufficient bolts and wing nuts are preferable.
- (i) When wax dipping is used, metal troughs or containers shall be provided to catch the wax removed from the dipped poultry. If such wax is to be used again, adequate equipment shall be provided for the conduct of reclaiming procedures such as skimming, heating and washing, centrifuging and filtration.
- (j) Where grading bins are used for poultry, they shall be of sufficient number and capacity to handle the grading adequately without the use of makeshift bins; and all dressed poultry shall be kept off the floor. Grading bins may be made of metal and shall be constructed and maintained in such a manner as to allow easy and thorough cleaning. All replacements of such bins shall, however, be of metal.
- (k) Except as otherwise provided herein, all equipment and utensils used in the killing, roughing, pinning, skinning, eviscerating, chilling and packing rooms shall be of metal or other equally impervious material and constructed so as to permit proper and complete cleaning.
 - (1) Conveyors, Shackles and Trays.
- (1) Conveyors used in the preparation of ready-to-cook poultry shall be constructed as to allow easy identification of viscera and its carcass and so designed as will present each carcass or all parts thereof in a way that will permit adequate and efficient inspection.
- (2) Overhead conveyors shall be constructed and maintained that they will not allow grease, oil, or dirt to accumulate on the drop chain or shackle which shall be of noncorrosive metal.

Page 86 (4-1-90)

- (3) Nonmetallic belt–type conveyors used in moving edible products shall be of waterproof composition.
- (4) When individual trays or other acceptable equipment are not used during eviscerating operations, each carcass shall be suspended and a metal trough shall be provided beneath the conveyor to extend from the point where the carcass is opened to the point where the viscera has been completely removed, and such troughs shall be flushed continuously by a water spray.
- (5) In plants where no conveyors are used, each carcass shall be eviscerated in such a manner that all contamination of the product is eliminated.
- (m) Tables and benches used in the processing of poultry shall be made of metal or other approved materials, and be so constructed and placed to permit thorough cleaning, and when replaced shall have coved corners.
- (n) Water spray washing equipment or running water facilities with sufficient potable water to thoroughly and efficiently wash carcasses shall be used for washing each carcass inside and out.
- (o) Watertight metal receptacles shall be used for entrails and other waste resulting from preparation of eviscerated poultry.
- (p) Freezing rooms should be adequately equipped to freeze ready-to-cook fowl solid in less than 60 hours, and rabbits should be frozen solid in less than 48 hours. Freezing rooms shall be equipped with floor racks or pallets and fans to insure air circulation.
- (q) Cooling racks shall be made of metal or other materials equally impervious to moisture and be readily accessible for thorough washing and cleaning.
- (r) Devices for the temporary retention of instruments such as knives, scissors, shears, clippers and similar hand-operated instruments used by workers and others at inspected plants shall be constructed of rust-resisting metal or other impervious materials, shall be of a type that may be readily cleaned, and shall be kept clean.
- (s) Metal surface required to be used in subsections a, c, d, e, f, g, h, j, k, m, o, q shall be rust resistant.

HISTORY

- 1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).
- New subsection (s) filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1218. Accessibility.

- (a) All equipment shall be so placed as to be readily accessible for all processing and cleaning operations.
- (b) Mechanical pickers shall be so installed as to be accessible for thorough cleaning and removal of the accumulation of feathers.

§ 1219. Restrictions on Use.

Equipment and utensils used in the official plant shall not be used outside the official plant, except under such conditions as may be prescribed or approved by the chief of the bureau. Equipment, used in the preparation of any article (including, but not being limited to, animal food) from inedible material, shall not be used outside of the inedible products department except under such conditions as may be prescribed or approved by the chief of the bureau.

Article 8. Maintenance of Sanitary Conditions and Precautions Against Contamination of Products

§ 1220. Cleaning of Rooms and Compartments.

- (a) Rooms, compartments, places, equipment, and utensils used for preparing, storing, or otherwise handling any product, and all other parts of the plant shall be kept clean and in sanitary condition.
- (b) There shall be no handling or storing of materials which create an objectionable condition in rooms, compartments, or places where products are prepared, store, or otherwise handled.

- (c) All feathers, blood, offal, refuse, dirt and waste products subject to decomposition and fermentation shall be removed daily.
- (d) All windows, doors, and light fixtures in the official plant shall be kept clean.
- (e) All docks and rooms shall be kept clean and free from debris, unused equipment and utensils.
- (f) Live poultry receiving docks and receiving rooms shall be of such construction as to readily permit their easy cleaning.
- (g) Floors in holding and feeding rooms shall be cleaned with such regularity as may be necessary to maintain them in a sanitary condition.
- (h) The killing, roughing, pinning and skinning room shall be kept clean and free from offensive odors at all times.
- (i) The walls, floors, and all equipment and utensils used in the killing, roughing, pinning, and skinning room shall be thoroughly cleaned after each day's operation.
- (j) The floors in the killing, roughing, pinning and skinning room shall be cleaned frequently during killing, roughing, skinning and finishing operations and be kept reasonably free from accumulated blood, offal, feathers, manure, water, and dirt.
- (k) All equipment in the toilet and locker rooms, as well as such rooms, shall be kept clean, sanitary, and in good repair.
- (I) Cooler and freezer rooms shall be free from objectionable odors of any kind and shall be maintained in a sanitary condition (including, but not being limited to the prevention of drippings from refrigerating coils onto products).

HISTORY

1. Amendment filed 1–28–61; effective thirtieth day thereafter (Register 61, No. 2)

§ 1221. Cleaning of Equipment and Utensils.

Equipment and utensils used for preparing or otherwise handling any product shall be kept clean and in a sanitary condition and in good repair.

- (a) Batteries, dropping pans, and pens shall be cleaned regularly and the manure removed from the plant daily.
 - (b) The feed mixer shall be cleaned daily.
- (c) Scalding tanks shall be completely emptied and thoroughly cleaned as often as may be necessary but not less frequently than once a day.
- (d) Ice shovels shall be marked to identify, kept clean, free of corrosion, stored off the floor, and used only for the handling of ice.
- (e) All equipment and utensils used in the killing, roughing, pinning, and skinning rooms shall be thoroughly washed and cleaned after each day's operation. The chilling and packing room and all equipment and utensils used therein shall be maintained in a clean and sanitary condition.
- (f) Graders' and packers' gloves and grading bins shall be washed daily and used only for grading and packing, as the case may be.
- (g) Chilling vats or tanks shall be emptied and rinsed after each use. They shall be thoroughly cleaned once daily.
- (h) When frozen poultry is to be defrosted in water, adequate facilities (tanks, vats or racks) shall be provided, including continuous running tap water of sufficient volume to thaw such poultry. Such poultry shall not be thawed in still water and the thawing tanks shall be emptied and rinsed after each use. The tanks shall be thoroughly cleaned once daily. If water is heated, it shall not be heated above 70 degrees F. Thawing tanks shall be equipped with properly installed over—flow pipes to discharge over a floor drain or a valley drain. Where mechanical devices are not used for removing thawed carcasses from thawing tanks, the tanks shall be of a size which will enable employees to remove poultry without getting inside the tanks.
- (i) When synchronized overhead conveyors and tray conveyors are used, the trays shall be completely washed and sanitized after being automatically emptied of inedible viscera.
- (j) When a coney or tray operation is used, such trays shall be of metal, of seamless construction, and shall be completely washed and sanitized after each use by means approved by the chief of the bureau.
- (k) Tables, shelves, bins, trays, knives, pans, and all other tools and equipment used in the preparation of ready-to-cook poultry shall be kept

Page 87 (4-1-90)

clean and sanitary at all times. Cleaned equipment and utensils shall be drained on racks and shall not be nested.

(l) Drums, cans, tanks, vats, and other receptacles used to hold or transport poultry, shall be kept in a clean and sanitary condition.

§ 1222. Operations and Procedures to Be Clean and Sanitary.

- (a) Operations and procedures involving the preparation, storing, or handling of any poultry or product shall be strictly in accord with clean and sanitary methods.
- (b) There shall be no handling or storing of materials which create an objectionable condition in rooms, compartments, or other places in the plant where any product is prepared, stored, or otherwise handled.
- (c) Pinning and finishing operations shall be performed in a part of the room that is located sufficiently away from the killing and roughing operations to prevent contamination of the product.
- (d) Blood from the killing operation shall be confined to a relatively small area and kept from being splashed about the room.
- (e) In finishing and cleaning dressed poultry, feed shall be removed from the crop, the fecal material in the cloaca shall be removed and carcasses which are not free from vestigial feathers shall be singed, and such operation shall be completed prior to or during the final washing but prior to chilling and packaging of such dressed poultry. Notwithstanding the foregoing, dressed poultry which is to be eviscerated in an official plant within 24 hours from time of slaughter may, when approved by the chief of the bureau, be transferred by conveyor or operational type container or other approved means to such official plant prior to removal of the feed in the crop.
- (f) The head of each dressed poultry carcass shall be washed thoroughly to remove feed from the mouth and blood from the head and mouth.
- (g) In the final washing, the dressed carcass shall be passed through a spray or system of sprays providing an abundant supply of fresh clean water or under clean flowing water utilizing a scrubbing action.
- (h) The floors in the eviscerating room shall be kept clean and reasonably dry during eviscerating operations, and free of all refuse.
- (i) Plant operations shall be conducted in such a manner as will result in sanitary processing and wholesome, properly prepared ready—to—cook poultry.
- (j) Mechanized packaging equipment shall be maintained in good sanitary condition.
- (k) All offal resulting from the eviscerating operation shall be removed as often as necessary to prevent the development of a nuisance.
- (1) Paper and other material used for lining barrels or other containers in which products are packaged shall be of such kinds as do not tear readily during use, but remain intact when moistened by the product. Wooden containers to be used for packaging poultry shall be fully lined except when the individual carcasses to be packaged therein are fully wrapped.
- (m) Protective coverings shall be used for the product in the plant, and as it is distributed from the plant, which will afford adequate protection for the product against contamination by any foreign substance (including, but not being limited to, dust, dirt and insects), considering the means intended to be employed in transporting the product from the plant.
- (n) Containers to be used for packaging ready-to-cook poultry shall be clean, free from objectionable substances or odors and of sufficient strength and durability to adequately protect the product during the normal distribution. Ready-to-cook poultry, other than that which is to be icepacked, shall be adequately drained to remove ice and free water prior to packing and packaging.
- (o) Refuse may be moved directly to loading docks only for prompt removal.
- (p) Employees and others who handle condemned carcasses or parts shall, before handling other carcasses or parts, cleanse their hands with liquid soap and hot water, and rinse them in clean water.
- (q) Implements which have come in contact with condemned carcasses shall be thoroughly cleansed before further use.

- (r) Employees of the plant who handle any product shall keep their hands clean and in all cases after visiting the toilet rooms or urinals shall wash their hands before handling any product, implement or packing material used in the preparation of a poultry product.
- (s) Aprons, frocks and other outer clothing worn by persons who handle any product shall be of material that is readily cleansed, and only clean garments shall be worn.
- (t) Hands of employees handling poultry or edible products or the equipment thereof shall be free of infected cuts, boils and open sores at all time while thus engaged.
- (u) Care shall be taken to prevent the contamination of products with perspiration, hair, cosmetics, medicaments and the like.
- (v) Neither smoking nor chewing of tobacco shall be permitted in any room where exposed edible products are prepared, processed, or otherwise handled.

HISTORY

1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).

§ 1223. Temperatures and Cooling and Freezing Procedures.

- (a) Temperatures and procedures which are necessary for cooling and freezing poultry, including all edible portions thereof, shall be in accordance with sound operating practices which insure the prompt removal of the animal heat, and which will maximize the preservation of the quality and conditions of the poultry.
- (b) In general, all poultry that is prepared in the official plant shall be cooled immediately after processing. If such poultry is to be shipped from the plant in packaged form, the poultry shall be cooled to and maintained at a temperature of 40 degrees F. or less prior to shipment from the plant, except that if it is to be held in excess of 24 hours it shall be held at 36 degrees F., and except that with respect to poultry which is to be frozen immediately, the chief of the bureau may approve, upon written request, the shipment of packaged poultry from the plant prior to cooling to 40 degrees F., or less if such poultry is handled in accordance with subparagraphs (1) and (2) of this paragraph.
- (1) Poultry intended for freezing without pre—chilling shall, within two hours from the time of slaughter, be placed in a plate freezer or a freezer with a functioning circulating air system where a temperature of –20 degrees F., or lower is maintained. The poultry shall be stacked in a manner which will permit adequate circulation of air around the individual containers, and such poultry shall remain therein until completely frozen.
- (2) The plant and freezer shall be so located and the necessary arrangements made so that the inspector will have access to the freezing room and adequate opportunity to determine compliance with the time and temperatures specified in (1) of this paragraph.
 - (c) Ice and Chilling Requirements.
- (1) In ice and water chilling, only ice manufactured or produced from potable water may be used for ice water chilling. The ice shall be handled and stored in a sanitary manner. If of block type, the ice shall be washed by spraying all surfaces with clean water before crushing. Metal ice crushers shall be cleaned at least once daily.
- (2) Enough clean crushed ice shall be used in vats or tanks to assure the chilling of poultry within the time specified in subparagraph (3) of this paragraph.
- (3) Poultry carcasses weighing less than 4 pounds shall be chilled to 40 degrees F. or below in less than 4 hours; carcasses weighing 4 to 8 pounds shall be chilled to 40 degrees F. or below in less than 6 hours; and carcasses weighing more than 8 pounds shall be chilled to 40 degrees F. or below in less than 8 hours.
- (4) In order to facilitate continuous processing operations, poultry may be held overnight in chilling tanks containing ice and water of a temperature of 40 degrees F. or less, but in no case may poultry be held in direct contact with water and ice for longer than 24 hours from the time of evisceration. If poultry is to be held in chill tanks for longer periods than specified herein, it shall be properly repacked with crushed ice in clean tanks

Page 88 (4-1-90)

which are continually drained, and during this holding period, the internal temperature of the poultry shall be maintained at or below 40 degrees F

- (d) In air chilling, dressed poultry shall be placed in a refrigerated room with moderate air movement and a temperature which will reduce the internal temperature of the carcasses to 40 degrees F.or less within 24 hours. In air chilling ready-to-cook poultry, the internal temperature of the carcasses shall be reduced to 40 degrees F. or less within 16 hours.
- (e) Any other chilling procedure which will affect chilling in a manner equal to that obtained by the procedures herein set forth, may be permitted when approved by the chief of the bureau.
- (f) Giblets shall be chilled to 40 degrees F. or lower within two hours from the time they are removed from the inedible viscera except that when they are chilled with the carcass by immediate entry into a freezer, the time and temperature requirements set forth in paragraph (b)(1) of this section shall apply. Any of the acceptable methods applicable to the chilling of the poultry carcass may be followed in cooling giblets except that unwrapped liver shall not be chilled in ice and water slush but may be chilled in direct contact with chipped ice or snow in containers which are continually drained. Giblet wrapping materials and procedures shall be such as will permit draining of the giblets prior to packaging of the ready-to-cook carcass.
 - (g) Freezing Requirements.
- (1) Poultry which has been chilled to 40 degrees F. or below prior to packaging and is to be frozen shall be placed into a freeze within 48 hours from time of packaging. However, if such poultry is held for longer than 24 hours from time of slaughter before it is placed in the freezer it shall be held at 36 degrees F. or lower.
- (2) The freezing operation for dressed poultry shall be accomplished in such a manner as to bring the internal temperature of the birds in the center of the package to 0 degree F. or below within 96 hours from the time of entering the freezer; whereas, ready—to—cook poultry shall be frozen in a manner so as to bring the internal temperature of the birds at the center of the package to 0 degree F. or below within 72 hours from the time of entering the freezer.
- (3) Warm packaged poultry which is to be chilled by immediate entry into a freezer within the official plant shall be handled in compliance with the time and temperature requirements set forth in paragraph (c)(3) of this section.
 - (4) Holding Requirements.
- (A) Frozen poultry shall be held under conditions which will maintain the product in a solidly frozen state with temperatures maintained as constant as possible.
- (B) Freezer temperatures of −10 degrees F. are preferable for holding frozen poultry.
- (h) When poultry is ice packed in barrels or other containers, the barrels and containers shall be covered and shall have an adequate number of drain holes to permit the water to drain out.

§ 1223.1. Exception to Chilling Requirements.

Regulations governing the chilling and freezing of poultry shall not be interpreted as requiring chilling of dressed or ready-to-cook poultry when sold direct to a retail customer providing the slaughtering, dressing and/or eviscerating is done at a retail customer's order and while the said customer awaits delivery; and further providing that the package or wrapper shall bear, in conjunction with the inspection mark or label, the additional statement "The poultry meat contained herein has not been chilled, and therefore should either be chilled or be cooked immediately."

HISTORY

1. New section filed 7–19–56 as an emergency; effective upon filing (Register 56, No. 14).

§ 1224. Vermin and Pets Excluded from Plant.

- (a) Every practicable precaution shall be taken to keep plants free of flies, rats, mice and other vermin.
- (b) Dogs, cats, and other pets shall be excluded from rooms where edible products and dressed poultry are processed, handled and stored.

§ 1225. Use of Compounds.

Only such germicides, insecticides, rodenticides, detergents or wetting agents or other similar materials may be used as will not contaminate or deleteriously affect the edible product. The use of poisons for any purpose in rooms or compartments where any unpacked poultry meat or product is stored or handled is forbidden except under such restrictions and precautions as the chief of the bureau may prescribe. The use of bait poisons in pelt rooms, inedible compartments, outbuildings, or similar places, or in store rooms containing canned or tierced products is not forbidden but so—called rat viruses shall not be used in any part of a plant or the premises thereof. The use of such compounds shall be in a manner satisfactory to the chief of the bureau.

§ 1226. Employment of Diseased Persons.

No poultry plant shall employ, in any department where any poultry or poultry meat product is handled or prepared, any person affected with tuberculosis or other communicable disease in a transmissible stage.

§ 1227. Inedible Operating and Storage Rooms: Outer Premises, Docks, Approaches, etc., Fly-Breeding Material: Nuisances.

All operating and storage rooms and departments of official plants used for inedible materials shall be maintained in acceptably clean condition. The outer premises of every official plant, embracing docks and areas where cars and vehicles are loaded, and the driveways and approaches shall be kept free of debris to permit complete drainage and kept in a clean and orderly condition. All catchbasins on the premises shall be given such attention as will ensure their being kept in acceptable condition as regards odors and cleanliness and catchbasins shall not be used for inedible waste recovery in departments where an edible product is prepared, handled, or stored. The accumulation on the premises of plants of any material in which flies may breed is forbidden. No nuisance shall be allowed in any plant or on any plant premises.

NOTE: Authority cited: Sections 407 and 24561, Food and Agricultural Code. Reference: Sections 24771 and 24772, Food and Agricultural Code.

§ 1228. Used Tubs, Barrels, and Other Containers: Inspection and Cleaning.

Used tubs, barrels, and boxes intended for use as containers of any poultry meat or product shall be inspected prior to use. Those showing evidence of misuse rendering them unfit to serve as containers for food products shall be rejected. The use of those showing no evidence of previous misuse may be allowed after they have been thoroughly and properly cleaned.

§ 1229. Dead Poultry Carcasses.

- (a) With the exception of dead poultry which have died enroute and are received with poultry for slaughter at an official plant, no dead animal, poultry or wild fowl may be brought on the premises of a plant unless advance permission therefor is obtained from the chief of the bureau.
- (b) Under no circumstances shall the carcass or parts of any domestic poultry which has died otherwise than by slaughter, or was found on the premises in a dying condition, be brought into any room or compartment in which any poultry meat is prepared, handled or stored.

Article 9. Products and Equipment Contaminated by Polluted Water

§ 1230. Products Contaminated by Polluted Water: Procedure for Handling.

- (a) In the event there is polluted water (including, but not being limited to, flood water and harbor water) in an official plant, all edible products that have been contaminated by such water shall be condemned.
- (b) After the polluted water has receded, all walls, ceilings, posts, and floors of the rooms and compartments involved, including the equipment therein, shall be cleansed thoroughly. An adequate supply of hot water, under pressure, is essential for effective cleansing. After cleansing, a solution of sodium hypochlorite containing approximately one–half of 1

Page 89 (4-1-90)

percent of available chlorine (5,000 parts per million) or other disinfectant approved by the chief of the bureau, shall be applied, and all metal surfaces shall be rinsed thoroughly with water to prevent corrosion. Any such equipment that will afterwards be used in connection with any edible product shall be rinsed thoroughly with clean water before being used.

- (c) Hermetically sealed containers of edible products which have been submerged in, or otherwise contaminated by, the polluted water shall be rehandled promptly as follows:
- (1) Such of the containers as are swollen or leaky or otherwise do not show the external characteristics of sound containers shall be segregated and the contents thereof condemned.
- (2) Paper labels, if any, attached or affixed to the remaining containers shall be removed and the containers washed in warm soapy water and, if necessary to remove rust and other foreign material, a brush shall be used.
- (3) Thereafter, such containers shall be immersed in a solution of sodium hypochlorite containing not less than 100 parts per million of available chlorine, or other disinfectant approved specifically for this purpose by the chief of the bureau, and rinsed in clean fresh water and dried thoroughly. Any such containers which show extensive rusting or corrosion, such as might materially weaken the container, shall be opened. The edible products from such containers that are found to be sound and wholesome shall be passed for human food.
- (4) The remaining containers may be relacquered, if necessary, and then relabeled with approved labels applicable to the edible product therein
- (5) The identity of the canned edible products shall be maintained throughout all stages of the rehandling operation to insure correct labeling of the containers.

Article 10. Sanitation Regulations Applicable to Rabbits Only

§ 1231. Processing, Chilling and Freezing.

- (a) Rabbits may be killed, skinned, eviscerated, cooled and packaged in one room, providing that the room is of such size that the killing, skinning and eviscerating can be done on hooks so spaced that sanitary processing is possible; the cooling tanks so placed that their contents are not contaminated by other processes, and the packing is done in a part of the room well away from inedible products so that no contamination of the ready—to—cook product is possible.
 - (b) Temperatures and Procedures for Cooling and Freezing Rabbits.
- (1) Cooling. Immediately after evisceration and washing of rabbit carcasses, they shall be placed in a cooling tank containing running cold tap water to remove the animal heat from the carcasses.
- (2) Air Chilling. Immediately after the initial water chilling, the carcasses shall be placed in cooling racks and thereupon placed in a refrigerated cooler with moderate air movements and a temperature which will reduce the internal temperature of the carcasses to 40 degrees F. or less within 24 hours.
 - (3) Freezing.
- (A) When ready-to-cook domestic rabbits are packaged in bulk or shipping containers, the carcasses shall be individually wrapped or packaged in water-vapor resistant cartons, or the containers shall be lined with heavy water-vapor resistant paper so as to assure adequate overlapping of the lining to completely surround the carcasses and to permit unsealed closure or sealing in such a manner that water-vapor loss from the product is considerably retarded or prevented. The rabbit carcasses shall receive an initial rapid freezing under such packaging, temperature, air circulation, and stacking conditions which will result in freezing the carcasses solid in 48 hours.
- (B) Frozen ready-to-cook rabbits shall be stored at 0 degrees F., or below, with temperatures maintained as constant as possible.

(4) Immediately after packing, all ready–to–cook domestic rabbits, other than those which are shipped from the plant (the body temperature of which will be below 36 degrees F.) will be either moved into the freezer or held for a period not exceeding 72 hours in the cooler at a temperature of not above 36 degrees F.

Article 11. Application for Examination and Poultry Meat Inspector License

§ 1235. Licensing Poultry Meat Inspectors.

- (a) Persons desiring to be licensed as poultry meat inspectors shall file an application with the director for an examination and license.
- (b) The application for license, accompanied by the fee of \$10 prescribed by law, shall be remitted by cash, check or money order, and shall be mailed, paid or delivered to: Cashier, State Department of Agriculture, 1220 N Street, Sacramento, California.
- (c) Applicants for examination to become licensed poultry meat inspectors shall have the following basic qualifications:
- (1) Applicant shall not be less than 18 years old.
 - (2) Applicant shall have had:
 - (A) Six months experience in poultry processing; or
 - (B) One year of technical training in a related field.
- (3) Ability to follow oral and written directions, to do simple arithmetical calculations, to write legibly, and to prepare clear and accurate reports.
- (4) Ability to analyze situations accurately and adopt an effective course of action.
 - (5) Normal vision or vision corrected to normal.
- (d) The form used for making application shall be provided by the Director of Agriculture.

HISTORY

- 1. Amendment of subsection (d) filed 1-9-70; effective thirtieth day thereafter (Register 70, No. 2).
- 2. Amendment of subsection (c)(1) filed 1–20–78; effective thirtieth day thereafter (Register 78, No. 3).

Article 12. Compliance with Law and Regulations

§ 1236. Reports of Violations of Regulations.

Poultry meat inspectors shall report to bureau employees all violations and failures to comply with Chapter 3, Division 3, Article 2 of the Agricultural Code or the regulations promulgated thereunder.

Article 13. Poultry Meat Inspectors

§ 1237. Designation of Minimum Number of Inspectors.

The chief of the bureau shall designate the minimum number of poultry meat inspectors to be employed by each poultry plant in accordance with the extent of operation of such plant.

§ 1238. Poultry Meat Inspectors to Have Right of Access to Plants at Any Reasonable Time.

For the purpose of any examination or inspection necessary to enforce any of the provisions of these regulations, poultry meat inspectors shall have right of access at any reasonable time, by day or night, whether the plant is operating or not, to every part of any official plant at which they are employed.

§ 1239. Identification of Poultry Meat Inspectors.

Each licensed poultry meat inspector shall be furnished with a numbered official identification card which he shall not allow to leave his possession. The applicant for a license as a poultry meat inspector shall furnish the department accurate information as to his sex, date of birth, height, weight, color of hair, color of eyes, which shall appear on such

Page 90 (4-1-90)

card for the purpose of identification. The applicant for a poultry meat inspector's license shall furnish the department two satisfactory recent photographs of himself, size 1 inch by 1 1/4 inch, one of which shall be attached to the identification card; the other will be held in the bureau files. This card shall serve as a certificate of license and shall be sufficient to entitle him to admittance at all regular entrances and to all parts of the plant and premises at which he is employed.

§ 1240. Interference with or Abuse of Poultry Meat Inspectors.

- (a) No person shall resist, intimidate, delay, obstruct, hamper, abuse, or interfere with any poultry meat inspector in the discharge of his duties nor shall any person attempt by means of any threat or violence to deter or prevent any poultry meat inspector from performing his duty.
- (b) No plant owner or operator or his agent shall discharge or in any way terminate the services of a poultry meat inspector in his plant without immediately notifying the chief of the bureau.

§ 1241. Duties and Conditions of Employment of Poultry Meat Inspectors.

- (a) Failure in effort on the part of the inspector to properly enforce poultry meat inspection regulations shall be sufficient cause for the director to revoke the license of such poultry meat inspector.
- (b) A poultry meat inspector whose license has been revoked shall surrender his identification or license card to the chief of the bureau upon written notification of his license having been revoked. No refund for license fee shall be made to any person whose license has been revoked.
- (c) No plant owner or operator or his agent shall employ a poultry meat inspector as such who does not possess a valid license as a poultry meat inspector.
- (d) When more than one poultry meat inspector is employed by a plant, the plant owner or operator shall keep a log in which he will enter, before the start of each day's operation, the name of the licensed inspector who will enforce the poultry meat inspection regulations for that day. If the plant operations are of such a nature that more than one poultry meat inspector is employed as such, the plant owner or operator shall enter, before the start of each day's operation, in his log the names of the poultry meat inspectors and designate the division of their authority within the plant. Such records shall be kept for a period of not less than one year.
- (e) The plant owner or operator shall not allow poultry meat inspectors to do work which will interfere with their carrying out the regulatory duties of their office in an efficient and satisfactory manner.
- (f) Poultry meat inspectors shall wear white, washable outer clothing and clean head coverings.
- (g) No processes used in killing, eviscerating, chilling, freezing, cutting, curing, pickling, rendering, canning, packing, or otherwise preparing any product in official plants shall be performed except under the supervision, and in the presence of a poultry meat inspector.
- (h) Office space and facilities for the inspector is to be constructed as provided by Section T3–902, Title 24, California Administrative Code, and related sections. This space and facilities, including heat, light, and janitor service, will be provided by the official plants for official use of the inspector.

NOTE: Authority cited: Sections 407 and 24561, Food and Agricultural Code. Reference: Sections 24741–24750, Food and Agricultural Code.

History

1. Repealer and new subsection (h) filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1242. Hours of Operation of Poultry Plants.

At the time of inauguration of inspection, each plant owner or operator shall make known to the chief of the bureau, in writing, their plant's regular scheduled work days and time of operation. Any deviation from this schedule, other than occasional deviations of not more than two hours at the end of a scheduled work day, made necessary by unforeseen work

stoppage or new commitments, shall be brought to the attention of the area supervisor or his superior prior to the time of deviation.

Article 14. Marking Receptacles and Tagging Unsanitary Equipment

§ 1243. Trucks and Receptacles for Diseased Carcasses.

Water-tight trucks and receptacles for holding or handling diseased carcasses and diseased parts of carcasses shall be so constructed as to be readily and thoroughly cleaned; such trucks and receptacles shall be marked in a conspicuous manner with the word "condemned" in letters not less than 2 inches high and, when required by the inspector, shall be equipped with facilities for locking and sealing.

§ 1244. Tagging Unsanitary Equipment, Utensils, Rooms or Compartments.

When in the opinion of a poultry meat inspector or bureau employee, any equipment, utensils, room or compartment at an official plant is unclean or its use would be in violation of any of these regulations, he will attach a "rejected" tag thereto, notify the plant operator of such tagging and make necessary arrangements with the plant operator for a poultry meat inspector or bureau employee to be present when the thing tagged is ready for reinspection. Such equipment, utensils, room, or compartment shall be placed in a sanitary condition in accordance with these regulations and thereafter shall be reinspected by the person designated on the reject tag and shall not be used until the condition thereof shall be found satisfactory by such person on reinspection and such person has removed the reject tag therefrom. Prior to such approval on reinspection, the reject tag shall not be removed or destroyed.

HISTORY

1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).

Article 15. Ante-Mortem Inspection

§ 1245. Ante-Mortem Inspection When Required and Where.

- (a) Ante-mortem inspection of fowl may be required by the bureau as a prerequisite to any inspection, and, if so required, the plant will provide such help and facilities as may be required to facilitate such examination. Such ante-mortem inspection shall be made on the day of slaughter.
- (b) Ante-mortem inspection of rabbits is a prerequisite to their being inspected for wholesomeness.
- (c) Ante-mortem inspection shall be made on the premises of the plant in which the poultry is about to be slaughtered.
- (d) All poultry showing, on ante-mortem inspection, symptoms of acute ornithosis, tularemia, erysipelas, or acute fowl pox shall be condemned, killed by dislocating the neck, and disposed of in accordance with Section 1254.

Article 15.1. Humane Slaughter of Poultry

§ 1245.1. General Provisions.

All slaughter of poultry, with the exception of "Spent hens" and "Small game birds," shall be performed in accordance with approved methods of humane poultry slaughter as provided in this article. Violations of humane slaughter procedures specified in this article shall be cause for the suspension of inspection and revocation of the poultry slaughter establishment's license by the Chief of the Meat and Poultry Inspection Branch after the establishment's management has been given notice and an opportunity for a hearing.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New article 15.1 (sections 1245.1–1245.16) and section filed 10–11–94; operative 11–10–94 (Register 94, No. 41).

§ 1245.2. Definitions.

- (a) "Poultry slaughter establishment" means any place where poultry is slaughtered, dressed, or drawn.
- (b) "Spent hens" means older chicken hens which are considered too unproductive to retain as egg layers.
- (c) "Small game birds" means pigeons, pheasants, silkies (Gallina lanigera), chukars, quail and other species of game birds of the same approximate size as those listed in this section.
- (d) "Stunning" means to humanely render any domesticated fowl or rabbit insensible to pain to a level of surgical anesthesia or unconsciousness.
- (e) "Non-commercial equipment" means any device that is not commercially available from poultry equipment manufacturers.
- (f) "Surgical anesthesia" means the induction of an animal to a level of insensibility to pain that would allow immediate and simultaneous severance of both carotid arteries with a sharp instrument.
- (g) "PMI" Poultry Meat Inspector means a person who, after examination and demonstration, has been issued a license by the Secretary of Food and Agriculture to inspect poultry meat for wholesomeness.

 NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.3. Handling of Poultry for Slaughter.

Regardless of the humane method of slaughter employed, the handling of poultry in connection with slaughter shall meet the following criteria.

- (a) Poultry shall be delivered to the stunning area in transport cages or other equipment that is of sufficient size to accommodate the size of poultry being presented for slaughter. Cages must be in good repair, free of broken wire, rough areas, holes, sharp projections, and other protrusions to avoid injury to the poultry.
- (b) If improper or injurious conditions exist at delivery to the poultry slaughter establishment, the PMI or Department inspector shall immediately halt slaughter activity until the discrepancy is corrected. A "California Rejected Tag" shall be attached to each cage identified with improper or injurious conditions by the PMI or Department inspector. The unacceptable conditions shall be corrected immediately by poultry slaughter establishment or its designated representative. The "California Rejected Tag" shall be removed by the PMI or Department inspector after corrective actions have been taken.
- (c) Poultry delivered for slaughter shall be held in a location with adequate ventilation to prevent overheating and shall have protection from exposure to adverse weather conditions.
- (d) Poultry shall be stunned, rendered unconscious, or killed before bleeding. Stunned poultry shall remain in a state of surgical anesthesia through completion of the bleeding process.
- (e) Bleeding shall be accomplished by severing both carotid arteries or by decapitation. Sufficient bleeding time (approximately 2 to 3 minutes) shall be allowed to prevent the unacceptable condition known as "red skins" which may occur with insufficient bleeding.
 - (f) PMIs shall be trained in humane methods of handling poultry.
- (g) Slaughter and handling of poultry shall be performed by operators in a proper and humane manner.
- (h) Each poultry slaughter establishment shall ensure that poultry handlers, slaughterers, and operators have been instructed in the humane methods of handling poultry and operating stunning and slaughter equipment before being assigned to such duties.
- (i) Non-commercial stunning or anesthetizing equipment shall not be used.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sectionss 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.4. Method of Humane Slaughter of Poultry.

- (a) The Department has determined that the following methods are acceptable and practical humane methods for use in the stunning and slaughter of poultry.
 - (1) Carbon dioxide and argon gas-induced anoxia.
 - (2) Electrical stunning.
 - (3) Electrocution to cardiac arrest.
 - (4) Captive bolt (ostrich and rabbit only).
 - (5) Cervical dislocation.
 - (6) Carotid artery severance.
 - (7) Decapitation.
 - (8) Other methods as approved by the Department.
- (b) Any of the above methods may be used in combination to effect the most humane slaughter of poultry.
- (c) Each poultry slaughter establishment shall be responsible for the selection of sale equipment and the safe use of such equipment.
- (d) Establishments selecting the carbon dioxide and argon gas electrical stunning, or electrocution method shall install all equipment in accordance with the manufacturer's specifications, or under the supervision of a licensed engineer. Such installations shall comply with all applicable building and safety codes as specified by local and state government. NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.5. General Requirements for Gas Chambers and Auxiliary Equipment; Operator; Facilities and Procedures.

- (a) The stunning area shall be adequately ventilated and the employee exposure monitored in accordance with Title 8, section 5155 of the California Code of Regulations. Carbon dioxide and argon gas is heavier than air, and therefore may accumulate in the stunning area.
- (b) A record of the calibration and maintenance of all measuring instruments shall be available for inspection by the Department inspector or PMI. All maintenance shall be performed by qualified personnel.
- (c) The carbon dioxide and argon gas shall be administered in a chamber which accomplishes effective exposure of poultry. Chamber operations shall be in accordance with manufacturer's specifications and instructions.
- (d) Chambers and all auxiliary equipment shall be designed to properly accommodate the species of poultry being stunned or killed.
- (e) A uniform carbon dioxide and argon gas concentration and distribution shall be maintained within the chamber to produce effective stunning. The system shall provide for mechanical agitation so that a concentration of carbon dioxide and argon gas is sufficient to accomplish effective stunning and is uniform throughout the chamber. The poultry slaughter establishment shall sample the concentration of gas for analysis from a representative place or places within the chamber on a continuing basis.
- (f) Neither carbon dioxide and argon gas nor atmospheric air used in the chambers shall contain irritating gases.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.6. Administration of Carbon Dioxide and Argon Gas; Required Effect; Handling.

Where the carbon dioxide and argon gas mixture is used for the humane slaughter of poultry, it shall be subject to the following requirements.

(a) The poultry shall be delivered to the chamber in the transport cages or other equipment to prevent excessive handling and stress. The delivery of poultry to the chamber shall be done with a minimum of excitement and discomfort to the poultry. Delivery of calm poultry to the chamber is essential to effective and humane slaughter.

Page 92 Register 94, No. 41; 10–14–94

(b) The carbon dioxide and argon gas mixture shall be administered in a chamber meeting the requirements of this section and section 1245.4. The poultry shall be exposed to a carbon dioxide and argon gas ratio sufficient to accomplish effective surgical anesthesia, unconsciousness or death quickly and calmly, with a minimum of excitement and discomfort to the poultry. The exposure shall produce, at a minimum, surgical anesthesia in the poultry before severing both of the carotid arteries in the neck or decapitating the poultry. To ensure adequate bleeding in each bird, bleeding shall be done immediately after stunning or killing.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.7. General Requirements for Electrical Stunning or Slaughter with Electric Current.

Where electric current is used for the humane slaughter of poultry, it shall be subject to the following requirements.

- (a) All equipment shall be installed and used in accordance with the manufacturer's instructions and specifications.
- (b) Only electric current application equipment with pathways, compartments, current applicators, and all auxiliary equipment designed to properly accommodate the species of poultry being anesthetized or slaughtered shall be used.
- (c) The delivery of poultry to the place of application of electric current shall be done with a minimum of excitement and discomfort to the poultry in accordance with the provisions contained in these regulations.
- (d) The application of electric current to stun or induce cardiac arrest shall be performed by operators so as to assure proper handling and humane application.
- (e) The electric current shall be administered so as to produce effective surgical anesthesia or death with a minimum of excitement and discomfort.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.8. Electrical Stunning.

When electric current is used to stun the poultry, sufficient electric current shall be applied to the poultry during stunning to produce a state of surgical anesthesia or unconsciousness through the completion of bleeding.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.9. Electrocution to Cardiac Arrest.

Where electrocution to cardiac arrest is used for the humane slaughter of poultry, it shall be subject to the following requirements.

- (a) Poultry may be stun-killed with this method.
- (b) Sufficient electric current shall be administered to the poultry, depending on size and weight of the species slaughtered, to induce cardiac arrest without the poultry regaining consciousness.
- (c) The proper voltage and current setting for each lot of birds may vary due to size and weight variations. Voltage may be adjusted to a higher setting to ensure that each poultry is delivered the appropriate amount of current to induce cardiac arrest.
- (d) After each poultry has been electrocuted, it shall be immediately bled by severing both carotid arteries or by decapitation to allow proper bleeding. Adequate bleeding time shall be allowed for each bird. Since electrocuted poultry does not have heart pumping action to facilitate blood loss, more time (approximately 2 to 3 minutes) should be allowed to achieve complete bleeding before being introduced to the scalding tank.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.10. Captive Bolt.

Captive bolt is an acceptable method of humane slaughter of rabbits, ostriches and other similar large birds.

- (a) Where captive bolt is used as the humane method of slaughter, the captive bolt device shall be of the appropriate size for the chosen species.
- (b) The captive bolt device must be properly placed so that the cerebral hemisphere and the brainstem are adequately disrupted by the penetrating bolt to cause immediate unconsciousness. Immediate bleeding must follow use of the captive bolt device.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.11. Cervical Dislocation.

Where dislocation of the neck is used as the humane method of slaughter, it shall be subject to the following requirements.

- (a) Dislocation of the neck by separating the cervical vertebrae from the base of the skull shall be performed quickly to induce rapid unconsciousness with a minimum of excitement and discomfort to the poultry.
- (b) Bleeding shall immediately follow cervical dislocation.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.12. Carotid Artery Severance.

Where carotid artery severance is used for the humane slaughter of poultry, it shall be subject to the following requirements.

- (a) Carotid artery severance may be employed by manual or automatic means
- (b) Severing the carotid arteries shall be performed using a sharp instrument which is used to sever both carotid arteries simultaneously.
- (c) Regardless of the method employed, it shall be performed quickly to induce rapid unconsciousness or death with a minimum of excitement to the poultry.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.13. Decapitation.

Where decapitation is used as the humane method of poultry slaughter, it shall be subject to the following requirements.

- (a) Decapitation may be achieved by manual or automatic means.
- (b) Decapitation shall be performed using a sharp instrument which achieves the complete severance of the head from the body by cutting all the major vessels of the neck and the spinal cord with a sharp instrument.
- (c) Regardless of the method employed, it shall cause quick and complete severance of the carotid arteries and the spinal cord.
- (d) All mechanical and automatic instruments used in this method shall be sharp and inspected frequently for sharpness. The poultry slaughter establishment shall ensure that all instruments and equipment are maintained in a satisfactory manner.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.14. Training.

- (a) Each licensed PMI shall be responsible for attending formal annual maintenance training provided by the Department, including, but not limited to, humane handling and slaughter of poultry.
- (b) Failure of each PMI to attend annual maintenance training, as specified in paragraph (a) of this section, shall be grounds for nonrenewal, suspension, or revocation of the PMI's license.

Page 92.1

- (c) It is the responsibility of the establishment management and the licensed PMI to make arrangements in the work schedule to attend the annual maintenance training.
- (d) Owners and managers shall be responsible for attending at least one scheduled departmental PMI training seminar or orientation on humane handling and slaughter of poultry procedures, as specified in paragraph (a) of this section.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10–11–94; operative 11–10–94 (Register 94, No. 41).

§ 1245.15. Tagging of Equipment, Cages, Pens or Compartments to Prevent Inhumane Slaughter or Handling in Connection With Slaughter.

- (a) When a PMI or Department inspector observes an incident of inhumane slaughter or handling in connection with slaughter, they shall notify the poultry slaughter establishment management, or his or her designated representative, of the incident and request immediate corrective action. If the establishment management fails to promptly take corrective action, the inspector shall follow the procedures specified in paragraph (b), (c), or (d) of this section, as appropriate.
- (b) If the cause of inhumane treatment is the result of facility deficiencies, disrepair, or equipment breakdown, the inspector shall discontinue slaughter operations until the deficiencies have been corrected. The inspector shall attach a tag rejecting the equipment (California Rejected Tag) thereto. No equipment, cage, pen or compartment so tagged shall be used until such equipment is made acceptable to the PMI or Department inspector. All poultry slaughtered prior to such tagging may be dressed, processed, or prepared under inspection. Upon correcting the deficiency, the establishment may request reinspection of the equipment for release. If corrected deficiencies are satisfactory to the inspector, slaughter operations shall be commenced. If release is denied on reinspection, the poultry slaughter establishment may appeal to the Chief, Meat and Poultry Inspection, for resolution of the matter.
- (c) If the cause of inhumane treatment is the result of establishment employee actions in the handling or moving of poultry, the PMI or Department inspector shall attach a "California Rejected Tag" to the cage or cages in the stunning or killing area. After tagging, no more poultry shall be stunned or killed until the problem has been corrected. Establishment management shall be informed immediately by the PMI or Department inspector. The tag shall not be removed by anyone other than a PMI or Department inspector. All corrective actions shall be immediate. All poultry slaughtered prior to the tagging may be dressed, processed, or prepared under inspection.
- (d) If the cause of inhumane treatment is the result of improper stunning, the PMI or Department inspector shall attach a "California Rejected Tag" to the stunning area. All slaughter operations shall be discontinued until the appropriate corrective actions have been taken. Upon satisfactory completion of corrective actions, the PMI or Department inspector shall commence operations. Management is responsible for ensuring that such infractions do not recur. The tag shall not be removed by anyone other than a PMI or Department inspector. All poultry slaughtered prior to such tagging may be dressed, processed, or prepared under inspection. Upon correcting the deficiency, the establishment may request reinspection of the equipment for release. If release is denied on reinspection, the poultry slaughter establishment may appeal to the Chief, Meat and Poultry Inspection, for resolution of the matter.
- (e) Failure to comply with these regulations shall provide grounds for suspension, revocation of the PMI license, or suspension, or revocation of plant license and withdrawal of inspection by the Secretary of Food and Agriculture or his representative after notice and opportunity for hearing.

NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference: Sections 19501 and 19501.5, Food and Agricultural Code.

HISTORY

1. New section filed 10-11-94; operative 11-10-94 (Register 94, No. 41).

§ 1245.16. Ritualistic Slaughter.

- (a) Where a method of slaughter is prescribed by Kosher or other rules of the Jewish faith, Islamic and other faiths and causes the poultry to lose consciousness through anemia of the brain resulting from the simultaneous severance of both carotid arteries with a sharp instrument, it shall be considered a humane method of slaughter.
- (b) Exemptions for other methods of ritualistic slaughter of poultry may be obtained upon approval by the Chief, Meat and Poultry Inspection Branch while effectuating the purpose of these regulations.

 NOTE: Authority cited: Section 19501.5, Food and Agricultural Code. Reference:

Sections 19501 and 19501.5, Food and Agricultural Code.

- HISTORY
 1. New section filed 10–11–94; operative 11–10–94 (Register 94, No. 41).
- Change without regulatory effect repealing subsection (b) and relettering subsections filed 1-8-98 pursuant to section 100, title 1, California Code of Regulations (Register 98, No. 2).

Article 16. Post Mortem Inspection

§ 1246. Extent and Time of Post-Mortem Inspection.

- (a) A careful post—mortem examination and inspection shall be made of the carcasses and parts thereof of all poultry slaughtered at official plants. Such inspection and examination shall be made within 24 hours of the time of slaughter, except when special permission is obtained from the chief of the bureau.
- (b) Conveyors shall be operated at such speeds as will permit a sanitary eviscerating operation and will permit adequate inspection for condition and wholesomeness.
- (c) In order to facilitate the work of the inspector and keep the line speed at its optimum, the inspector may be furnished a trimmer or helper.
- (d) Each carcass, including all parts thereof, in which there are any lesions of disease, or other condition which might render such carcass or any part thereof unfit for human food, and upon which for that reason a final decision cannot be made by the inspector, shall be retained for further inspection by a qualified bureau employee. The identity of each such carcass, including all parts thereof, shall be maintained until a final examination has been completed by affixing a "RETAINED" tag. These tags shall not be removed except by a poultry meat inspector or bureau employee.
- (e) Such devices, i.e., (racks) and methods as may be approved by the chief of the bureau may be used for the temporary retention of carcasses, parts, or organs in need of reprocessing or further inspections.
- (f) Carcasses and parts found to be sound, healthful, wholesome, and fit for human food shall be passed as wholesome and marked as provided in these regulations.

§ 1247. Abdominal and Thoracic Viscera and Giblets to Be Removed.

- (a) Each carcass to be eviscerated shall be opened so as to expose the organs and the body cavity for proper examination by the inspector and shall be prepared immediately after inspection as ready—to—cook poultry.
- (b) In all instances the opening cut must be made in such a way as will permit thorough inspection of the abdominal and thoracic cavities, and will permit the removal of viscera in a sanitary manner.
- (c) The use of acceptable skin straps suitable for trussing the legs after carcasses have been eviscerated are permitted. A transverse cut through the abdominal wall, commonly known as the "bar cut" is not permitted, except on turkeys, capons, and old hens, providing that such operations are performed in such a manner that contamination of the inner surface of the skin strap does not occur.
- (d) The giblets shall be separated from the inedible viscera immediately after removal from the body cavity, and shall be immediately cleaned, trimmed, and washed under a continuous flow or spray of water.
- (e) Confucian exemption may be requested by the clerical official or the responsible leader of the Chinese Benevolent Association.

Page 92.2 Register 98, No. 2; 1-9-98

HISTORY

1. Change without regulatory effect adding subsection (e) filed 1–8–98 pursuant to section 100, title 1, California Code of Regulations (Register 98, No. 2).

§ 1248. Technique of Inspection.

The technique of the post–mortem inspection must conform to the following basic procedure:

- (a) Right Hand Operation
- (1) Grasp one leg, run hand down leg to determine bone disease.
- (2) Open body cavity to view internal surfaces.
- (3) Turn body to view outside of bird (including head) for disease, abnormalities and dressing imperfections.
 - (b) Left Hand Operation
- (1) Place hand over liver to feel for consistency, texture and lesions, viewing simultaneously.
- (2) Slip fingers around liver lobe and grasp spleen between thumb and finger, rolling spleen to determine texture and presence of abnormal growth. In case of fryers and broilers it is not necessary to roll the spleen. Simultaneously view other viscera while checking spleen.

For those who find it more convenient, the left hand can be used for operations under (a) and the right hand for operations under (b), however; hand motions must be consistent.

§ 1249. Disposal of Diseased Carcasses and Parts.

The carcasses or parts of carcasses of all poultry inspected at an official plant and found at the time of post—mortem inspection, or at any subsequent inspection to be affected with any of the diseases or conditions named in other sections of this regulation shall be disposed of according to the section pertaining to the disease or condition. Owing to the fact that it is impracticable to formulate rules covering every case and to designate at just what stage a process becomes loathsome or a disease noxious, the decision as to the disposal of all carcasses, parts, or organs not specifically covered by these regulations shall be left to the poultry meat inspector or bureau employee.

§ 1250. Diseases and Conditions Requiring Condemnation of Affected Carcasses.

- (a) Carcasses of poultry affected with or showing lesions of any of the following-named diseases or conditions shall be condemned:
 - (1) Acute ornithosis.
 - (2) Tuberculosis.
 - (3) Erysipelothrix septicemia.
 - (4) Salmonellosis septicemia.
 - (5) Tularemia.
 - (6) Anthrax.
 - (7) Hemorrhage septicemia.
 - (8) Pyemia.
 - (9) Leukemia.
 - (10) Sarcoatosis.
 - (11) Metritis.
 - (12) Necro-bacillosis (Smorl's disease).
 - (13) Emaciation in rabbits.
 - (14) Septicemia.

- (15) Toxemia.
- (16) Viremia.
- (b) The lesions of septicemia, viremia and toxemia include cyanosis, hyperemia, anemia, edema, dehydration, hypertrophy, atrophy, and hemorrhagic or necrotic manifestations in any of the body structures. It must be understood that many of these processes may be reactions to local injury and do not alone necessitate condemnation of the carcasses. However, systemic reactions which result in dark dehydrated musculature, doughy skin and flesh, or markedly anemic (pale) musculature shall be condemned, even though other lesions are not apparent at the time of post–mortem examination.
- (c) Fowl and rabbits from pathological laboratories shall not be brought onto any official plant premise.

§ 1251. Diseases Requiring Condemnation of Carcasses or Parts, Exceptions.

- (a) Carcasses of poultry affected with any of the following diseases shall be condemned, excepting that when recovery has occurred, even though localized lesions persist, or when the lesions are of such character or extent that there is no apparent systemic disturbance, the carcass may be passed for food, after removal and condemnation of affected parts:
 - (1) Avian monocytosis.
 - (2) Mycotic infections.
 - (3) Fowl cholera.
 - (4) Fowl typhoid.
 - (5) Pullorum disease.
 - (6) Infectious coryza.
 - (7) Pseudotuberculosis.
 - (8) Infectious laryngotracheitis.
 - (9) Fowl pox.
 - (10) Trichomoniasi.
 - (11) Enterohepatitis.
 - (12) Coccidiosis.
 - (13) Newcastle disease.
 - (14) Infectious bronchitis.
 - (15) Airsac disease or chronic respiratory disease.
- (b) Carcasses of poultry affected with avian leukosis complex shall be condemned.
- (c) Any individual organ or part of a carcass affected by a tumor shall be condemned. When there is evidence of metastasis, or that the general condition of the carcass has been affected by the size, position, or nature of the tumor, the whole carcass shall be condemned.
- (d) Carcasses of poultry showing any disease such as generalized melanosis, pseudoleukemia, and the like, which affects the system of the animal, shall be condemned.
- (e) Any organ or part of a carcass which is badly bruised or which is affected by an abscess, or a suppurating sore, shall be condemned; and when the lesions are of such character or extent as to affect the whole carcass, the whole carcass shall be condemned. Parts of a carcass which show only slight reddening from a bruise, may be passed as wholesome. Parts of carcasses which are contaminated by pus shall be condemned.

[The next page is 93.]

- (f) (1) Any organ or part of a carcass which is affected by an inflammatory process shall be condemned.
- (2) All carcasses of poultry so infected that consumption of the products thereof may give rise to food poisoning shall be condemned. This includes all carcasses showing signs of:
- (A) Acute inflammation of the lungs, pleura, pericardium or peritoneum.
 - (B) Gangrenous or severe hemorrhagic enteritis or gastritis.
 - (C) Polyarthritis and acute nephritis.
 - (D) Tenovaginitis.
- (E) Abscess or suppurating sore if associated with general systemic disturbance.
 - (F) Infectious synovitis.
- (g) Carcasses showing any degree of icterus with a parenchymatous degeneration of organs, the result of infection or intoxication, and those which, as a result of a pathological condition, show an intense yellow or greenish—yellow discoloration without evidence of infection or intoxication shall be condemned.
- (h) Carcasses of poultry (rabbits) affected with mange or scab in advanced stages, or showing emaciation or extension of the inflammation to the flesh shall be condemned. When the diseased condition is slight, the carcass may be passed as wholesome after removal and condemnation of the affected portion.
- (i) Edible organs or parts of carcasses of poultry which are found to be infested with parasites, or which show lesions of such infestation shall be condemned.
- (j) In the disposal of carcasses and parts of carcasses of rabbits showing evidence of infestation with parasites not transmissible to man, the following general rules shall govern:
- (1) If the lesions are localized in such a manner and are of such character that the parasites and the lesions caused by them may be radically removed, the nonaffected portion of the carcass, or part of the carcass may be passed as wholesome after removal and condemnation of the affected portions. Where a part of a carcass shows numerous lesions caused by parasites, or the character of the infestation is such that complete extirpation of the parasites and lesions is difficult and uncertainly accomplished, or if the parasitic infestation or invasion renders the organ or part in any way unfit for food, the affected organ or part shall be condemned. Where parasites are found to be distributed in a carcass in such a manner, or to be of such a character that their removal and the removal of the lesions caused by them are impracticable, no part of the carcass shall be passed for food.
- (2) Carcasses infested with hydatid cysts (Echinococcus granulosis) shall in all cases be condemned regardless of the degree of infestation.
- (k) Carcasses of poultry too emaciated or anemic to produce wholesome meat, and carcasses which show a slimy degeneration of the fat or a serous infiltration of the muscles shall be condemned. Mere leanness should not be classed as emaciation.
- (l) Carcasses of poultry affected with gout shall be disposed of as follows:
- (1) The whole carcass shall be condemned if marked deposits of urates are found in the organs or tissues, or if there is evidence of general systemic disturbance.
- (2) When slight deposits of urates are found in the organs or tissues and there is no apparent systemic disturbance the carcass may be passed as wholesome, after removal and condemnation of the affected parts.

NOTE: Authority cited: Sections 407 and 24561, Food and Agricultural Code. Reference: Sections 24996, 24997, 25091–25094 and 25095, Food and Agricultural Code.

HISTORY

1. Amendment of subsection (b) filed 6-4-85; effective thirtieth day thereafter (Register 85, No. 23).

§ 1252. Conditions Affecting Soundness, Requiring Condemnation of Carcasses or Parts.

- (a) Carcasses or parts of poultry contaminated by volatile oils, paints, poisons, gases, or other substances which affect the wholesomeness of the carcass shall be condemned.
- (b) Any organ or part of a carcass which has been contaminated following mutilation shall be condemned, and if the whole carcass is affected, the whole carcass shall be condemned.
- (d) Carcasses of poultry deleteriously affected by post-mortem changes shall be disposed of as follows:
- (1) Carcasses which have reached a state of putrefaction or stinking fermentation shall be condemned.
- (2) Any part of a carcass which is "green struck" shall be condemned and if the carcass is so extensively affected that removal of the affected parts is impracticable, the whole carcass shall be condemned.
- (3) Carcasses affected by types of post–mortem change which are superficial in nature may be passed as wholesome after removal and condemnation of the affected parts.
- (e) All poultry which have been suffocated in any way, and poultry which has entered the scalding vat alive, shall be condemned.
- (f) Carcasses of poultry showing evidence of having died from causes other than slaughter shall be condemned.
- (g) Carcasses of poultry which have been overscalded, resulting in cooked appearance of the flesh, shall be condemned.
- (h) All rabbit carcasses to be passed s ready—to—cook shall have the entire skin, feet, head and viscera removed. The kidneys, liver and heart may be left attached to the dressed carcass provided they are thoroughly cleaned.

HISTORY

1. Repealer of subsection (c) filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2)

§ 1253. Livers Affected with Abnormal Conditions: Disposal.

- (a) Livers showing any of the following pathological processes or abnormal conditions shall be condemned:
 - (1) Fatty degeneration resulting in visible, well-defined light spots.
- (2) Petechial or larger areas of hemorrhages. (The typical paint brushed appearance is not to be considered significant.)
 - (3) Petechial or larger areas of necrosis.
 - (4) Inflammatory processes including abscessation.
 - (5) Neoplastic tissue.
 - (6) Cirrhosis.
 - (7) Atrophy.
 - (8) Cysts.
- (9) Discoloration due to chemical toxins, bile duct or gall bladder disorders, and/or post-mortem changes. (Parts of livers showing bile stains should be trimmed off and the affected parts condemned.)
 - (10) Specific disease lesions such as enterohepatitis, leukemia, etc.
- (11) Mutilated livers which have been contaminated with intestinal content in rough or careless handling in the evisceration operation or otherwise contaminated by or with extraneous substances or materials.

Article 17. Denaturing and Disposing of Condemned Carcasses and Products

§ 1254. Disposition of Condemned Poultry Meat or Product.

(a) Any carcass or part or product condemned at an official plant shall be denatured with crude carbolic acid, kerosene, cresylic disinfectant or other prescribed agent, approved by the chief of the bureau, or be de-

Page 93 (4-1-90)

stroyed by incineration under the supervision of an inspector or bureau employee.

(b) Official plants not equipped for the proper disposition of condemned carcasses or products by incineration may dispose of such parts or products through reduction or rendering plants or by other means that shall not endanger human, poultry, or livestock health, after obtaining a written permit from the Director of Agriculture. When applying for such permit, the applicant shall designate the name and location of such reduction or rendering plant or other method of disposal whereupon, if the designated plant or method of disposal conforms with the requirements, a permit will be granted by the Director of Agriculture. Such permit may be revoked at any time when it is found that said reduction or rendering plant, or other method of disposal is not conducted in accordance with these regulations.

Article 18. Marking and Identifying Poultry Meat and Products

§ 1255. Approval of Abbreviations and Marks of Inspection.

- (a) The director may approve and authorize the use of abbreviations of marks of inspection under these regulations. Such abbreviations shall have the same force and effect as the respective marks for which they are so authorized to be used.
- (b) Except for the purpose of submitting a sample or samples of the same to the director for approval, no person shall make or prepare, or cause to be made or prepared, labels, inserts, brands, tags, or other marking devices bearing the inspection mark or any abbreviation, copy or representation thereof, for use on any poultry meat or product, without the written authority thereof of the director given in advance.
- (c) Official plants shall furnish such devices for marking products as the chief of the bureau may require. The mark of inspection on such a device shall be a facsimile of the official mark of inspection in the form shown herewith, using the size best suited for the purpose intended:

In advance of manufacture, complete and accurate descriptions and designs of the same shall be submitted to and approved by the director.

- (d) No person shall remove or cause to be removed from an official plant any article which these regulations required to be marked in any way unless the same is clearly and legibly marked in compliance with these regulations.
- (e) All marks of inspection shall be carefully applied and securely affixed.

HISTORY

1. Repealer of subsection (f) filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).

Article 19. Labeling

§ 1256. Marking and Labeling Inspected Products.

- (a) The inspection mark or approved abbreviation thereof, as the case may be, shall be applied to the inspected and passed edible product or to the immediate container of such product. The inspection mark, or the approved abbreviation thereof, shall, when used on packaging material, be printed on such material or on a label to be affixed to the packaging material, and the name and address of the packer or distributor of such product must be legibly printed on the packaging material or label, as the case may be. Notwithstanding the foregoing, the name and address of the packer or distributor, if appropriately shown elsewhere on the labeling material, may be omitted from insert labels and giblet wrappers which bear an official identification, provided, the applicable plant number is shown.
- (b) No label shall be used on any immediate or shipping container until it has been approved in its final form by the director. For the convenience of the plants, sketches or proofs of new labels may be submitted in duplicate for approval and the preparation of finished labels deferred until such approval is obtained. All finished labels shall be submitted in quadruplicate to the bureau for approval.
- (c) Each trade label approved for use pursuant to Articles 18 and 19 of these regulations with respect to any inspected and passed product shall bear the following information:
 - (1) The common or usual name of the edible product;
- (2) The name and address of the packer or distributor, and when the name of the distributor is shown, it shall be qualified by such terms as "packed for," "distributed by" or "distributors";
 - (3) A statement of the net weight of the product;
 - (4) The inspection mark;
- (5) The plant number of the official plant in which the product was inspected and passed; and
- (6) A statement of ingredients, if the edible product is made up to two or more ingredients; such ingredients shall be listed by their common or usual names in the order of descending proportion.
- (d) A product fabricated from two or more ingredients shall bear a list of the ingredients, giving the common or usual names of the ingredients arranged in order to their predominance, except that spices may be designated as "spices" or "flavorings" and flavorings (including essential oils, oleoresins, and other spice extractives) may be designated as "flavorings" without naming each.
- (e) Copies of each trade label submitted for approval pursuant to Articles 18 and 19 of these regulations shall, when the chief of the bureau requires, be accompanied by a statement showing the kinds and percentages of the ingredients comprising the edible product with respect to which the label is used. Approximate percentages may be given in cases where the percentages of ingredients may vary from time to time, if the limits of variation are stated.
- (f) Any trade label which is to be affixed to a container of any food product containing poultry product which is packed under the supervision of a poultry meat inspector in any official plant must bear the phrase: "The poultry product contained herein has been inspected for wholesomeness at a plant where California State supervised inspection is maintained." Each such trade label shall also be subject to the applicable provision of Articles 18 and 19 of these regulations.
 - (g) Labeling chicken parts
- (1) When labels are approved for chicken parts, there is a definite way that the chicken must be cut up in order that the approved labels will be appropriate for the various parts. Chicken legs are to be thighs and drumsticks in equal numbers. The meat on the pelvic bones (so-called oysters) must remain on the pelvic bones, if the product is to be labeled as chicken backs. The pelvic bones are not to be included with the chicken legs or chicken thighs. Chicken breasts are to have only the sternal ribs attached. This is accomplished by separating the breasts from the backs at the shoulder joint and by cutting downward and backward along the junction

Page 94 (4-1-90)

of the vertebral and sternal ribs. The vertebral ribs and pelvic bones would then remain to be labeled as chicken backs.

- (2) Poultry packaged with a leg or wing, etc., removed from the carcass must have an insert stating "parts missing."
- (h) All inserts used in conjunction with approved labeling must be submitted to the bureau office for approval before using.
- (i) No official identification or any abbreviation, copy or representation thereof may be affixed to or placed on or caused to be affixed to or placed on any product or container thereof except by a poultry meat inspector or bureau employee or under the supervision of a poultry meat inspector or bureau employee. All such products shall have been inspected and passed, and at the time of filling, shall have been sound, wholesome, and fit for human food. The inspector or bureau employee shall have supervision over the use and handling of all material bearing any official identification.
- (j) No inspector shall authorize the use of official identification for any inspected product unless he has on file evidence that such official identification or packaging material bearing such official identification has been approved in accordance with the provisions of Articles 18 and 19 of these regulations.
- (k) Trade labels approved for use pursuant to Articles 18 and 19 of these regulations shall be used only for the product for which approved.

 HISTORY
- 1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).

§ 1257. Removal of Official Identification.

Official plants which receive inspected poultry in containers which bear any official identification shall remove or deface such official identification upon removal of such poultry from the containers.

§ 1258. Relabeling Product—Requirements Regarding.

When it is claimed by an official plant that some of its labeled product which has been transported to a location other than an official plant is in need of relabeling on account of the labels having become mutilated or otherwise damaged, the request for relabeling the product shall be sent to the bureau and accompanied by a statement of the reasons therefor. Labeling material intended for relabeling inspected and passed product shall not be transported from an official plant until permission has been received from the bureau. The relabeling of inspected and passed product with official labels shall be done under the supervision of a poultry meat inspector or bureau employee.

§ 1259. Rescindment of Label Approvals.

Once a year, or oftener if necessary, each official plant should submit to the chief of the bureau, in quadruplicate, a list of approvals for labels that have become obsolete, accompanied with a statement that such approvals are no longer desired. The approvals shall be identified by the number, the date of approval, and the name of product or other designation showing the class of materials.

Article 20. Reinspection and Preparation of Products

§ 1260. Reinspection of Products.

(a) Only inspected and passed poultry product may be brought into an official plant and then only if the container of such product is marked for identification in the manner prescribed in Section 1256 (c) and the product is reinspected by a poultry meat inspector at the time it is brought into such plant. Upon reinspection, if any such product or portion thereof is found to be unsound, unwholesome, or otherwise unfit for human food, such product or portion thereof, shall be condemned and shall receive such treatment as that provided in Section 1254.

- (b) Any product which is prepared under inspection in an official plant shall be inspected in such plant as often as the inspector or bureau employee deems it necessary in order to ascertain whether such product is sound, wholesome, and fit for human food at the time such product leaves such plant. Upon any such inspection, if any such product or portion thereof is found to be unsound, unwholesome, or otherwise unfit for human food, such product or portion thereof shall be condemned and shall receive such treatment as that provided in Section 1254. When a plant operator indicates that he wishes to salvage or endeavor to salvage portions of such product, part of which is condemnable, the poultry meat inspector or bureau employee shall attach a "retained" tag thereto, notify the plant operator of such tagging and make necessary arrangements with the plant operator so that an inspector or bureau employee may be present when the product so tagged is to be processed for salvage or otherwise handled. No tagged product or product in containers so tagged shall be reprocessed or removed from the plant or containers until the "retained" tag is removed by a person authorized to do so and the tag shall indicate the name and retained tags shall not be removed or destroyed other than by persons authorized by a bureau employee.
- (c) All substances and ingredients used in the manufacture or preparation of any product shall be clean, sound, wholesome, and fit for human food.

HISTORY

1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2)

§ 1260.1. Standards for Poultry Meat Food Products.

(Section 377.5 Agricultural Code).

- (a) Meat Content of Poultry Pies. Poultry pies, or pot pies, which are prepared from cooked meat shall contain a minimum of 14 percent (1 1/8 ounces per 8—ounce pie) of cooked deboned poultry meat. Poultry pies, or pot pies, prepared with raw meat shall contain a minimum of 25 percent (2 ounces per 8—ounce pie) of raw deboned poultry meat. Both percentages shall be exclusive of any skin, giblets, or fat which may be included in the product.
- (b) Canned Boned Chicken or Turkey. Canned boned chicken or turkey which is prepared from cooked deboned meat shall not contain more than 10 percent added moisture. The product shall consist of deboned white and dark meat in natural proportions and may contain skin and fat not in excess of natural proportions.
- (1) Canned boned poultry meat which is prepared from raw boned meat in combination with cooked boned meat may have moisture added not to exceed 10 percent of the weight of cooked meat used in the product.
- (2) Boned chicken or turkey prepared from raw boned meat shall have no moisture added during the preparation and canning processes.
- (3) If moisture is added in excess of amounts specified in this paragraph (b), the ingredient statement on the label shall contain a statement indicating the addition of moisture, and the name of the product shall be qualified to indicate the added moisture.

NOTE: Authority cited: Sections 16 and 377.5, Agricultural Code.

HISTORY

1. New section filed 7–10–58; effective thirtieth day thereafter (Register 58, No. 12).

Article 21. Samples for Laboratory Examination

§ 1261. Samples of Products, Water, etc., May Be Taken for Examinations.

Samples of products, water, chemicals, spices, or other articles in any official plant may be taken, without cost to the bureau, for examination as often as may be deemed necessary for the efficient conduct of the inspection.

Page 95 (4-1-90)

Article 22. Canning

§ 1262. Poultry Meat Food Products for Canning.

Only inspected and passed products may be canned in an official plant; and such products shall be processed and handled in compliance with the following requirements:

- (a) Immediate containers (whether of metal, glass or other material) shall be cleaned thoroughly by washing in an inverted position with running water of a temperature of at least 180 degrees F., or by other means acceptable to the chief of the bureau, immediately prior to filling with products; and precautions shall be taken to avoid any subsequent spoilage of the inner surfaces of such containers.
- (b) Only perfect closure is acceptable for hermetically sealed containers; and heat processing of the products in such containers shall follow immediately after closing.
- (1) Except as provided in paragraph (e) of this section, such products shall be so processed at such temperature and for such period of time as will insure preservation of the products under usual conditions of storage and transportation.
- (2) Immediately after closing, and again after the containers have cooled sufficiently for handling after heat processing, careful examination shall be made by competent plant employees of all containers to ascertain whether such containers are perfectly sealed. The products in such containers as are defectively closed or sealed shall, as promptly as practicable, be filled into other containers, hermetically sealed, and heat processed unless the containers are promptly placed in a cooler at a temperature not exceeding 36 degrees F. under conditions that will promptly and effectively chill them. Such chilled containers of products shall be opened and the contents removed and reprocessed immediately after removal from the cooler:

Provided, that if such containers remained in the cooler for a period of 24 hours or longer, the contents shall be inspected by an inspector prior to the reprocessing thereof. Failure to comply with the provisions of this paragraph shall subject the products to condemnation.

- (c) After heat processing, and after the containers have cooled sufficiently for handling, the containers shall be examined by competent plant employees and shall not be passed unless showing the external characteristics of sound containers, that is, there is no bulging or slack or loose tin.
- (d) After heat processing, any containers of products showing characteristics of short vacuum or over–stuffed containers shall, when an inspector deems it necessary in order to determine whether spoilage of the product has taken place, be incubated under the supervision of an inspector, after which the containers shall be opened and sound products passed for food and spoiled products condemned.
- (e) Products may, when authorized by the chief of the bureau, and under such conditions as he may prescribe and approve, be canned without steam–pressure cooking, and such products, if frozen, shall be labeled "keep frozen," and if they are not frozen, they shall be labeled "perishable, keep under refrigeration."
- (f) Each lot of canned products shall be identified, during the handling preparatory to heat processing, by tagging the baskets, cases, or containers with a tag which will change color on going through the heat processing, or by other effective means which will positively prevent failure to heat process.
- (g) Facilities shall be provided to incubate at least representative samples of fully processed canned products. The incubation shall consist of holding the samples at least 10 days at about 98 degrees F. The extent to which incubation tests shall be required will depend on conditions such as efficiency of the plant in conducting canning operations, the kind of equipment used, and the degree of efficiency at which such equipment is maintained.
- (1) In the event the official plant fails to provide suitable facilities for incubation of test samples of any lot of fully processed canned products,

the inspector or bureau employee may require holding of the entire lot under such conditions and for such period of time as will, in this discretion, be necessary to ascertain the stability of the product.

- (2) The inspector or bureau employee may, prior to completion of any required incubation of a representative sample, permit lots of fully processed canned products to be shipped from the official plant when he has no reason to suspect unsoundness of such products; however, such shipments shall be made under circumstances which will assure the return of the products to the plant for reinspection should such action be indicated by the incubation results.
- (h) All canned products, excepting those in glass, shall be plainly and permanently marked, by code or otherwise on the containers, with the identity of the contents and date of canning. If the marking is by code, its meaning shall be on record in the files of the inspector.

Article 23. Preparation of Uninspected Articles

§ 1263. Preparation of Animal Food or Similar Uninspected Articles in an Official Plant.

- (a) When an article (including, but not being limited to, animal food) that will not be prepared for use as human food is prepared in any room or compartment in an official plant where products are prepared or handled (such rooms or compartments being herein referred to as "edible products department"), there shall be sufficient space allotted and adequate equipment provided, so that the preparation of the article in no way interferes with the preparation or handling of the products. Where necessary, separate equipment shall be provided for the preparation of the article. To assure the maintenance of the requisite sanitary conditions in the edible products department, the operations incident to the preparation of the article shall be subject to the same sanitary requirements as apply to the edible products department. Preparation of the article shall be limited to those hours during which the official plant operates under the supervision of an inspector. The ingredients used in the preparation of the article shall, unless otherwise approved by the chief of the bureau, be such as may be used in the preparation of an edible product. The article may be stored in, and distributed from, the edible products department if the article is properly identified.
- (b) When any article (including, but not being limited to animal food) that will not be prepared for use as human food, is prepared in any part of an official plant other than an edible products department (such part of the plant being herein referred to as "inedible products department"), the area in which such article is prepared shall be distinctly separated from all edible products departments. Products and inedible products may be brought from any edible products department into any inedible products department, but no product or inedible product from an inedible products department may be brought into an edible products department except under such conditions as may be prescribed or approved by the chief of the bureau. Any such articles as are in sealed containers or handled in the manner prescribed or approved by the chief of the bureau may be brought into an edible products department. Diseased carcasses or diseased parts of any carcass shall not be used in the preparation of any animal food. Trucks or containers used for the transportation of products or inedible products into an inedible products department shall be cleaned before being returned to or brought into an edible products department. Sufficient space shall be allotted and adequate equipment and facilities provided so that the preparation of the article does not interfere with the preparation of products in the plant or the maintenance of the requisite sanitary conditions in the official plant. The preparation of any article shall be subject to supervision by a poultry meat inspector or bureau em-
- (c) The immediate container of any such article that is prepared in an official plant shall be conspicuously labeled so as to distinguish it from human food.

Page 96 (4-1-90)

Article 24. Tagging Chemicals, etc., "Retained"

§ 1264. Tagging Chemicals, Cereals, Spices, etc., "Retained."

When any chemical, cereal, spice, or other substance is presented for use in an official plant, it shall be examined by a poultry meat inspector or bureau employee, and if found to be unfit or otherwise unacceptable for the use intended, or if final decision regarding acceptance is deferred pending laboratory or other examination, the inspector or bureau employee shall attach a "Retained" tag to the substance or container thereof. The substance so tagged shall be kept separate from other substances as the inspector may require, shall not be used until the tag is removed, and such removal shall be only by a poultry meat inspector or bureau employee after a finding that the substance can be accepted, or, in the case of an unacceptable substance, when it is removed from the plant.

Article 25. Products for Other Uses

§ 1265. Product for Educational Uses, Laboratory Examination, and Other Purposes.

When authorized by the chief of the bureau, product of special type or kind may be shipped or transported from official plants for educational uses, laboratory examination, and other purposes.

Article 26. Reports

§ 1266. Reports Required.

(Sections 375.5, 377.5, Agricultural Code.)

- (a) Poultry meat inspectors, employed as such, shall keep daily reports on B.P.I. forms 4 (Rev.) and 5 (Rev.) and such other forms as the chief of the bureau may direct.
 - (b) Reports required
 - (1) B.P.I. Form 4 (Rev.).
- (A) Official Daily Record of Poultry Post-mortem Examinations by Class. The inspector will list each carcass condemned under the appropriate cause. The inspector shall complete this record in full. The ready-to-cook weight shall be secured from the management and shall include that which is chilled and/or that which is frozen. If under ordinary circumstances a plant received ready-to-cook poultry products for repackaging only, the poultry meat inspector shall not report these weights as certified weights on B.P.I. Form 4 (Rev., since these weights have already been reported at the plant of origin. He must report in memorandum form in duplicate on any day of such operations and forward the original at the end of the month as directed by the chief of the bureau and retain one copy in the inspector's file.
- (B) Poultry Plant Operation Log. The report required on plant sanitation shall be completed in full before the start of each working day, then again before the start of the afternoon work period. B.P.I. Form 4 (Rev.) shall be kept on file for one year.
- (2) B.P.I. Form 5 (Rev.), Monthly Summary of Post-mortem Examination of Poultry for Condition and Wholesomeness by Class. A separate B.P.I. Form 5 (Rev.) will be completed for each "class" of poultry as listed in subparagraph (3) below. In plants with more than one eviscerating line, the condemnation records will be compiled on one B.P.I. Form 5 (Rev.) for each class at the end of the day. The inspector shall post the figures from B.P.I. Forms 4 (Rev.) to B.P.I. Form 5 (Rev.) daily. At the end of the month the inspector will prepare the monthly summaries, B.P.I. Forms 5 (Rev.), in duplicate. The inspector shall check each monthly summary with his original copies to be sure the copies are correct and mail the original as directed by the chief of the bureau. The inspector's copy shall be placed in the inspector's file and there held for one

year. The monthly summary shall be mailed not later than the third day after the end of the month.

- (3) The following is a list of classes for which separate reports (B.P.I. Form 5 (Rev.)) will be made:
 - (A) Chickens.
 - (B) Turkeys.
 - (C) Rabbits.
 - (D) Other classes (guineas, squabs, pigeons, ducks, geese).
- (c) All forms and instructions that the poultry meat inspector may receive from the bureau shall be kept under lock and key and made immediately available for examination by all bureau employees making plant visits.

HISTORY

1. Amendment filed 3–17–58; effective thirtieth day thereafter (Register 58, No. 5).

§ 1267. Plants to Furnish Information for Reports.

Each official plant shall furnish to the inspector accurate information as to all matters needed by him for making his reports pursuant to Section 1266.

§ 1268. Appeals from Poultry Meat Inspection Actions.

When the action of an inspector in condemning any poultry meat or product is questioned, appeal may be made to the immediate supervisor, and from his decision appeal may be made to the chief of the bureau, whose decision shall be final.

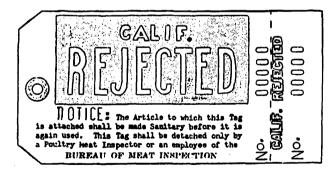

Article 28. State Food and Drug Laws

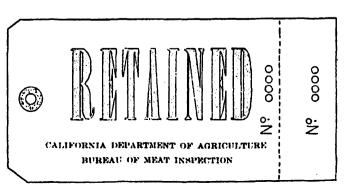

§ 1269. Food and Drug Acts.

Inspected and passed poultry meat and products shall comply with the provisions of the California Pure Food Act in every respect.

§ 1270. Facsimile of Tags to Be Used by Poultry Meat Inspector.

(Sections 375.5, 377.2, 377.5 Agricultural Code.) The following sample tags are facsimiles of tags to be supplied by the bureau for the use of poultry meat inspectors and bureau employees in tagging rooms, compartments, places, equipment, utensils, and products rejected; and products, chemicals, cereals, spices, etc., retained.

HISTORY

- 1. Amendment filed 3–17–58; effective thirtieth day thereafter (Register 58, No. 5).
- 2. Amendment filed 1-9-70; effective thirtieth day thereafter (Register 70, No. 2).

Article 30. New York Dressed Fowl

§ 1271. New York Dressed Fowl.

HISTORY

- 1. Amendment filed 1–23–61; effective thirtieth day thereafter (Register 61, No. 2).
- 2. Expired by own terms (Register 72, No. 51).

Subchapter 2. State-Federal Cooperative Inspection

HISTORY

- 1. Repealer of Group 2 (§§ 1272–1274.12) filed 10–8–70 as an emergency; effective upon filing (Register 70, No. 41). For prior history, see Registers 69, Nos. 46, and 70, No. 2.
- Certificate of Compliance Section 11422.1, Gov. Code, filed 12–15–70 (Register 70, No. 51).

Chapter 6. Drugging of Horses

§ 1280. Purpose of Subchapter.

NOTE: Authority cited for Subchapter 6 (Sections 1280 through 1280.11): Sections 407, 24007 and 24008, Food and Agricultural Code.

HISTORY

- 1. New Subchapter 6 (Sections 1280 through 1280.11) filed 1–12–72 as an emergency; effective upon filing (Register 72, No. 3).
- New Subchapter 6 (Sections 1280 through 1280.11) filed 5–19–72 as an emergency; effective upon filing (Register 72, No. 22). Certificate of Compliance included
- 3. Order of Repeal filed 6-3-85 by OAL pursuant to Government Code Section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).

§ 1280.1. Registration.

NOTE: Authority cited: Sections 407 and 24013, Food and Agricultural Code. Reference: Sections 24012 and 24015, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–13–85; effective thirtieth day thereafter (Register 85, No. 24).
- 2. Repealer filed 6-22-95; operative 7-22-95 (Register 95, No. 25).

§ 1280.2. Fees.

Beginning January 1, 2005, the applicable fee is \$5.00 per horse entered per event, except where a horse is entered in simultaneous multiple events held as single performances, the total applicable fee per horse shall be \$5.00.

NOTE: Authority cited: Sections 407, 24012 and 24013, Food and Agricultural Code. Reference: Sections 24012, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–24–81 as an emergency; designated effective 7–1–81. Certificate of Compliance included (Register 81, No. 26).
- Amendment filed 6-13-85; effective thirtieth day thereafter (Register 85, No. 24).
- 3. Amendment of subsection (b) filed 4–15–87; operative 4–15–87 (Register 87, No. 16).
- 4. Repealer and new section filed 6–22–95; operative 7–22–95 (Register 95, No. 25).
- 5. Amendment filed 5–10–2000; operative 5–10–2000 pursuant to Government Code section 11343.4(d) (Register 2000, No. 19).
- Change without regulatory effect amending section filed 5–23–2000 pursuant to section 100, title 1, California Code of Regulations (Register 2000, No. 21).
- Designation of existing section as subsection (a) and new subsection (b) filed 10–4–2004; operative 11–3–2004 (Register 2004, No. 41).
- 8. Change without regulatory effect repealing subsection (a) and subsection (b) designator filed 2–24–2005 pursuant to section 100, title 1, California Code of Regulations (Register 2005, No. 8).

§ 1280.3. Testing of Horses.

NOTE: Authority cited: Sections 407, 24007 and 24008, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–22–73; effective thirtieth day thereafter (Register 73, No. 12).
- 2. Amendment filed 6-24-81 as an emergency; designated effective 7-1-81. Certificate of Compliance included (Register 81, No. 26).
- 3. Editorial correction filed 4-29-82 (Register 82, No. 18)
- 4. Repealer filed 6-22-95; operative 7-22-95 (Register 95, No. 25).

§ 1280.4. Testing of Samples.

HISTORY

1. Repealer filed 6-22-95; operative 7-22-95 (Register 95, No. 25).

§ 1280.5. Prohibited Medications and Drugs.

NOTE: Authority cited: Sections 407, 24003, 24008 and 24013, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–22–73; effective thirtieth day thereafter (Register 73, No. 12).
- 2. New subsection (g) filed 2-26-82; effective thirtieth day thereafter (Register 82, No. 9).
- 3. Amendment of subsections (a), (b) and (g) filed 10–5–84; effective thirtieth day thereafter (Register 84, No. 40).
- 4. Repealer filed 6-22-95; operative 7-22-95 (Register 95, No. 25).

§ 1280.6. Medications.

NOTE: Authority cited: Sections 407, 24003 and 24008, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6-24-81 as an emergency; designated effective 7-1-81. Certificate of Compliance included (Register 81, No. 26).
- 2. Repealer filed 6-22-95; operative 7-22-95 (Register 95, No. 25).

§ 1280.7. Random Testing.

The Director will require random testing of horses exhibited or entered in any public horse show, horse competition, or public horse sale and shall designate the frequency and method of such testing by providing instructions to department personnel, contracting veterinarians, and to laboratories performing analyses.

NOTE: Authority cited: Sections 407, 24003 and 24008, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–22–73; effective thirtieth day thereafter (Register 73, No. 12).
- 2. Repealer of Section 1280.7 and renumbering of Section 1280.8 to Section 1280.7 filed 6-24-81 as an emergency; designated effective 7-1-81. Certificate of Compliance included (Register 81, No. 26).

§ 1280.8. Request for Testing.

NOTE: Authority cited: Sections 407, 24003 and 24008, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of Section 1280.9 to Section 1280.8 and renumbering of former Section 1280.8 to Section 1280.7 filed 6–24–81 as an emergency; designated effective 7–1–81. Certificate of Compliance included (Register 81, No. 26).
- 2. Repealer filed 6-22-95; operative 7-22-95 (Register 95, No. 25).

§ 1280.9. Procedure upon Allegation of Violation.

NOTE: Authority cited: Sections 407, 24003 and 24008, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

- 1. Renumbering and amendment of Section 1280.11 to Section 1280.9 and renumbering and amendment of former Section 1280.9 to Section 1280.8 filed 6–24–81 as an emergency; designated effective 7–1–81. Certificate of Compliance included (Register 81, No. 26).
- 2. Repealer filed 6-22-95; operative 7-22-95 (Register 95, No. 25).

§ 1280.10. Penalties.

NOTE: Authority cited: Sections 407, 24003 and 24008, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

1. Repealer filed 6-24-81 as an emergency; designated effective 7-1-81. Certificate of Compliance included (Register 81, No. 26).

§ 1280.11. Procedure upon Allegation of Violation.

NOTE: Authority cited: Sections 407, 24003 and 24008, Food and Agricultural Code. Reference: Sections 24000–24018, Food and Agricultural Code.

HISTORY

 Renumbering and amendment of Section 1280.11 to Section 1280.9 filed 6-24-81 as an emergency; designated effective 7-1-81. Certificate of Compliance included (Register 81, No. 26).

Chapter 7. Control of Diseased Animals

Article 1. Permits for Transportation and Sale of Diseased Animals to Slaughterers, Salesyards and Stockyards

§ 1300.

- (a) (Reserved)
- (b) Federal Regulations. These articles have been adopted after consultation with the United States Secretary of Agriculture. The requirements of these articles are supplementary to those of the Secretary in Title 9, Code of Federal Regulations, Part 71. Whenever any permit is required by these articles, such requirements may be satisfied by filing with the Director a copy of a permit or comparable documents issued by the Secretary and containing substantially the same information and requirements.

NOTE: Authority cited for new Subchapter 6: Sections 407, 9572, 18735, 19380, Agricultural Code.

HISTORY

- 1. New Subchapter 6 (Sections 1300 through 1300.15, not consecutive) filed 1–4–72 as an emergency; effective upon filing (Register 72, No. 2).
- 2. Renumbering of Subchapter 6 (Sections 1300 through 1300.15, not consecutive) to Subchapter 7 (Sections 1300 through 1300.15, not consecutive) filed 1–19–72 as an emergency; effective upon filing (Register 72, No. 4).
- 3. Certificate of Compliance, as to 1–4–72 filing, filed 2–18–72 (Register 72, No. 8)
- Order of Repeal of subsection (a) filed 6–3–85 by OAL pursuant to Government Code Section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).

§ 1300.1. Permit for Transportation of Diseased Animals into California.

- (a) No person shall transport into the State, any livestock as defined in Section 18663 of the Agricultural Code, known to have any of the following conditions or diseases or manifesting any of the following diseased conditions except under permit of the Director:
 - (1) Inability to walk normally or stand
 - (2) Abnormal temperature (high or low)
 - (3) Difficult breathing
 - (4) Abnormal swellings
 - (5) Foul odor and running sores
 - (6) Tumors or cancer growths
 - (7) Gangrene of the udder (blue bag)
 - (8) Water belly or swollen brisket
- (9) Infections of the region of eye (epithelioma–eye cancer in which the eye is destroyed or covered with a tissue mass showing infection, suppuration, and necrosis, usually accompanied with a foul odor).
- (b) Applications for permits required under subsection (a) shall be made to the CA Department of Agriculture, Division of Animal Industry, Bureau of Animal Health, 1220 N Street, Sacramento, CA 95814, and shall include the name and address of both the consignor and consignee, and the number, breed, and type of livestock.

The consignor, as a condition for the issuance of the permit, shall agree to comply with requirements thereof, which may include

- (1) Description and marking, or individual identification of the live-
- (2) Designation of the carrier and the time and place of destination;
- (3) Segregation and holding of the livestock for inspection at destination by the consignor; and

(4) Obtaining a certificate signed by a Federal or State veterinary inspector, or an accredited veterinarian, that the livestock to be shipped have been examined and none of the animals appears or is known to be affected with a contagious disease.

The consignee, as a condition for the issuance of the permit, shall agree to comply with the requirements thereof which shall include the requirements of Section 1300.11.

- (c) Each permit granted pursuant to subsection (a) shall state the destination of each shipment, without diversion, as
- (1) A slaughter establishment under inspection by the Director or the Secretary of Agriculture;
- (2) An establishment licensed by the Director as a pet food and horse slaughterer or renderer;
 - (3) A named livestock saleyard or public stockyard; or
- (4) An institution conducting research into animal diseases, employing a professional staff for such purpose.

§ 1300.2. Verification of Shipments Under Permit.

A copy of the required permit specified in Section 1300.1 shall accompany each shipment. It shall be exhibited to inspectors of the Department, the Secretary, or other law enforcement officers upon request.

§ 1300.3. Violations.

Any livestock manifesting disease as specified in Section 1300.1 and transported in violation of the requirements of that section are a public nuisance. The Director may require the owner or person in possession of such livestock to dispose of them at his own expense and in a manner suitable under the circumstances for accomplishing the purposes of this chapter.

§ 1300.4. Revocation of Permit.

The Director may revoke any permit issued under this article for violation of any of the conditions specified therein, and may suspend such permit when he deems it necessary for the purposes of this chapter. Any person aggrieved by the actions of the Director may, within 30 days of such action, appeal to the Director for a hearing thereon. Such hearing shall be held, in so far as practicable, under the provisions of the Administrative Procedure Act (Government Code, Title 2, Division 3, Part 1, Chapter 5), provided, however, the filing of the appeal shall not stay the suspension or revocation.

Article 2. Disposition of Animals Manifesting Disease

§ 1300.11. Receipt of Shipment.

(a) This article applies to livestock shipped into California pursuant to Article 1 and also to livestock from within this State shipped to a consignee stated in Section 1300.1(c).

Each person receiving any livestock which may be manifesting any disease condition specified in subsection (a) of Section 1300.1, or which were transported into California pursuant to a permit required by Section 1300.1, or which were required to be shipped pursuant to a permit specified in Section 1300.12 of this subchapter, shall:

- (1) Notify the Director of the arrival of the shipment;
- (2) Segregate the animals in specifically marked pens or enclosures;
- (3) Hold the animals for inspection when required by this article, or specifically required by the permit;
- (4) Dispose of such animals by sale or otherwise only in accordance with this article; and
- (5) Prepare and maintain records of the transaction involving the animals showing compliance with such requirements.
- (b) The provisions of this section are not intended to apply to livestock not required to be transported under permit which were apparently normal and healthy when received for transportation to a premises where livestock are commercially held for feeding (feed lot) in preparation for slaughter.

HISTORY

- 1. Amendment filed 1–19–72 as an emergency; effective upon filing (Register 72, No. 4).
- 2. Certificate of Compliance filed 3–10–72 (Register 72, No. 11).

§ 1300.12. Sale or Disposal.

Livestock received under the provisions of Section 1300.11 shall be sold, transferred, transported, or otherwise disposed of only as follows:

(a) If the receiving consignee is a person operating a slaughter establishment under inspection by the Director or Secretary, the livestock may be presented for inspection and disposition as provided pursuant to Sections 18721 and 18722 of the Agricultural Code and comparable provisions of the Federal Meat Inspection Act. The animals shall be slaughtered only at times specified by the Director, for an establishment under State inspection, or by the Secretary for a Federally inspected establishment. Such livestock need not be held for other inspections unless specifically required by the Director or Secretary; provided, however, records shall be prepared and maintained as required herein and such animals

may not be sold, transferred, or transported to another person unless authorized by permit pursuant to this article;

- (b) If the receiving consignee is a person licensed by the Director as a pet food and horse slaughterer, the livestock may be used for food purposes in accordance with the limitations of the license after passing inspection by the Director at the establishment. Records shall be prepared and maintained as required herein and such animals shall not be sold, transferred, or transported to another person unless authorized by permit;
- (c) If the receiving consignee is a renderer licensed by the Director, the livestock may be killed and rendered without holding such animals for inspection unless specifically required by the permit or other order of the Director. Records shall be prepared and maintained as provided herein and such animals shall not be sold, transferred, or transported to another person unless authorized by permit pursuant to this article;
- (d) If the receiving consignee is a saleyard or public stockyard, the livestock shall be held for inspection and proof of its identity furnished to the Director. Such animals may not be sold, transferred, or transported to another person except under permit of the Director. Records shall be prepared and maintained as provided herein.

(e) If the receiving consignee is a person engaged in the business of buying or transporting animals the livestock may be disposed of only in accordance with this regulation to a slaughter establishment under inspection by the Director or Secretary, to a licensed pet food and horse slaughterer, to a licensed renderer or to a salesyard or public stockyard. Records shall be prepared and maintained as required herein and such animals shall not be sold, transferred or transported to another person or destination unless authorized by permit.

§ 1300.13. Permit for Transfer or Sale of Livestock Manifesting Disease.

- (a) Livestock which are received by a consignee operating a saleyard or public stockyard, may be sold, transferred or transported to another person specified in Section 1300.12 (a), (b) or (c) when authorized by a general permit of the Director. Such permit shall not require a separate approval for each transaction.
- (b) Livestock which are received by a consignee operating a saleyard or public stockyard may be sold, transferred or transported to another person not specified in Section 1300.12 (a), (b) or (c) when authorized by a special permit of the Director. Such permit shall be signed by both the transferor and transferee and shall provide for the identification and segregation of the animals, a statement of intended use of the animals, notification to the Director of the movement and location of such animals, and the preparing and maintaining of pertinent records.

§ 1300.14. Retention of Documents.

Records required by this subchapter to be prepared and maintained shall be maintained for a period of six months after the date of receipt of the animals and shall be exhibited on the demand of any peace officer or any agent of the Department.

§ 1300.15. Violations.

Any livestock sold, transferred, or transported in violation of the permit requirement of Section 1300.12, are a public nuisance. The Director may require the owner or person in possession of such animals to dispose of them at his own expense and in a manner suitable under the circumstances for accomplishing the purposes of this chapter.

Article 3. Quarantine

§ 1301. Definitions.

- (a) "Animal" means any animal, livestock, or domestic animal, including poultry and fish, which is kept, maintained, held, or raised in captivity.
- (b) "Poultry" means any domesticated fowl and any wild fowl or bird which is kept, maintained, held, or raised in captivity.
- (c) "Population of animals" means any quantity of animals, including one animal
- (d) "Animal Product" means any edible or inedible product or products made from, by, or with an animal, any part of an animal, or animal by-product.
- (e) "Condition" means any illness, disease, infection, pathogen, contagion, toxin, bacteria, virus, prion, or any other material or factors affecting a population of animals or animal product.
- (f) "State Veterinarian" means the State Veterinarian or his designated representative.
- (g) "Hold" means to prevent or restrict movement of a population of animals or animal product from the premises where it is located.
- (h) "Move" means to relocate a population of animals or animal product from the premises where it is located, including the recall of an animal product already shipped.
- (i) "Segregate" means to separate, and maintain separately, a population of animals or animal product from another population of animals or animal product.
- (j) "Isolate" means to confine a population of animals or animal product in an area away from other populations of animals or animal products.

- (k) "Treat" means to test, clean, decontaminate, disinfect, dip, medicate, vaccinate, or destroy a population of animals, animal product, and/or premises, equipment, and other materials that may have been contaminated by the condition affecting the population of animals or animal product.
- (*l*) "Destroy" means to kill a population of animals or destroy or otherwise render an animal product inedible or unusable by a method deemed appropriate for the condition as determined by the State Veterinarian.
- (m) "Quarantine" means the designation of host and/or at-risk population(s) of animals, humans, and/or animal products, wherever located, for appropriate action as determined by the State Veterinarian, pursuant to this Article.
- (n) "Notice of Required Action" or "Notice" means a written notice by the State Veterinarian directing an owner to hold, move, prohibit entry into this State, segregate, isolate, treat, or destroy a population of animals or animal product.
- (o) "Owner" means the legal owner of a population of animals or animal product, the legal owner's authorized representative, any person with immediate control of a population of animals or animal product, or any person with immediate control over premises where a population of animals or animal product is or has been located.
- (p) "Epidemiology" means the study of the causes, distribution, and control of diseases in a population of animals or animal product.
- (q) "Standard epidemiological practice" means practices accepted as standard in veterinary medicine, including but not limited to official screening tests or the professional judgment of the State Veterinarian.
- (r) "Credible scientific research" means research published in a peerreviewed publication and not refuted by subsequent experiment or evidence
- (s) "Epidemiological investigation" means an investigation to determine the risks or presence of a condition affecting a population of animals or animal product, conducted using recognized or standard epidemiological practices, including but not limited to sample collection and laboratory testing.
- (t) "Plan of Action" means any procedure or procedures to control or eliminate a condition, or risks of a condition, affecting a population of animals or animal product, or to protect the health and safety of the citizens or animals of this State.
- (u) "Sample" means any specimen or portion necessary to establish a finding of fact in any circumstance subject to an application of this Article. The size and nature of the sample shall be determined by current standard epidemiological practice for the condition being investigated.
 - (v) "Presumptive diagnosis" means a preliminary diagnosis.
- (w) "Confirmatory diagnosis" means a diagnosis confirmed by confirmatory test results or other diagnostic criteria.
- (x) "Eradication program" means a prescribed course of action, set forth in State or Federal statute or regulation, for the purpose of eliminating or controlling a particular condition.
- (y) "Hearing Officer" means any person designated as a Hearing Officer by the State Veterinarian.
- (z) "May Carry", as referenced in Food and Agricultural Code section 9562, subdivision (a), means, in the exercise of the State Veterinarian's professional judgment, "susceptible to" or a belief that a population of animals or animal product has a condition pending epidemiological investigation.

NOTE: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 9502, 9503 and 9562, Food and Agricultural Code.

HISTORY

- 1. New article 3 (sections 1301–1301.9) and section filed 6–15–2001 as an emergency; operative 6–15–2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–15–2001 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New article 3 (sections 1301–1301.9) and section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Com-

pliance must be transmitted to OAL by 2-21-2002 or emergency language will be repealed by operation of law on the following day.

- 4. Certificate of Compliance as to 10–24–2001 order transmitted to OAL 10–23–2001 and filed 12–5–2001 (Register 2001, No. 49).
- 5. New subsection (z) and amendment of NOTE filed 4-2-2007; operative 5-2-2007 (Register 2007, No. 14).

§ 1301.1. Notice of Required Action.

- (a) If the State Veterinarian imposes a Quarantine pursuant to Food and Agricultural Code section 9562, he shall issue a Notice of Required Action.
- (b) The Notice of Required Action shall be in writing and shall be personally served upon the owner. If an owner cannot be contacted within an epidemiologically appropriate period of time as determined by the State Veterinarian, the Department may carry out the action required by the Notice.
- (c) The Notice of Required Action shall contain the following information:
- (1) Notice that a Quarantine has been imposed and the reasons for the Quarantine.
 - (2) Date and time of issuance of the Notice.
- (3) Name of the owner of the population of animals or animal product subject to the Quarantine and the Notice.
- (4) Description of the population of animals or animal product subject to the Quarantine and the Notice.
- (5) Description and/or address of the premises where the population of animals or animal product is located.
 - (6) The action required by the Notice.
 - (7) The procedure to appeal the imposition of the Quarantine.
 - (8) The signature and title of the person serving the Notice.
- (9) A location for the signature of the owner acknowledging receipt of the Notice.
- (d) Absence of a signature by the owner acknowledging receipt does not invalidate the Notice.
- (e) If the action required by the Notice is to hold a population of animals or animal product, the owner is prohibited from moving the population of animals or animal product from the premises.
- (f) If the action required by the Notice is to move a population of animals or animal product, including but not limited to relocation to another site or recall to the owner's premises of a population of animals or animal product already shipped, the owner shall move, to a location specified by the State Veterinarian, the population of animals or animal product no later than a date and time and by a method deemed appropriate for the condition as determined by the State Veterinarian. The location to which the population of animals or animal product is to be moved, and the date and time and method by which the population of animals or animal product is to be moved shall be specified on the Notice.
- (g) If the action required by the Notice is to segregate or isolate a population of animals or animal product, the owner shall segregate or isolate the population of animals or animal product no later than a date and time and by a method deemed appropriate for the condition as determined by the State Veterinarian. The date and time and method by which the population of animals or animal product is to be segregated or isolated shall be specified on the Notice.
- (h) If the action required by the Notice is to treat (other than to destroy) a population of animals or animal product, the owner shall treat the population of animals or animal product no later than a date and time and by a method deemed appropriate for the condition as determined by the State Veterinarian. The date and time and method by which the treatment is to be completed shall be specified on the Notice.
- (i) If the action required by the Notice is to destroy a population of animals or animal product, the owner shall cooperate with the State Veterinarian to destroy and dispose of the remains of the population of animals or animal product no later than a date and time and by a method deemed appropriate for the condition as determined by the State Veterinarian.

The date and time and method for destruction and disposal shall be specified on the Notice.

- (1) The action may be carried out before compensation is tendered pursuant to section 1301.9.
- (2) If the owner destroys or disposes of the population of animals or animal product, the owner shall submit by mail to the State Veterinarian a written declaration confirming that the population of animals or animal product was destroyed and the method of destruction and disposal no later than two (2) calendar days after the action is completed.
- (j) If the action required by the Notice is to cease efforts to cause a population of animals or animal product to enter the State, the owner is prohibited from bringing, or causing to be brought, the population of animals or animal product into this State.
- (k) The State Veterinarian may issue a subsequent Notice at any time, modifying any or all of the provisions of an earlier Notice; provided however that:
- (1) if an informal hearing has already been conducted and the imposition of Quarantine has been upheld, the owner may not appeal and request another informal hearing based on the subsequent Notice.
- (2) if an informal hearing was not requested based on any earlier Notice, the owner may appeal and request an informal hearing based on the subsequent Notice, but only if the subsequent Notice requires that a population of animals or animal product be destroyed and the previous Notice required a different action to be taken.
- (1) The State Veterinarian may inspect a population of animals or animal product which are subject to a Quarantine, or the premises where they are or have been present, in order to ascertain compliance with the Notice of Required Action or for any other purpose related to the Quarantine.
- (m) If an owner fails to comply with a Notice of Required Action or is otherwise in violation of the Quarantine, the Department may take such action as is required to effect the action required in the Notice, including but not limited to taking custody and/or control of the population of animals or animal product and causing the action ordered in the Notice to occur.
- (n) If the Quarantine imposed by the State Veterinarian designates a geographic region containing multiple owners which shall be subject to the Quarantine, service of the Notice of Required Action may be effected by publication in a newspaper of general circulation in or near the designated area, instead of by personal service on each owner. If service of the Notice is effected by publication, the contents of the published Notice shall omit the matters specified in subsections (c)(3), (c)(8), and (c)(9) above.
- (o) The Quarantine shall remain in effect until a Release of Quarantine is issued by the State Veterinarian.

NOTE: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 263, 9502, 9503, 9531, 9561, 9562, 9570, 9563, 9565, 9566, 10061, 10102, 10324, 10326, 10327, 10386, 10404,10781, 10921, 32731, 32741, 32742, 32743, 32761, 32765, 32766, 32767 and 35928, Food and Agricultural Code; and Sections 11425.50 and 11445.10, Government Code.

HISTORY

- 1. New section filed 6–15–2001 as an emergency; operative 6–15–2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–15–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–21–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 10–24–2001 order transmitted to OAL 10–23–2001 and filed 12–5–2001 (Register 2001, No. 49).

§ 1301.2. Appeal of Imposition of Quarantine.

(a) The owner may appeal the imposition of the Quarantine and request an informal hearing by contacting Animal Health and Food Safety Services, California Department of Food and Agriculture, within 72 hours from the time the Notice of Required Action is served, or within

Page 102 Register 2007, No. 14; 4-6-2007

- a shortened time period deemed appropriate for the condition as determined by the State Veterinarian and as specified on the Notice. If the appeal is not timely submitted, the Department shall deny the request for hearing.
- (b) If the action required by the Notice is to hold, cease efforts to cause entry into the State, segregate, isolate, or treat (other than destroy) a population of animals or animal product, the Notice shall remain in effect during the appeal period and pending the outcome of the informal hearing.
- (c) If the action required by the Notice to move a population of animals or animal product, the State Veterinarian, in his sole discretion, may stay the Notice pending the outcome of the informal hearing; provided however that, if the Notice requires treatment also, that portion of the Notice shall remain in effect, unless expressly stayed by the State Veterinarian. The direction of the State Veterinarian to hold or move or treat pending the outcome of the informal hearing is not appealable.
- (d) If the action required by the Notice is to destroy a population of animals or animal product, the Notice shall be stayed pending the outcome of the informal hearing, but the population of animals or animal product must be held or moved, as directed by the State Veterinarian, during the stay. The direction of the State Veterinarian to hold or move pending the outcome of the informal hearing is not appealable.

NOTE: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 9561, 10324, 10493, 10781, 10921 and 32767, Food and Agricultural Code; and Sections 11425.50 and 11445.10, Government Code.

HISTORY

- 1. New section filed 6–15–2001 as an emergency; operative 6–15–2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–15–2001 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–21–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 10-24-2001 order transmitted to OAL 10-23-2001 and filed 12-5-2001 (Register 2001, No. 49).

§ 1301.3. Hearing Procedures.

- (a) If an appeal is received pursuant to the conditions set forth in section 1301.2, the hearing shall be held within 48 hours of receipt of the appeal.
- (b) Hearings shall be presided over and conducted by a Hearing Officer designated by the State Veterinarian.
- (c) The standard of proof to be applied by the Hearing Officer shall be the preponderance of the evidence.
 - (d) The burden of proof shall be on the owner.
- (e) The only issue before the Hearing Officer shall be whether, when the State Veterinarian imposed the Quarantine, there was reason to believe, upon any basis reasonably supportable by standard epidemiological practice or credible scientific research, that a population of domestic animals or food product from animals had contracted, may carry, or is at risk from a condition that, without intervention, could transmit an illness that could kill or seriously damage other animals or humans, including, in addition to the original condition, those clinically plausible secondary illnesses, infections, pathogens, contagions, toxins, or conditions arising from the effects of the original. The appropriateness of the action(s) (including its time and place and method) required by the Notice is not before the Hearing Officer, but only whether or not there was an adequate basis for imposition of the Quarantine.
- (f) Hearings may be conducted by telephone, at the discretion of the Hearing Officer.
- (g) The decision of the Hearing Officer shall be in writing. The decision shall be in minute order form, containing only a brief statement of the conclusion and findings to support the conclusion. It may be handwritten.

- (h) The decision shall be issued within 24 hours after the conclusion of the hearing and may be issued orally at the conclusion of the hearing subject to written confirmation.
- (i) The written decision shall be served on the owner either by personal service or, if available, by facsimile transmission.
- (j) The Hearing Officer's decision shall be effective immediately upon first articulation under either subsection (g) or (h) above and shall be final and not appealable to the Secretary or any other officer of the Department
- (k) The owner may challenge the Hearing Officer's decision by filing a writ of administrative mandamus in the appropriate court pursuant to Code of Civil Procedure section 1094.5.
 - (1) Hearings shall be recorded by audio tape.

NOTE: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 9561, 10324, 10493, 10781, 10921 and 32767, Food and Agricultural Code; and Sections 11425.50 and 11445.10, Government Code.

HISTORY

- 1. New section filed 6–15–2001 as an emergency; operative 6–15–2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–15–2001 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–21–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 10-24-2001 order transmitted to OAL 10-23-2001 and filed 12-5-2001 (Register 2001, No. 49).

§ 1301.4. Epidemiological Investigation.

- (a) An epidemiological investigation shall be conducted by the State Veterinarian after he has imposed a Quarantine, except as specified in subsection (e). The State Veterinarian may use the findings of a federal investigation as the basis for any decision with regard to a Quarantine, Notice of Required Action, and/or plan of action.
 - (b) The investigation shall seek to determine the following:
- (1) the condition affecting the population of animals or animal product.
 - (2) the origin of the condition.
 - (3) the extent of the exposure to the condition.
- (4) an appropriate plan of action, including but not limited to a subsequent Notice of Required Action.
- (c) All laboratory tests conducted under this Article shall be conducted in laboratories of the California Department of Food and Agriculture, University of California School of Veterinary Medicine, the United States Department of Agriculture, an approved County Veterinarian's laboratory, or by other such persons authorized by the State Veterinarian to conduct the particular tests needed.
- (d) Upon reasonable belief that any sample taken may have been contaminated, spoiled, collected inappropriately, or is otherwise insufficient for a valid laboratory result, the State Veterinarian may take such action as he deems appropriate, including but not limited to requiring the submission of another sample for laboratory testing.
- (e) If the action required by the Notice is to cease efforts to cause a population of animals or animal product to enter the State and the owner ceases efforts to cause the entry into this State of that population of animals or animal product, the State Veterinarian may, but is not required to, conduct an epidemiological investigation.

NOTE: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 9531, 9561, 10151, 10324, 10326, 10354, 10384, 10493, 10781, 10921, 32731, 32761.5 and 35928, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–15–2001 as an emergency; operative 6–15–2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–15–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by

- 2–21–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 10–24–2001 order transmitted to OAL 10–23–2001 and filed 12–5–2001 (Register 2001, No. 49).

§ 1301.5. Sample Collection.

- (a) All samples for laboratory testing shall be collected by designated representatives from federal, state or county governments, or other persons authorized by the State Veterinarian to collect samples for testing purposes under this Article.
- (b) The State Veterinarian shall determine what samples shall be collected, including but not limited to the type, number, amount, and size or volume.
- (c) A duplicate of each sample may be taken and, if taken, shall be collected at the same time as the official sample.
- (1) If taken, a duplicate of each sample shall be left with the owner, except as specified in subsections (g) and (h).
- (2) The owner's signature shall be requested on a form acknowledging receipt or refusal of duplicate samples.
- (3) If the owner refuses to sign the form, the Department's representative shall note on the form whether the duplicate sample was accepted or refused, that the owner refused to sign the form, and the Department's representative shall sign the form.
- (d) Each sample collected shall be appropriately identified with the identification number of the animal or animal product, if any, the date and time collected, the person collecting the sample, and the premises address where collected. If an identification number of the animal or animal product is not available, then a detailed description of the animal or animal product and its location on the premises, which is adequate to accurately identify the specific animal(s) or animal product, shall be used.
- (e) Sample integrity and usefulness shall be safeguarded by sealing and packaging individual samples in containers appropriate for the type of sample collected, preventing direct contact with contaminants such as refrigerants or other samples, and sealing the container in which the individual samples are transported.
- (f) A Sample Submission and Chain of Custody form shall accompany each sample throughout the shipping and laboratory testing process.
- (g) Subsequent testing pursuant to an existing eradication program shall not require a duplicate of each sample to be left with the owner unless the eradication program so requires.
- (h) A duplicate of each sample shall not be left with the owner if, in the State Veterinarian's judgment, the suspected condition is so contagious or potentially dangerous that possible mishandling of the sample may expose a population of animals, animal product, or citizens of the State to the contagious or potentially dangerous condition.

Note: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 9531, 9561, 10151, 10324, 10326, 10354, 10384, 10493, 10781, 10921, 32731, 32732, 32733, 32761.5 and 35928, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-15-2001 as an emergency; operative 6-15-2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10-15-2001 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–21–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 10-24-2001 order transmitted to OAL 10-23-2001 and filed 12-5-2001 (Register 2001, No. 49).

§ 1301.6. Release of Quarantine.

The State Veterinarian shall issue a Release of Quarantine under either of the following circumstances:

(a) The confirmatory laboratory testing of samples collected from the suspected host population disproves the presumptive diagnosis, and no other condition is identified.

(b) The host population of animals or animal product tests negative upon re–testing, and the State Veterinarian determines that the condition is controlled or eradicated and that the host population of animals or animal product no longer poses a threat to the animals and/or citizens of the State of California.

NOTE: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 9531, 9561, 9563, 9567, 10102, 10324, 10324, 10781, 10921 and 35928, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–15–2001 as an emergency; operative 6–15–2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10–15–2001 or emergency language will be repealed by operation of law on the following day.
- Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–21–2002 or emergency language will be repealed by operation of law on the following day.
- .4. Certificate of Compliance as to 10–24–2001 order transmitted to OAL 10–23–2001 and filed 12–5–2001 (Register 2001, No. 49).

§ 1301.7. Reportable Conditions

- (a) Licensed veterinarians, any persons operating an animal disease diagnostic laboratory, or their authorized agents, shall comply with Food and Agricultural Code section 9101 and shall report any of the diseases set forth in Title 3, California Code of Regulations, section 796, as required by that section.
- (b) If the Department determines that a reportable condition was known or discoverable using standard tests, but not reported as required, the Department shall report this failure to the appropriate government agency.
- (c) Failure to comply by any person is a basis for imposition of penalties pursuant to this Article.

NOTE: Authority cited: Sections 407, 9562 and 9570, Food and Agricultural Code. Reference: Sections 263, 9101, 9561, 9574, 9591, 9595, 10324, 10781 and 10921, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-15-2001 as an emergency; operative 6-15-2001 (Register 2001, No. 24). A Certificate of Compliance must be transmitted to OAL by 10-15-2001 or emergency language will be repealed by operation of law on the following day.
- 2. Repealed by operation of Government Code section 11346.1(g) (Register 2001, No. 43).
- 3. New section filed 10–24–2001 as an emergency; operative 10–24–2001 (Register 2001, No. 43). A Certificate of Compliance must be transmitted to OAL by 2–21–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 10-24-2001 order transmitted to OAL 10-23-2001 and filed 12-5-2001 (Register 2001, No. 49).

§ 1301.8. Violations.

- (a) It is a violation of this Article if:
- (1) The owner fails to comply with any Notice of Required Action served upon him, or interferes with the State Veterinarian in connection with the Quarantine.
- (2) The owner refuses to permit or interferes with an inspection by the State Veterinarian of a population of animals or animal product, or the premises where they are or have been present, in order for the State Veterinarian to ascertain compliance with a Notice of Required Action or for any other purpose related to the Quarantine. Such refusal shall constitute a violation of the Quarantine.
- (3) The owner fails to cooperate with, or otherwise interferes with, the State Veterinarian in conducting the epidemiological investigation.
- (4) The owner fails to complete, or cooperate with, the epidemiological investigation, plan of action, or eradication program determined by the State Veterinarian to control or eliminate the condition, or otherwise interferes with the State Veterinarian in completing the plan of action or eradication program.
- (5) A licensed veterinarian, any person operating an animal disease diagnostic laboratory, or their authorized agents, fails to report any of the diseases set forth in Title 3, California Code of Regulations, section 796 as required by that section.

- (b) Violation of this Article constitutes a basis for the Department to pursue existing remedies. Pursuing any one remedy does not preclude the Department from pursuing any of the remaining remedies concurrently or at a later date unless otherwise prohibited by law.
 - (c) Existing remedies include but are not limited to:
- Denial, suspension, or revocation of a license, registration, certificate, permit, exception, or other indicia of authority issued by the Department;
 - (2) Civil or administrative penalties; and
- (3) Referral to the appropriate District Attorney or the Attorney General for criminal prosecution or other appropriate remedy.
- (4) Reimbursement of the Department for any cost incurred while acting pursuant to section 1301.1(m) above or due to any other violation of this Article.

NOTICE OF REQUIRED ACTION PURSUANT TO QUARANTINE Owner: _ You are hereby notified that the State Veterinarian has imposed a Quarantine pursuant to Food and Agricultural Code section 9562. The Quarantine includes the following population of animals or animal product: Description of Population of Animals or Animal Product: Present location: Pursuant to Food and Agricultural Code section 9562 and Title 3, California Code of Regulations, section 1301 et seq., you are required by the State Veterinarian to (check all that apply): Hold the population of animals or animal product described above on the premises where it is now located. ☐ Move the population of animals or animal product described above from the present location to _ __ no later than ___ a.m. / p.m. on The method of movement shall be ☐ Cease all efforts to cause the population of animals or animal product described above to enter the State of California. ☐ Segregate the population of animals or animal product described above from other animals or food products no later than a.m. / p.m. on _. The method of segregation shall be __ Isolate the population of animals or animal product described above no later than The method of isolation shall be ☐ Treat the population of animals or animal product described above no later than ____ The method of treatment shall be ☐ Destroy and dispose of the population of animals or animal product described above no later than a.m. / p.m. on The method of destruction shall be __ The method of disposal after destruction shall be ___ and disposal shall be completed no later than _ a.m. / p.m. on _ The Quarantine is imposed by the State Veterinarian because the population of animals or animal product described above may be infected or infested, has been exposed to a condition that could transmit an illness that could kill or seriously damage other animals or humans, or may be at risk for such exposure. An epidemiological investigation will be conducted pursuant to Food and Agricultural Code section 9562, and Title 3 of the California Code of Regulations, section 1301 et seq. to determine the condition affecting the population of animals or animal product. The Quarantine is imposed by the State Veterinarian in the circumstances of natural disaster, whether occurring or imminent, or a The State Veterinarian may modify the action(s) required in this Notice, if warranted by circumstances or assessment. Failure to comply with this Notice of Required Action is a violation of Title 3, California Code of Regulations, section 1301.8 and will result in the Department of Food and Agriculture pursuing appropriate remedies, including but not limited to law enforcement involvement, and may interfere with your receiving indemnity payments to which you might be entitled. Notice issued by: Title Date Time Notice served by: Time Date Notice received by: YOUR APPEAL RIGHTS You may appeal the imposition of the Quarantine in an informal hearing process, pursuant to Chapter 4.5

You may appeal the imposition of the Quarantine in an informal hearing process, pursuant to Chapter 4.5 (commencing with Section 11400) of Division 3 of Title 2 of the Government Code and Title 3, California Code of Regulations, section 1301.3, by contacting the Division of Animal Health and Food Safety Services, 1220 N Street, Room A-114, Sacramento, California 95814, telephone (916) 654-0881, facsimile (916) 653-4249, and requesting an informal hearing.

- Q YOUR REQUEST FOR A HEARING MUST BE RECEIVED WITHIN 72 HOURS OF THE SERVICE OF THIS NOTICE.
- ☐ YOUR REQUEST FOR A HEARING MUST BE RECEIVED NO LATER THAN _____ A.M. / P.M. ON _____

Chapter 8. Animal Biologics

Article 1. Definitions

§ 1305.00. Definitions.

Unless otherwise apparent from the context, the following definitions shall apply to this subchapter:

- (a) "Animal" means all vertebrates and other species, other than man to which biologics may be administered.
- (b) "Expiration Date." The end of the period in which the biological product properly stored and handled can, with reasonable certainty, yield the result expected.
- (c) "Serial." The total quantity of biological product, in its final composition, which has been thoroughly mixed in a single container and permanently identified by a serial number.
- (d) "Subserial." Each of two or more portions of a serial identified by serial number and letters, which are filled into final containers at different times, further processed at different times, or further processed under different conditions.

NOTE: Authority cited: Sections 407 and 9251, Food and Agricultural Code. Reference: Section 9201, Food and Agricultural Code.

HISTORY

1. New Subchapter 8 (Sections 1305.00–1305.12) filed 8–15–75; effective thirtieth day thereafter (Register 75, No. 33).

Article 2. Licenses

§ 1305.01. Issuance of License.

(a) Each establishment applying for a license to produce biologics, as required by Section 9211 of the Food and Agricultural Code, shall be inspected and approved by the Secretary prior to the approval of a license. Approval shall be based on compliance at the specific location, with current applicable standards for the production of biologics established in Chapter 1, Title 9 of the Code of Federal Regulations pertaining to Virus, Serum, Toxins, and Analogous products. Exceptions for individual standards at specific locations may be granted by the Secretary upon application and demonstration by the applicant of conditions warranting such exception and appropriate license restrictions.

(b) The license is not transferable as to location or ownership. Change in equity ownership, directly or by sale or transfer of a controlling stock interest or change in location, requires a new license.

HISTORY

Change without regulatory effect amending subsection (a) filed 7-30-96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

§ 1305.02. Cancellation or Suspension of License.

- (a) The Secretary may suspend or cancel the license of any establishment not in compliance with Section 9212 of the Food and Agricultural Code or producing a product not in compliance with Section 9242 of the Food and Agricultural Code. License cancellation or suspension shall be in accord with Section 9261 of the Food and Agricultural Code.
- (b) If the Secretary finds the continued operation of an establishment constitutes an immediate hazard to persons or animals, he may, after notice, suspend the license pending a hearing and final decision.
- (c) Each applicant for license shall accept the above as a condition of licensure.

HISTORY

1. Change without regulatory effect amending subsections (a) and (b) filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

Article 3. License Fees

§ 1305.03. Application Fee.

The application and license fee for the period July 1, 1975 to June 30, 1976, or portion thereof, is \$125.00 for each establishment. Thereafter, the application and license fee shall be \$250.00 for each establishment for the fiscal year, or portion thereof, ending June 30 of each year.

§ 1305.04. Renewal Fee.

An annual renewal fee of \$250.00 shall be paid on or before the first day of July of each year. To any fee which is not paid when due, there shall be added a penalty of \$25.00.

Article 4. Animals

§ 1305.05. Use of Animals.

HISTORY

1. Order of Repeal filed 6-3-85 by OAL pursuant to Government Code Section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).

Article 5. Product Registration

§ 1305.06. Separate Registration.

Separate registration is required for:

- (a) Each biologic produced in an establishment licensed by the Secretary.
- (b) Each biologic product produced by an owner or operator for animals owned by him, except products produced by a veterinarian for treatment of disease in animals which are under his care for therapy and are administered by him only to such animals.
- (c) Each experimental biologic product produced in an establishment licensed by the United States Department of Agriculture or biologic product issued a special license by the USDA prior to use in California.
- (d) The Secretary, upon notice, may require registration of any biologic product which is licensed by the United States Department of Agriculture when he determines it necessary to prevent the spread or introduction of infection or disease and to assure its safe and effective use in California. The Secretary will maintain a current index of such products.

HISTORY

1. Change without regulatory effect amending subsections (a) and (d) filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

§ 1305.07. Application for Registration.

Each application for registration of a biologic shall include:

- (a) A protocol of production and methods to be followed to include:
- (1) Source and type of biologic material used to produce the product.
- (2) Methods used to determine efficacy, potency, purity, and safety of the product during manufacture and distribution.
- (b) A sample of the label to be attached to the product, including restrictions to use by a licensed veterinarian in appropriate cases or other restrictions such as specifying a special registration subject to precautions
- (c) Such other information as required by the Secretary to determine if a product may be hazardous to animal or human health. The Secretary may require demonstration by the registrant of the safety and efficacy of the product prior to registration.

HISTORY

Change without regulatory effect amending subsection (c) filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

§ 1305.08. Registration.

- (a) (Reserved.)
- (b) No change in composition, protocol of production or labeling of a biologic registered by the Secretary shall be made without prior approval of the Secretary.

(c) The registration of a biologic shall specify the conditions of use and period for which registration is granted.

HISTOR

- Order of Repeal of subsection (a) filed 6–3–85 by OAL pursuant to Government Code Section 11349.7; effective thirtieth day thereafter (Register 85, No. 26).
- Change without regulatory effect amending subsection (b) filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

§ 1305.09. Cancellation or Suspension of Registration.

- (a) The Secretary may suspend or cancel the registration of any biologic if it is advertised or represented by the registrant or its agents in any false or misleading manner.
- (b) The Secretary may suspend or cancel the registration of any registered biologic which he finds is hazardous or does not correspond to the registration or does not produce effective results in accordance with the registration.
- (c) When the Secretary determines summary action is necessary for the immediate protection of public health, or health of animals, he may suspend registration pending hearing and prohibit the production, shipment, or use of biologics pending hearing, and may require the recall, secure custody, or destruction of biologics presenting an immediate hazard to human or animal health. Each registration shall be accepted subject to the above requirement.

HISTORY

1. Change without regulatory effect amending subsections (a), (b) and (c) filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

§ 1305.10. Records and Samples.

- (a) Each establishment licensed by the Secretary shall maintain, as to each registered biologic, records of the source of stock cultures, methods of preparation, results of tests for purity, safety, and potency of each serial of biologics produced and the sale, shipment, or other disposition of the above.
- (b) A representative sample of each serial and subserials of biologic produced in a licensed establishment shall be stored under conditions specified on the label for six months after the expiration date of the biologic. A Department inspector will sign and date each product label and attach a Department serial number or otherwise identify the sample for the Secretary with instructions to the licensee. The Secretary may require additional sampling or storage in particular cases. Failure to comply with such requests shall be grounds for summary suspension of registration.

HISTORY

1. Change without regulatory effect amending subsections (a) and (b) filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

§ 1305.11. Inspections.

- (a) Authorized representatives of the Secretary shall be permitted to enter an establishment producing registered biologics at any reasonable hour and inspect without previous notification, the entire premises of such establishment and all records maintained relative to condition of animals maintained, biologic production, spoilage, and distribution, as well as any other premises where the registrant may have placed any such products, records, or animals.
- (b) The licensed manufacturer shall provide upon request and without cost to the Secretary samples of stock cultures, other material, or serial or subserial of finished product from his establishment and any firm or person storing or selling the manufacturer's registered biologics; and shall also provide in contracts with distributors that the Secretary may take such samples without charge to the Secretary.

HISTORY

1. Change without regulatory effect amending subsections (a) and (b) filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

Article 6. Product Registration Fees

§ 1305.12. Registration Fee.

No additional product registration fee, in addition to the manufacturing establishment license fee, shall be payable for registrations which are determined by the Secretary to be routine and do not require special handling, tests, inspections or other special procedures. For registrations requiring such special consideration, the Secretary may require the applicant to pay a fee based on the estimated costs of processing the application to cover the Department's costs beyond the cost of a routine registration. The Secretary may later require such additional fees as necessary to cover such costs.

HISTORY

1. Change without regulatory effect amendment of section filed 7–30–96 pursuant to section 100, title 1, California Code of Regulations (Register 96, No. 31).

Chapter 9. Informal Hearings

Article 1. Informal Hearing Requirements

§ 1310. Scope of Coverage.

- (a) Any person, or his or her duly authorized representative, may contest a notice of adverse determination and request an informal hearing as outlined in this article. The informal hearing proceedings pertain to a violation of any of the following sections of the Food and Agricultural Code:
- (1) Importation requirements for horses or other Equidae pursuant to section 9641.5.
- (2) Brucellosis vaccination requirements pursuant to sections 10341, 10342 and Article 4 (commencing with section 10351), Chapter 3, Part 2, Division 5.
 - (3) Importation requirements for cattle pursuant to section 10610.
 - (4) Importation requirements for swine pursuant to section 10721.
- (5) Approved processing or disposal of garbage aboard any vessel or aircraft in the state pursuant to sections 16101, 16151, 16152, 16153 and 16154.
- (6) Control of performance and disposition enhancing medications for horses in public horse shows, events, competitions, or sales pursuant to Chapter 8 (commencing with section 24000), Division 11.
- (7) Inspection and sampling of milk, milk products, and products resembling milk pursuant to Article 2 (commencing with section 32731), Chapter 2, Part 1, Division 15.
- (8) Testing of milk and milk products for the presence of drug residues pursuant to Article 4 (commencing with section 32761), Chapter 2, Part 1, Division 15.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 11400.20, Government Code. Reference: Sections 9641.5, 10341, 10342, 10610, 10721, 16101, 16151, 16152, 16153 and 16154, Food and Agricultural Code; Article 4 (commencing with section 10351), Chapter 3, Part 2, Division 5, Food and Agricultural Code; Chapter 8 (commencing with section 24000), Division 11, Food and Agricultural Code; Article 2 (commencing with section 32731), Chapter 2, Part 1, Division 15, Food and Agricultural Code.

HISTORY

- 1. New chapter 9, article 1 (sections 1310–1310.3) and section filed 5–5–2003 as an emergency; operative 5–5–2003 (Register 2003, No. 19). A Certificate of Compliance must be transmitted to OAL by 9–2–2003 or emergency language will be repealed by operation of law on the following day.
- 2. Editorial correction of NOTE (Register 2003, No. 35).
- 3. Certificate of Compliance as to 5–5–2003 order transmitted to OAL 7–16–2003 and filed 8–26–2003 (Register 2003, No. 35).

§ 1310.1. Filing Deadlines and Procedures.

(a) The respondent may contest a notice of adverse determination for any violation specified in section 1310 and may request an informal hearing by written correspondence to the Department of Food and Agriculture, 1220 "N" Street, Room A–107, Sacramento, California 95814.

- (b) The respondent must submit a request for an informal hearing to the Department in writing within 30 days from the date of the notice of adverse determination. If the notice of adverse determination requires the holding of animals or animal products at a site specified, the respondent must submit the request by mail, facsimile, or by telephone within 72 hours of the date of the notice of adverse determination.
- (c) The respondent may request a formal hearing in lieu of an informal one. The respondent must do so within the filing deadlines for requesting an informal hearing set forth in subsection (b). Any request must be accompanied by a written statement in support of it. The hearing officer shall determine whether to proceed with an informal hearing or whether a formal hearing or other appropriate administrative proceeding may be required by statute pursuant to Chapter 5 (commencing with section 11500), Part 1, Division 3, Title 2 of the Government Code. The respondent will be expected to waive the time constraints of this article on the record if any administrative proceeding other than an informal hearing is requested by respondent or required by the Department.
- (d) Failure to present a timely request for a hearing constitutes a waiver of the respondent's right to contest the notice of an adverse determination. Untimely requests for a hearing shall be denied by the Department.
- (e) If the notice of adverse determination places a hold on a product or animal, or requires a person to cease operations, the notice of adverse determination shall remain in effect pending the outcome of the informal hearing.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 11400.20, Government Code. Reference: Chapter 4.5 (commencing with section 11400), Part 1, Division 3, Title 2, Government Code; and Chapter 5 (commencing with section 11500), Part 1, Division 3, Title 2, Government Code.

HISTORY

- 1. New section filed 5-5-2003 as an emergency; operative 5-5-2003 (Register 2003, No. 19). A Certificate of Compliance must be transmitted to OAL by 9-2-2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 5–5–2003 order transmitted to OAL 7–16–2003 and filed 8–26–2003 (Register 2003, No. 35).

§ 1310.2. Hearing Schedule and Notification.

- (a) Supplemental to any procedures set forth in Chapter 4.5 (commencing with section 11400), Part 1, Division 3, Title 2, Government Code, the Department shall schedule an informal hearing within 30 days from the receipt of the request from the respondent. If the notice of adverse determination requires the holding of animals or animal products at a site specified, the Department shall schedule the hearing within 72 hours of the receipt of the request for an informal hearing.
- (b) Formal hearings shall be scheduled by the Department consistent with the provisions of Chapter 5 (commencing with section 11500), Part 1, Division 3, Title 2 of the Government Code, and any applicable regulations enacted pursuant to these provisions.
- (c) The Department shall provide a notice of the informal hearing to the respondent containing the following information:
 - (1) Date, location, and time of the informal hearing;
- (2) Departmental contact information including applicable telephone and facsimile numbers;
 - (3) Subject matter of the adverse determination; and,
- (4) Any other information or documentation relative to the adverse determination.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 11400.20, Government Code. Reference: Chapter 4.5 (commencing with section 11400), Part 1, Division 3, Title 2, Government Code; and Chapter 5 (commencing with section 11500), Part 1, Division 3, Title 2, Government Code.

HISTORY

- 1. New section filed 5–5–2003 as an emergency; operative 5–5–2003 (Register 2003, No. 19). A Certificate of Compliance must be transmitted to OAL by 9–2–2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 5–5–2003 order transmitted to OAL 7–16–2003 and filed 8–26–2003 (Register 2003, No. 35).

§ 1310.3. Conduct of Hearings.

- (a) If a formal hearing is requested by the respondent or otherwise required by statute or regulation, it shall be conducted consistent with the provisions of Chapter 5 (commencing with section 11500), Part 1, Division 3, Title 2 of the Government Code.
- (b) Informal hearings shall be conducted pursuant to Chapter 4.5 (commencing with section 11400), Part 1, Division 3, Title 2 of the Government Code and shall be conducted as follows:
- (1) The informal hearing shall be presided over and conducted by a hearing officer designated by the Department.
- (2) The standard of proof to be applied by the hearing officer shall be preponderance of the evidence unless statutes or regulations applicable to the determination provide a higher standard.
- (3) Hearings may be conducted by telephone at the discretion of the hearing officer subject to Government Code section 11440.30.
- (4) Subject to the provisions of Government Code section 11425.50, the decision of the hearing officer shall be in writing with a brief statement of the conclusion and findings to support the conclusion. The decision may be handwritten.
- (5) The decision shall be issued within 14 days after the conclusion of the hearing and may be issued orally at the conclusion of the hearing subject to written confirmation.
- (6) The decision shall be served on the respondent either by personal service or, if available, by facsimile transmission.
- (7) The hearing officer's decision shall be effective immediately upon first articulation under subsection (b)(4) or (b)(5) above, and shall be final.
- (8) The respondent may appeal the hearing officer's decision by filing a petition for a writ of administrative mandamus in accordance with the provisions of the Code of Civil Procedure subject to the statutes relating to the Department.
- (9) The Department shall provide a copy of the decision to any interested party upon written request.

NOTE: Authority cited: Section 407, Food and Agricultural Code; and Section 11400.20, Government Code. Reference: Chapter 4.5 (commencing with section 11400), Part 1, Division 3, Title 2, Government Code; and Chapter 5 (commencing with section 11500), Part 1, Division 3, Title 2, Government Code.

HISTORY

- 1. New section filed 5-5-2003 as an emergency; operative 5-5-2003 (Register 2003, No. 19). A Certificate of Compliance must be transmitted to OAL by 9-2-2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 5–5–2003 order transmitted to OAL 7–16–2003 and filed 8–26–2003 (Register 2003, No. 35).

Division 3. Economics

(Originally Printed 7-25-45)

Chapter 1. Fruit and Vegetable Standardization

Subchapter 1. Canning Tomatoes

§ 1330. Inspection Fees.

The Director shall adopt a uniform schedule of inspection fees to defray the cost of inspection certification.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40811, 40933 and 41055, Food and Agricultural Code.

HISTORY

- 1. Repealer of Group 1 (Sections 1330–1335) and new Group 1 (Sections 1330–1341.4) filed 4–3–78; effective thirtieth day thereafter (Register 78, No. 14). For prior history, see Registers 55, No. 15; 56, No. 3; 57, No. 9; 60, No. 6; 68, No. 30; 71, No. 24; 71, No. 35; 72, No. 2; 72, No. 34; 73, No. 21; 73, No. 24; 74, No. 41; 75, No. 15; 75, No. 32; 76, No. 15; 76, No. 21; 76, No. 26; 76, No. 32; and 77, No. 14.
- 2. Editorial correction of NOTE (Register 82, No. 9).

§ 1330.1. Inspection Fee Deposit.

The Director may collect the fees for inspection and certification as required in Division 16, Chapter 2, of the Food and Agricultural Code in advance of performing the services.

If the Director determines that advance payment is required and the agent responsible for payment of inspection fees is so notified, inspection may be withheld until there has been deposited with the Department a cash deposit guaranteeing the payment of future inspections. The amount to be deposited shall be determined by the Director based upon expected charges.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 282, 40531, 40811 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1331. Field Identification Tag.

A field identification tag shall be furnished to the Director with each load of tomatoes prior to inspection. One (pink) copy of the field identification tag shall be preprinted "state copy" and retained by the Director. The field identification tag shall be a minimum size of 4" x 5." The name of the processor, producer, current date and the contract number applicable to the load shall be shown in the upper left hand corner of the field identification tag. Each field identification tag shall be printed and serial numbered.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40961 and 41005, Food and Agricultural Code.

HISTORY

- Repealer and new section filed 4-30-79; effective thirtieth day thereafter (Register 79, No. 18).
- 2. Editorial correction of NOTE (Register 82, No. 9).
- Amendment filed 10–14–86; effective thirtieth day thereafter (Register 86, No. 42).

§ 1332. Color Determination.

Any load of tomatoes which is offered for delivery to a canner shall be rejected and turned back to the grower if the tomatoes do not meet the minimum requirements for color based on comminuted raw product sampling. The maximum Agtron E5–M reading allowed to meet the minimum color for tomatoes shall be 39, except due to the unusual climatic and growing conditions in the desert areas, the maximum Agtron reading for tomatoes grown south and east of San Gorgonio Pass, shall be 40. Note: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40812, 40813,40961 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1332.05. Color Determination for Manufactured Tomato–Containing Products.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40811, 40812, and 40813, Food and Agricultural Code.

HISTORY

- 1. New section filed 8–22–83; designated effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 35).
- 2. Expired by own terms (Register 84, No. 24).
- 3. New section filed 6–14–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 24).
- 4. Repealer filed 10-14-86; effective thirtieth day thereafter (Register 86, No. 42).

§ 1332.1. Worm Damage.

Any load of tomatoes which is offered for delivery to a canner shall be rejected and turned back to the grower if in excess of 2 percent, by weight, is affected by worm damage. A tomato is scoreable for worm damage when a worm has penetrated the flesh. Open holes which are clean, and no worm or other excreta are present, shall not be considered as worm damage.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40812, 40813, 40961 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1332.2. Mold.

Any load of tomatoes which is offered for delivery to a canner shall be rejected and turned back to the grower if in excess of 8 percent, by weight, is affected by mold. A tomato is scoreable for mold when (a) mold has penetrated the wall of the tomato and is plainly visible on the inside of the wall of the tomato, or (b) mold has penetrated into the wall structure, but not through to the locule, and the mold has affected in its penetration enough of the volume of the wall of the tomato to make it necessary, as would be done in normal preparation for canning purposes, to remove more than 10 percent of the weight of the tomato. "Mold" as used in this section means there is present in the flesh of the tomato mycelium or mycelium and spores of any kind of mold fungus which has affected the tomato.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40812, 40813, 40961 and 41005, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE (Register 82, No. 9).
- 2. Amendment filed 5–15–84; effective thirtieth day thereafter (Register 84, No. 20).

§ 1332.3. Green.

Any load of tomatoes which is offered for delivery to a canner shall be rejected and turned back to the grower if in excess of 4 percent, by weight, is green. A tomato is scoreable for green when the external surface of the tomato is green, with no visible shade of red.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40812, 40813, 40961 and 41005, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 4–30–79; effective thirtieth day thereafter (Register 79, No. 18).
- 2. Editorial correction of NOTE (Register 82, No. 9).

§ 1332.4. Material Other Than Tomatoes.

Any load of tomatoes which is offered for delivery to a canner shall be rejected and turned back to the grower if in excess of 3 percent of the delivery, by weight, contains material other than tomatoes. Material other than tomatoes includes extraneous material, dirt, and detached stems. NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40812, 40813, 40961 and 41005, Food and Agricultural Code.

Page 103 (4-1-90)

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1333. Certification of Non-Rejectable Categories.

- (a) Limited Use. A tomato is scoreable as "limited use" and the percentage recorded on the certificate, if:
- (1) It has a soft watery condition with more than 25 percent of the skin separated from the underlying flesh; or
 - (2) More than 50 percent of the tomato is soft and mushy; or
 - (3) The fruit is broken to the extent the seed locules are visible.
- (b) Seed Sprouts. A tomato is scoreable, and so indicated in the check box, when seed sprouts are present in most of the cells or a single sprout exceeds 5/16 inch (.8 centimeters) in length in any cell.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40961 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1333.1. Soluble Solids.

The Director shall provide inspection for testing of soluble solids.

The Director shall record the percentage of soluble solids on the certificate. The determination shall not be cause for rejection.

The testing equipment shall be approved and provided by the Director. The refractometers shall be a hand type, temperature compensated with a 0 to 30 scale and/or a digital bench type, temperature compensated with at least a 0 to 30 scale. The Director will consider equipment recommendations of the Canning Tomato Advisory Committee.

The sample to be tested for soluble solids shall be collected in conjunction with or as a portion of the normal representative sample.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40961 and 41005, Food and Agricultural Code.

HISTORY

New section filed 10–14–86; effective thirtieth day thereafter (Register 86, No. 42). For history of former Section, see Register 79, No. 18.

§ 1333.2. Gray Wall Recorded for Information Purposes.

The Director shall record on the certificate, and not be cause for rejection, the indication of gray wall if found during inspection.

"Gray wall" means dark brown or black discoloration of the vascular bundles in the wall of the tomato.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40961 and 41005, Food and Agricultural Code.

HISTORY

- 1. Renumbering from 1333.1 to 1333.2 filed 4–30–79; effective thirtieth day thereafter (Register 79, No. 18).
- 2. Editorial correction of NOTE (Register 82, No. 9).

§ 1334. Delivery and Acceptance of Tomatoes.

No load of canning tomatoes shall be unloaded for canning purposes until a canning tomato inspector has inspected and issued a certificate of compliance as prescribed by regulation for the load.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40811, 40812, 40813 and 40961, Food and Agricultural Code.

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1335. Sampling.

Canning tomatoes shall be determined to be suitable or unsuitable for canning purposes, by the examination of the tomatoes in a representative sample. Each sample probe from a bin or bulk load or each sample taken with a bin sampler shall contain 50 pounds of tomatoes. Loads of canning tomatoes shall be sampled only at locations and with sampling equipment approved by the Director. The number of samples shall be as follows:

(a) Bins. The number of bins to be sampled shall be determined by the total number of bins in the load and shall be selected from various parts

of the load. Approximately one—half of the number of bins comprising the sample shall be bins located below the top layer of the load. The balance of sample bins may be from the top layer. One sample shall be taken from each bin selected, in accordance with the following:

Bins Number of Samples
Loads From: 1 to 60 4

For each additional twenty (20) bins or portion thereof, select one (1) additional bin.

(b) Bulk. The number of probes to be taken shall be determined by the total number of tons in the load. Approximately one-half of the probes comprising the sample shall be from the side of the bulk unit. The balance of probes may be from the middle of the bulk unit, in accordance with the following:

Tons Number of Probe
Loads From: 1 to 30 4

For each additional ten (10) tons or portion thereof, there shall be selected one (1) additional probe.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40781, 40811, 40812, 40813, 40961 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1336. Delivery of Tomatoes onto Mechanized Grading Table.

- (a) The delivery of tomatoes onto the mechanized grading table shall be accomplished by the use of sample boxes furnished by the Director.
- (b) Each sample shall be dumped on the mechanized grading table by using a mechanical device which prohibits lateral movement of the sample box while it is being dumped. Each device shall be installed in such a manner that the sample is dumped with a minimum amount of vertical fall.
- (c) This section does not apply to mechanized grading tables installed at inspection stations prior to May 1, 1977.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40781, 40811, 40814 and 41005, Food and Agricultural Code. HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1336.5. Delivery of Tomatoes onto Standard Grading Tables.

Tomatoes shall be sampled, placed in sample boxes, conveyed to, and dumped directly on the grading table. Sample boxes shall be furnished by the Director.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40781, 40811, 40814, and 41005, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–30–79; effective thirtieth day thereafter (Register 79, No. 18).
- 2. Editorial correction of NOTE (Register 82, No. 9).

§ 1337. Regrade.

An authorized inspector may elect to regrade a load of tomatoes.

If a regrade is performed, a complete new sample shall be taken, but from a different location of the same load. Not more than two inspections shall be made for any one load or lot and the results shall be averaged together. This average will then be considered the final inspection for the load or lot of tomatoes.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40531, 40781, 40811, 40812, 40813, 40961 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1338. Percentage Chart.

When tomatoes are in sample boxes designed to hold 50 pounds of tomatoes: (1) the official "percentage chart" issued by Fruit and Vegetable Quality Control shall be used to determine the percent of defects; and (2) the boxes of tomatoes selected as a sample for the purpose of inspection and determining the percentage of defects shall be normally filled and shall be considered as holding 50 pounds of tomatoes.

Page 104 (4-1-90)

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40811, 40812, 40813, 40961 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1339. Adequate Facilities.

The Director shall review inspection stations for adequacy of facilities at least 60 days prior to start of tomato harvest. Prior to the remodeling or construction of an inspection station, the Director shall be provided with a general diagram of intended work and office area, type and quantity of inspection equipment, and an estimated load volume so the adequacy of facilities can be determined. The Director shall approve the inspection facility, if satisfied it complies with the regulations.

Safety and sanitation inspections by the Director are for the safety and health of employees working at the stations. Safety and sanitation standards do not preempt compliance with other regulations for occupational safety or public health.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE (Register 82, No. 9).
- 2. Amendment filed 5–15–84; effective thirtieth day thereafter (Register 84, No. 20).

§ 1339.1. Minimum Load and Yard Requirements.

- (a) Inspection stations shall be designed to accommodate adequately through the inspection process six loads per hour for each grading table when staffed by inspection personnel grading all tomato samples delivered from sampling equipment.
- (b) Surface adjacent to each station shall be concrete, blacktop, or similar hard material. If bins of tomatoes are to be inspected, there shall be a level, firm surface adjacent to the traffic flow for operation of forklift equipment. If station operates at night, the yard shall have adequate lighting.
- (c) Stations shall have adequate yard space for trucks and parking to meet the operational requirements of this section.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1339.2. Office and Inspection Area Floor Space.

- (a) Inspection station offices shall contain a minimum of 80 square feet of floor space, except stations designed for three (3) or more grading tables or one (1) or more mechanized grading tables shall contain a minimum of 120 square feet of office floor space.
- (b) Inspection area floor space shall conform to the following minimum requirements or their equivalents:
- $24' \times 20'$ for installation of two (2) regular grading tables or one (1) mechanized grading table.
 - 24' x 28' for installation of three (3) regular grading tables.
- $24' \times 36'$ for installation of four (4) regular grading tables or two (2) mechanized grading tables.

A minimum of eight (8) feet in width of floor space shall be required for each additional regular table and a minimum of twelve (12) feet in width for each additional mechanized grading table. Stations with special equipment needs shall provide adequate inspection area floor space to accommodate those needs.

A mechanized grading table is defined as that table designed by the University of California, Davis, including all additions.

(c) New stations or stations remodeled to comply with the provisions of this section shall be constructed with the office and inspection area floors not less than five (5) feet nor more than six (6) feet above ground level, except slab constructed stations shall be not less than three (3) feet nor more than six (6) feet above ground level.

Stations located inside a cannery may be floor level.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1339.3. Equipment Requirements.

The Director shall approve the adequacy of each station's inspection equipment, which shall include but is not limited to the following:

- (a) Grading tables constructed in accordance with specification provided by the Director.
 - (b) Inspection area floor space shaded from direct sunlight.
- (c) Electrical outlets grounded and conveniently located for operation of inspection equipment.
- (d) Electricity adequate to operate all inspection equipment simultaneously.
- (e) A vacuum pump which will create in the blending container a vacuum of not less than 27 inches of mercury within 30 seconds from start of operation and maintain this vacuum for the duration of the blending operation.
 - (f) Provisions for water and adequate sink and counter space.
- (g) Equipment to obtain without undue delay a representative sample of tomatoes.
- (h) A drinking fountain with potable water located in the inspection station's office or inspection area floor space.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1339.4. Sanitation and Safety.

Facilities needed for protecting food sanitation, to permit proper inspection and to provide for incidental health and safety shall be provided, and shall include but not be limited to the following:

- (a) Separate toilet facilities for men and women.
- (b) Toilet facilities shall be located in the inspection station building or within reasonable distance from inspection facilities.
- (c) Premises kept reasonably free from insects such as vinegar flies, house flies, and other flying pests.
- (d) Adequate facilities to eliminate standing liquids from station's office and inspection area floor space and around building.
 - (e) A closed system for removal of water-carried waste material.
 - (f) Floors shall be of non–skid material.
- (g) Floors and station premises and toilet facilities shall be maintained in a clean condition.
- (h) Waste material shall be removed at least once daily from beneath inspection area platform.
- (i) Area where tomatoes are spilled from sampling equipment shall be kept clean.
- (j) Conveying equipment for dispatch and return of all sample containers shall conform to the following:
- (1) Overhead return conveyors shall be a minimum of 6 feet above floor level;
- (2) Conveyors obstructing movement within work areas less than 6 feet above floor level shall be constructed with gates or stairs over conveyors;
- (3) Conveyors shall have side rails sufficient to prevent sample containers from falling.
 - (k) Hand rails shall be provided at all step and stairway locations.
- (1) Electrical outside wiring shall be installed underground or overhead.
- (m) Adequate fire extinguishers visibly located and readily accessible. Note: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814 and 41005, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE (Register 82, No. 9).
- 2. Amendment filed 7–27–83; effective thirtieth day thereafter (Register 83, No. 31).

Page 105 (4-1-90)

§ 1339.5. Dumping and Drainage Facility.

- (a) Tomatoes shall not be dumped within 500 yards of inspection stations.
- (b) Truck trailers shall not be drained within 250 yards of stations unless emptied into a drainage facility approved by the director.

Examples of acceptable drainage facilities are:

- (1) city sewer systems,
- (2) paved pads with a large, closed holding tank buried in the ground, or
 - (3) an open ditch more than 250 yards from work site.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814 and 41005, Food and Agricultural Code.

HISTORY

- 1. Editorial correction of NOTE (Register 82, No. 9).
- 2. Amendment of subsection (b) filed 7-27-83; effective thirtieth day thereafter (Register 83, No. 31).

§ 1339.6. Inadequate Inspection Facilities.

If, after reviewing the submitted information, it is determined that the inspection station facilities are not adequate to inspect projected tomato tonnage, the Director shall take the following action:

- (a) Sixty days prior to commencement of inspection activity at a station, or as soon thereafter as practical, the station owner and appropriate processors will be advised in writing by the Director that adequate facilities are not provided.
- (b) If the station owner fails to provide adequate inspection facilities, the Director may disapprove the facility entirely or designate the maximum number of loads that will be allowed through the station for any 24-hour period.

NOTE: Authority cited: Sections 407 and 40761, Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9).

§ 1339.7. Inspection Stations Built After 1986.

All stations built after 1986, at which there will be a weighmaster shall be constructed to operate in the order of weighing first and grading second

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40811 and 40814, Food and Agricultural Code.

HISTORY

 New section filed 10–14–86; effective thirtieth day thereafter (Register 86, No. 42).

§ 1340. Station Deliveries.

Tomatoes shall not be delivered to any station for inspection by producers or processors in excess of the maximum number of loads designated by the Director.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814 and 41005, Food and Agricultural Code.

HISTORY

 Editorial correction of NOTE (Register 82, No. 9). For history of former section, see Register 71, No. 2.

§ 1340.1. Acreage and Load Information.

In order to determine whether inspection stations are adequate, the Director shall be provided each year with the following information:

- (a) Each processor shall provide, 75 days prior to commencement of inspection, the total tomato acreage to be harvested by or for that processor, and the estimated total acreage of tomatoes for inspection at each inspection station. The information shall be reported in tons, loads, or acres to be harvested.
- (b) Each processor shall provide in writing, prior to May 15 of each year, a list of inspection stations of intended use including names, addresses, and contract numbers of applicable producers who will have tomatoes inspected at each station. Any additions or deletions to the list shall be submitted promptly.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

 Editorial correction of NOTE (Register 82, No. 9). For history of former section, see Register 71, No. 2.

§ 1340.2. Daily Load Information.

Each processor shall provide load information for their company, by station, prior to 5:00 p.m. daily for the following day.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40871 and 41005, Food and Agricultural Code.

HISTORY

 Editorial correction of NOTE (Register 82, No. 9). For history of former section, see Register 71, No. 2.

§ 1340.3. Consigning Loads to Alternate Locations.

The Director may designate alternate stations where tomatoes will be inspected if delays in inspection occur due to equipment breakdowns or lack of adequate facilities. The Director may announce to all parties of record affected by such action that truck loads of tomatoes will be directed to less congested stations if:

- (a) No unreasonable burden will be imposed upon station owners, processors, or producers, and
- (b) Tomatoes which are normally inspected at such station will not be hauled an unreasonable distance.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

1. Editorial correction of NOTE (Register 82, No. 9). For history of former section, see Register 71, No. 2.

§ 1340.4. Easement.

Inspection stations approved by the Director are for the purpose of enforcing the provisions of Division 16, Chapter 2, of the Food and Agricultural Code. No station owner or operator shall refuse entrance to the Director for enforcement purposes or to the public using the facilities. The Director may withdraw inspection at any station for any of the following reasons:

- (a) The station facilities fail to meet building, safety, or sanitation standards; or
- (b) Any other violation of law or regulations relating to operation of inspection stations; or
- (c) Inadequate tonnage of tomatoes to warrant continuation of inspection.

NOTE: Authority cited: Sections 407 and 40761, Food and Agricultural Code. Reference: Sections 40814, 40871 and 41005, Food and Agricultural Code.

HISTORY

- 1. Revision of section numbers of Group 2 filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10). For prior history, see Register 11, No. 8.
- 2. Amendment and renumbering of Group 2 (§§ 1340, 1340.1 through 1341.2) as Group 4 (§§ 1472.20 through 1472.25) filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).

Subchapter 3. Eggs

(Originally Printed 2–7–48) Revision filed 7–7–55 Revision filed 2–9–72

§ 1351. Definitions—General Terms.

- (a) "Balut." Shell eggs from any species of fowl, removed from incubation after partial embryo development, intended for human consumption
 - (b) "Case." Quantity of 30 dozen eggs.
- (c) "Denature." Application of a substance which, by sight or smell, readily identifies an egg, or egg meat, as unfit for human consumption.
- (d) "Inedible." Any eggs of any of the following descriptions: black rots; yellow rots; white rots; mixed rots; sour eggs; green whites, stuck yolks; moldy eggs; and eggs showing embryo development at blood ring stage or beyond.
- (e) "Loss." Any egg classed as "inedible"; also eggs with contents leaking, frozen, cooked, contaminated or which contain bloody whites, large blood/meat spots, or other foreign matter.
- (f) "Lot." Any number of containers labeled with one size, grade, brand and code date and in one location.
- (g) "Origin." Standards applicable to eggs at the plant where graded and packed.
- (h) "Restricted eggs." Dirties, checks, leakers, loss, inedibles, and incubator rejects.

NOTE: Authority cited: Sections 14, 407 and 27531, Food and Agricultural Code. Reference: Sections 27521 and 27531, Food and Agricultural Code.

HISTORY

- 1. Repealer of Group 3 (Sections 1351–1360) and new Group 3 (Sections 1351–1358.6) filed 2–9–72; effective thirtieth day thereafter(Register 72, No. 7). For prior history, see Register 58, No. 4, and Register 63, No. 19.
- 2. Repealer of Group 3 (Sections 1351–1358.4) and new Group 3 (Sections 1351–1358.4, not consecutive) filed 1–24–83; effective thirtieth day thereafter (Register 83, No. 5). For prior history, see Registers 81, No. 15; 76, Nos. 50 and 38; 75, Nos. 43, 35, 29 and 18; 74, Nos. 46, 40 and 10; 73, No. 11; and 72, Nos. 53, 34 and 29.
- 3. Amendment filed 5-31-88; operative 6-30-88 (Register 88, No. 23).

§ 1351.2. Definition of Terms Descriptive of the Shell.

- (a) Clean. A shell that is free from adhering foreign material, visible stains or discolorations. A shell may be considered clean if it has only very small specks, stains, or cage marks, provided they are not of sufficient number or intensity to detract from the generally clean appearance of the egg. Eggs showing traces of processing oil on the shell are considered clean, unless otherwise soiled.
- (b) Dirty. An egg that is unbroken, with dirt or foreign material adhering to its surface, or has prominent stains, or moderate stains greater than permitted in B quality.
- (c) Check. An egg having a fractured shell, but with its membranes intact and not leaking.
- (d) Leaker. An egg having a break in the shell and membranes, with contents exuding or free to exude.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Section 27531, Food and Agricultural Code.

§ 1351.4. Definition of Terms Descriptive of Air Cell.

- (a) Depth of air cell (air between the shell membranes). Air cell depth is a measurement from its top to bottom, when the egg is held air cell upward.
 - (b) Free air cell. An air cell that is mobile.
- (c) Bubbly air cell. A ruptured air cell resulting in small air bubbles in the albumen.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Section 27531, Food and Agricultural Code.

§ 1351.6. Definition of Terms Descriptive of the White.

- (a) Clear. A white that is free of discoloration or suspended foreign matter.
- (b) Weak and watery. (B quality) A white lacking in viscosity, causing the yolk outline to appear dark and plainly visible when examined before a candling light.
- (c) Blood clots and spots (not due to germ development). These are blood clots or spots on the surface of the yolk or suspended in the white. If aggregating no more than 1/8 inch in diameter, the egg shall be classed as a C quality. If larger, or showing diffusion of blood in the white, the egg shall be classified as loss.
- (d) Bloody white. An egg with blood diffused through the white. Eggs with blood spots which show only slight diffusion into the white are not classed as bloody whites.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Section 27531, Food and Agricultural Code.

§ 1351.8. Definition of Terms Descriptive of the Yolk.

- (a) Practically free of defects (AA-A quality). A yolk showing no germ development but may have slight defects on its surface.
- (b) Outline plainly visible (B quality). A yolk outline that is clearly visible as a dark shadow and may appear enlarged and flattened.
- (c) Serious defects (B quality). A yolk that shows well-developed spots or areas and other serious defects, such as olive yolks, which do not render the egg inedible.
- (d) Clearly visible germ development (B quality). A development of the germ spot on the yolk of a fertile egg, which is plainly visible as a definite circular area around the spot, with no blood in evidence.
- (e) Blood due to germ development. Blood caused by development of the germ in a fertile egg, visible as definite lines or as a blood ring. Such an egg is classified as inedible.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Section 27531, Food and Agricultural Code.

§ 1352. California Standards of Quality for Individual Shell Eggs.

(a) General. California standards of quality for individual shell eggs are applicable only to eggs that are a product of domesticated chickens. Except as provided in Section 1356.2, no eggs lower than Grade B shall be sold for human consumption.

Interior quality is based on the apparent condition of the egg contents when examined before a candling light. Any type candling light may be

Page 107 (4-1-90)

used which will enable the grader to make an accurate determination of the grading factors affecting egg quality.

- (b) AA Quality. The shell must be clean and unbroken. The air cell is limited to a 1/8 inch depth at origin, 3/16 inch at destination, and may be free and bubbly. The white must be clear and the yolk practically free of apparent defects.
- (c) A Quality. The shell must be clean and unbroken. The air cell is limited to a 3/16—inch depth at origin, 1/4 inch at destination, and may be free and bubbly. The white must be clear and the yolk practically free of apparent defects.
- (d) B Quality. The shell must be unbroken and may have unlimited slight stains. Moderately stained areas are permitted if they cover no more than 1/32 of the shell surface, when localized, or 1/16 of the shell surface if scattered. Eggs having shells with prominent stains or adhering dirt are not permitted. The air cell depth may not exceed 3/8 inch, may show unlimited movement and be free and bubbly. The white may be weak and watery and the yolk outline plainly visible. The yolk may appear dark, enlarged and flattened, and with clearly visible germ development, but no blood due to such development. It may show other serious defects which do not render the egg inedible.
- (e) C Quality. An egg having an air cell over 3/8 inch in depth or small blood spots or clots aggregating no more than 1/8 inch in diameter. Note: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Ref-

erence: Sections 27531 and 27651, Food and Agricultural Code.

§ 1352.2. Exempt Eggs.

- (a) Eggs in the shell are exempt from standards established by these regulations when being transported:
- (1) From a location which does not have proper or adequate facilities for grading or reconditioning to a shell egg grading plant which does.
 - (2) To first point of grading.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Section 27531, Food and Agricultural Code.

§ 1353. Grade Tolerances.

- (a) Grade AA (origin) shall consist of eggs which are at least 85 percent AA quality; a tolerance of 15 percent below AA quality is permitted and may consist of A and B quality in any combination; no more than 5 percent (7 percent for Jumbo size) checks is permitted; and no more than 1 percent C quality or more than 0.5 percent leakers, dirties or loss (due to meat or blood spots) in any combination is permitted. Other types of loss are not permitted.
- (b) Grade AA (destination) shall consist of eggs which are at least 80 percent AA quality; a tolerance of 20 percent below AA quality is permitted and may consist of A or B quality in any combination; no more than 7 percent (9 percent for Jumbo size) checks is permitted; and no more than 1 percent C quality or more than 1 percent leakers, dirties or loss (due to meat or blood spots) in any combination is permitted, except that such loss may not exceed 0.5 percent. Other types of loss are not permitted.
- (c) Grade A (origin) shall consist of eggs which are at least 85 percent A quality; a tolerance of 15 percent below A quality is permitted and may consist of B quality; no more than 5 percent (7 percent for Jumbo size) checks is permitted; and no more than 1 percent C quality or more than 0.5 percent leakers, dirties or loss (due to meat or blood spots) in any combination is permitted. Other types of loss are not permitted.
- (d) Grade A (destination) shall consist of eggs which are at least 80 percent A quality; a tolerance of 20 percent below A quality is permitted and may consist of B quality; no more than 7 percent (9 percent for Jumbo size) checks is permitted; and no more than 1 percent C quality or more than 1 percent leakers, dirties or loss (due to meat or blood spots) in any combination is permitted, except that such loss may not exceed 0.5 percent. Other types of loss are not permitted.
- (e) Grade B (origin) shall consist of eggs which are at least 85 percent B quality; a tolerance of 15 percent below B quality is permitted and may

consist of C quality; no more than 10 percent checks or more than 0.5 percent leakers, dirties or loss (due to meat or blood spots) in any combination is permitted. Other types of loss are not permitted.

- (f) Grade B (destination) shall consist of eggs which are at least 80 percent B quality; a tolerance of 20 percent below B quality is permitted and may consist of C quality; no more than 10 percent checks or more than 1 percent leakers, dirties or loss (due to meat or blood spots) in any combination is permitted, except that such loss may not exceed 0.5 percent. Other types of loss are not permitted.
- (g) Additional Tolerance: No lot shall be rejected due to a single loss or dirty egg.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Section 27531, Food and Agricultural Code.

§ 1353.2. Summary of Grades for Shell Eggs.

TABLE I ORIGIN GRADES

		O.M.O.L. O.L.D.		
	Quality	Toleran	ice Permitted	
	Required	Percent	Quality	
Grade AA	85% AA	15%	A, B.	
		Within this 15%		
		5%	Checks, (7% Jumbos)	
	•	1%	C.	
		.5%	Leakers, dirties or	
			loss (due to blood or	
			meat spots).*	
Grade A	85% A or better	15%	В.	
0.400.11	30 % It of better	Within this 15%	2.	
		5%	Checks, (7% Jumbos)	
		1%	C.	
		.5%	Leakers, dirties or	
			loss (due to blood or	
			mest spots).*	
Grade B	85% B or better	15%	C.	
Grade D	oo a b or better	Within this 15%	٠.	
		10%	Checks.	
		.5%	Leakers, dirties or	
		.0 70	loss (due to blood or	
			meat spots).*	

*No lot shall be rejected due to a single loss or dirty egg.

TABLE II DESTINATION GRADES

	Quality	Tolerance Permitted	
	Required	Percent	Quality
Grade AA	80% AA	20%	A, B.
	*	Within this 20%	•
		7%	Checks, (9% Jumbos)
	,	1%	C.
	•	1%	Leakers, dirties or loss (of this 1% not over .5% loss due to
			blood or meat spots).*
Grade A	80% A or better	20%	В.
		Within this 20%	
		7%	Checks, (9% Jumbos)
		1%	C.
		1%	Leakers, dirties or loss (of this 1% not over 5% loss due to
			blood or meat spots).*
Grade B	80% B or better	20%	C.
		Within this 20%	
		10%	Checks.
,		1%	Leakers, dirties or loss (of this 1% not over .5% loss due to blood or meat spots).*

*No lot shall be rejected due to a single loss or dirty egg.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Sections 27531 and 27651, Food and Agricultural Code.

§ 1353.4. Size Standards for Individual Shell Eggs.

The shell egg size standards for consumer grades are indicated in the following table. Tolerance for individual eggs at the next lower size is 4 percent.

Page 108 (4-1-90)

Size or			
Weight Class	Grams	Grains	Ounces
Jumbo	68.51	1,057	2 5/12
Extra Large	61.42	948	2 1/6
Large	54.34	839	1 11/12
Medium	47.25	729	1 2/3
Small	40.16	620	1 5/12
Peewee		No minimum	

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Sections 27531 and 27651, Food and Agricultural Code.

§ 1353.6. Egg Sample Schedule.

When Size Of Lot Is:	Minimum Sample Is:
50 eggs or less	all eggs
51 eggs to less than 1 case	50 eggs
1 case	100 eggs
more than 1 to 10 cases	100 eggs from each of 2 cases
more than 10 to 25 cases	100 eggs from each of 3 cases
more than 25 to 50 cases	100 eggs from each of 4 cases
more than 50 to 100 cases	100 eggs from each of 5 cases
more than 100 to 200 cases	100 eggs from each of 8 cases
more than 200 to 300 cases	100 eggs from each of 11 cases
more than 300 to 400 cases	100 eggs from each of 13 cases
more than 400 to 500 cases	100 eggs from each of 14 cases
more than 500 to 600 cases	100 eggs from each of 16 cases

For each additional 50 cases, or fraction thereof, in excess of 600 cases, draw one additional 100-egg sample.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Sections 27531, 27591 and 27611, Food and Agricultural Code.

§ 1354. Marking Requirements.

(a) Grade and Size Designation. Each container or subcontainer of shell eggs shall be marked with name, address and zip code of the person by or for whom the eggs were graded and packed, and the unabbreviated designation of one of the following sizes and grades:

Size		Grade
Jumbo	Medium	Grade AA
Extra Large	Small	Grade A
Large	Peewee	Grade B

Only one size and grade shall appear upon a container, subcontainer or placard. Size and grade shall be plainly marked in letters not less than 1/4 inch in height, as follows:

- (1) Containers holding three dozen or less, on the outside top face.
- (2) Containers holding more than three dozen, on one outside top, side or end, except that oblong containers shall be marked on one outside end.
- (b) Price Advertising. Any advertisement, sign or placard, which indicates the price of eggs for sale, must also use the full designation of size and grade.
 - (c) Superlative and Brand Names.
- (1) Superlative descriptions or other amplification of grade or size are not permitted on containers. Prohibited words related to grade include, but are not limited to: "fancy," "select," "premium," and "superior." Prohibited words related to size include, but are not limited to: "oversize," and "giant."
- (2) Brand names on consumer size containers which use a superlative term shall be separated from the size and grade designation in a style of lettering which makes it obvious that the brand name is not related nor intended to be read in conjunction with size or grade designation. Additionally, each such brand name shall be followed immediately by the word "brand" in letters at least one-half the size of letters or figures used in the brand name, and in the same color, style, and prominence.
 - (d) Descriptive Terms.
- (1) Descriptive terms, such as "polyunsaturated," "plus polyunsaturates," "higher in iodine," "flavored with iron" or other wording, indicating a quality or ingredient different than found in a normally produced egg, may not appear in labeling unless approved by the department. Information concerning the altered constituent(s) must be submitted to the department, describing the method used to create and verify the change. If determined that a statistically significant difference exists, relative to the descriptive term used, and provided the term is not judged misleading, permission may be granted for its use.

- (2) Terms such as "organic" and "organically produced" or similar description relating to production, qualities, nature of the product or other descriptive terms, if determined by the department not to be misleading or deceptive, may be used.
- (e) Shell eggs packed in California in consumer size containers exclusively for out-of-state sales are exempt from the prohibitions of (c) above

NOTE: Authority cited: Sections 407, 27531 and 46002, Food and Agricultural Code. Reference: Section 27631, Food and Agricultural Code.

HISTORY

1. Amendment of subsection (d)(2) and Note filed 6–14–2000; operative 7–14–2000 (Register 2000, No. 24).

§ 1354.2. Markings Not Required.

- (a) Size, grade, name and address markings are not required on containers or subcontainers of eggs in any of the following situations:
- (1) If sold at retail from a properly marked bulk display and packaged in the presence of the purchaser.
 - (2) If packed for shipment or in transit to points outside the state.
- (3) If sold to household consumers without advertising by the producer on the premises where produced, from a flock of 500 hens or less.
- (4) If being delivered from outside the state to dealers for candling and grading.
- (5) If being delivered to, or are in possession of, a dealer for candling and grading, or being delivered, stored or removed from cold storage.
- (6) If packed for sale to the military forces of the United States, labeled with one of the United States Department of Agriculture grades.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Section 27531, Food and Agricultural Code.

§ 1355. Seized and Held Lots.

- (a) Any eggs and their containers which are prepared, packed, stored, delivered for shipment, delivered for sale, loaded, shipped, transported, or sold in violation of any provision of these regulations, are a public nuisance.
- (b) The enforcement officer may affix a warning tag or notice to the eggs and their containers which are a public nuisance and may give notice of such violation to the producer, packer, or owner, or other person in possession of the eggs.
- (c) If the person notified refuses or fails within a reasonable time specified by the enforcement officer to commence to bring the eggs and their containers into compliance with these regulations, the eggs and their containers may be seized by any enforcement officer.

NOTE: Authority cited: Sections 407, 27531 and 27592, Food and Agricultural Code. Reference: Sections 27531, 27591, 27592 and 27640, Food and Agricultural Code.

§ 1356. Special Requirements.

- (a) Shell eggs which are labeled as containing a distinguishing quality or condition, in addition to meeting size and grade standards are subject to the following requirements:
- (1) "Fertile Eggs." To be labeled or advertised as fertile, the eggs must be at least 85 percent fertile, as determined by candling, break—out, or incubation.
- (2) "Polyunsaturates." To be labeled or advertised as containing an amount of polyunsaturated fatty-acid greater than the average egg, at least 2.0 grams of polyunsaturated fatty-acid in 100 grams of the edible portion must be evidenced by laboratory analysis performed by the department.
- (b) "Balut." Records shall be maintained on eggs incubated for this purpose at the time they are placed in an incubator. These eggs are exempt from the standards and marking requirements for grade and size. They must be labeled with (1) species of fowl from which the eggs came, followed by "Embryos" in letters 1/2 inch high, (2) the words "incubated fertile eggs" in letters no less than 1/4 inch high, and (3) the name and address of the producer.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Sections 27531 and 27637, Food and Agricultural Code.

§ 1356.2. Restricted Eggs.

Eggs classed as "restricted eggs" are exempt from the size and quality standards for consumer grade eggs except as provided in the tolerances, if any, for undergrade eggs.

Restricted eggs may be sold directly to consumers only as follows: by a shell egg producer from his own flock's production, at the site of production or segregation, or at secondary locations operated by the producer–packer for the primary purpose of shell egg retail sales; by a shell egg packer at the grading station where grading or segregation occurred.

Special provisions described below place restrictions upon the sale, processing, movement, distribution and uses of restricted eggs.

Any product segregated into the several restricted egg categories must bear legible and conspicuous labeling of its quality on the carton, case, rack or pallet, as applicable. Name, address and zip code of the packer is required for shipment, but need not appear on the label if it appears elsewhere on the packing medium described above.

- (a) Product for Human Consumption.
- (1) Checks—direct sales to consumers. Checked eggs may be sold directly to a consumer for exclusive use by his household and nonpaying guests, in quantities not to exceed 30 dozen per sale. Eggs labeled "checks" may not exceed 1 percent dirties, leakers and loss (due to meat or blood spots), except that loss may not exceed 0.5 percent.
- (2) Checks—sales to breaking plants. Checked eggs may be sold in bulk and transported only for processing into an egg product at a USDA inspected egg product plant. Labeling shall include the statement "For Processing Only in an Official USDA Egg Product Plant." For this purpose a tolerance of 5 percent leakers and 1 percent other loss or dirties is permitted.
- (3) Dirties—direct sales to consumers. Dirty eggs may be sold directly to a consumer for exclusive use by his household and nonpaying guests, in quantities not to exceed 30 dozen per sale. Eggs labeled "dirty" may not exceed 10 percent checks and 1 percent leakers and loss (due to meat or blood spots), except that loss may not exceed 0.5 percent.
- (4) Dirties—sales to breaking plants. Dirty eggs may be sold in bulk and transported only for processing into an egg product at a USDA inspected egg product plant. Labeling shall include the statement "For Processing Only in an Official USDA Egg Product Plant." Eggs so labeled may not exceed 10 percent checks or 1 percent loss.
- (5) Dirties—transported for cleaning. Dirty eggs may be transported to another facility and location for the purpose of cleaning.
- (6) Checks and Dirties—direct sales to consumers. Checked and dirty eggs may be sold directly to a consumer for exclusive use by his household and nonpaying guests, in quantities not to exceed 30 dozen per sale. Eggs labeled "checks and dirties" may not exceed 1 percent leakers and loss (due to meat or blood spots), except that loss may not exceed 0.5 percent.
- (7) Checks and Dirties—sales to breaking plants. Checked and dirty eggs may be sold in bulk and transported only for processing into an egg product at a USDA inspected egg product plant. Labeling shall include the statement "For Processing Only in an Official USDA Egg Products Plant." For this purpose a tolerance of 5 percent leakers and 1 percent other loss is permitted.
- (8) Bloods—sales to breaking plants. Eggs containing large blood or meat spots with only slight diffusion, if any, into the egg white, and when labeled "Spots" or "Light Bloods," may be sold and transported without denaturation to a USDA inspected egg product plant for processing as an egg product. Labeling must include the statement "For Processing Only in an Official USDA Egg Products Plant." No other type loss is permitted for this product.
- (b) Product Unfit for Use as Human Food. Leakers, loss and inedible eggs must be rendered unfit for human food purposes at point of segregation by one of the following methods:
- (1) Processed into animal food—in shell form. Sale and transportation of loss eggs for animal food purposes are permitted when denatured by

- application of dye to the shell and the following statement included in the label: "Restricted Eggs—Not To Be Used As Human Food."
- (2) Processed into animal food—liquid form. Sale and transportation of loss eggs in liquid form for animal food purposes is permitted when denatured and the following statement is included in the label: "Restricted Eggs—Not To Be Used As Human Food." When shipped and received under USDA supervision the product need not be denatured.
- (3) Processed into industrial product. Inedible eggs in liquid form may be processed into an industrial product at the grading station. If transported from the plant, the product must be denatured and the following statement included in the labeling: "Inedible Egg Product—Not To Be Used As Human Food."
- (4) Destroyed. Any form of restricted eggs other than incubator rejects may be disposed of by intermingling with refuse and discarded.
- (c) Incubator Rejects. Eggs which have been subjected to incubation may not be moved in shell form, but must be crushed and denatured upon removal from incubation. If transported from the hatchery the product must be labeled: "Inedible Egg Product—Not To Be Used As Human Food."

NOTE: Authority cited: Sections 407, 27531 and 27642, Food and Agricultural Code. Reference: Sections 27531 and 27642, Food and Agricultural Code.

§ 1357. Registered Brands.

- (a) Brand Registration and Container Regulation Requirements. Any certification of registration granted pursuant to this regulation and Section 27661 of the Food and Agricultural Code, shall be valid until cancelled by the department.
- (b) Registered Brand—Change of Ownership. A person who acquires by purchase or other lawful means, egg master containers, other than corrugated fiber, with a registered brand, shall notify the department and submit evidence which supports the transaction. Such notice constitutes transfer of the brand and container ownership.
- (c) Brand Alterations. To obliterate, erase, cover-up, remove or conceal any registered brand, other than his own, without first notifying the department and receiving approval, is prohibited.
- (d) Licensed Container Exchange Operators. Licenses issued to persons engaged in the container exchange business for master containers of eggs shall be valid until suspended or revoked by the department.
- (e) Court Proceeding—Registered Container. Upon representation of any interested party, the department may institute proceedings in any court of competent jurisdiction to recover for the owner any container which is marked with a brand that is registered pursuant to this section. Whenever the department prevails in such an action, it shall ask the court to assess costs against the party found to have been in unlawful possession of the containers.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Sections 27631, 27641 and 27661–27669, Food and Agricultural Code.

HISTORY

Amendment of section and Note filed 6–14–2000; operative 7–14–2000 (Register 2000, No. 24).

§ 1358. Inspection Fees.

- (a) The mill fee shall be due and payable after close of each reporting period, and becomes delinquent at the close of the next reporting period thereafter.
- (b) Reporting Periods. Reporting periods shall be four-week periods beginning July 1 through June 30, with the first reporting period ending on the fourth Saturday of July of each year.
- (c) Advance Payment. A handler who provides information satisfactory to the department, indicating the handler's estimated annual mill fee liability, may pay that amount in advance. Such advance payment shall cover the period from July 1 through June 30, whereupon the handler shall report actual mill fee liability and a recapitulation will be made. A refund will be made in case of overpayment, or the balance, if any, may be applied to the next year's estimate. In the event of underpayment, the mill fee shall become due and payable on June 30, and becomes delin-

quent after close of the first reporting period of each fiscal year. Any handler, choosing not to make an estimated advance deposit, as described above, shall submit the fee at the end of each four—week reporting period.

(d) Penalties shall be charged for each delinquent report and payments as follows: A penalty of ten percent (10%) for the first delinquent reporting period and two percent (2%) of the unpaid balance compounded at the close of each subsequent reporting period for all delinquent mill fee reports and payments until payment has been received. The above penalties apply to all reports and payments due after the effective date of this subsection.

NOTE: Authority cited: Sections 407, 27531 and 27553, Food and Agricultural Code. Reference: Sections 27551 and 27631, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–4–85; effective thirtieth day thereafter (Register 85, No. 10).
- 2. Amendment filed 5-31-88; operative 6-30-88 (Register 88, No. 23).
- 3. Amendment of subsection (c) and NoTE filed 6–14–2000; operative 7–14–2000 (Register 2000, No. 24).

§ 1358.2. Fee Exemption.

- (a) Any handler providing satisfactory information that the handler owes no mill fee for any fiscal year, and anticipates no mill fee liability to be incurred, may be exempted by the department from filing a mill fee report. Should the handler later make sales requiring payment during the fiscal year, the handler shall file a report pursuant to Section 1358(a) or 1358(c), as applicable.
- (b) The department may require special or periodic reports from any handler pursuant to this section and may require a statement in such detail as the department deems necessary to support the payment or exemption. The department may require the report to be made, or confirmed, under penalty of perjury.

NOTE: Authority cited: Sections 407, 27531 and 27553, Food and Agricultural Code. Reference: Sections 27551 and 27631, Food and Agricultural Code.

History

- 1. Amendment filed 5-31-88; operative 6-30-88 (Register 88, No. 23).
- Amendment of section and Note filed 6–14–2000; operative 7–14–2000 (Register 2000, No. 24).

§ 1358.4. Records/Invoices.

- (a) Each egg handler shall maintain business records of egg transactions for three years, subject to audit by the department. The records shall indicate the date, egg quality and quantity, and identity of purchaser and seller. For small quantities of restricted eggs sold by egg handlers directly to consumers under provisions of Section 1356.2, or incidental sales of consumer grade eggs, the name of purchaser is not required.
- (b) An invoice on egg sales shall be furnished to the purchaser, stating the seller's name and address, quantity, size and grade or quality of the eggs. Exempt from this requirement are eggs which are:
 - (1) Sold or delivered by a producer for candling and grading.
 - (2) Sold at retail.
- (3) Sold by an egg handler from the handler's own production directly to a consumer on the premises where produced.

NOTE: Authority cited: Sections 407 and 27531, Food and Agricultural Code. Reference: Sections 27631, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5-31-88; operative 6-30-88 (Register 88, No. 23).
- Amendment of subsection (a) and Note filed 6-14-2000; operative 7-14-2000 (Register 2000, No. 24).

§ 1358.5. Eggs, Procedures to Ascertain Ambient Air Temperature.

Air flow temperature of egg transport vehicles and ambient room temperatures of storage rooms, retail outlets, and display units located in packing plants or distribution facilities shall be ascertained at least quarterly in accordance with this section.

(a) Ambient or air flow temperature shall be determined by use of a thermometer having a temperature gradation one-half Celsius (one degree Fahrenheit) and have an accuracy of plus or minus one degree Celsius (two degrees Fahrenheit).

- (b) Prior to taking an initial temperature reading, the thermometer shall be brought to equilibrium within the location being inspected.
- (c) When a location is determined to be in violation, each temperature reading taken and the location within the enclosure where the temperature is taken shall be recorded. The cooler or vehicle shall be clearly identified.
- (d) If a transport vehicle is equipped with a thermometer that has been verified for accuracy, an enforcing officer may use the thermometer to determine compliance with temperature requirements. If a transport vehicle is not equipped with a thermometer, an enforcing officer shall utilize an accurate thermometer and two temperature readings shall be taken. When a unit is accessible, the readings shall be taken in the air flow discharge at the refrigeration unit, one reading on the right side of the unit and one reading on the left side of the unit. The vehicle shall be accepted or rejected on the basis of the mean average of such readings. If the refrigeration unit is not accessible, the readings shall be taken in the air flow as near as possible to the refrigeration unit in a manner consistent with the foregoing instructions. If the mean average air flow temperature is more than 7 degrees Celsius (45 degrees Fahrenheit), the handler may unload the vehicle to make the refrigeration unit accessible for two additional temperature readings which shall be mean averaged to determine the basis for accepting or rejecting the vehicle.

(e) Mean Average.

The "mean average" is calculated by dividing the number of samples into the sum of all temperatures taken.

- (f) If a cooler is equipped with a thermometer that has been verified for accuracy, an enforcing officer may use the thermometer to determine compliance with temperature requirements. If a cooler is not equipped with a thermometer an enforcing officer shall utilize an accurate thermometer, and five temperature readings shall be taken in the storage room(s) or display unit(s). The readings shall be taken approximately 4 to 5 feet from the floor, and as far from warm eggs as feasible. The readings shall be taken away from doorways and the refrigeration unit's air flow at separate locations. The readings shall be mean averaged to determine compliance.
 - (g) Compliance Time Period.
 - (1) Storage Rooms and Display Units.

Locations in which eggs are placed or stored and which are found to have a mean average ambient air temperature above 7 degrees Celsius (45 degrees Fahrenheit) shall be brought into compliance within 24 hours from the time of rejection. If compliance cannot be accomplished within such time, the eggs shall be removed and placed in a transport vehicle or storage facility which complies with temperature requirements of 7 degrees Celsius (45 degrees Fahrenheit) or below.

(2) Transport Vehicles.

- A transport vehicle in which eggs are placed for shipment or storage and which is found to have the refrigeration unit discharging a mean average air flow temperature above 7 degrees Celsius (45 degrees Fahrenheit), the unit shall be brought into compliance within four hours from the time of rejection. If compliance cannot be accomplished within such time, the transport vehicle shall not be used, and the eggs shall be removed and placed in a transport vehicle or storage facility which is in compliance.
- (3) If a transport vehicle, store room, or display unit is found to be in noncompliance and is to be used for transporting or storing eggs, the responsible party shall repair the refrigeration unit and submit a copy of the repair tag to the enforcing officer. The repair tag shall include:
- i. The name, address and telephone number of the person or company that made the repairs.
 - ii. The date and time of repair.
- iii. The refrigeration unit's delivery temperature taken by the repair person, following the unit's repair.

Unless otherwise instructed by the enforcing officer, the responsible party may place the store room, display unit, or transport vehicle back in use upon repair and submission of the repair tag. The tag may be submitted by facsimile. Upon receipt of the repair tag, the enforcing officer

may approve the continued use verbally, in writing or by facsimile. If approval is made verbally, the enforcing officer shall record the time, date and name of the person to whom approval was given.

(h) Tolerance.

A tolerance of one degree Celsius (two degrees Fahrenheit) shall be allowed.

(i) Good Faith Effort.

Enforcing officers shall take into consideration refrigeration efforts of an industry egg handler or transporter when determining whether to initiate any legal proceedings.

HISTORY

1. New section filed 9-27-2000; operative 10-27-2000 (Register 2000, No. 39).

Subchapter 4. Fresh Fruits, Nuts and Vegetables

(Originally Printed 7-25-45)

Article 1. Markings

§ 1359. General Provisions for Markings on Containers.

In addition to the markings required by this Subchapter, containers of fruits, nuts, and vegetables shall be marked in accordance with Title 4, Division 9, Chapter 10, Article 2, Section 4510 of the California Code of Regulations.

NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Sections 42941, 42943 and 42944, Food and Agricultural Code; and CCR, Title 4, Division 9, Chapter 10, Article 2, Section 4510.

HISTORY

- 1. New section filed 4–30–75; designated effective 6–1–75 (Register 75, No. 18). For prior history of former Group 4 (sections 1377.5–1472.9), see Register 55, No. 10; Register 58, No. 4; Register 59, No. 12; Register 67, No. 23; Register 71, No. 2; Register 71, No. 22; Register 71, No. 24; Register 72, No. 12; Register 73, No. 15; Register 74, No. 27 and Register 75, No. 4.
- 2. Repealer and new section and amendment of Note filed 5–4–2001 as an emergency; operative 5–4–2001 (Register 2001, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–4–2001 or emergency language will be repealed by operation of law on the following day.
- 3. Reinstatement of section as it existed prior to 5–4–2001 emergency action by operation of Government Code section 11346.1(f) (Register 2001, No. 48).
- 4. Repealer and new section and amendment of Note filed 11-28-2001; operative 12-28-2001 (Register 2001, No. 48).
- 5. Editorial correction amending HISTORY 1 (Register 2004, No. 35).

- 3. Reinstatement of section as it existed prior to 5–4–2001 emergency action by operation of Government Code section 11346.1(f) (Register 2001, No. 48).
- 4. Repealer of section and amendment of NOTE filed 11-28-2001; operative 12-28-2001 (Register 2001, No. 48).

§ 1365. General Provisions for Markings on Containers.

NOTE: Authority cited for Article 1: Sections 42 and 43, Chapter 1404, Statutes of 1974 and Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1389, 1389.1, 1389.2 filed 1–4–71, as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1389 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1365.1. Master Container Marking Exceptions.

HISTORY

- 1. Renumbering from Section 1389.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1365.2. California Address Requirement.

HISTORY

- 1. Renumbering from Section 1389.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4–30–75; designated effective 6–1–75 (Register 75, No. 18).

§ 1365.3. Artificial Coloring of Fruits and Vegetables.

When it is evident that artificial coloring material has been applied to fruits or vegetables (making them appear to be better than they actually

Page 112

are, or results in partially or completely hiding a defective condition), such application constitutes a misrepresentation and is in violation of the provisions of Sections 42943 and 42944 of the Food and Agricultural Code; provided, however, oranges, grown outside of California, shall be deemed not to be false, deceptive or misleading in violation of Sections 42943 and 42944 of the Food and Agricultural Code if color has been added to the skin thereof, provided 55 percent of the oranges in such lot bear the statement "color added" in legible print.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Sections 42943 and 42944, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10–14–68 as an emergency; effective upon filing (Register 68, No. 39). For prior history, see Register 55, No. 10.
- 2. Certificate of Compliance—Sec. 11422.1, Gov. Code, filed 12–20–68 (Register 68, No. 48).
- 3. Amendment filed 12–3–74; effective thirtieth day thereafter (Register 74, No. 49).
- 4. Renumbering from Section 1370 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1365.4. Obliteration of Grade Markings Which Do Not Apply.

When a container is labeled with a grade term (an example would be "U.S. No. 1") and the product in the container does not meet the grade as marked, the grade designation may be obliterated provided all the terms or letters are completely obliterated; a few chalk marks are not considered sufficient.

HISTORY

- New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1372 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1365.5. Containers Labeled Precooled.

Containers of produce labeled as "Precooled" shall be considered as complying with Section 1375.13, if it is evident the field heat has been removed from the product in the container, to a temperature that can be maintained in transit under good refrigeration practices, for example, the use of top ice or any other method is a form of precooling if it removed field heat quickly.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1374 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1365.6. Consumer Packages in Master Container.

HISTORY

- 1. New section filed 3–16–56; effective thirtieth day thereafter (Register 56, No. 5).
- 2. Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1374.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1365.7. Markings When Produce Is in Sacks.

HISTORY

- 1. New section filed 3–16–56; effective thirtieth day thereafter (Register 56, No. 5).
- 2. Renumbering from Section 1374.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1365.8. Marking Exceptions.

HISTORY

- Renumbering from Section 1386.72 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1365.9. Containers Marked Standard or Standard Containers.

The words "standard" or "standard container" shall not be placed on any container unless such container conforms to the requirements which are specified for the standard containers of such fruit, nut, or vegetable.

HISTORY

1. Renumbering from Section 1386.42 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1365.10. Containers Marked Standard Pack.

Only if any fruit, nut, or vegetable is packed in a standard container and in conformity to the standard pack which is established for such product may the container be marked with the words "standard pack" or "standard container and pack."

HISTORY

Renumbering from Section 1386.43 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

Article 1.1. Standardization Assessment Rates

§ 1366. Standardization Assessment Rates for Fresh Fruits and Vegetables (Commodities).

NOTE: Authority cited: Sections 407, 42806 and 42812, Food and Agricultural Code. Reference: Sections 42807 and 42808, Food and Agricultural Code.

HISTORY

- 1. New article 1.1 (section 1366) and section filed 6-13-2002; operative 7-1-2002 pursuant to Food and Agricultural Code section 42806 (Register 2002, No. 24).
- Repealer filed 7–21–2006; operative 7–1–2006 pursuant to Food and Agricultural Code section 42806; exempt from OAL review and the requirements of Chapter 3.5 (commencing with section 11340) of Part 1 of Division 3 of Title 2 of the Government Code (the Administrative Procedure Act) pursuant to Food and Agricultural Code section 42806 (Register 2006, No. 29).

Article 2. Inspection Procedures

§ 1370. Standardization Inspection and Certification by Commissioners.

Inspection certificates, as authorized and identified in Sections 42791 and 42792 of the Food and Agricultural Code, may be written only when:

- (a) (1) Each lot to be certified has been completely prepared for sale or shipment; and
- (2) When there is room on the vehicle for additional produce, the certificates shall bear, in a conspicuous place, the statement "Not a complete load": and
- (3) Each inspection certificate is prepared in a clear and legible manner by an inspector, and each change or correction is signed by an inspector, and all information on the inspection certificate is accurate; and
- (4) A sufficient number of containers from the actual lot to be certified have been inspected to assure the inspector that the lot meets all the requirements; or
- (5) When a sufficient number of containers have been inspected in the field or packing house to assure the inspector that the lot to be certified meets all the requirements, in which case the certificate shall bear in a conspicuous place the statement "lot inspection."
 - (b) The inspection certificate may indicate:
- (1) The vehicle license number only when the lot is completely loaded on the vehicle, or that each container is properly identified by an official stamp placed on each container by or under the supervision of the inspector, stating that the lot complied with the requirements of this group on a specific date. The official stamp of each county must be approved by the Department of Food and Agriculture prior to use. When containers are on pallets or otherwise arranged to cause stamping of each container impractical then all accessible containers shall be stamped.
- (2) Indicate the words "lot inspection" when the provisions of Section 1370 (b) cannot be complied with.

NOTE: Authority cited for Group 4: Sections 407, 42681 and 42682, Food and Agricultural Code. Additional authority cited for Article 2: Sections 42 and 43,

Chapter 1404, Statutes of 1974. Reference: Sections 42791, 42792 and 42794, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 60, No. 16.
- 2. Amendment and renumbering from Section 1366 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment of subsection (b)(1) filed 6–13–75; effective thirtieth day thereafter (Register 75, No. 24).

§ 1370.1. Procedure for Acceptance of Standardization Inspection Certificates in Lieu of Inspection.

When standardization inspection certificates have been presented to the inspector by the person in possession of the lot and such certificate is identifiable by the truck license number or an official stamp, and is written in accordance with all provisions of Section 1370(a), the certificate shall be accepted in lieu of inspection unless:

- (1) There is an indication that substitution has been made for the lot originally inspected at origin;
- (2) A cursory inspection reveals that defects in excess of the tolerance for condition factors (such as mold, rot or decay) have developed after the original inspection;
- (3) The date of the inspection is not current in relation to commodity involved, distance traveled, and other factors;
- (4) The Director of the Department of Food and Agriculture determines that a reinspection should be made.

HISTORY

- 1. Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 55, No. 17.
- 2. Amendment and renumbering from Section 1366.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.2. Appeal Inspections Not Required.

When certificates are written as a lot inspection, the inspector is not required to appeal to the Director (Section 42794 of the Food and Agricultural Code) before rejecting the lot in question.

HISTORY

- Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 55, No. 17.
- Renumbering from Section 1366.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.3. Federal-State Certificates.

Federal–state shipping point certificates, issued by licensed federal–state inspection services, available to shippers at point or origin, contain various types of statements indicating the quality or condition of the products inspected. Such certificates are sometimes the result of condition inspection only. Also, the grade or quality statement given may be based upon inspection at some prior date, and deterioration may have taken place. In some instances such certificates indicate compliance with federal or state marketing orders.

For these reasons federal–state certificates, properly identified to the load as described in Section 1370.1 are informative to inspectors at stations in making inspections in connection with quality, condition or other stated facts.

HISTORY

- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from Section 1366.4 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.4. Disposition at Inspection Stations of Lots or Loads Which Fail to Comply.

- (a) Produce which fails to comply and which has originated in California may go to a location in California (not out of state) under proper written authorization of the enforcement officer, provided it goes to a specified person or firm at that location, and that legal disposition at destination is performed under the direction of an enforcement officer at destination.
- (b) Produce which fails to comply, and which originated outside California, may go to an out-of-state location; (1) if the lot or load returns

to an out-of-state destination, or (2) proceeds through California, without unloading, to an out-of-state destination; in these two instances reconditioning or remarking is not necessary. However, if such load or lot of produce is to proceed to a California destination, it may do so only under proper written authorization of the California enforcement officer, and provided the destination is a specified person or firm at a California location, and that legal disposition at destination is performed under the direction of an enforcement officer at said destination.

In the case of (2) above of this section, such load or lot may be transported through California only under proper written authorization of the California enforcement officer, and provided an enforcement officer at the border station at the exit location is notified.

(c) A rejected lot or load may be reconditioned or remarked, whichever is necessary to provide compliance, at the station, provided this is accomplished within a reasonable time specified by the enforcement officer, and when reconditioned, the lot is again submitted for inspection.

HISTORY

- 1. New section filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4).
- 2. Renumbering from Section 1366.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.5. Delivery of Substandard Produce Direct to Broker.

Produce dealers, commission merchants, or brokers are not considered processors of substandard or by-product produce; therefore, a disposal order, as provided in Section 42881 of the Food and Agricultural Code and following, shall not be considered valid unless the enforcing officer at point of origin shall also state thereon the name and address of the by-product plant, or other location authorized by Section 1390 to which the substandard produce is to be delivered.

HISTORY

- 1. New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1376 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.6. Interpretation of Disposal Order at Destination.

- (a) The enforcement officer shall verify that the produce described on the disposal order did arrive at the location designated; according to Section 42884 the enforcing officer may, if circumstances warrant, authorize delivery to another place, provided he does this in writing.
- (b) The enforcing officer may, if circumstances warrant, authorize a different by-product use for the product, provided he gives this authorization in writing.
- (c) The enforcing officer may, if circumstances warrant, authorize a substandard lot to be reconditioned, and that portion sorted out which meets all requirements of the Food and Agricultural Code may be sold on the open market.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Renumbering from Section 1377 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.7. Permit for By-Products Form.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Repealer filed 10–8–76; effective thirtieth day thereafter (Register 76, No. 41). For prior history, see Register 75, No. 4.

§ 1370.8. Representative Sample, General Application.

In the enforcement of Division 17 of the Food and Agricultural Code relating to fruits, nuts and vegetables, except for those commodities wherein the specific section of the law or a specific section of the California Administrative Code describes an official sample, the sample for the

purpose of determining *noncompliance* of the lot shall consist of containers selected at random from widely separated parts of the lot and shall be as follows:

The number of containers in each sample designated below shall apply when only a portion of the specimens in each such container is examined.

When all of the specimens in each container are examined, and the number of containers designated below is four or more, then the official sample may consist of one-half the number of containers designated. However, at least a portion of the specimens in each container shall be inspected.

If the tolerance for the commodity, or the defect involved is on a container basis, it is not permissible to average the results of the inspection in one container with that of another container in the sample, unless provided for in the specific commodity sections.

- (a) Where lot consists of less than 10 containers, official sample shall consist of at least 2 containers.
- (b) Where lot consists of 10 and not over 30 containers, official sample shall consist of at least 3 containers.
- (c) Where lot consists of 31 and not over 50 containers, official sample shall consist of at least 4 containers.
- (d) Where lot consists of 51 and not over 100 containers, official sample shall consist of at least 5 containers.
- (e) Where lot consists of 101 and not over 200 containers, official sample shall consist of at least 6 containers.
- (f) Where lot consists of 201 and not over 300 containers, official sample shall consist of at least 8 containers.
- (g) Where lot consists of 301 and not over 500 containers, official sample shall consist of at least 10 containers.
- (h) Where lot consists of more than 500 containers, official sample shall consist of a number of containers equal to at least one-half the square root of the total number of containers in the lot.

HISTORY

- New Section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 3–16–56; effective thirtieth day thereafter (Register 56, No. 5).
- 3. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 4. Renumbering from Section 1367 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.9. Sampling Loads at Highway Inspection Stations.

The Department of Food and Agriculture reserves the right to choose containers of fruits, vegetables, nuts, and honey from various parts of each load to be inspected for compliance at highway inspection stations. The purpose is to determine, by such sampling, whether the products within those containers inspected comply with the requirements as provided in Division 17, Food and Agricultural Code, and Title 3, California Administrative Code.

Inspection will be made of two or three containers selected at random from various parts of the load. If all the requirements, as described in the above–named codes are safely met, it is usually sufficient. Additional containers may be inspected because the inspector must use his judgment, considering the circumstances which prevail at the time of inspection, and be satisfied that the load meets the requirements.

HISTORY

- 1. Amendment filed 1–24–69; effective thirtieth day thereafter (Register 69, No. 4). For prior history, see Register 55, No. 17.
- 2. Amendment and renumbering from Section 1366.3 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.10. Determining Percent Waste Individual Fruits and Vegetables.

In the enforcement of Division 17 of the Food and Agricultural Code relating to fruits and vegetables, except for those commodities wherein the specific commodity section of the law or a specific section of the California Administrative Code describes a method of determining waste, the

method of arriving at a percentage of waste by weight for the purpose of determining compliance shall be as follows:

The percentage of waste by weight on an individual specimen, by defects so listed in the law, shall be determined by removing the affected parts of such specimen as would be done in the normal and practical preparation for use, and weighing such parts against the original weight of the fruit or vegetable. When weighing defective parts, include only that skin or peel that is removed with the defective portions.

HISTORY

- 1. New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- Renumbering from Section 1369 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.11. Shrinkage (42946) Not for Size Requirements.

With respect to tightness of pack, fruits or vegetables, after having been in storage or shipped, shall not be considered in violation if they have suffered unavoidable material shrinkage. Section 42946 of the Food and Agricultural Code does not relieve that same produce from the variation in size requirements, minimum size requirements or other sizing provisions in the law.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Renumbering from Section 1381 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.12. Variation in Size Requirement.

Reference is made to California Administrative Code Sections 1400.22, 1400.42, 1402.11, 1404.11, 1446.9, 1454.16, 1456.18, 1460.4, 1462.16, 1464.9, and 1468.2, and as to the fruits and vegetables regulated by the California Administrative Code sections listed, the tolerance for those commodities which fail to comply with the standards also shall apply to those fruits and vegetables that exceed the variation in size requirement.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1381.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.13. U.S. Grades Certified Lots, or Lots Marked U.S. Grade.

This pertains to the enforcement of the fruit and vegetable standards on products which are marked with U.S. grade designations, some of which are accompanied by federal or federal–state inspection certificates. Difficulties arise when rejections are made, or contemplated, for failure to meet the U.S. grade as marked if the lot carries a certificate attesting to the fact that the product does meet the grade as marked, or if an appeal inspection supports the original certification that the products do meet the grade as marked.

As to the interpretation of the U.S. grades, the U.S. Department of Agriculture representatives include Shipping Point Inspection members as the official administrators of the U.S. grades in California, and their conclusion as to the status of a given lot or commodity, when based entirely upon U.S. grade specifications, shall be final, and the enforcement officers shall accept and follow their interpretations of the U.S. grades.

Some situations which may illustrate the application of this principle are as follows:

(a) When the issue clearly embodies only the matter of interpretation of U.S. grade defects, which are not included in this group or if the defect is included in this group but the tolerance is more restrictive in the U.S. grade than contained in this group, then interpretation by the federal agency shall be final and accepted.

- (b) When the product in question, either certified as meeting the U.S. grade by the federal agency or not, meets the requirements of a particular U.S. grade and the minimum standards in the California Administrative Code are more restrictive than the U.S. grade in question, then the commodity is subject to rejection under the California Administrative Code and the application of the U.S. grade shall not be construed to alter this situation. For example: If a U.S. grade permits 10 percent insect injury and the minimum standards of this group permits only 5 percent of like injury, then the California Administrative Code prevails. This same situation could apply to defective conditions independent of tolerances for defects.
- (c) There may be a few situations where similar defective conditions are contained both in the U.S. grades and in the minimum standards of the California Administrative Code where federal grade interpretation and certification indicates that the product complies with the grade but fails to meet the minimum standards and would be cause for rejection under this group.

HISTORY

- New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment and renumbering from Section 1378 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment of subsections (a) and (c) filed 6-13-75; effective thirtieth day thereafter (Register 75, No. 24).

§ 1370.14. Inspection of Fruits and Vegetables Delivered to State Institutions.

Some fruits and vegetables delivered to state institutions have previously been inspected and certified by federal or federal–state inspection agencies, in accordance with the terms of a contract. Such products are also subject to inspection to determine compliance wit the fruit and vegetable standards of the California Administrative Code.

- (a) When a shipment of produce is covered by a federal or federal-state inspection certificate, indicating compliance with the grade or quality stipulated in the contract or purchase order submitted to the vendor by the purchasing department, and the management of the institution receiving the produce concludes that the produce fails to meet the standard or quality stipulated in the purchase order, enforcing officers of the fruit and vegetable standards of the California Administrative Code should not enter into any controversy between the state agencies, the vendor and the inspection agency. If enforcing officers are contacted concerning such a controversy, they should advise the State Purchasing Department or state institution representatives to contact the inspecting agency.
- (b) When inspection of produce at a state institution by an enforcing officer indicates that the products probably fail to meet the grade as marked on the container, as certified to by the federal or federal–state inspection agency, or without such certification, interpretation of the grade terms, as applied to the given commodity by the inspection agency, shall be considered as final. In controversies of this kind, if any should arise, the enforcement officers shall immediately contact representatives of the inspection agency in order to obtain guidance in the interpretation of grades. The federal and federal–state inspection agencies have indicated that they will be glad to cooperate whenever it is at all possible to do so.
- (c) When inspection of produce being delivered to state institutions reveals the fact that the products fail to meet the minimum standards in the Food and Agricultural and California Administrative Codes, then rejection and proper action shall be taken in accordance with the facts independent of the federal or federal–state inspection and certification.

HISTORY

- New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment and renumbering from Section 1378.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.15. Fruits or Vegetables Being Transported from One Packing Plant to Another for Prepackaging into Consumer Packages.

Section 1390 of the California Administrative Code shall be interpreted to mean that fruits and vegetables, which fail to meet the standards, if not regularly packed or wrapped and packed, may be transported from one packing plant to another for final prepackaging into consumer packages.

HISTORY

- New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1380 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1370.16. Alkali Solutions, Procedure for Testing.

The 0.1562 normal hydrochloric acid for testing the strength of solutions used for testing citrus can also be used to check the strength of the 0.1333 normal sodium hydroxide solution used for testing grape maturity.

PROCEDURE FOR CHECKING THE STRENGTH OF CITRUS AND GRAPE TESTING SODIUM HYDROXIDE SOLUTIONS

By means of a volumetric pipette transfer 25.00 milliliters (ml.) of 0.1562 normal hydrochloric acid to the titrating flask. Do not blow out the liquid remaining in the tip of the pipette, but touch the pipette tip to the surface of liquid in the flask to remove the adhering drop.

Add phenolphthalein indicator solution to the titrating flask, and then add the alkali solution to be tested from the burette, agitating the contents of the titrating flask continuously if possible. As the end-point is approached and the indicator color starts to spread through the liquid, add the alkali solution dropwise, swirling the flask to mix the entire contents before adding additional alkali.

The true end-point is a faint but persistent pink color, not a deep red.

Table 1. Citrus Maturity Testing Solution (0.1562 Normal)

30.20	0.1293	0.00970
30.30	0.1289	0.00967

The keeping qualities of the 0.1562 N hydrochloric acid standard are excellent when the bottle is kept properly closed to avoid evaporation and out of direct sunlight. Unused titrating solutions should never be returned to the bottle, but discarded to minimize the hazard of contamination. There should be a slight change in normality of the acid in a six-month

period. Sodium hydroxide solutions do not keep as well but tend to become weaker as they age. They should be checked with the standard acid as frequently as necessary to assure the operator that their strength is known.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1382 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

Article 2.1. Administrative Civil Penalty Guidelines

§ 1371. Notice of Proposed Action and Disposition.

- (a) Before a civil penalty is levied pursuant to Section 43003 or Section 885 of the California Food and Agricultural Code, the person charged with the violation shall receive written notice of the proposed action including the nature of the violation and the amount of the proposed penalty. The person shall be allowed to review any evidence related to the matter that is in the possession or control of the county agricultural commissioner or the Department of Food and Agriculture. The person shall have the right to request a hearing within 20 days after receiving notice of the proposed action. A notice may be served to the person charged by certified mail to the address provided on the person's licensing, registration, and/or certification on file with the county agricultural commissioner or the Department of Food and Agriculture. If a hearing is requested, notice of the time and place of the hearing shall be given at least 10 days before the date set for the commissioner's hearing and the person shall be allowed to present evidence on his or her own behalf. If a hearing is not timely requested, the commissioner may take the action proposed without a hearing.
- (1) The hearing shall be conducted by an unbiased hearing officer who has not served as an investigator, prosecutor or advocate regarding the proposed action.
 - (2) A record shall be made of the proceedings.
- (3) A decision shall be rendered by the City Agricultural Commissioner and shall be based only upon evidence presented to the hearing officer during the hearing.
- (b) If a respondent in an administrative action agrees to pay the proposed penalty, a signed stipulation with the payment of the proposed administrative penalty shall be returned to the county agricultural commissioner within 45 days of the postmark of the notice of proposed action.

(c) If an administrative hearing is requested, a final decision and order shall be made by a hearing officer within 60 days of the conclusion of the hearing. This order will be mailed to the address provided by the respondent. Any penalty imposed shall be due and payable within 45 days of the postmark of such order, unless the respondent timely files a written appeal to the secretary.

HISTORY

1. New article 2.1 (sections 1371–1371.2) and section filed 3–15–2007; operative 4–14–2007 (Register 2007, No. 11).

§ 1371.1. Penalty Guidelines.

In applying Section 885 and Section 43003 of the California Food and Agricultural Code, county agricultural commissioners shall use the provisions of this section to determine the violation class and amount of the penalty.

- (a) For the purposes of this section, violation classes are designated as "Serious", "Moderate" and "Minor".
- (1) "Serious". Violations which preclude or significantly interfere with enforcement, or those which cause significant false, misleading or deceptive business practices; or repeat violations of sub-paragraph (2) that occurred within a two-year period and which resulted in an action and subsequent penalty.
- (2) "Moderate". Violations which undermine enforcement, or those in which there is a potential for intermediate level of consumer or competitive harm; or repeat violations of sub–paragraph (3) that occurred within a two–year period and which resulted in an action and subsequent penalty.
- (3) "Minor". Violations that have minimal adverse effect on consumers or equitable competition in the marketplace.
- (b) Table A shall be used to establish the level of severity of a particular violation and the corresponding penalty range for "Serious", "Moderate" and "Minor" violation classes. Except where specific violation parameters are provided, the violation column in Table A is an abbreviated description of the corresponding section in the California Food and Agricultural Code, Division 1, Chapter 8. Agriculture Theft Prevention; and Division 17. Fruit, Nut and Vegetable Standards.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Sections 401, 885 and 43003, Food and Agricultural Code.

§ 1375.15. Pack, Packing, or Packed.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Sections 42941 and 42516, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1386.15 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-15-85; effective thirtieth day thereafter (Register 85, No. 16).

§ 1375.16. Placard.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Sections 42941 and 42517, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1386.16 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-15-85; effective thirtieth day thereafter (Register 85, No. 16).

§ 1375.17. Preserving.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Sections 42941 and 42518, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1386.17 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-15-85; effective thirtieth day thereafter (Register 85, No. 16).

§ 1375.18. Processing.

Processing means canning, preserving, or fermenting, which materially alters flavor, keeping quality, or any other property; the extracting of juices or other substances; quick freezing; or the making of any substantial change of form. It does not include refrigeration at temperatures which are above the freezing point nor any other treatment which merely retards or accelerates the natural processes of ripening or decomposition. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Sections 42941 and 42519, Food and Agricultural Code.

HISTORY

1. Renumbering from Section 1386.18 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

2. Amendment filed 4–15–85; effective thirtieth day thereafter (Register 85, No. 16).

§ 1375.19. Processing Includes "Quick Freezing."

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1375 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 4-15-85; effective thirtieth day thereafter (Register 85, No. 16).

§ 1375.20. Subcontainer.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Sections 42941 and 42520, Food and Agricultural Code.

HISTORY

- Renumbering from Section 1386.19 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-15-85; effective thirtieth day thereafter (Register 85, No. 16).

§ 1375.21. At Time of Picking in Relation to Maturity Tests.

Maturity tests must be made as near to the time of picking as is practicable under the circumstances. "At time of picking" does not necessarily mean the instant the fruit was separated from the tree, but may be construed to mean the time when the product reaches the packing location, provided that the product has been brought from the orchard or field to the packing location within a reasonable time. The term "at time of picking" cannot be extended to include allowing the product to stand either in the orchard or any other place for the purpose of permitting the produce to undergo a ripening process.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment and renumbering from Section 1371 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4–15–85; effective thirtieth day thereafter (Register 85, No. 16).

Article 4. Containers

§ 1380. Experimental Container Permit.

This group does not prohibit the preparation, packing, shipment, or sale under the director's permit of fruits, nuts, or vegetables in any experimental type of container which does not conform to the standards prescribed in this article. Each container shall be clearly and conspicuously marked on one outside surface with the words "Experimental Container Permit No. ______," followed by the permit number assigned to the applicant by the director.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.1. Container Permit Application.

Application for the permit and permit number shall be made to the director at least five days before shipment. The application shall state all of the following:

- (a) The name of the product.
- (b) The quantity intended to be shipped.
- (c) The description and inside and outside dimensions of the container expressed in inches.
- (d) The name of the person from whom the experimental containers are to be obtained.

- (e) The reason for the contemplated experiment.
- (f) The quantity of such product, if any, shipped by the applicant in all types of containers during the preceding year. If no shipments of such product were made by the applicant during the preceding year, an estimate of the total quantity which such applicant will ship in all types of containers during the current year.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 8–19–75 as an emergency; effective upon filing (Register 75, No. 34).
- 3. Reinstatement of section as it existed prior to emergency amendment filed 8–19–75 by operation of Section 11422.1(b), Gov. Code (Register 75, No. 51).
- 4. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.2. Permit Number.

The director may issue to the applicant a permit and a permit number for the shipment of a specified quantity of the product in the containers within a specified period, which shall not exceed one year, if he makes all of the following findings:

- (a) The container is not deceptive in shape, design, or capacity.
- (b) The applicant has complied with the permit application requirements and has established the proper reasons for the experiment.
- (c) The proposed shipments are only for experimental purposes. NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- New NOTE filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.3. Acceptance of Applications for Experimental Container Permits.

The director may refuse to approve an application for an experimental container permit as provided in this article unless such application is accompanied by a statement of facts signed by the applicant showing, to the satisfaction of the director, the need for experimental container shipments and that the proposed shipments are for experimental purposes only.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–25–60; effective thirtieth day thereafter (Register 60, No. 16).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1384 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.4. Permit Renewal.

- (a) A permit may be renewed a maximum of two times in any harvest season or any succeeding harvest season upon written application showing to the Department that the experiment has not been completed, provided that a permit shall not be renewed after three years from the original date of issue of the permit.
- (b) Notwithstanding the above requirements, any person to whom a permit has been issued prior to January 1, 2000 and such permit has either expired prior to or continues to be valid on or after January 1, 2000, the permittee shall, upon written request, be authorized a new permit and two renewals as provided in (a), above.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

Page 118

3. Repealer and new section and amendment of Note filed 6–22–2000; operative 7–22–2000 (Register 2000, No. 25).

§ 1380.5. Permit Quantity.

(a) If the applicant has shipped products of a kind specified in the application during the preceding year, a permit may be issued for the shipment in experimental containers of not more than 10 percent of the quantity of such product shipped in all types of containers by such person in the preceding calendar year. However, when 10 percent represents less than 10,000 containers, a permit may be issued for 10,000 containers, provided that such amount does not exceed the quantity shipped in the preceding year.

(b) If no shipments of such products were made by the applicant during the preceding year, a permit may be issued for the shipment in experimental containers of not more than 10 percent of the quantity which the applicant estimates will be shipped in all types of containers during the current year. However, when 10 percent represents less than 10,000 containers, a permit may be issued for 10,000 containers, provided that such amount does not exceed the quantity to be shipped in the current year. NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 12–19–80 as an emergency; effective upon filing (Register 80, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–18–81.
- 3. Certificate of Compliance including amendment transmitted to OAL 4-10-81 and filed 4-23-81 (Register 81, No. 17).

§ 1380.6. Permit Quantity (No Previous Shipments).

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 12–19–80 as an emergency; effective upon filing (Register 80, No. 51). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 4–18–81.
- 3. Certificate of Compliance including repealer transmitted to OAL 4–10–81 and filed 4–23–81 (Register 81, No. 17).

§ 1380.7. Experimental Type Container.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 7-31-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.8. Permit Number Marking.

No person may prepare, pack, transport, deliver, or sell commodities in experimental containers or experimental packs, or mark such containers with the permittee's assigned permit number, in excess of the quantities specified in the permit.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.9. Permit Record.

Every person to whom an experimental container or pack permit has been issued shall keep an accurate record of all shipments of such experimental containers or packs including the place from which such shipments are made, the date of shipment, and the number of containers in each shipment. All such records shall be kept for at least one year and shall be delivered to the director or the commissioner for inspection on demand at any time within that period.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.10. Experimental Packs.

This group does not prohibit the preparation, packing, shipment, or sale under the director's permit of fruits, nuts, or vegetables which do not conform to the count arrangement or packing requirements prescribed in this group. Each container of such fruits, nuts, or vegetables shall be clearly and conspicuously marked on one outside surface of the container with the words "Experimental Pack Permit No. _____," followed by the permit number assigned to the applicant by the director.

NOTE: Authority cited: Sections 14, 407, and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7-31-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.11. Pack Permit Application.

Application for an experimental pack permit shall be made to the director at least 5 days before shipment. The application shall state all of the following:

- (a) The name of the product.
- (b) The quantity intended to be shipped.
- (c) The description of the count, arrangement, or method of packing to be used.
- (d) The quantity of such product, if any, shipped by the applicant during the preceding year.
- (e) If no shipments of such product were made by the applicant during the preceding year, an estimate of the total quantity which such applicant will ship during the current year.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 8–19–75 as an emergency; effective upon filing (Register 75, No. 34).
- 3. Reinstatement of section as it existed prior to emergency amendment filed 8–19–75 by operation of Section 11422.1(b), Gov. Code (Register 75, No. 51).
- 4. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.12. Experimental Pack Time Limit.

- (a) The Department may issue to the applicant a permit for the shipment of a specified quantity of the product within a specified period, which shall not exceed one year, upon determining that the count, arrangement, or pack is not deceptive or misleading in any manner. A permit may be renewed a maximum of two times in any harvest season or any succeeding harvest season upon written application showing to the Department that the experiment has not been completed, provided that a permit shall not be renewed after three years from the date of issue of the original permit.
- (b) Notwithstanding the above requirements, any person to whom a permit has been issued prior to January 1, 2000 and such permit has either expired prior to or continues to be valid on or after January 1, 2000, the permittee shall, upon written request, be authorized a new permit and two renewals as provided in (a), above.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).
- Amendment of section and Note filed 6–22–2000; operative 7–22–2000 (Register 2000, No. 25).

§ 1380.13. Quantity of Experimental Packs.

(a) If the applicant has shipped products of the kind specified in the application during the preceding year, a permit shall not be issued for the shipment of experimental packs of more than 10 percent of the quantity of such product shipped by such person in the preceding calendar year. However, when 10 percent represents less than 10,000 containers, a permit may be issued for 10,000 containers, provided that such amount does not exceed the quantity shipped in the preceding year.

(b) If no shipments of such products were made by the applicant during the preceding year, a permit may be issued for the shipment in experimental packs of not more than 10 percent of the quantity which the applicant estimates will be shipped in all types of packs during the current year. However, when 10 percent represents less than 10,000 containers, a permit may be issued for 10,000 containers, provided that such amount does not exceed the quantity to be shipped in the current year.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.14. Experimental Pack Definition.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.15. General Provisions for Standard Containers and Standard Packs.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1386.40 through 1386.43 filed 1–4–71 as an emergency. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1386.40 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.16. Imported Fruits, Nuts, or Vegetables.

This group shall not be construed to do any of the following:

- (a) Conflict with any laws or regulations of this state or the United States regarding net weight or other markings on containers or subcontainers.
- (b) Prohibit the shipment, transportation, delivery for sale, or sale of fruits, nuts, or vegetables which are imported into this state in containers which are established as standard by the applicable laws or regulations of the United States.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1387 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- New NOTE filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.17. Imported Containers.

In addition to other exceptions which pertain to the use of standard containers, this group does not prohibit the shipment, transportation, delivery for sale, or sale of any fruits, nuts, or vegetables imported into this state in containers which do not conform to the container requirements

prescribed in this group, if such containers comply with the basic marking requirements of Section 1359, and in addition:

- (a) are lawful for use in the state of origin and in interstate commerce, and
- (b) if the containers are not constructed so as to misrepresent their capacity and the dimensions are not so similar to those of any standard used container used in California for the same commodity as to be deceptive. NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–4–71 as an emergency; effective upon filing, Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1387.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).
- Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.18. Standard Containers—Provisions.

The numbers, names, and dimensions of standard containers are set forth in this article. Unless otherwise specified, all inside measurements are in inches, and reading from left to right are measurements of depth, width, and length, respectively.

Except as otherwise provided, to allow for reasonable manufacturing variations, nonconsumer containers designed to hold 100 pounds or less of a product shall be permitted a 1/4-inch variation in each of these dimensions. Containers designed to hold more than 100 pounds shall be permitted a 1-inch variation.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1387.10 and 1387.11 filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1387.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.19. Standard Containers.

This section describes containers that are required by other regulations of Subchapter 4. The depth dimension of containers designated below shall include in that measurement any cleats, if used.

All apples, except Lady variety, crab apples, and as otherwise provided in Section 1400.2 when in closed containers, shall be in one of the containers listed. Specific packing conditions are listed in Article 7 of this Subchapter.

In addition, wrapped apples shall be packed only in containers AP 1, AP 2, AP 3, AP 4, or AP 11. Tray packed apples shall be packed only in container AP 11 or AP 15. AP 11 shall be placed in layers of 4 to 6 trays, pads, or molded forms, and AP 15 shall be placed in layers of 2 trays,

pads, or molded forms. A collar or liner is permitted, provided it does not reduce the internal capacity of the container.

Specific packing conditions are listed in article 20 of this group. The nonbulge celery container 45L shall only be used when lidded and packed with no more than a slight bulge on top and bottom as defined in section 1426.18. Not more than 10 percent, by count, of container 45L

in any lot may exceed this slight bulge.

Container 45K shall be constructed of expanded molded polystyrene and shall be wrapped with a shrink film. Containers 45E and 45R shall be constructed of expanded molded polystyrene and shall have a snap—on lid. The lid shall be constructed in a manner as to add 1 inch in depth to the container without exceeding the depth requirement listed above. In addition to the depth, width, and length specifications listed above, containers 45E and 45K shall have an internal vertical radii of the corners of not less than 3/8 inch. Container 45K, when empty, shall have a minimum net weight of 13.5 ounces. Container 45E (body and lid), when empty, shall have a minimum net weight of 20 ounces. Width and length measurements of containers 45E, 45K, and 45R, as listed above, shall be taken at a point approximately one—half of the depth of the container. Radii measurements of containers 45E and 45K shall be taken at a point ap-

Specific packing conditions are listed in articles 25 and 25.5 of this subchapter.

In reference to all containers mentioned in this subsection, except when otherwise specifically mentioned, the depth is determined by the actual depth of the head of the container. The sides need not be placed on the head up to the top edge.

Depth measurement of containers with lids closing from the side shall be made vertically at the inside corner opposite the manufacturer's joint. The measurement shall be made from the upper side of the bottom to the manufacturer's score line at the underside of the corresponding top inner flap.

Containers 38J and 38Q shall be constructed of expanded molded polystyrene and shall have a snap—on lid. The depth described above for these containers shall include any measurement in the lid which affects the depth. In addition to the depth, width, and length specifications, 38J shall have an internal vertical radii of the corners of not less than 3/8 inch and the empty container shall have a minimum net weight of 14 ounces, composed of a 9–ounce body and a 5–ounce lid. In addition to the depth, width, and length specifications above, 38Q shall have an internal vertical radii of the corners of not less than 5/8 inch and the empty container shall have a minimum net weight of 13 ounces, composed of an 8–ounce body and a 5–ounce lid.

Width and length measurements of containers 38J, 38K, and 38Q, as listed above, shall be taken at a point approximately one—half the depth of the container. Radii measurements of 38J and 38Q shall be taken at a point approximately 1 inch below the top of the body.

57D	7 to 8 3/4	10 1/2 to 12 3/4	14 3/4 to 17 1/2

The above description in inches for container 57A includes an "H" divider which shall (a) completely cover the entire area of both sides, and (b) extend the full depth of the container in the center.

Containers 55 and 56, used with an "H" divider, may measure 3/8 inch less in width and 3/8 inch less in length if the side pieces of the "H" divider completely cover the entire area of both sides of the container, and the center divider extends the full depth of the container.

In addition to the above description, container 57D shall have an interior volume of 1,420 cubic inches, plus or minus 5 percent.
(w) BASKETS, FRUIT.

1 Approximately 8 inches square on top, 6 1/2 inches square on bottom, and 4 to 5 inches deep, inside measurements.

1B Approximately 5 1/4 inches square on top, 4 1/4 inches square on bottom, and 3 inches deep, inside measurements.

1C Approximately 6 1/2 inches square on top, 5 3/8 inches square on bottom, and 3 3/4 inches deep, inside measurements.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (14) filed 4–8–85; effective thirtieth day thereafter (Register 85, No. 15). For prior history, see Register 84, No. 48.
- Amendment of subsection (11) filed 4-19-85; effective thirtieth day thereafter (Register 85, No. 16).
- Amendment of subsections (14), (17) and (20) filed 4–19–85; designated effective 4–20–85 pursuant to Government Code section 11346.2(d) (Register 85, No. 16).
- Amendment of subsection (6) filed 4–24–85; effective upon filing pursuant to Government Code section 11346.2(d) (Register 85, No. 17).
- Amendment filed 7–31–85; effective upon filing pursuant to Government Code section 11346.2(d) (Register 85, No. 31).
- 6. Amendment of subsection (10) filed 4–11–86; effective upon filing pursuant to Government Code section 11346.2(d) (Register 86, No. 15).
- 7. Amendment of subsections (2), (12), (14), (17), and (18) filed 5–5–86; effective upon filing pursuant to Government Code section 11346.2(d) (Register 86, No. 19).
- 8. Amendment of subsections (2), (17), (18) and (20) filed 4–16–87; operative 4–20–87 (Register 87, No. 16).
- Renumbering of former subsections (1)–(24) to subsections (a)–(x) and amendment of subsections (f) and (x) filed 7–13–87; operative 8–12–87 (Register 87, No. 29).
- 10. Amendment of subsection (e) filed 9–1–87; operative 10–1–87 (Register 87, No. 36).
- 11. Amendment of subsection (j) filed 10–6–87; operative 11–5–87 (Register 87, No. 42).
- 12. Amendment of subsection (c) filed 10–14–87; operative 11–13–87 (Register 87, No. 42).
- Amendment of subsection (j) filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).
- 14. Repealer of subsection (u) and renumbering of subsections (v) and (w) to subsections (u) and (v), filed 6-20-91; operative 7-22-91 (Register 91, No. 39).
- 15. Amendment of subsections (f) and (m) filed 8-16-91; operative 9-16-91 (Register 91, No. 50).
- 16. Repealer of subsection (s) filed 7–27–92 as an emergency; operative 7–27–92 (Register 92, No. 31). A Certificate of Compliance must be transmitted to OAL 11–24–92 or emergency language will be repealed by operation of law on the following day.
- 17. Repealer of subsection (f) filed 10–1–92; operative 10–1–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 40).
- 18. Repealer of subsection (i) filed 10-15-92; operative 10-15-92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 42).
- 19. Repealer of subsection (d) filed 3–26–93; operative 4–26–93 (Register 93, No. 13).
- 20. Amendment of subsection (m) filed 2–1–94; operative 2–1–94 (Register 94, No. 5).
- 21. Amendment of subsection (m) filed 11-8-94 as an emergency; operative 11-8-94 (Register 94, No. 45). A Certificate of Compliance must be transmitted to OAL by 3-8-95 or emergency language will be repealed by operation of law on the following day.
- 22. Certificate of Compliance as to 11–8–94 order transmitted to OAL 12–22–94 and filed 1–31–95 (Register 95, No. 5).
- Amendment of subsection (h) filed 5-8-95; operative 5-8-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 19).
- 24. Amendment of subsection (n) filed 8-28-95; operative 9-27-95 (Register 95, No. 35).

- 25. Amendment of opening line and subsection (n) filed 7–2–96; operative 8–1–96 (Register 96, No. 27).
- 26. Amendment of subsection (p) filed 12–5–96; operative 1–4–97 (Register 96, No. 49).
- 27. Amendment of subsections (q) and (r) filed 5–29–97; operative 6–28–97 (Register 97, No. 22).
- 28. Amendment of subsection (n) filed 8-4-97; operative 9-3-97 (Register 97, No. 32).
- 29. Amendment of subsections (n), (q), (r) and (t) filed 6–17–98; operative 7–17–98 (Register 98, No. 25).
- 30. Amendment of subsection (a) filed 1–21–99; operative 2–20–99 (Register 99, No. 4).
- 31. Editorial correction restoring inadvertently omitted subsection (b)-Apricots container 25 dimensions (Register 99, No. 30).
- 32. Amendment of subsection (a) adding new container AP14 filed 7–22–99; operative 8–21–99 (Register 99, No. 30).
- 33. Amendment of subsection (b) and NOTE filed 5–4–2000; operative 6–3–2000 (Register 2000, No. 18).
- 34. Amendment of subsection (*l*) and NOTE filed 7–17–2000; operative 8–16–2000 (Register 2000, No. 29).
- 35. Amendment of subsection (a) filed 1–18–2001; operative 2–17–2001 (Register 2001, No. 3).
- 36. Amendment of subsection (k) filed 11–26–2001; operative 12–26–2001 (Register 2001, No. 48).
- 37. Amendment of subsections (n), (q), (r) and (t) filed 5–29–2002; operative 5–29–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 22).
- 38. Amendment of subsection (h) filed 10–9–2002; operative 11–8–2002 (Register 2002, No. 41).
- 39. Amendment of subsection (m) filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).
- 40. Amendment of subsection (*l*) filed 1–6–2003; operative 2–5–2003 (Register 2003, No. 2).
- 41. Amendment of subsections (b), (q), (r) and (t) filed 8–26–2003; operative 8–26–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 35)
- 42. Amendment of subsection (p) filed 6–25–2004; operative 6–25–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 26).
- 43. Amendment of subsection (h) filed 4–28–2006; operative 5–28–2006 (Register 2006, No. 17).
- 44. Amendment of subsection (n) filed 11–1–2007; operative 12–1–2007 (Register 2007, No. 44).

§ 1380.20. Standard Containers "Permissive."

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1386.41 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.21. Determining Inside Dimensions of Fiberboard Cartons.

The inside width and the inside length shall be determined by measuring the respective panels of the carton opposite from the manufacturer's joint. These measurements shall be taken at a point approximately one—half the depth of the container. The depth shall be determined by placing the bottom flaps firmly in a closed position, without crushing them, and then measuring vertically in the corner opposite from the manufacturer's joint from the upper side of the bottom inner flap to the underside of the corresponding top inner flap. The top inner flaps also must be in a closed position. When measuring a telescope—type container without the lid in place, measure from the upper side of the bottom inner flap to the edge of the top of the carton.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–6–61; effective thirtieth day thereafter (Register 61, No. 7).
- 2. Renumbering from Section 1385 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7-31-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.22. Mullen Bursting Test, Fibreboard Containers.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 11–16–72; effective thirtieth day thereafter (Register 72, No. 47).
- 2. Renumbering from Section 1387.50 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 11-25-80; effective thirtieth day thereafter (Register 80, No. 48).

§ 1380.23. Citrus Field Picking Box Measurements.

Except as otherwise permitted in Section 1380.25, the standard citrus field picking box shall have a cubic content of 3,115 cubic inches and shall not have cleats over 1 inch high. The volume added to the box by the cleats shall not be considered in computing the cubic content.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New Sections 1388, 1388.1 through 1388.3 filed 1-4-71; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from Section 1388 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.24. Citrus Field Picking Box Requirements.

No person shall load, ship, transport, or deliver citrus fruits from the orchard where they were produced or from elsewhere within the state in any nonstandard citrus field picking box designed to hold less than 500 pounds, unless the box is clearly and conspicuously marked on an outside end with the word "irregular" and with the cubic content in cubic inches. Any citrus field picking box designed to hold more than 500 pounds shall be clearly and conspicuously marked on an outside end with the cubic content in cubic inches.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1388.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 7-31-85; effective upon filing (Register 85, No. 31).

§ 1380.25. Citrus Field Picking Boxes Variation Tolerances.

In order to provide for reasonable variation in the cubic content of standard citrus field picking boxes because of atmospheric changes, normal use, and normal manufacturing variations, a tolerance of 4 percent either above or below the standard cubic content is permissible. An equal tolerance is permissible in the case of irregular citrus field picking boxes above or below the cubic content as marked upon such picking boxes. Note: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1388.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. New NOTE filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

§ 1380.26. Citrus Field Picking Boxes Contract Basis.

All contracts which are entered into, and all settlements which are made with growers on the basis of citrus field picking boxes shall be on the basis of the standard box unless such contract or settlement is in writing and expressly provides in type as conspicuous as the balance of the type that the box which is involved is irregular and states its actual cubic content.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1388.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- New NOTE filed 7–31–85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).

Page 124

§ 1380.27. Consumer Packages of Fresh Fruits, Nuts, or Vegetables.

Fresh fruits, nuts, or vegetables in unbroken consumer—type containers are exempt from the standard container provisions in this group, provided that such consumer—type containers:

(a) have a volume not greater than 85 percent of the smallest size standard container established for a particular commodity provided this provision shall not apply to unbroken consumer—type containers filled entirely with apricots, cherries, grapes, nectarines, peaches, or plums, and

(b) regardless of the smallest size container, are not of a size that will hold more than 15 pounds of the commodity.

In addition, this section shall not apply to containers filled entirely with berries or other commodities for which consumer-type containers are specifically defined by this group.

Article 6. Exempt Fruits, Nuts and Vegetables

§ 1390. Intrastate Exemptions for Fruits, Nuts, and Vegetables.

Except as otherwise provided in Sections 1400.12, 1430.1, 1434, 1434.2 and 1466.7, fruits, nuts, and vegetables which are specified in this group, if they are not wrapped or packed, are exempt from the standards which are established in this group when being transported or delivered to the destinations and for the purposes herein set forth, or when prepared, loaded, shipped, or sold under any of the following conditions:

- (a) from a packing plant which does not have proper or adequate facilities for processing, grading, packing, or reconditioning to another packing plant within the state which has such facilities;
- (b) to a by-product plant within the state for commercial processing, preserving, or manufacturing of by-products for resale;
 - (c) to a feedyard within the state for livestock feeding purposes;
- (d) to a dumping ground or waste disposal plant within the state for disposal;
- (e) from the orchard or field where they were produced to a packing plant within the state for first processing, grading, or packing; or
- (f) to a charitable organization within the state to be used for charitable purposes.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Article 6 (Sections 1390–1390.13) filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 10–8–76; effective thirtieth day thereafter (Register 76, No. 41).
- 3. Amendment filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1390.1. Permits for Exempt Fruits, Nuts, or Vegetables.

Except as otherwise provided in Section 1390.2 or 1390.3, any commissioner may issue a permit to any person who resides or maintains a principal place of business in the county to sell, buy, receive, transport, deliver, or cause to be transported any fruits, nuts, or vegetables which are exempt from the standards established in this group for any one or more of the purposes which are prescribed in Section 1390.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1390.2. Permit Not Authorized.

No permit issued pursuant to Section 1390.1 shall authorize any person to sell, buy, receive, transport, deliver, or cause to be transported fruits, nuts, or vegetables which are in conflict with orders or regulations which are issued by the director pursuant to the California Marketing Act of 1937, Chapter 1 (commencing with Section 58601), Part 2, Division 21 of the Food and Agricultural Code, or a marketing program issued pursuant to the Agricultural Producers Marketing Law, Chapter 2 (commencing with Section 59501), Part 2, Division 21 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

Amendment filed 8-23-83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1390.3. Permit Requirements.

(a) A permit shall not be issued for the purpose set forth in Section 1390(a) until the commissioner has determined both that:

- (1) The packing plant from which the commodity is transported or delivered does not have proper and adequate facilities for processing, grading, packing, or reconditioning the particular lot; and
- (2) the packing plant to which the commodity is to be transported has such facilities.
- (b) A permit shall not be issued for the purpose set forth in Section 1390(f) until the commissioner has determined that the commodity shall be used solely for charitable purposes and not for resale.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10–8–76; effective thirtieth day thereafter (Register 76, No. 41).
- 2. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.4. Permit Period.

Permits may be issued for a period not exceeding 36 months.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.5. Permit Validity.

A permit which is issued pursuant to Section 1390.1 is only valid in the county where it is issued unless the permit has been approved in writing by the agricultural commissioners of both the county of origin and of destination.

NOTE: Authority cited: Sections 407, 4262 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1390.6. Permittee Affidavits.

A permittee shall, upon request of any commissioner, furnish such affidavits, receipts and other evidence as is necessary to prove that the commodities have been disposed of in accordance with the terms of the permit issued pursuant to Section 1390.1.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1390.7. Permit Refused.

Any commissioner may refuse to issue or to endorse a permit, or may revoke or suspend any permit or endorsement which is issued by him, if after investigation and in his judgment the permittee or applicant for permit comes within any of the following classes:

- (a) Does not have available proper and adequate facilities with which to pack, process, or otherwise dispose of the commodities which are described in Article 6 (commencing with Section 1390) of this article in accordance with the provisions of this group.
- (b) Has previously violated any of the provisions of this group or the terms of any permit which is issued pursuant to this article.
- (c) Has failed or refused to furnish the evidence required by the commissioner.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.8. Permit Refusal in Writing.

Any order of the commissioner refusing to endorse or issue a permit, or suspending or revoking a permit, shall be in writing.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.9. Permit Appeal.

(a) Any person may appeal to the director, within 10 days, for a hearing upon a written order of the commissioner refusing to endorse or issue a permit, or suspending or revoking a permit.

(b) The proceedings for such hearing shall be conducted in accordance with Chapter 5 (commencing with Section 11500) Part 1, Division 3, Title 2 of the Government Code. However, the provisions of Sections 11505 and 11506 of such code shall not apply and the statement of issues or accusation, as the case may be, shall be delivered or mailed to the parties as provided in Section 11509 of such code.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 10–8–76; effective thirtieth day thereafter (Register 76, No. 41).
- 2. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.10. Permittee Operation Pending Disposition of Application.

This article does not allow a permittee or applicant to operate pending the disposition of his application or petition.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.11. Permit Suspended or Revoked.

This article does not prevent the commissioner from suspending or evoking a permit forthwith, and without notice or hearing. Such peremptory action shall, however, be supported by previous investigation, the results of which reasonably indicate to the commissioner that to allow an existing permit to remain in use pending a hearing would encourage, allow, or permit additional or other violations of any provision of this group.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.12. Permit Inspection.

A permit shall be submitted for inspection upon demand of any enforcing officer.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Editorial correction adding NOTE filed 8-23-83 (Register 83, No. 35).

§ 1390.13. Permit Records.

Every person who sells, delivers, or receives any fruits, nuts, or vegetables which do not conform to the standards prescribed by this group shall keep an accurate record of all such transactions in such form as the commissioner shall require. All such records shall be kept for at least one year and shall be delivered to the commissioner for inspection on demand at any time within that period.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35)

§ 1390.14. Exemptions for Out-of-State Processing.

Any person, under a permit issued pursuant to Section 1390.15, may transport out of state any commodity that fails to comply with the quality, packing, container, or marking requirements of this group, except as provided in Sections 1430, 1434, 1434.2, 1436, 1438.33, and 1466.1. Such commodity shall be used for commercial processing, preserving, or manufacturing on the purchaser's premises. The requirements are:

- (a) the permit shall be issued for and accompany each load or lot which is transported; and
- (b) the commodity shall be loose in containers holding 200 pounds or more or in bulk.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35)

§ 1390.15. Out-of-State Permit Requirements.

Except as otherwise provided in Section 1390.17, a permit may be issued by the enforcing officer if there is satisfactory verification by a like official in the state of destination that the produce is to be transported to a purchaser for commercial processing, preserving, or manufacturing on the premises of the purchaser.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

 New section filed 8-23-83; effective thirtieth day thereafter (Register 83, No. 35).

§ 1390.16. Proof of Compliance.

The permittee shall, upon request of the enforcing officer, furnish such affidavits, receipts, and other evidence as is necessary to prove that the commodities have been disposed of in accordance with the terms of the permit issued pursuant to Section 1390.15.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 8-23-83; effective thirtieth day thereafter (Register 83, No. 35)

§ 1390.17. Permit Not Authorized.

No permit issued pursuant to Section 1390.15 shall authorize any person to sell, buy, receive, transport, deliver, or cause to be transported fruits, nuts, or vegetables which are in conflict with orders or regulations which are issued by the director pursuant to the California Marketing Act of 1937, Chapter 1 (commencing with Section 58601), Part 2, Division 21 of the Food and Agricultural Code, or a marketing program issued pursuant to the Agricultural Producers Marketing Law, Chapter 2 (commencing with Section 59501), Part 2, Division 21 of the Food and Agricultural Code.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 8–23–83; effective thirtieth day thereafter (Register 83, No. 35).

Article 6.1. State Organic Program Appeal and Mediation Procedures

§ 1391. Appeal of Denial, Suspension or Revocation of Organic Certification.

- (a) A certification agent or the Secretary may propose denial, suspension or revocation of the organic certification of agricultural production and handling operations consistent with the provisions of Title 7, Code of Federal Regulations, Section 205.662.
- (b) An applicant for certification may appeal a certification agent's or Secretary's notice of denial of certification, and a certified operation may appeal a certification agent's or Secretary's notification of the proposed suspension or revocation, to the Secretary consistent with the provisions of Title 7, Code of Federal Regulations, Section 205.681.
- (c) Upon receipt of the appeal, the Secretary will evaluate the proposal of the certification agent or Secretary to deny, suspend or revoke a certification in order to determine if there is sufficient evidence to proceed to initiate formal administrative action to do so.
- (1) A decision by the Secretary to decline to initiate a formal administrative proceeding shall be deemed a granting of the appeal, and the Secretary shall communicate the decision in writing to the appellant and the certification agent.
- (2) A decision by the Secretary to proceed to initiate a formal administrative proceeding shall be deemed a denial of the appeal, and the service of the accusation shall be construed as the communication of the denial to the appellant and the certification agent.

Page 126 Register 2008, No. 4; 1-25-2008

- (d) Formal administrative proceedings shall be conducted in accordance with the provisions of Government Code, Section 11500 et seq. Note: Authority cited: Sections 407, 46000, 46001 and 46002, Food and Agricultural Code. Reference: Sections 401 and 46016.5, Food and Agricultural Code. HISTORY
- 1. New article 6.1 (sections 1391–1391.1) and section filed 9–10–2007; section operative upon approval by the Secretary of the U.S. Department of Agriculture (Register 2007, No. 37).
- Change without regulatory effect amending section, and attaching letter by the Secretary of the U.S. Department of Agriculture approving the State Organic Program appeal procedures effective 11–5–2007, filed 1–24–2008 pursuant to section 100, title 1, California Code of Regulations (Register 2008, No. 4).

§ 1391.1. Mediation of Denial, Suspension or Revocation of Organic Certification.

- (a) If a certification agent proposes the denial, suspension or revocation of the organic certification of an agricultural production or handling operation, pursuant to 1391(a), they may voluntarily participate in mediation prior to the filing of a formal administrative proceeding by the Secretary. If they enter into mediation after the filing of an appeal with the Secretary, but before the commencement of a formal administrative proceeding, pursuant to 1391(c), they shall inform the Secretary of their decision to do so. Upon the conclusion of a mediation session, they have 30 days to reach a settlement agreement. Mediation process must be consistent with Title 7, Code of Federal Regulations, Section 205.663.
- (1) Any settlement agreement shall be in compliance with the requirements of the State Organic Program.
- (2) The parties shall submit any proposed settlement agreement to the Secretary for review.
- (3) Upon receipt, the Secretary shall review proposed settlements for conformity with the requirements of the State Organic Program, and reject any agreement or provision that does not comply with the requirements of the Program. If the Secretary rejects a provision or provisions of the proposed settlement, the parties must affirmatively agree to accept the settlement in the form as approved by the Secretary.
- (b) The Secretary may establish a list of qualified mediators, but the certification agent and the certified operation or applicant for certification may voluntarily agree upon the choice of a mediator that is not on the list.
- (c) Compensation of the mediator, if other than the County Agricultural Commissioners or Secretary, and any other associated costs shall be the responsibility of the certification agent and the certified operation or applicant for certification. The mediator, the certification agent and the certified operation or applicant for certification shall enter into a written agreement regarding compensation and costs before the commencement

- of mediation. County Agricultural Commissioners may be reimbursed for expenses incurred in conducting mediation by the Secretary as agreed to within the organic program contract or memorandum of understanding.
- (d) Formal administrative proceedings shall be conducted in accordance with the provisions of Government Code, Section 11500 et seq. Note: Authority cited: Sections 407, 46000, 46001 and 46002, Food and Agricultural Code. Reference: Sections 401 and 46016.5, Food and Agricultural Code. HISTORY
- 1. New section filed 9–10–2007; section operative upon approval by the Secretary of the U.S. Department of Agriculture (Register 2007, No. 37).
- Change without regulatory effect amending section, and attaching letter by the Secretary of the U.S. Department of Agriculture approving the State Organic Program appeal procedures effective 11–5–2007, filed 1–24–2008 pursuant to section 100, title 1, California Code of Regulations (Register 2008, No. 4).

Article 6.5. Direct Marketing

§ 1392. Intent.

The intent of this article is to facilitate the sale of agricultural products from producers and certified producers within the state directly to consumers while maintaining sufficient regulatory control to ensure that the agricultural products are of acceptable quality and that the selling activities are conducted honestly and fairly.

NOTE: Authority cited: Sections 14, 407, 42682, 42684, 58101, 58101.5, 58102, 58103 and 58104, Food and Agricultural Code. Reference: Sections 42941, 58101, 58101.5, 58102, 58103, and 58104, Food and Agricultural Code.

HISTORY

- 1. New article 6.5 (sections 1392–1392.11) filed 3–31–77; effective thirtieth day thereafter (Register 77, No. 14).
- 2. Amendment filed 3–30–79; effective thirtieth day thereafter (Register 79, No. 13).
- Amendment of section filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).

§ 1392.1. Direct Marketing Authorized.

- (a) Notwithstanding other provisions of this Group, this article authorizes producers or certified producers of certified or noncertifiable agricultural products to sell their products, as defined in this article, directly to consumers, subject to the provisions of this article.
- (b) A certified producer may sell agricultural products, which he/she has produced, at a certified farmers' market.
- (c) A producer may only sell noncertifiable agricultural products which he/she has produced, at a certified farmers' market, or agricultural products which he/she has produced, at or near the point of production.

[The next page is 127.]

- (d) Fresh fruits, nuts, and vegetables may be sold directly to consumers exempt from size, standard pack, container, and labeling requirements only by:
- (1) The certified producer of the agricultural products at a stand at a certified farmers' market; or
- (2) The producer of the agricultural products at a retail stand located at or near the point of production.
- (e) All fresh fruits, nuts, and vegetables sold pursuant to this article shall comply with the regulations of the California Code of Regulations, title 3, subchapter 4, beginning with section 1359, governing maturity and quality.
- (f) Excluding fresh fruits, nuts, and vegetables, agricultural products, as defined in this article, which are sold or offered for sale at a certified farmers' market or at or near the point of production, must comply with all applicable laws and regulations pertaining to quality and labeling.
- (g) This article does not supersede the provisions of federal marketing orders, state marketing orders, state laws and regulations enforced by any state agency, or any other local health and safety laws, regulations, or ordinances.

NOTE: Authority cited: Sections 407, 42681, 42682, 42684, 47000, 47001 and 47003, Food and Agricultural Code. Reference: Sections 42941, 47002 and 47003, Food and Agricultural Code.

HISTORY

- 1. Amendment and numbering of undesignated introductory paragraph as subsection (a), repealer of remaining paragraphs with new subsections (b)–(c) and NOTE filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).
- Amendment of subsection (d) and Note filed 2-4-2002 as an emergency; operative 2-4-2002 (Register 2002, No. 6). A Certificate of Compliance must be transmitted to OAL by 6-4-2002 or emergency language will be repealed by operation of law on the following day.
- 3. Amendment of subsection (d) and NOTE refiled 7-3-2002 as an emergency; operative 7-3-2002 (Register 2002, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2002 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 7-3-2002 order transmitted to OAL 10-25-2002 and filed 12-2-2002 (Register 2002, No. 49).

§ 1392.2. Definitions.

Unless the context otherwise requires, the following definitions govern the construction of the language in this article.

- (a) Certified Farmers' Market. A location approved by the county agricultural commissioner of that county where agricultural products are sold by producers or certified producers directly to consumers. A certified farmers' market may be operated by one or more certified producers, by a nonprofit organization, or by a local government agency.
- (b) Certified Farmers' Market Certificate. A certificate issued by the county agricultural commissioner authorizing the location where agricultural products are sold by the producers directly to consumers. The certificate is valid only when bearing the original signatures of the county agricultural commissioner and the authorized representative of the certified farmers' market.
- (c) Land Which the Producer or Certified Producer Controls. Land that the producer or certified producer farms and owns, rents, leases, or sharecrops.
- (d) Producer. A person or separate entity that produces agricultural products by practice of the agricultural arts upon land which the person or separate entity controls. Producer may be, for the purposes of this article, a person, partnership, corporation or any other entity.
- (e) Certified Producer. A producer authorized by the county agricultural commissioner to sell certified agricultural products, produced by practice of the agricultural arts upon land which the certified producer controls, directly to consumers at a certified farmers' market.
- (f) Certified Producer's Certificate. A certificate issued by the county agricultural commissioner in the county of production authorizing the transportation and sale of certified agricultural products pursuant to this article
- (g) Consumer. A person who purchases and receives agricultural products at or near the point of production or at a certified farmers' mar-

ket. It excludes a person who purchases fresh fruits, nuts, and vegetables for commercial resale unless such products comply with all applicable size, standard pack, containers, and labeling requirements.

- (h) Direct Marketing. The sale:
- (1) At a certified farmers' market of agricultural products by a certified producer to a consumer: or
- (2) At a certified farmers' market of noncertifiable agricultural products by a producer to a consumer; or
- (3) At or near the point of production of agricultural products by a producer to a consumer.
- (i) Immediate Family. Parents, children, grandparents, or grandchildren of the certified producer or a family member regularly residing in the certified producer's household.
- (j) Employee. Any person employed by a certified producer at a regular salary or wage, on either a full or part time basis. It does not include any person who is reselling or whose compensation is primarily based on a commission of sales.

Notwithstanding the above, an employee of an agricultural cooperative organized under the laws of California may sell the agricultural products of one of its members in accordance with the provisions of this article

- (k) Agricultural Products. Agricultural products include all certified and noncertifiable agricultural products as defined in section 1392.2(1) and section 1392.2(m).
- (1) Certified Agricultural Products. Agricultural products, which are certified under the jurisdiction of the county agricultural commissioner relative to inspection and verification of compliance with the provisions of this article, include fresh fruits, nuts, vegetables, shell eggs, honey, flowers, and nursery stock.
 - (m) Noncertifiable Agricultural Products.

Noncertifiable agricultural products include all certified agricultural products that have been processed, those products other than certified agricultural products noted in (*l*) above from any tree, vine or plant and their flowers (including processed products), livestock (including rabbits) and livestock products, and fish and shellfish produced under controlled conditions in waters or ponds located in California.

- (n) Nonprofit Organization. An organization which qualifies for non-profit status for California income tax purposes.
- (o) Market Manager. A person or persons empowered to implement the rules, regulations, policies, and directives of the governing body of a certified farmers' market.
- (p) Market Rules. A set of written rules or regulations approved by each certified farmers' market. The rules and regulations may be more stringent than established state regulations, provided they do not violate or conflict with any state law or regulation governing their activities.
- (q) Notice and Hearing Process. A process initiated at the discretion of a county agricultural commissioner after alleged violation(s) of the provisions of this article has occurred.
- (r) Agricultural Production and Practice of the Agricultural Arts. To be involved in and make decisions regarding all phases of producing an agricultural product, which includes, but is not limited to, planting, growing, fertilizing, irrigating, cultivating, pest control, and harvesting.
- (s) Partnership. A partnership is a separate entity distinct from its individual members. As a separate entity, a partnership must obtain a certified producer's certificate to market, directly to consumers, its agricultural products, which shall be produced by practice of the agricultural arts upon land that the partnership, as a separate entity, exclusively controls.
- (t) Sprouts. Sprouts are germinated seeds, legumes and nuts such as, but not limited to, pumpkin seeds, peanuts, flax, soybeans and fenugreek. For the purpose of practicing the agricultural arts to sell sprouts at a certified farmers' market, a minimum of fifty percent of the seeds, legumes, or nuts, in any package or container offered or displayed for sale, must have sprouts that have emerged from the seed, legume or nut coat, husk, pericarp or other type of covering. No requirement for a minimum measurement of the sprout shall apply nor shall a minimum time of seed hydration be required.

NOTE: Authority cited: Sections 407, 42681, 42684, 47000, 47001, 47002, 47003 and 47004, Food and Agricultural Code. Reference: Sections 42941, 47000, 47001 and 47003, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (a) filed 3–30–79; effective thirtieth day thereafter (Register 79, No. 13).
- 2. Amendment of undesignated paragraph and subsection (a), amendment and renumbering of subsections (k) to (c), (b) to (d), (c) to (e), (i) to (f), (d) to (g), (e) to (h), (g) to (i), (f) to (j), (h) to (m) and (j) to (n), with new subsections (b), (k), (/), (o), (p) and (q) filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).
- 3. New subsection (r) and amendment of Note filed 12–9–99; operative 1–8–2000 (Register 99, No. 50).
- Amendment of subsections (d) and (f), new subsection (s) and amendment of NOTE filed 2-4-2002 as an emergency; operative 2-4-2002 (Register 2002, No. 6). A Certificate of Compliance must be transmitted to OAL by 6-4-2002 or emergency language will be repealed by operation of law on the following day.
- 5. Amendment of subsections (d) and (f), new subsection (s) and amendment of Note refiled 7-3-2002 as an emergency; operative 7-3-2002 (Register 2002, No. 27). A Certificate of Compliance must be transmitted to OAL by 10-31-2002 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 7–3–2002 order, including amendment of subsection (s), transmitted to OAL 10–25–2002 and filed 12–2–2002 (Register 2002, No. 49).
- 7. New subsection (t) and amendment of Note filed 5-9-2005; operative 6-8-2005 (Register 2005, No. 19).

§ 1392.3. Where Direct Marketing Permitted.

HISTORY

1. Repealer filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).

§ 1392.4. Conditions of Direct Marketing.

- (a) Except as provided in subsection (f) below, producers or certified producers may sell or offer to sell only agricultural products which they have produced to consumers at a certified farmers' market. The certified producer's immediate family or employee(s) may also act for and sell the certified producer's agricultural products. No certifiable agricultural products may be sold at a certified farmers' market unless such products are listed on the certified producer's certificate.
- (b) All agricultural products, when sold or offered for sale at a certified farmers' market or at or near the point of production, shall comply with all applicable requirements of Article 1 (beginning with Section 113700), 2, 3, 4, 5, 6, 7, 11, 13, and 15 of Chapter 4 (California Uniform Retail Food Facilities Law), Division 104, Part 7, of the California Health and Safety Code, and Chapters 1 (beginning with Section 109875), 2, 4, 5, and 8 (California Sherman Food, Drug, and Cosmetic Law), and Division 104, Part 5, of the California Health and Safety Code.
- (c) Only agricultural products may be sold or offered for sale at a certified farmers' market. The sale of nonagricultural products shall not be permitted in the area designated as a certified farmers' market.
- (d) The certified producer's embossed photocopy certificate shall accompany the certified agricultural products during transportation and shall be conspicuously posted at the point of sale.
- (e) When any agricultural products are sold by weight, the type of scale used shall be approved by the Department of Food and Agriculture, and shall be tested and sealed for use by the county sealer—director of weights and measures.
- (f) A certified farmers' market may allow, or prohibit, a certified producer or his/her immediate family member or employee to sell at that market certified agricultural products on behalf of a maximum of two other certified producers including, but not limited to, separate entities, such as partnerships, in which the certified producer has an interest as an individual member. If such a practice is allowed, the following provisions shall be met by the certified producer and shall be specified in the certified farmers' market's rules and regulations:
- (1) A certified producer shall not represent, nor be represented by more than two other certified producers in a 12-month period.
- (2) Each certified producer's certified agricultural products to be sold or offered for sale shall be separated and identifiable by each certified producer's valid certificate at the point of sale.

- (3) The name of the certified producer for whom another certified producer is selling shall appear on the certificate of the certified producer that is conducting sales at a certified farmer's market.
- (4) The name of the certified producer who is selling the products of another certified producer shall appear on the certificate of the person or entity for whom the certified producer is selling.
- (5) The certified producer selling for another certified producer shall be selling or offering for sale, at the same certified farmers' market on the same day, certified agricultural products which the certified producer conducting the sales has produced and which are in greater volume than the volume offered for sale for the other certified producer. For purposes of this section, the volume shall be measured by the weight or dollar value of the products at the time and point of sale. This volume requirement shall apply only at the beginning of each day of sale.
- (6) The producer applying for certification shall obtain and submit to the agricultural commissioner, prior to certification, written authority from said other certified producers to sell on their behalf.
- (7) Commission sales and buying and selling between certified producers is prohibited. Any payment made for the service of one certified producer selling for another certified producer shall not be related to the volume or value of the products sold.
- (8) The operator of a certified farmers' market may prohibit or otherwise establish rules regarding sales permitted under this subsection that are more restrictive, provided that such prohibition or restriction is contained in the market's written rules and regulations.
- (9) A certified producer who sells certified agricultural products on behalf of another certified producer or whose products are sold by another certified producer at a certified farmers' market shall keep for a period of not less than three years, the following records relating to such products:
- (i) Date of transfer to seller and accurate amount of products, by weight, dry measure, or count, transferred. Each separate product and amount shall be recorded according to variety.
- (ii) Date of sale and accurate amount of products, by weight, dry measure, or count, sold. Each separate product and amount shall be recorded according to variety.
 - (iii) Names of both certified producers involved.
- (10) A certified producer subject to this subdivision shall produce, for inspection, records required by this section upon demand of a representative of the department or county agricultural commissioner.
- (g) The provisions of this section, and any amendments thereof, shall apply to all new certified producer's certificates, including renewals, upon filing with the Secretary of State, unless another effective date has been designated by the Office of Administrative Law. Certified producer's certificates already issued shall conform to the requirements of this section, and any amendments, within twelve (12) months of the certificate issue date.
- (h) Any person selling organic products or representing products as organic at a certified farmers' market shall conspicuously post at the point of sale a photocopy of his or her current State of California organic registration and, if applicable, documentation of his or her organic certification. Prior to posting organic documents, it is permissible to conceal from public view acreage and dollar amounts pertaining to annual sales. A complete photocopy of the original, unaltered, current organic document(s) shall, upon the request of an enforcement officer, be made available for review at any time during participation in a certified farmers' market.
- (i) Any person selling organic products or representing products as organic on behalf of another certified producer at a certified farmers' market shall conspicuously post at the point of sale a photocopy of the represented certified producers' current State of California organic registration and, if applicable, documentation of the represented certified producers' organic certification. Prior to posting organic documents, it is permissible to conceal from public view acreage and dollar amounts pertaining to annual sales. A complete photocopy of the original, unaltered, current organic document(s) shall, upon the request of an enforce-

ment officer, be made available for review at any time during participation in a certified farmers' market.

(j) A certified producer shall not sell or represent sprouts as his or her own production resulting from practicing the agricultural arts if less than 50 percent of the seeds, legumes or nuts in any package or container have sprouts that have emerged from the seed, legume or nut coat, husk, pericarp or other type of covering.

NOTE: Authority cited: Sections 407, 42682, 47000, 47001, 47002, 47003, 47004 and 47005, Food and Agricultural Code. Reference: Sections 47000, 47002, 47003, 47004, 47005 and 47022, Food and Agricultural Code.

HISTORY

- Amendment of subsection (a) filed 3-30-79; effective thirtieth day thereafter (Register 79, No. 13).
- 2. Amendment of subsection (a) filed 4–4–79; effective thirtieth day thereafter (Register 79, No. 13).
- 3. Amendment of subsection (a) filed 2–3–82; effective thirtieth day thereafter (Register 82, No. 6).
- 4. Amendment of subsection (a), amendment and renumbering of subsections (b) to (e), (c) to (f), with new subsections (b), (c), (d) and (g) filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).
- 5. Amendment of subsections (g)–(g)(3) and amendment of NOTE filed 1–30–97; operative 3–1–97 (Register 97, No. 5).
- Amendment of subsections (a) and (g), new subsections (g)(1), (g)(3) and (g)(4), subsection renumbering, amendment of subsections (g)(7)–(10) and amendment of Note filed 12–9–99; operative 1–8–2000 (Register 99, No. 50).
- Amendment of section and Note filed 5–4–2001 as an emergency; operative 5–4–2001 (Register 2001, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–4–2001 or emergency language will be repealed by operation of law on the following day.
- 8. Reinstatement of section as it existed prior to 5–4–2001 emergency action by operation of Government Code section 11346.1(f) (Register 2001, No. 48).
- 9. Amendment of section and Note filed 11-28-2001; operative 12-28-2001 (Register 2001, No. 48).
- 10. Amendment of subsections (f) and (f)(3)–(5), new subsection (g) and amendment of Note filed 2–4–2002 as an emergency; operative 2–4–2002 (Register 2002, No. 6). A Certificate of Compliance must be transmitted to OAL by 6–4–2002 or emergency language will be repealed by operation of law on the following day.
- 11. Amendment of subsections (f) and (f)(3)–(5), new subsection (g) and amendment of Note refiled 7–3–2002 as an emergency; operative 7–3–2002 (Register 2002, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2002 or emergency language will be repealed by operation of law on the following day.
- 12. Certificate of Compliance as to 7–3–2002 order, including further amendment of subsections (f), (f)(3)–(5) and (f)(8)–(10), transmitted to OAL 10–25–2002 and filed 12–2–2002 (Register 2002, No. 49).
- 13. New subsections (h)–(j) and amendment of NOTE filed 5–9–2005; operative 6–8–2005 (Register 2005, No. 19).

§ 1392.5. Producer Certification Procedures.

- (a) A producer may become certified by applying to the agricultural commissioner of the county where the producer's farm is located. A producer who farms in more than one county must be certified in each county where he/she produces certifiable agricultural products for sale at a certified farmers' market.
- (b) The certificate and application shall be on a form authorized by the director and include an agreement signed by the applicant that the applicant will comply with the terms of this article.
- (c) Any producer shall provide, upon request by an enforcing officer or market manager, certificates, documentation, information, or any other identification that may be reasonably required to show that the conditions of this article are being met.
- (d) The county agricultural commissioner shall issue only one original certificate, which bears the signatures of the agricultural commissioner and the certified producer, and the name of each destination county where the certified producer will be selling. The original certificate shall be maintained in the issuing county agricultural commissioner's office.
- (e) The county agricultural commissioner shall issue an embossed photocopy of the original certificate to the certified producer, which will serve as the valid certified producer's certificate. Certified producers who intend to sell at more than one certified farmers' market must obtain

the necessary number of embossed photocopies of the original certificate to comply with the provisions of this article.

(f) The issuing county agricultural commissioner shall send a photocopy of the original certificate to each destination county listed on the certified producer's certificate.

NOTE: Authority cited: Sections 14, 407, 42681, 42682, 42684, 58101.5, 58102 and 58103, Food and Agricultural Code. Reference: Sections 42941, 58101, 58101.5, 58102, 58103 and 58104, Food and Agricultural Code.

HISTORY

 Amendment of heading, amendment and numbering of first three undesignated paragraphs as subsections (a)–(c), with repealer of remaining undesignated paragraphs, and new subsections (d)–(f) and NOTE filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).

§ 1392.6. Certification Requirements of a Certified Farmers' Market.

- (a) A county agricultural commissioner may issue a certified farmers' market certificate, which specifies a location where agricultural products may be sold or offered for sale. The certificate shall indicate that the marketplace is a certified farmers' market.
- (b) Application shall be made by the proposed operator(s) of a certified farmers' market and shall include a signed agreement by the operator(s) to comply with the terms of this article. The application and certificate shall be on a form authorized by the director.
- (c) The county agricultural commissioner shall not issue a certificate for a certified farmers' market when notified that a permit for the operation of such market has been denied by an agency of local government.
- (d) The governing body of a certified farmers' market operation for or by more than one certified producer shall promulgate a set of market rules and regulations which specify procedural criteria pertaining to:
 - (1) Admission of any producer to the market(s).
 - (2) Admission of any agricultural products to the market(s).
 - (3) Removal of any producer from the market(s).
- (4) Allowance of a certified producer selling on behalf of another certified producer as provided in Section 1392.4.
- (e) The governing body of a certified farmers' market has authority to establish specific rules and regulations for any market(s) under its control which regulate the:
 - (1) Type and number of producers and certified producers admitted.
 - (2) Type and number of certified and noncertifiable products admitted.
- (3) Methods of selling certified and noncertifiable agricultural products.
- (f) The certified farmers' market's rules and regulations shall contain a clause, which states that the governing body and its designated agents shall implement and enforce all rules and regulations pertaining to the operation of a certified farmers' market in a fair and equitable manner.
- (g) A current copy of the certified farmers' market's rules and regulations shall be sent to the Department of Food and Agriculture, Fruit and Vegetable Quality Control—Standardization, and to the agricultural commissioner of the county in which the certified farmers' market is located.

NOTE: Authority cited: Sections 14, 407, 42681, 42682, 42684, 47000, 47002 and 47003, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment of heading, repealer of undesignated 1st, 3rd and 4th paragraphs, amendment and numbering of undesignated second paragraph as subsections (b) and (c), and new subsections (a), (d)–(g) and NOTE filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).
- 2. New subsection (d)(4) and amendment of NOTE filed 1-30-97; operative 3-1-97 (Register 97, No. 5).

§ 1392.7. Certificates Issued.

(a) A county agricultural commissioner shall issue a certified producer's certificate upon review of application and determination that the applicant meets the requirements of a certified producer. When issuing the certified producer's certificate, the county agricultural commissioner should:

- (1) Consider seasonal production and varieties of the products when listing the products.
- (2) Insofar as practicable, include an on-site inspection of the land controlled by the producer.
- (b) A county agricultural commissioner shall issue a certified farmers' market certificate upon review of application and determination that the applicant meets the requirements to operate a certified farmers' market.
- (c) A certified producer's certificate shall be valid for not more than 12 months from the date of issue.
- (d) A certified farmers' market certificate shall be valid for 12 months from the date of issue.

NOTE: Authority cited: Sections 14, 407, 42681, 42682, 42684, 58101.5, 58102 and 58103, Food and Agricultural Code. Reference: Sections 42941, 58101, 58101.5, 58102, 58103 and 58104, Food and Agricultural Code.

HISTORY

Amendment of subsection (a), amendment and renumbering of subsection (b) to (c), and new subsections (b) and (d), and NOTE filed 7-26-91; operative 7-26-91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).

§ 1392.8. Fees.

The county agricultural commissioner may charge a fee for issuing, modifying, verifying, or renewing any certificate, including embossed photocopies, as set by the board of supervisors of that county.

NOTE: Authority cited: Sections 14, 407, 42681, 42682, 42684, 58101.5, 58102 and 58103, Food and Agricultural Code. Reference: Sections 42941, 58101, 58101.5, 58102, 58103 and 58104, Food and Agricultural Code.

HISTORY

1. Amendment of heading and section with new NOTE filed 7– 26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).

§ 1392.8.1. Certified Farmers' Market Fees.

- (1) Every operator of every certified farmers' market shall remit to the Department of Food and Agriculture sixty cents (\$0.60) for each certified producer represented by each certified producer's certificate and other agricultural producers participating in the market(s) on each market day for the entire quarter. The fee shall be submitted within 30 days after the end of each quarter with a form containing the following information:
 - (a) Name of market sponsor
 - (b) Market certificate number
 - (c) Name and address of the market
 - (d) Name of market contact person
 - (e) Market day(s) and hours of operation
- (f) Telephone number and fax number through which the market representative can be reached during normal work hours.
 - (g) Quarterly period for which the report is submitted.
- (h) Total number of certified producer certificates and other agricultural producers participating on each market day of the entire quarter.
 - (i) Amount of fees submitted.
 - (j) Signature of authorized market representative.
- (2) Any operator who fails to pay the required fee within thirty (30) days after the end of the quarter in which it is due shall pay interest at the rate of one and one half (1 1/2) percent per month on the entire unpaid balance including any late penalty fees that may apply, until payment is received in full.
- (3) In addition to monthly interest charges referenced in Section 1392.8.1(2), any operator who fails to pay the required fee within sixty (60) days after the end of the quarter in which it is due shall pay a late penalty fee of one hundred dollars (\$100), and for every thirty (30) days thereafter, until payment is received in full or the certificate expires.

NOTE: Authority cited: Sections 407, 47000, 47001, 47003, 47011 and 47021, Food and Agricultural Code. Reference: Sections 47002, 47003, 47004, 47011 and 47021, Food and Agricultural Code.

HISTORY

 New section filed 12–30–99 as an emergency; operative 1–1–2000 (Register 99, No. 53). A Certificate of Compliance must be transmitted to OAL by 5–1–2000 or emergency language will be repealed by operation of law on the following day.

- Certificate of Compliance as to 12–30–99 order transmitted to OAL 4–19–2000 and filed 5–17–2000 (Register 2000, No. 20).
- 3. Amendment of subsection (2), new subsection (3) and amendment of Note filed 3–7–2005; operative 4–6–2005 (Register 2005, No. 10).

§ 1392.9. Direct Marketing, Compliance Requirements for the Operator of a Certified Farmers' Market.

- (a) The operator of a certified farmers' market shall ensure that each person participating in the sale of agricultural products in the area designated as a certified farmers' market:
- (1) Is a producer, certified producer, or their immediate family member or employee.
 - (2) Sells only certified and noncertifiable agricultural products.
- (3) Has in their possession, in the case of certifiable agricultural products, a valid certificate that is posted at the point of sale.
- (4) Has each certifiable agricultural product in their possession listed on the certified producer's certificate.
- (5) Who sells noncertifiable agricultural products sells only those products which were produced in accordance with the certified farmers' market's rules and regulations.
- (6) Who represents another certified producer under an additional certificate, separates and identifies the items listed on each respective certificate, and that the name of the certified producer they are selling for appears on both of the certificates.
- (b) The operator of a certified farmers' market shall obtain from each person participating in the sale of agricultural products in the area designated as a certified farmers' market an itemized list of all products sold at the certified farmers' market each market day.
- (1) The product list shall state the name of the certified producer, the identity of each product sold as it appears on the certified producer's certificate, and the quantity of each product sold at the market.
- (2) The market operator shall keep the list of products sold for a period of not less than eighteen months.
- (c) No person shall operate a certified farmers' market unless he or she has in his or her possession a current, valid certified farmers' market certificate issued by the county agricultural commissioner for that market.
- (d) The operator of a certified farmers' market shall, upon the request of an enforcement officer, provide for review his or her current, valid certified farmers' market certificate at any time during the operation of a certified farmers' market.

NOTE: Authority cited: Sections 407, 47000, 47002, 47003, 47004 and 47005, Food and Agricultural Code. Reference: Sections 47000, 47002, 47003, 47004, 47005 and 47022, Food and Agricultural Code.

HISTORY

- 1. New section filed 12–9–99; operative 1–8–2000 (Register 99, No. 50). For prior history, see Register 91, No. 47.
- 2. New subsections (c) and (d) and amendment of Note filed 5-9-2005; operative 6-8-2005 (Register 2005, No. 19).

§ 1392.9.1. Direct Marketing. Requirements for Partnerships, Sharecropping Agreements, and Similar Contractual Agreements.

- (a) Every person or entity that enters into a partnership as defined in Section 1392.2(s), sharecropping, or similar contractual agreement with another person(s) or entity and that applies for a certified producer's certificate under such agreement shall provide the issuing agricultural commissioner, at the time of application, with proof of partnership as defined in the United States and California Tax Codes, or the Partnership's Federal Tax Identification Number and a copy of their current written agreement which shall contain the following:
- (1) A clear, concise and accurate description of the property to be farmed. The description shall include the present use of the property, the dimensions, and the location of the property; and
- (2) Partners shall demonstrate equitable risk by submitting a description of each party's financial and material resource input, which shall include the degree of involvement each party has in agricultural production; and
- (3) The date of the agreement and the signatures of all parties involved; and

- (4) A guarantee of the signatures on the agreement by a notary public executed at the time of signing by all parties. The notarized signatures on the agreement of all parties executing the agreement.
- (5) A statement of verification that the property or properties to be farmed by the partnership or producers cooperating under a similar contractual agreement are under the exclusive control of the partnership as a separate entity from its individual members.
- (b) Notwithstanding the above, an enforcing officer representing the Department or agricultural commissioner may request such additional documentation as is reasonably necessary to show that the conditions of this article are being met.
- (c) To qualify for a certified producer's certificate, all parties listed on the certificate shall:
- (1) Have entered into the agreement prior to planting of annual and biannual crops; and
- (2) Have entered into the agreement prior to or within 30 days after preparing perennial field crops for the subsequent cropping pattern (e.g., prior to the fern stage of asparagus or prior to cut back of artichokes); and
- (3) Have entered into the agreement prior to bloom of tree and vine crops; and
- (4) Be engaged in agricultural production upon the land which is the subject of the agreement.
- (d) Any change in the terms of this agreement shall invalidate a certified producer's certificate issued under such terms. Any such change shall be reported immediately and all embossed copies of certificates issued to the partnership shall be surrendered to the issuing agricultural commissioner.

NOTE: Authority cited: Sections 407, 42682, 47000, 47001, 47002, 47003 and 47004, Food and Agricultural Code. Reference: Sections 42941, 47000, 47001 and 47003, Food and Agricultural Code.

HISTORY

- 1. New section filed 12-9-99; operative 1-8-2000 (Register 99, No. 50).
- 2. Amendment of subsection (a), new subsection (a)(5) and amendment of Note filed 2-4-2002 as an emergency; operative 2-4-2002 (Register 2002, No. 6). A Certificate of Compliance must be transmitted to OAL by 6-4-2002 or emergency language will be repealed by operation of law on the following day.
- Amendment of subsection (a), new subsection (a)(5) and amendment of Note refiled 7–3–2002 as an emergency; operative 7–3–2002 (Register 2002, No. 27). A Certificate of Compliance must be transmitted to OAL by 10–31–2002 or emergency language will be repealed by operation of law on the following day.
- 4. Editorial correction of History 3 (Register 2002, No. 49).
- 5. Certificate of Compliance as to 7–3–2002 order, including further amendment of subsections (a)(1) and (a)(5), transmitted to OAL 10–25–2002 and filed 12–2–2002 (Register 2002, No. 49).

§ 1392.9.2. Direct Marketing. Requirements for Farm Leases.

- (a) Every person or entity who enters into a farm lease with another person(s) or entity and who applies for a certified producer's certificate under such agreement shall provide the issuing agricultural commissioner, at the time of application, with a copy of the current written lease agreement which shall contain the following:
- (1) A clear and concise accurate description of the leased property. The description shall include the present use of the property, the dimensions of the leased property and the location; and
 - (2) The purchase price (cost) of the lease; and
- (3) The date of the agreement and the signatures of all parties involved; and
- (4) A guarantee of the signatures on the agreement by a notary public executed at the time of signing by all parties. The notarized signatures on the agreement of all executing the agreement.
- (b) Notwithstanding the above, an enforcing officer representing the Department or agricultural commissioner may request such additional documentation as is reasonably necessary to show that the conditions of this article are being met.
- (c) To qualify for a certified producer's certificate, the person applying for the certificate shall:

- (1) Assume all financial risks associated with producing agricultural products; and
- (2) Enter into the agreement prior to planting of annual and biannual crops; and
- (3) Enter into the agreement prior to or within 30 days after preparing perennial field crops for the subsequent cropping pattern (e.g., prior to the fern stage of asparagus or price to cut back of artichokes), and
 - (4) Enter into the agreement prior to bloom of tree and vine crops, and
- (5) Perform agricultural production upon the land which is the subject of the agreement.
- (d) Any change in the terms of this agreement shall invalidate a certified producer's certificate issued under such terms. Any such change shall be reported immediately and all embossed copies of certificates issued to the partnership shall be surrendered to the issuing agricultural commissioner.

NOTE: Authority cited: Sections 407, 42682, 47000, 47002, 47003 and 47004, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 12-9-99; operative 1-8-2000 (Register 99, No. 50).

§ 1392.10. Penalties.

- (a) Any county agricultural commissioner may, at any time, initiate a notice and hearing process to determine whether a violation of these provisions has occurred. The hearing process may review the actions of:
 - (1) The certificate holder; or
- (2) A family member, employee, or another certified producer acting on behalf of the certificate holder; or
 - (3) Any other person whose actions may have resulted in the violation.
- (b) The notice of hearing shall be on a form approved by the director and contain:
 - (1) Specific provisions violated; and
 - (2) A warning to cease such violations; and
- (3) A hearing date to determine if the certificate(s) involved in the violations or participation privileges should be revoked.
- (c) The county agricultural commissioner, upon determination that a violation has been made in accordance with (a), above, may:
- (1) Suspend and/or refuse, for a period of up to 18 months, to issue a certificate to the violator; and/or
- (2) Suspend, for a period of up to 18 months, the privilege of participation, under the provisions of this article, of any person whose action resulted in the violation.

NOTE: Authority cited: Sections 14, 407, 42681, 42682, 42684, 58101.5, 58102 and 58103, Food and Agricultural Code. Reference: Sections 42941, 58101, 58101.5, 58102, 58103 and 58104, Food and Agricultural Code.

HISTORY

1. Repealer with new subsections (a)–(c) and NOTE filed 7– 26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).

§ 1392.11. Appeals.

Any person may appeal to the director for a hearing if aggrieved by any one of the following actions or decisions:

- (a) Denial of any certificate.
- (b) Suspension of any certificate.
- (c) Suspension of participation privileges.
- (d) Adoption of more stringent rules or regulations pertaining to the operation of certified farmers' markets.

In all cases, the appeal must be submitted to the director in writing within 30 days of the date the action or decision was made. The director's proceeding shall, insofar as practicable, comply with the provisions of the Administrative Procedure Act (Government Code, Section 11500, et seq.), except that a department hearing officer may be used.

NOTE: Authority cited: Sections 14, 407, 42681, 42682, 42684, 58101.5 and 58104, Food and Agricultural Code. Reference: Sections 42941, 58101, 58101.5, 58102, 58103 and 58104, Food and Agricultural Code.

HISTORY

1. Repealer with new undesignated introductory paragraph, subsections (a)–(d), and undesignated final paragraph and NOTE filed 7–26–91; operative 7–26–91 pursuant to Government Code section 11346.2(d) (Register 91, No. 47).

§ 1392.12. Emergency Declaration.

- (a) The director may, on an as needed, case by case basis, waive or modify specific restrictions within this Article on the direct marketing of agricultural products, including, but not limited to, restrictions or limitations on production acreage and commodities, as well as certification requirements, if a declared plant, pest or animal quarantine, or a declared state of emergency, as defined by Government Code Section 8558, interferes with the normal operative effect of the rules.
- (b) Any waivers or modifications shall be consistent with any quarantine, and the response to any declared state of emergency as defined by Government Code Section 8558.
- (c) Prior to the utilization of any waivers or modifications, certified producers and certified farmers' markets shall enter into compliance agreements with California Department of Agriculture through the county agricultural commissioner in the county in which their certificates have been issued.

NOTE: Authority cited: Sections 407, 47000, 47001, 47002, 47003, 47004, 47005, 47005.1 and 47020, Food and Agricultural Code. Reference: Sections 47000, 47001, 47002, 47003, 47022, 47022.3 and 47022.6, Food and Agricultural Code. HISTORY

- New section filed 12–24–2002 as an emergency; operative 12–24–2002 (Register 2002, No. 52). A Certificate of Compliance must be transmitted to OAL by 4–23–2003 or emergency language will be repealed by operation of law on the following day.
- 2. Certificate of Compliance as to 12-24-2002 order, including amendment of subsections (a) and (b), transmitted to OAL 4-15-2003 and filed 5-28-2003 (Register 2003, No. 22).

Article 7. Apples

§ 1400. Apples, Standards.

NOTE: Authority cited: Sections 407, 42682, and 42684, Food and Agricultural Code. Reference: Sections 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Editorial correction (Register 81, No. 34).
- 4. Repealer filed 2-22-85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.1. Apples, Exceptions for By-Product Use.

NOTE: Authority cited: Sections 407, 42682, and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Repealer filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.2. Apples, Permit By-Product Use.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Editorial correction (Register 81, No. 34).
- 4. Repealer filed 2-22-85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.3. Apples, Exceptions.

Except for maturity, grade, and labeling requirements, Lady and crab apples are exempt from the requirements of this article.

NOTE: Authority cited: Sections 407, 42682, and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

History

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer and new section filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).

3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8)

§ 1400.4. Apples, Properly Matured Defined.

"Properly matured" means that the apple, at the time it was taken from the tree, had reached that stage of minimum maturity, based upon the known and defined factors of maturity, which ensures palatability and proper completion of the ripening process.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

Renumbering and amendment of Section 1400.14 to Section 1400.4 and renumbering and amendment of former Section 1400.4 to Section 1400.5 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23). For history of former Section 1400.4, see Register 75, No. 4.

§ 1400.5. Apples, Minimum Maturity Standards.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.4 to Section 1400.5 and renumbering and amendment of former Section 1400.5 to Section 1400.11 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Repealer filed 2-22-85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.6. Apples, Maturity Exemptions.

The maturity provisions of this article do not apply to apples that are shipped into this state from outside of the state. Such apples shall, however, be properly matured as required in Section 1400.4 of this article or shall be accompanied by an official certificate that states such apples, at the time of harvest, met the maturity requirements of the state of origin. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of Section 1400.6 and renumbering and amendment of Section 1400.7 to Section 1400.6 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.7. Apples, Overripe Defined.

"Overripe" means that the apple has attained that degree of maturity where the condition of the flesh is very mealy or soft, having passed the last stages of firmness for commercial use.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Renumbering and amendment of Section 1400.18 to Section 1400.7 and renumbering and amendment of former Section 1400.7 to Section 1400.6 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23). For history of former Section 1400.7, see Register 75, No. 4.

§ 1400.8. Apples, Maturity Standards for Gravensteins.

Gravenstein apples shall be considered properly matured when a composite sample of the juice taken from the representative portion of each of 10 representative apples in any lot, tests not less than 10.5 percent soluble solids as shown by a standard hand refractometer instrument.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of Section 1400.8 and renumbering and amendment of Section 1400.16 to Section 1400.8 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23). For history of former Section 1400.16, see Registers 75, No. 4, and 71, No. 2.

§ 1400.9. Apples, Maturity Standards for Designated Varieties.

(a) Standard Tests. The commissioner shall consider apples properly matured if each variety listed in Column A at least complies with the standard maturity tests specified in Column B or the alternative sliding scale

application of these tests as provided in subsection (b) below:

Column A	Column B	
	Soluble	
Apple Variety	Solids	Pressure
Red Delicious	11%	18 lbs. ¹
Golden Delicious	12%	18 lbs ^{.2}
Jonathan	12%	19 lbs.
Rome	12.5%	21 lbs. ³
Newtown Pippin	11%	23 lbs.
McIntosh	11.5%	19 lbs.

- No pressure test required. However, any decrease in pressure below 18 lbs. may be applied as provided in subsection (b) "Sliding Scale Test." Above the elevation of 1,900 feet in El Dorado County, any decrease in pressure below 19 lbs. may be applied.
- 20 lbs. for San Joaquin Valley area of Kern County; 19 lbs. above the elevation of 1,900 feet in El Dorado County.
- 3. 23 lbs. for San Bernardino County GTP the Tehachapi–Cummings Valley area of Kern County, and above the elevation of 1,900 feet in El Dorado County.
- (b) Sliding Scale Test. The soluble solids test and the pressure test may be applied on the basis that a 1/2 percent increase of soluble solids will compensate for a one–pound increase in pressure test, or a one–pound decrease in pressure will compensate for 1/2 percent decrease in soluble solids, or other amounts of change that are proportional to this rate of change.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of Section 1400.9 and renumbering and amendment of Section 1400.17 to Section 1400.9 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23). For history of former Section 1400.17, see Registers 78, No. 34; 76, No. 47; 76, No. 32; and 75, No. 4.

§ 1400.9.1. Apples, Granny Smith Maturity, Sampling and Testing Procedures.

- (a) Granny Smith apples shall be considered mature when attaining a numerical value of 2.5 on the starch scale entitled "Granny Smith Apple Starch Scale," F. G. Mitchell and G. Mayer, Pomology Department, University of California, Davis, CA 95616, 7/88.
- (b) The numerical value on the starch scale shall be determined by use of a standard iodine–potassium iodide (iodine) solution with a normality of 0.057. The iodine solution strength may be checked by use of a standard solium thiosulfate solution with a normality of 0.057. Transfer 50 milliliters of thiosulfate solution to a flask and add to it 50 milliliters of iodine solution. The end point is reached when the combined solution turns blue.
- (c) The numerical value specified in (a), above, shall be based on the mathematical average of 30 sample apples. Each apple shall be cut in half horizontally to a center line between the stem and blossom ends. The stemmed half shall be used for testing; however, when an error is made in the testing of such half, the matching blossom end half shall be tested and the results shall be included in any official test. In a shallow dish or pan, place an amount of iodine sufficient to completely submerse the cut surface of the apple half or halves to be tested. An apple half shall remain in the solution for approximately 30 seconds then transferred to a distilled water rinse for approximately 10 seconds. Approximately one minute after removal from the rinse, the extent of color development shall be determined and a numerical value assigned the apple half in accordance with the starch scale.

NOTE: Authority cited: Section 14, 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 5-8-92; operative 6-8-92 (Register 92, No. 19).

§ 1400.10. Apples, Maturity: Release Dates Established by Commissioners.

Dates of maturity may be established prior to the harvesting season by the commissioners for areas, counties, or districts within counties. The commissioner may take into consideration location, climatic conditions, or other factors that are known to produce apples that vary as to the time they reach maturity. Testing shall be based on representative orchards in each area, county, or district. The maturity dates shall be set when such tests generally indicate that the apples are, or will be, properly matured. These dates of maturity shall be announced by the commissioner. The commissioner shall prepare records, based on the factors of maturity that are used each year.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Amendment filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.10.1. Apples, Certification Prior to Release Date.

The county agricultural commissioner may, upon request, sample apples intended for shipment prior to the release date. If the fruits meet minimum maturity requirements and all other provisions of this article, they may be certified by placing an official stamp on each container. The county involved may, pursuant to Section 42793 of the Food and Agricultural Code, establish a fee for such certification.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Sections 42941 and 42793, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 2. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.11. Apples, Maturity Testing Prior to and After Maturity Release Dates.

Where the commissioner establishes a harvest release date for any variety of apple, such variety shall not be subject to maturity testing after the established release date. Apples harvested prior to the release date shall be subject to testing at any time after harvest or shipment unless they have been certified by the commissioner as complying with the standards established by this article.

NOTE: Authority cited: Sections 14, 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of section 1400.11 and renumbering and amendment of section 1400.5 to section 1400.11 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23)
- Editorial correction (Register 81, No. 34).
- 4. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8)
- 5. Amendment filed 5-8-92; operative 6-8-92 (Register 92, No. 19).

§ 1400.12. Apples, Mature While Transported to Another County.

Notwithstanding the provisions of Article 6 (commencing with Section 1390) of this Group, apples which are being transported to another county or district within a county for grading or packing shall be properly matured before such movement. A disposal order may be issued for mature apples which are being transported from one county to another county.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.13. Apples, Standard Grades.

Apples shall be packed to comply with one of the following grades: Extra Fancy, Fancy, "C" grade, or a combination grade of Extra Fancy and Fancy. When apples are in combination grade, at least 50 percent, by count, shall conform to the Extra Fancy grade. However, notwithstanding any provision of this article, all varieties of Gravenstein apples intended for sale within the North American continent shall at least comply with the Fancy grade.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- 2. Repealer of Section 1400.13 and renumbering and amendment of Section 1400.20 to Section 1400.13 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2-22-85; effective thirtieth day thereafter (Register 85, No.

§ 1400.14. Apples, Extra Fancy Grade.

The Extra Fancy grade consists of properly matured but not overripe apples of one variety which are hand picked, clean, well colored as defined in Section 1400.19, and fairly well formed. These apples shall be free from decay, visible bitter pit, Jonathan spot, scald (including storage and soft scald), internal breakdown, visible watercore, bruises except those that are necessarily caused in proper sorting or packing, broken skin except those that are well healed and slight or unhealed according to Section 1400.25, insect pests, limb rub, spray burn, sunburn, sunscald, russeting except within the basin of the stem, hail mark, frost injury, internal browning, apple scab, insect stings, and other diseases or defects. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- 2. Renumbering and amendment of Section 1400.26 to Section 1400.14 and renumbering and amendment of former Section 1400.14 to Section 1400.4 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Editorial correction (Register 81, No. 34)
- 4. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No.

§ 1400.15. Apples, Fancy Grade.

The Fancy grade consists of properly matured but not overripe apples of one variety which are hand picked, clean, fairly well colored, and fairly well formed. These apples shall be free from decay, visible bitter pit, Jonathan spot, soft scald, internal breakdown, visible watercore, and insect pests (except San Jose and similar scales). In addition, these apples shall be free from appreciable damage from limb rub, spray burn, bruises (except such bruises as are necessarily caused in proper sorting or packing), sunscald, sunburn, russeting, hail mark, frost injury, internal browning, scald (including storage scald), apple scab, flyspeck fungus, stem or calyx cracks, broken skin, insect pests, and other diseases or defects.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. Originally filed as Section 1400 on 4-26-46 (Register 3).
- 2. Renumbered from Section 1400, filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 3. Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2)
- 4. Amendment and renumbering from Section 1392 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Repealer of Section 1400.15 and renumbering and amendment of Section 1400.27 to Section 1400.15 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 6. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.16. Apples, Appreciable Damage Defined.

As used in this article, "appreciable damage" means any injury or defect which appreciably affects the appearance or quality of the apple. The following defects are considered appreciable damage:

- (a) Limb rubs that are soft or exceed an aggregate area of 3/4 inch in diameter.
- (b) Sunscald, sunburn, and spray burn if the normal color of the skin is more than slightly changed, the skin is blistered or cracked, and the flesh contains more than a trace of discoloration.
- (c) Russeting that is excessively rough or barklike which exceeds an aggregate area of 3/4 inch in diameter.
- (1) Russeting that is not excessively rough, but appears on more than 15 percent of the surface of any apple in the aggregate, is also considered

- appreciable damage. However, for Pippin and Greening varieties russeting must appear on more than 25 percent of the surface in the aggregate.
- (2) Russeting in the stem cavity that cannot be seen when the apple is placed stem end down on a flat surface, and viewed from the side at eye level, is not appreciable damage.
- (d) Hail marks when exceeding two such marks, provided injury is more than superficial and the skin has been broken.
- (1) "More than superficial" is defined as injury when corky tissue beneath the mark extends more than 1/16 inch into the apple flesh.
- (2) Also, blemished areas or spots that are 1/8 inch or more in diameter and more than 1/16 inch in depth (excluding any corky condition beneath the affected area) shall be considered appreciable damage.
- (e) Frost injury that is more than skin deep and affects an aggregate area that exceeds 1/2 inch in diameter.
- (f) Internal browning that shows more than a trace of discoloration in
- (g) Scab spots on any apple that in the aggregate exceed 1/4 inch in di-
 - (h) More than slight flyspeck fungus.
- (i) Two casebearer, codling moth, or aphid stings which are not well healed or exceed 1/8 inch in diameter exclusive of any encircling ring.
- (j) Stinkbug injury that exceeds an aggregate area of 3/4 inch in diameter on an individual apple.
- (k) San Jose and similar scales or marks when the number occurring on a green or yellow surface exceeds three, or when the number occurring on a red surface exceeds five.
- (1) Stem or calyx cracks that are not well healed and exceed 1/4 inch in aggregate length.
- (m) Scald (including storage scald) that has begun to affect the flesh, or that is a solid brown (not tan) with a definite outline around the circumference of the damaged area. The defect must cover more than an aggregate area of 3/4 inch in diameter.
- (n) Broken skin that is well healed but exceeds 1/4 inch in aggregate length. Broken skin that is unhealed according to Section 1400.25.
- (o) Other diseases or defects that cause a waste of more than 5 percent of the surface area of the fruit.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941. Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1392.1 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4). For history of former section, see Register 71, No. 2.
- 2. Renumbering and amendment of Section 1400.28 to Section 1400.16 and renumbering and amendment of former Section 1400.16 to Section 1400.8 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- Editorial correction (Register 81, No. 34).
 Amendment filed 2-22-85; effective thirtieth day thereafter (Register 85, No.

§ 1400.17. Apples, "C" Grade.

The "C" grade consists of properly matured but not overripe apples of one variety which are hand picked, virtually clean, and free from decay, soft scald, internal breakdown, visible watercore, and insect pests (except San Jose and similar scales). These apples shall be free from serious damage due to visible bitter pit, Jonathan spot, sunscald, sunspots, sunburn, spray burn, hail marks, frost injury, internal browning, bruises (except such bruises as are necessarily caused in proper sorting or packing), apple scab, insect pests, stem or calyx cracks, broken skin, scald (including storage scald), Jonathan freckle, and other diseases or defects.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 8-6-76; effective thirtieth day thereafter (Register 76, No. 32). For prior history, see Register 75, No. 4.
- 2. Editorial correction of subsection (a) (Register 76, No. 47)
- 3. Amendment of subsection (a) filed 8-25-78; effective thirtieth day thereafter (Register 78, No. 34).
- Renumbering and amendment of Section 1400.29 to Section 1400.17 and renumbering and amendment of former Section 1400.17 to Section 1400.9 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 5. Editorial correction (Register 81, No. 34).

 Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.18. Apples, Serious Damage Defined.

As used in this article, "serious damage" means any injury or defect that seriously detracts from the appearance or quality of the apple. The following defects are considered serious damage:

- (a) Jonathan spot or visible bitter pit in any extent is considered serious damage. However, the defects are serious on Newtown Pippin or Bellefleur varieties only when more than 25 percent, by count, of apples in any container or bulk lot are affected by more than three spots each.
- (b) Sunscald, sunburn, sunspots, and spray burn, if there is blistering or cracking of the skin, or the flesh is seriously discolored or injured.
- (c) Hail marks or frost injury, when defects, singly or in combination, affect an aggregate area of more than one-tenth of the apple surface or seriously deform or disfigure the fruit.
- (d) Internal browning that can be detected by external examination or pressure.
- (e) Scab spots on any apple that in the aggregate exceed 1/2 inch in diameter.
- (f) More than five well healed casebearer, codling moth, or aphid stings on an apple, any of which exceeds 1/8 inch in diameter excluding any encircling ring.
- (g) Stinkbug injury that exceeds an aggregate area of 1 1/2 inches in diameter on an individual apple.
- (h) Jonathan freckle on any apple that in the aggregate exceeds 1/2 inch in diameter.

- (i) San Jose and similar scales or marks scattered over more than 10 percent of the surface.
- (j) Scald (including storage scald) that has begun to affect the flesh, or that is a solid brown (not tan) with a definite outline around the circumference of the damaged area. The defect must cover an aggregate area of more than 1 inch in diameter.
- (k) Broken skin that is well healed but exceeds 1/2 inch in aggregate length. Broken skin that is unhealed according to Section 1400.25.
- (1) Other diseases or defects that cause a waste of more than 10 percent of the surface area of the fruit.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1390 and 1390.1 filed 1-9-68; effective thirtieth day thereafter (Register 68, No. 2).
- 2. Renumbering from Section 1390 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1400.30 to Section 1400.18 and renumbering and amendment of former Section 1400.18 to Section 1400.7 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 4. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.19. Apples, Color Requirements for California Extra Fancy and Fancy Grades.

Apples of Extra Fancy and Fancy grades shall have the percentage of color specified for the variety in Table 1 appearing in this section. For the solid red or striped red varieties, the percentage stated refers to the area of the surface which must be covered with a good shade of solid red or

[The next page is 131.]

striped red characteristic of the variety. However, a lighter shade of solid red or striped red may be acceptable for the variety and grade, provided a larger percentage of the surface area is covered by the lighter shade. Sufficient additional area must be covered so that the apple has as good an appearance as one with the minimum percentage of good red characteristic of the variety and required for the grade. For the striped red varieties, the percentage stated refers to the area of the surface in which the stripes of a good shade of red characteristic of the variety shall predominate over stripes of lighter red, green, or yellow. Faded brown stripes shall not be considered as color except in the case of the Gray Baldwin variety.

TABLE I—COLOR REQUIREMENTS FOR APPLES BY VARIETIES

	Extra	
	Fancy	Fancy
Variety	(Percent)	(Percent)
Solid red:	,	,

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–9–68; effective thirtieth day thereafter (Register 68, No. 2).
- 3. Renumbering from Section 1391 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Amendment filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 5. Editorial correction (Register 81, No. 34).
- Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.20. Apples, Hand Picked Defined.

"Hand picked" means that the apples do not show evidence of having been on the ground.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

2. Renumbering and amendment of Section 1400.35 to Section 1400.20 and renumbering and amendment of former Section 1400.20 to Section 1400.13 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.21. Apples, Fairly Well Formed Defined.

"Fairly well formed" means that the apple may be slightly abnormal in shape. Models to be used as guides are available at the Sacramento office, Fruit and Vegetable Quality Control—Standardization.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of Section 1400.21 and renumbering and amendment of Section 1400.43 to Section 1400.21 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.22. Apples, Bruises.

Bruising shall be considered beyond that necessarily caused in proper sorting or packing when an individual bruise affects an area greater than 1 inch in diameter, or the aggregate area of all bruises is greater than 2 inches in diameter, or the depth of any bruise at any point exceeds 1/4 inch

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbers and amends Section 1400.40 to Section 1400.22 and renumbers and amends former Section 1400.22 to Section 1400.27 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8)

§ 1400.23. Apples, Insect Pests.

"Insect pests" include San Jose scale, codling moth, and other insects or their larvae, nymphs, or pupae. This includes evidence of previous infestations by insect pests, with the exception of superficial, well healed insect pest stings.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–9–68; effective thirtieth day thereafter (Register 68, No. 2).
- 3. Amendment and renumbering filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer of Section 1400.23 and renumbering and amendment of Section 1400.36 to Section 1400.23 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 5. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.24. Apples, Healed Stings.

Insect stings are generally considered "well healed" when an encircling discolored ring is present. Well healed stings may have an opening through the brownish seal that covers the wound.

Apples with questionable stings may be cut to determine the extent and nature of damage. If it is found that affected tissues are corky and show no decay, the sting shall be considered well healed. However, if affected tissues beneath the sting show soft breakdown or decay, then the sting shall be considered unhealed.

Very recent stings which do not show a ring or corky tissue are not considered well healed. They should be scored against grade. Also, all healed or unhealed stings over 1/8 inch in diameter should be scored against grade.

⁸ None.

⁹ Characteristic ground color.

^{10 75} percent or more of the surface of the apple shall show white or light green predominating over the green color.

- 2. Amendment filed 7–10–75; effective thirtieth day thereafter (Register 75, No. 28).
- 3. Repealer of Section 1400.24 and renumbering and amendment of Section 1400.32 to Section 1400.24 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 4. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.25. Apples, Broken Skin.

"Broken skin" includes all stem punctures and all cracks on the stem or calyx end of the apple. Unhealed broken skin is considered a defect in all grades when:

- (a) The break exceeds 1/8 inch in diameter, or
- (b) The break exceeds 1/8 inch in depth, or
- (c) Individual breaks aggregate more than 3/16 inch in diameter.

Damage from well healed broken skin is considered "slight" in the Extra Fancy grade when it is incidental to proper sorting or packing.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of Section 1400.25 and renumbering and amendment of Section 1400.37 to Section 1400.25 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.26. Apples, Hail Marks.

Blemished areas which cannot be definitely identified as having been caused by hail, including fairly smooth russeted areas which show no depression, shall not be considered hail damage for any grade.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Renumbering and amendment of Section 1400.38 to Section 1400.26 and renumbering and amendment of former Section 1400.26 to Section 1400.14 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.27. Apples, Minimum Size Requirement.

Apples of a standard grade or combination of grades shall be of such size that their widest cross section will not pass through a ring 2 1/4 inches in diameter. This requirement does not apply to well packed apples (including tray pack, cell pack, or comparable packs), or to loose "C" grade apples.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.22 to Section 1400.27 and renumbering and amendment of former Section 1400.27 to Section 1400.15 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Editorial correction (Register 81, No. 34).

§ 1400.28. Apples, Uniform in Size Defined.

"Uniform in size" means:

- (a) Apples in containers containing 125 apples or less do not vary in size more than 3/8 inch at the widest cross section.
- (b) Apples in containers containing 138 apples or more do not vary in size more than 1/4 inch at the widest cross section.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.42 to Section 1400.28 and renumbering and amendment of former Section 1400.28 to Section 1400.16 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.29. Apples, Packing Requirements.

Apples that are well packed shall be uniform in size and placed in clean standard containers. Apples that are place packed shall be in clean containers.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.67 to Section 1400.29 and renumbering and amendment of former Section 1400.29 to Section 1400.17 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Editorial correction (Register 81, No. 34).

§ 1400.30. Apples, Well Packed Defined.

"Well packed" (including tray packed, cell packed, and similarly packed apples) means that all fruit in a container is packed in regular, compact, diagonal arrangement, and in such a manner that it will not move in a lidded container.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.47 to Section 1400.30 and renumbering and amendment of former Section 1400.30 to Section 1400.18 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Editorial correction (Register 81, No. 34).

§ 1400.31. Apples, Place Packed Defined.

"Place packed" means that the apples are not wrapped and are arranged compactly in layers throughout the container. Such apples need not be uniform in size or in count among layers.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1400.31 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer of Section 1400.31 and renumbering and amendment of Section 1400.46 to Section 1400.31 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.32. Apples, Wrapped Defined.

"Wrapped" means individual apples are completely enclosed by a wrapper.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10)
- 2. Amendment and renumbering from Section 1391.2 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1400.45 to Section 1400.32 and renumbering and amendment of former Section 1400.32 to Section 1400.24 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.33. Apples, Consumer Package Defined.

"Consumer package" means any closed container or package which will not hold more than 20 pounds net when full. Consumer packages may contain mixed varieties of apples. All apples in consumer packages shall conform to one of the following grades:

Extra Fancy, Fancy, or a combination grade of Extra Fancy and Fancy, as defined in this Code.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1391.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer of Section 1400.33 and renumbering and amendment of Section 1400.44 to Section 1400.33 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

Page 132 (4-1-90)

4. Editorial correction (Register 81, No. 34).

§ 1400.34. Apples, Gift Pack.

Apples in containers labeled with the term "gift pack" shall conform to the Extra Fancy grade, except that russeting on Pippin varieties shall only be considered damage if it is appreciable damage as in Section 1400.16(c).

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of Section 1400.34 and renumbering and amendment of Section 1400.58 to Section 1400.34 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.35. Apples, Gift Pack Containers.

Containers of apples that are labeled "gift pack" shall be of rigid construction. Gift pack containers are exempt from the container and packing requirements of this article.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.57 to Section 1400.35 and renumbering and amendment of former Section 1400.35 to Section 1400.20 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8)

§ 1400.36. Apples, Tolerances.

Tolerances for apples are determined as follows:

- (a) 10 percent, by count, for a combination of defects in any lot, not to exceed 5 percent for one cause in any lot. When applying defect tolerances to the combination grade, they shall apply only to Fancy grade.
- (b) In addition, 5 percent, by count, for minimum size and uniform in size in any container or lot.
- (c) Individual containers are permitted double the tolerances, provided the lot averages within the specified tolerances.
- (d) Apples are allowed an additional tolerance for minimum size and uniform size. This tolerance is 5 percent for any lot, 10 percent for any container, provided the lot or container does not exceed the above tolerances allowed for defects.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.48 to Section 1400.36 and renumbering and amendment of former Section 1400.36 to Section 1400.23 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.37. Apples, Marking Requirements.

In addition to the basic marking requirements of Section 1359, the following markings are required:

- (a) Master containers:
- (1) The name of the variety or varieties; and
- (2) Grade designation.
- (b) Consumer packages:
- (1) Grade designation.
- (c) Nonconsumer packages:
- (1) Grade designation or equivalent U.S. Grade; and
- (2) The minimum diameter when apples are loose in containers, except when sold by producer directly to ultimate consumer on the premises where grown. The minimum diameter shall be plainly marked on the container in terms of whole inches and not less than eighth–inch fractions followed by the words "minimum diameter" or their abbreviations; and
- (3) Variety, if known, or, if not known, "unknown variety" on all closed containers.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1400.51 to Section 1400.37 and renumbering and amendment of former Section 1400.37 to Section 1400.25 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.38. Apples, Use of Terms Other Than Standard Grades and Abbreviations.

No superlative designation may be used in conjunction with the grades "Extra Fancy," "Fancy," "C" Grade, or "Extra Fancy and Fancy," such as "Selected . . ." or ". . . Better." "Extra" may be abbreviated to "Ex.," and "Fancy" may be abbreviated to "Fcy." The abbreviation for "minimum diameter" shall be "min. dia." or "Min."

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–16–56; effective thirtieth day thereafter (Register 56, No. 5).
- 2. Amendment filed 6-6-57; effective thirtieth day thereafter (Register 57, No. 9).
- 3. Renumbering from Section 1391.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Renumbering and amendment of Section 1400.52 to Section 1400.38 and renumbering and amendment of former Section 1400.38 to Section 1400.26 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 5. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.39. Apples, USDA Grades in Lieu of California Grades.

In lieu of the standard grade markings required by this article, any container of apples may be marked with one of the grades established in the official United States standards for apples, if the apples conform to the grade as marked. The provisions of this section shall in no way permit apples to be of a lower grade or size requirement than California standards

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-14-69; effective thirtieth day thereafter (Register 69, No. 33). For prior section see Register 68, No. 2.
- Renumbering from Section 1391.7 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer of Section 1400.39 and renumbering and amendment of Section 1400.63 to Section 1400.39 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 4. Amendment filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.40. Apples, Controlled Atmosphere.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 8-14-69; effective thirtieth day thereafter (Register 69, No. 33).
- 2. Renumbering from Section 1391.8 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1400.68 to Section 1400.40 and renumbering and amendment of former Section 1400.40 to Section 1400.22 filed 6–5–81; effective thirtieth day thereafter (Register 81, No. 23).
- 4. Repealer filed 2–22–85; effective thirtieth day thereafter (Register 85, No. 8).

§ 1400.41. Apples, Controlled Atmosphere Requirements.

Apples prepared, packed, sold, or transported for sale which are represented as having been exposed to controlled atmosphere shall comply with the following requirements:

- (a) Apples must have been kept under conditions of not more than 5 percent oxygen for at least:
 - (1) 45 days for Gala and Jonagold varieties.
 - (2) 60 days for all other apple varieties.
- (b) The oxygen level must have been reduced to 5 percent within 20 days after sealing the apples in the storage room.

The secretary may require an agreement in writing from registered handlers of controlled atmosphere apples that these conditions have been met. The secretary may refuse to approve an application for registration if the applicant does not fulfill these requirements or other provisions of this Article, or has failed to furnish information or evidence required by these sections pertaining to controlled atmosphere apples.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of Section 1400.41 and renumbering and amendment of Section 1400.69 to Section 1400.41 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).
- 3. Amendment of section and NOTE filed 9–30–99; operative 10–30–99 (Register 99, No. 40).

§ 1400.42. Apples, Controlled Atmosphere Registration.

(a) The identity of all apples represented as having been exposed to controlled atmosphere storage shall be maintained from the original room or building where they were treated through the various channels of trade to the retailer.

Enforcing officers may investigate and examine records and invoices relating to any transactions in order to determine the identity of apples represented as having been exposed to controlled atmosphere storage, and shall consider all CA storage registration numbers pertinent to marketplace transactions.

- (b) All owners or operators of controlled atmosphere rooms or storage facilities for apples in California, and California packers or repackers of apples treated in this or any other state and represented as having been exposed to controlled atmosphere shall register with the director on a prescribed form. The registration period for these owners, operators, packers, and repackers shall extend for one year beginning September 1 and ending August 31 of the following year.
- (c) The director shall assign each approved registrant a registration number preceded by the letters CA.
- (d) Each owner or operator of a controlled atmosphere room or storage facility in this State shall maintain a record on a daily basis, as required by the county agricultural commissioner, of the temperature, percentage of carbon dioxide, and percentage of oxygen, checked at least once each day. The required record shall also include the name and address of the owner or operator, room number(s), room capacity, lot identification, quantity in each lot, date of sealing, date of opening, and a daily record of date and time of each oxygen, carbon dioxide, and temperature test.

Each owner or operator of a controlled atmosphere room or building in this State shall submit to the county agricultural commissioner a written report, within 10 days of the date of sealing, pertaining to each room showing the owner's room number(s), date of sealing, and variety and quantity of apples stored by the owner or operator.

- (e) Apples represented in any way as having been exposed to controlled atmosphere shall be moved in containers or consumer packages marked with the registration number of the owner or operator of the room or building where the apples were treated. These containers shall also be marked with the registration number of the California packer or repacker of the apples.
- (f) All registration numbers or other identification required to be marked on containers shall be in letters and numbers not less than those prescribed in Table 1 of Section 1363; however, in the case of consumer packages as defined in this Article, all such markings shall be clear and conspicuous and in a place readily visible to the purchaser.
- (g) A "lot" of apples means any group of containers of apples from one grower or orchard, of one variety, which is separated from other groups by some evidence such as a lot number or similar mark of identification.

A "packer" or "repacker" is a person other than an owner or operator of a controlled atmosphere storage plant who removes apples from the containers in which they were treated and places them into other containers or replaces them into the original containers.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Renumbering and amendment of Section 1400.70 to Section 1400.42 and renumbering and amendment of former Section 1400.42 to Section 1400.28 filed 6-5-81; effective thirtieth day thereafter (Register 81, No. 23).

§ 1400.43. Apples, Controlled Atmosphere from Out-of-State.

Out-of-state owners or operators of controlled atmosphere rooms or storage facilities, and out-of-state packers or repackers of apples represented as having been exposed to controlled atmosphere, who market these apples in California, shall register with the director in the same manner as required of persons within this State. However, these persons are not required to register if they are already registered with proper authorities in the state of origin and have been assigned a comparable identification number, under laws or regulations which at least conform to provisions of Sections 1400.41 and 1400.42 of this Article. Out-of-state containers of apples marketed in California shall be marked with the registration number of this state or the state of origin.

Persons marketing these apples need not submit records to a California agricultural commissioner.

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 5–12–78, effective thirtieth day thereafter (Register 78, No 19).
- 3. Repealer filed 8–18–83; designated effective 8–25–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

§ 1402.1. Apricots, Verification for Permit.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 8–18–83; designated effective 8–25–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

§ 1402.2. Apricots, Maturity.

Apricots shall not be considered mature within the meaning of the California Administrative Code, Section 1402.3 unless reasonably well filled out, and (a) at least three–fourths of the outside surface area has attained a color equal to No. 3 Yellowish Green as represented by the "Standard Color Chart, Department of Food and Agriculture"; or (b), at least one–half the surface area of the flesh showing on a transverse cut through the center, made approximately one–half the distance between the stem and blossom ends, has attained a color equal to No. 4 Yellow of the same color chart.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–25–63; effective thirtieth day thereafter (Register 63, No. 17).
- 2. Amendment filed 4–23–71; effective thirtieth day thereafter (Register 71, No. 17).
- 3. Amendment and renumbering from Section 1394.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Editorial correction adding NOTE filed 8-18-83 (Register 83, No. 34).

§ 1402.3. Apricots, Standards.

Fresh apricots shall be mature but not overripe and free from any of the following defects:

- (a) Insect injury which has penetrated or damaged the flesh.
- (b) Mold, brown rot, and decay.
- (c) Serious damage caused by cuts, bruises, cracks, shot hole fungus, growth cracks, scab, hail, or other causes.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Editorial correction adding NOTE filed 8-18-83 (Register 83, No. 34).

§ 1402.4. Apricots, Serious Damage.

With the exception of shot hole fungus, damage is serious when it causes a waste of 10 percent, by volume, of the individual apricot. Damage to any apricot caused by shot hole fungus is serious when the spots cover an aggregate area of more than one-half inch in diameter.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 8–18–83; designated effective 8–25–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

§ 1402.5. Apricots, Pit-Burn.

Pit-burn in apricots shall be considered serious damage when it causes a breakdown of the flesh and a portion of such flesh is brown in color, provided that the combined total affects more than 10 percent of the flesh of the individual apricot. Brown color shall not include the color change associated with normal apricot flesh overripeness.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Originally filed as Section 1435 on 4–20–54; effective thirtieth day thereafter (Register 54, No. 9).
- 2. Renumbered from Section 1435, filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).

- 3. Renumbering from Section 1394 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 8–18–83; designated effective 8–25–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

§ 1402.6. Apricots, Tolerances.

Not more than 10 percent, by count, of the apricots in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

HISTORY

New section filed 1–21–75, effective thirtieth day thereafter (Register 75, No. 4).

§ 1402.7. Apricots, Marking Requirements.

In addition to the basic marking requirements of section 1359, every nonconsumer container of apricots shall be clearly and conspicuously marked with the following information:

- (a) The name of the variety, if known, or if not known, the words "Unknown Variety."
- (b) The row count, or count, if the apricots are packed in any style container.
- (c) When apricots are loose in the container, the statement "24 lbs. net wt." or "24 lbs. net weight" and one of the numerical size designations established in section 1402.8. Where any such size designation is followed in parenthesis by a descriptive size designation, both such designations, the numerical followed by the descriptive, shall appear together on the container from the effective date of this regulation and until December 31, 1990. After such date, the containers shall only be marked with one of the numerical designations.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (c) and new subsection (d) filed 3-17-72; effective thirtieth day thereafter (Register 72, No. 12).
- 2. Renumbering from section 1394.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).
- 4. Amendment filed 8–18–83; designated effective 8–25–83 pursuant to Government Code section 11346.2 (d) (Register 83, No. 34).
- Amendment filed 5–3–90; operative 5–3–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 24).

§ 1402.8. Apricots, Size Markings.

All loose apricots, when in containers marked with one of the size designations stated in column A of the table below, shall meet the weight requirements specified for that size designation shown in the table. The apricots shall be uniform in size and not more than 5 percent, by count, of the apricots in each container may vary more than 1/4 inch in diameter when measured through the widest portion of the cross section, except sizes 4 and 18 need not meet the size variation requirement.

Compliance of a lot with the requirements of this section shall be determined as followed: If the lot consists of three or more containers, select at random three of the containers and from each container select at random 40 apricots. Combine and weigh the 120 apricots selected. The combined weight for the size designation shall equal or exceed the weight designated in column D for that size.

For lots of less than three containers, select 120 apricots at random from the containers and apply the method above.

If the apricots in the combined sample fail to meet the weight specified in column D, the entire lot shall be considered mislabeled within the meaning of Food and Agricultural Code sections 42514, 42943, and 42944.

\boldsymbol{A}	B	С	D
	Approximate	Number of	Minimum
	Number of	Apricots	Weight of
Size	Apricots	in Combined	Combined
Designation	Per Pound	Sample	Sample
4	4	120	25 pounds
5	5	120	22.5 pounds
6	6	120	20 pounds
7 (XX Jumbo)	7 (6)	120	17.5 (20) pounds
8 (Extra Jumbo)	8	120	15 pounds
10 (Jumbo)	10	120	12 pounds
12 (Extra Large)	12	120	10 pounds
14 (Large)	14	120	8.5 pounds
16 (Medium)	16	120	7.5 pounds
18 (Small)	No maximum	No maximum	No minimum
,	number	number	weight

With the "Extra Large" and "Extra Jumbo" designation, "Extra" may be abbreviated "Ex" or be represented by a single "X" preceding the term "Large" or "Jumbo."

All of the size designations in parenthesis, and except for XX Jumbo, the appropriate number of apricots per pound and the minimum sample weight in columns B and D, respectively, existed prior to the establishment of the numerical designations. In the case of XX Jumbo, the previous number of apricots per pound and the minimum sample weight appear in parenthesis. Refer to section 1402.7 for applicable container size marking requirements.

NOTE: Authority cited: Sections 14, 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 9–25–63; effective thirtieth day thereafter (Register 63, No. 17).
- 2. Amendment filed 5-19-67 as an emergency; designated effective 5-22-67. Certificate of Compliance included (Register 67, No. 20).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 4. Amendment and renumbering from section 1394.1 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Amendment filed 8–18–83; designated effective 8–25–83 pursuant to Government Code section 11346.2(d) (Register 83, No. 34).
- 6. Amendment filed 4-16-87; operative 4-20-87 (Register 87, No. 16).
- Amendment filed 5–3–90; operative 5–3–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 24).

§ 1402.9. Apricots, Row Count.

If row count is used to designate the size on any lug of packed apricots, the lug shall be marked with the number of rows of apricots packed laterally across the end of the container, directly followed by the word "row" or "rows."

HISTORY

1. Renumbering from Section 1394.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1402.10. Apricot, Count Variation.

HISTORY

- 1. Renumbering from Section 1394.11 filed -21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1402.11. Apricots, Size Variation and Tolerance.

- (a) Packed apricots shall not vary in size between the fruits in one container more than one-fourth inch in diameter, when measured through the widest portion of the cross section of the fruit.
- (b) Size variation shall not exceed 5 percent by count in any container. NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1394.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 8–18–83; designated effective 8–25–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 34).

§ 1402.12. Apricots, Standard Container Requirements.

Apricots shall be in standard container numbers 6, 10A, 12B, 22A, 22B, 22C, 24, 25, or 36.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–20–77; effective thirtieth day thereafter (Register 77, No. 21). For prior history, see Register 75, No. 4.
- 2. Editorial correction of NOTE filed 8-18-83 (Register 83, No. 34).
- 3. Amendments filed 5–5–86; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 86, No. 19).
- 4. Amendment filed 4–16–87; operative 4–20–87 (Register 87, No. 16).
- Amendment of section and Note filed 8-26-2003; operative 8-26-2003 pursuant to Government Code section 11343.4 (Register 2003, No. 35).

Article 9. Artichokes

§ 1404. Artichokes, Standards.

Globe artichokes shall be free from the following defects:

- (a) Mold, decay, or insect larvae.
- (b) Serious damage due to insects, freezing, or other causes. Damage to artichokes is serious due to:
- (1) Insects when worm tunnelling is present on a bract, or when six or more bracts are punctured, or when insect injury has damaged an area of one-half inch or more on the lower half of a bract.
- (2) Freezing, when discoloration extends beyond the area of attachment of the stem to the base of the artichoke.
- (3) Other causes when 10 percent, by volume, of the edible portion of the artichoke is wasted.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–14–83; effective thirtieth day thereafter (Register 83, No. 12).

§ 1404.1. Artichokes, Tolerances.

Not more than 10 percent, by count, of the globe artichokes in any one container or bulk lot may be below the requirements prescribed by this article. Not more than one-half of this tolerance shall be allowed for decay

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

HISTORY

- 1. Renumbering from Section 1395.12 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–14–83; effective thirtieth day thereafter (Register 83, No. 12).

§ 1404.11. Artichokes, Size Variation.

Globe artichokes which are packed shall not vary in size, in any one container, more than one—half of an inch in diameter if measured through the widest portion of the cross section of the artichokes.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1395.17 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. New NOTE filed 3–14–83; effective thirtieth day thereafter (Register 83, No. 12).

§ 1404.12. Artichokes, Size Tolerances.

Size variation shall not exceed 10 percent in any one container or bulk lot.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 3-14-83; effective thirtieth day thereafter (Register 83, No. 12).

Article 10. Asparagus

§ 1406. Asparagus, Exception for By-Products Use.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–23–75 as an emergency; effective upon filing (Register 75, No. 4).
- 2. Certificate of Compliance filed 5-22-75 (Register 75, No. 21).
- 3. Amendment filed 12–3–75; effective thirtieth day thereafter (Register 75, No. 49).
- 4. Repealer filed 4-5-85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.1. Asparagus, Standards.

Fresh asparagus shall comply with all of the following requirements:
(a) It shall not be wilted or crushed, except such injuries as are necessarily caused in proper sorting or packing.

- (b) Stalks shall not have badly broken, badly spreading, or badly seeded tips and shall be free from decay and from damage which is caused by dirt, disease, insects, mechanical injury, or other causes. "Damage" means any injury from any cause which is mentioned in this article that materially affects the quality.
 - (c) Stalks of asparagus shall not be badly crooked.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering of Article 10 (Sections 1406-1406.20) to (Sections 1406.1-1406.21) filed 1-23-75 as procedural; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment of NOTE filed 4–5–85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.2. Asparagus, Tolerance.

Not more than 10 percent, by count, of the asparagus stalks in any container or bulk lot may be below the requirements prescribed by Section 1406.1. Not more than one—half of this tolerance shall be allowed for any one cause.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Amendment filed 4-5-85; effective thirtieth day thereafter (Register 85, No. 14)

§ 1406.3. Asparagus, Badly Crooked.

Asparagus failing to meet the requirements prescribed by Section 1406.1 only because of being "badly crooked," shall be considered as complying with this article if the container in which it is packed is clearly and conspicuously marked with the word "crooks." Containers so marked need not bear any bunch or size designation terms, as required by Section 1406.15.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- 3. Amendment filed 4–5–85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.4. Asparagus, White Stalks.

Asparagus stalks shall not have more than 1 1/2 inches of white color, beginning from the cut end of the stalk. However, 20 percent of the stalks in any bunch or container may have more than 1 1/2 inches of white, provided that not more than 5 percent of this amount exceeds 3 inches of white in length. Containers of asparagus clearly and conspicuously

marked with the word "white" may be packed if grown north or west of San Gorgonio Pass, provided not more than 5 percent of the stalks in any container contain more than 1 1/2 inches of color other than white on the stalk.

Individual containers in any lot may contain 1 1/2 times the tolerance, provided the lot averages within the specified tolerance.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 2-8-85; effective thirtieth day thereafter (Register 85, No. 6).
- 3. Amendment refiled 2-21-85; designated effective 2-22-85 pursuant to Government Code Section 11346.2(d) (Register 85, No. 8).
- 4. Amendment filed 4–5–85; effective thirtieth day thereafter (Register 85, No. 14).
- 5. Change without regulatory effect (Register 86, No. 33).

§ 1406.5. Asparagus, Descriptive Terms Defined.

When containers of asparagus are marked with the terms "long green," "tall green," or similar descriptive terms, the asparagus placed in such container may not have more than one inch of white showing, beginning from that end which is cut from the plant.

Containers of asparagus which are labeled with the term "all green" shall contain stalks of asparagus with no white.

The tolerances as provided for in Section 1406.4 of the California Administrative Code shall apply to stalks of asparagus packed and marked as indicated in this section.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–18–70; effective thirtieth day thereafter (Register 70, No. 25).
- 2. Amendment and renumbering from Section 1396.2 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. New NOTE filed 4-5-85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.6. Asparagus, Definition of the Term "White."

The term "white" with reference to asparagus shall mean those areas on individual stalks of asparagus that are white with no shade of purple or green or any other color that may develop during the growing of the asparagus.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

History

- 1. New section filed 6–18–70; effective thirtieth day thereafter (Register 70, No. 25).
- 2. Renumbering from Section 1396.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. New NOTE filed 4-5-85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.7. Asparagus, Bunch Pack, Defined.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1396 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For prior history, see Register 71, No. 2
- 2. Amendment filed 12-3-75; effective thirtieth day thereafter (Register 75, No.
- Amendment filed 12–4–78; effective thirtieth day thereafter (Register 78, No. 49).
- 4. Repealer filed 4-5-85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.8. Asparagus, Bunch Designations.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. Amendment filed 12–4–78; effective thirtieth day thereafter (Register 78, No. 49). For prior history, see Register 75, No. 49.
- 2. Amendment filed 4-5-85; effective thirtieth day thereafter (Register 85, No. 14).

3. Repealer filed 3-26-93; operative 4-26-93 (Register 93, No. 13).

§ 1406.9. Asparagus, Crooks.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1396.9 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 12–3–75; effective thirtieth day thereafter (Register 75, No. 49).
- Amendment filed 12–4–78; effective thirtieth day thereafter (Register 78, No. 49).
- 4. Repealer filed 3-26-93; operative 4-26-93 (Register 93, No. 13).

§ 1406.10. Asparagus, Bunch Pack Tolerance.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1396.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 12-3-75; effective thirtieth day thereafter (Register 75, No. 49).
- 3. Amendment filed 12–4–78; effective thirtieth day thereafter (Register 78, No. 4)
- 4. Repealer filed 3-26-93; operative 4-26-93 (Register 93, No. 13).

§ 1406.11. Asparagus, Measurement to Define Amount of White.

When determining the amount of white on a stalk of asparagus which is cut from the plant, measure from the cut end of the stalk to the nearest point of color. For spears longer than 9 inches, the nearest point of color shall be determined by measuring from a point which is 9 inches from the tip.

Note: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–18–70; effective thirtieth day thereafter (Register 70, No. 25).
- 2. Amendment filed 3–11–71 as an emergency; effective upon filing (Register 71, No. 11).
- 3. Certificate of Compliance—Sec. 11422.1, Gov. Code, filed 4–12–71 (Register 71, No. 16).
- 4. Renumbering from Section 1396.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Amendment filed 4–5–85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.12. Asparagus, Diameter.

As used in this section, "diameter" means the measurement of the widest portion of the cross section which is measured at the largest point on the stalk.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New sections 1396.5 through 1396.16 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- Renumbering from Section 1396.5 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 4–5–85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.13. Asparagus, Size Designations.

Asparagus which is classified according to the following size designations shall comply with the corresponding individual stalk size requirements:

- (a) "Colossal" means stalks which are not less than 16/16 inch in diameter.
- (b) "Jumbo" means stalks which are not less than 13/16 inch in diameter.
- (c) "Extra Large" means stalks which are not less than 10/16 inch in diameter.
 - (d) "Large" means stalks which are not less than 7/16 inch in diameter.
- (e) "Standard" means stalks which are not less than 5/16 inch in diameter.

(f) "Small" means stalks which are not less than 3/16 inch in diameter. NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1396.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 12–3–75; effective thirtieth day thereafter (Register 75, No. 49).
- 3. Amendment filed 4–5–85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.14. Asparagus, Size Tolerances.

The size designation requirements established by Section 1406.13 shall apply to all stalks of asparagus in each container, except that as a tolerance in the case of colossal, jumbo, extra large, large, standard, and small sizes, 10 percent, by count, of the stalks in any container may be smaller than the size designation specified. Individual containers in any lot may contain 1 1/2 times the tolerance if the average percentage of the entire lot is within the tolerance.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1396.7 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 12–3–75; effective thirtieth day thereafter (Register 75, No. 49)
- 3. Amendment filed 4–5–85; effective thirtieth day thereafter (Register 85, No. 14).

§ 1406.15. Asparagus, Marking Requirements.

In addition to the basic marking requirements required by Section 1359, every nonconsumer container of asparagus shall be clearly and conspicuously marked with one of the size designations defined in Section 1406 13

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

Article 11. Avocados

§ 1408. Avocados, By-Products.

Avocados which are intended to be used solely for by-product use shall not be deemed "prepared for market" within the meaning of section 44971 of the Food and Agricultural Code. The enforcing inspector shall issue a permit or serve a disposal order upon the owner or person that has custody or possession of any lot or load that is intended for by-product use. The issuance of disposal orders shall be in accordance with sections 42881, 42882, 42883, 42884, 42885, and 42886. The issuance of permits shall be in accordance with the following:

- (a) The permit shall accompany each vehicle transporting the avocados.
- (b) The permit shall be in writing and on a form provided by the Director of Food and Agriculture.
- (c) The permit shall be valid for one year from date of issuance unless revoked or suspended by the Director or his representative.
- (d) The permittee shall, upon request of the enforcing officer, furnish such evidence as may be required as proof that the avocados have been disposed of in accord with provisions of this section.

NOTE: Authority cited for Article 11: Sections 42 and 43, Chapter 1404, Statutes of 1974 and Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Sections 42941 and 44971, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–4–73 as an emergency; effective upon filing (Register 73, No. 23).
- 2. Certificate of Compliance filed 9-20-73 (Register 73, No. 38).
- 3. Amendment filed 1–11–74; effective thirtieth day thereafter (Register 74, No. 2).
- 4. Renumbering from Section 1397.16 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1408.1. Avocados, Identification of Avocados in Noncomplying Lots.

When any lot of avocados has been determined to be in noncompliance with the maturity or other quality standards as established by this article, and is to be disposed of as authorized by this group, the avocados in the lot shall be cut or otherwise permanently identified prior to disposal. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Sections 42941 and 44971, Food and Agricultural Code.

HISTORY

- New section filed 9-20-68 as an emergency; effective upon filing; Certificate of Compliance included (Register 68, No. 35).
- Amendment and renumbering from Section 1397.7 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 5–27–83; effective thirtieth day thereafter (Register 83, No. 22).

§ 1408.2. Avocados: Maturity, Sample Size and Sampling Procedures.

- (a) The following procedure shall be used to determine whether avocados in a lot are mature as required by this article.
- (b) For the purposes of this section, a lot is defined as one group of containers of avocados of the same variety, same count size, if packed, and same grade or brand or grower.
- (c) Sample containers shall be selected at random in accordance with the table below. Two avocados shall be randomly selected from each sample container. Where the number of sample containers is four or less, additional avocados shall be selected for a total sample of ten avocados. The avocados selected from the sample containers shall comprise the total sample to be tested.

Number of Containers	Sample Containers
in Lot	Required
50 containers or less	2
51 to 100	3
101 to 200	4
201 to 500	
501 to 1,000	10
1,001 to 1,500	15
1,501 to 2,000	20
2,001 to 2,500	

For lots of over 2,500 containers, an additional five sample containers shall be selected for each additional 500 containers or fraction thereof.

(d) The avocados selected in accordance with the above subsection shall be tested in accordance with the procedures in Sections 1408.3 and 1408.6.1. Notwithstanding the foregoing sampling procedures, the least mature appearing fruit shall be selected when avocados from different growing seasons or bloom sets in the same growing season have been intermixed.

NOTE: Authority cited: Sections 14, 407, 42681, and 42684, Food and Agricultural Code. Reference: Sections 42941 and 44973, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsections (a), (e) and (f) filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2). For prior history, see Register 64, No. 15.
- 2. Amendment and renumbering from section 1397.6 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment of subsections (d)(1) and (d)(2) filed 11–17–78 as an emergency; effective upon filing. Certificate of Compliance included (Register 78, No. 46).
- 4. Amendment of subsections (d)(1) and (d)(2) filed 11–9–79; effective thirtieth day thereafter (Register 79, No. 45).
- 5. Amendment of subsection (d) filed 9–30–81 as an emergency; effective upon filing. Certificate of Compliance included (Register 81, No. 41).
- Amendment filed 5–27–83; effective thirtieth day thereafter (Register 83, No. 22).
- 7. Amendment of subsection (d) filed 9–15–87; operative 10–15–87 (Register 87, No. 39).
- 8. Amendment of subsections (d) and (e) filed 9–7–89; operative 8–9–89 pursuant to Government Code section 11346.2(d) (Register 89, No.37).
- Amendment to subsection (d) filed 8–8–90; operative 9–7–90 (Register 90, No. 39).
- 10. Amendment of section heading, subsections (b), (c), (d) and NOTE and repealer of subsection (e) filed 9–16–92; operative 9–16–92 (Register 92, No. 38).

§ 1408.3. Avocados, Determination of Dry Matter.

Dry matter of avocados shall be determined by weighing the fresh weight and dry weight of a sample of avocados. The testing procedures and method of calculating the percent of dry matter shall be as follows:

- (a) At the widest circumference of the avocado, remove a core from the entire width of the avocado. Discard the seed portion, and remove the seed coat and skin to the depth of the edible portion from the remaining core pieces. Cut each core piece in half. The core sample shall be removed with a coring device having an inside diameter of 5/8 inch, plus or minus 1/16 inch.
- (b) Repeat the above for the number of sample fruit required by Section 1408.6.
- (c) The cored pieces shall be immediately placed in a sealed plastic bag if there is a delay in completing the procedures below.
 - (d) Weigh a clean petri dish and record the weight (P).
- (e) Place all cored pieces on the preweighed petri dish; reweigh the petri dish with the sample and record the weight (F).

- (f) Place the petri dish with the sample in a 1,000 watt microwave oven and dry the sample at 50% power for 40 minutes, adjusting the power down as necessary to avoid charring the tissue. Remove the sample from the microwave oven and note the weight. Place the sample back in microwave oven for 5 minutes. Remove the sample again and compare weight. If weight is the same, record it as dry weight. Whenever there is a weight difference, repeat this step until there is no weight loss. After the sample reaches a constant weight, record the weight (D).
 - (g) Calculate the percent of dry matter using the following example: D=P

 $F-P \times 100 = _____ \% dry matter$

All weighings required by this section shall be recorded to the nearest 0.01 gram.

 $Note: Authority\ cited:\ Sections\ 407,\ 42681,\ 42684,\ and\ 44988,\ Food\ and\ Agricultural\ Code.\ Reference:\ Sections\ 42941\ and\ 44971,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 7. Amendment filed 8-8-90; operative 9-7-90 (Register 90, No. 39).
- Amendment of section and Note filed 8–29–2002; operative 9–28–2002 (Register 2002, No. 35).

§ 1408.4. Avocados, Defects.

As used in this article, "defect" includes damage which is due to insect injuries, freezing injury, decay, rancidity or other causes.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1408.5. Avocados, Tolerances.

Avocados shall be free from all defects, including, but not restricted to, those that are mentioned in Section 1408.4, which singly or in the aggregate cause a waste of 10 percent or more, by weight, of the entire avocado, including the skin and seed. Not more than 5 percent, by count, of the avocados in any one container or bulk lot may be below the requirement which is prescribed by this section.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1408.6. Avocados, Maturity.

Avocados shall be mature at time of picking and at all times thereafter. Mature means that the percent dry matter of the edible portion of an avocado sample is not less than the percent established below for the respective varieties, as applicable on the date of testing.

The percentages in the following table shall be effective until modified by order of the Director in accordance with Section 1408.6.2. Interested persons should contact the Department's Fruit and Vegetable Quality Control—Standardization program for current standards.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Amendment filed 5–27–83; effective thirtieth day thereafter (Register 83, No. 22).
- 3. Amendment filed 9–7–89; operative 9–8–89 pursuant to Government Code section 11346.2(d) (Register 89, No.37).
- 4. Amendment filed 8-8-90; operative 9-7-90 (Register 90, No. 39).
- 5. Amendment of text, table and NOTE filed 9–16–92; operative 9–16–92 (Register 92, No. 38).

§ 1408.6.1. Avocados, Maturity Determination of Dry Matter Testing Results.

The sample avocados selected in accordance with Section 1408.2 shall be randomly separated into two equal official test samples, hereafter referred to as Text No. 1 and Test No. 2, and tested as follows:

- (a) The avocados in Test No. 1 shall be tested for percent dry matter. If the percent dry matter from the test is equal to or greater than the established percent in Section 1408.6 for the variety tested, the fruit passes and no further testing shall be required.
- (b) When the percent dry matter from the test is less than the established percent, the avocados in Test No. 2 shall be tested for percent dry matter. If the percent dry matter from the test is equal to or greater than the established percent, the fruit passes and no further testing shall be required. If the percent dry matter from the test is below the established percent, the lot shall be rejected and no further testing shall be allowed. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reerence: Sections 42941 and 44973, Food and Agricultural Code.

HISTORY

- 1. New section filed 5–27–83; effective thirtieth day thereafter (Register 83, No. 22).
- 2. Renumbering of former section 1408.6.1 to section 1408.6.2, and new section 1408.6.1 filed 9–7–89; operative 9–8–90 pursuant to Government Code section 11346.2(d) (Register 89, No. 37).
- 3. Amendment filed 8-8-90; operative 9-7-90 (Register 90, No. 39).
- 4. Amendment of section heading, text and NoTE filed 9–16–92; operative 9–16–92 (Register 92, No. 38).
- Amendment of subsection (a) and NOTE filed 8–29–2002; operative 9–28–2002 (Register 2002, No. 35).

§ 1408.6.2. Avocados, Application of Maturity Standards (Fixed Levels).

The director may issue formal directives to modify the minimum maturity standards set forth in Section 1408.6. However, such directive may

only be issued after the director determines that a need exists to modify the standards. Modification shall only be made when: (1) experience with maturity standards indicates a need for correction and refinement, and (2) establishment of new standards more accurately reflect fruit quality ad consumer acceptance of same.

After demonstrating a need for change, proposed changes in the maturity standards may be initiated by the director, by the California Avocado Commission, or by the Avocado Inspection Committee. Such need shall be based upon scientific test data generated or reviewed and approved by a recognized research institution. test data may include but shall not be limited to dry matter tests, fruit variety and size, analysis of differences in geographic areas or climatic conditions, and consumer acceptance of same.

NOTE: Authority cited: Sections 14,407, 42684 and 44988, Food and Agricultural Code. Reference: Sections 42941, Food and Agricultural Code.

HISTORY

1. Repealer of former Section 1408.6.2, and renumbering of former Section 1408.6.1 to Section 1408.6.2 filed 9–7–89; operative 9–8–89 pursuant to Government Code Section 11346.2(d) (Register 89, No. 37). For prior history, see Registers 88, No. 46 and 83, No. 22.

§ 1408.6.3. Avocados, Release Dates.

When the director is satisfied that all fruit of a given size of a specified variety meet the maturity standards, the director may by order release all such fruit for harvesting.

NOTE: Authority cited: Sections 407, 42684 and 44988, Food and Agricultural Code. Reference: Sections 42941 and 44971, Food and Agricultural Code.

HISTORY

1. New section filed 5–27–83; effective thirtieth day thereafter (Register 83, No. 22).

§ 1408.7. Avocados, Freezing Injury.

Notwithstanding the provisions of Section 1408.5, avocados shall be considered damaged by freezing injury when:

- (a) There is any amount of bronze color; or
- (b) There is any amount of water–soaked discoloration of the flesh adjacent to the skin as determined on the surface of a transverse cut made at least 1 inch from the stem end of the fruit; or
- (c) Any discoloration or desiccation of the flesh occurs on a transverse cut made at least 1 inch from either the stem or distal end of the fruit, or on either such cut surface if it covers an aggregate area of more than 1/2 inch in diameter; or
- (d) Ten or more vascular fiber bundles, which are as dark as the color guide established by the Director, appear on the surface of a transverse cut made at least 1 inch from the stem end of the fruit; or
- (e) There is any internal void as determined on the surface of a transverse cut made at least 1 inch from either the stem or distal end of the fruit. NOTE: Authority cited: Sections 14, 407 and 42684, Food and Agricultural Code. Reference: Sections 42941 and 44973, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1397 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For prior history, see Register 57, No. 9.
- 2. Amendment filed 11-7-88; operative 11-7-88 (Register 88, No. 46).
- 3. Amendment of section and Note filed 9-16-92; operative 9-16-92 (Register 92, No. 38).

§ 1408.8. Avocados, Number of Avocados to Select to Inspect for Frost Damage.

The number of containers of avocados from which fruit is to be sampled is provided in Section 1370.8, California Administrative Code. The following is in addition to the above–named section:

- (a) When it is evident from the outside appearance of the avocados in the lot that freezing damage has occurred to the avocados, a random sample is not necessary.
- (b) When freezing damage is not evident from the outside appearance of the avocados in a lot, the following method shall be used:
- (1) When five containers or less are selected, inspect 10 avocados which have been selected at random from all containers in the sample. If one of these fruits is considered rejectable under Sections 1408.5 and

1408.7 of the California Administrative Code, inspect an additional 10 avocados selected from the same containers in the same manner. When more than 5 percent, by count, of these 20 fruits are considered rejectable, the lot shall be considered in violation.

- (2) When six or more containers are selected, inspect 20 avocados which have been selected at random from all containers in the sample. When more than 5 percent, by count, of these 20 fruits are considered rejectable, the lot shall be considered in violation.
- (3) When avocados have been sized, each size must be tested as a separate lot; when not sized, test large, medium and small fruits as separate lots
- (c) When avocados have been selected under method (a), the fruit, or the results of testing them, shall not be combined in any way with those selected to be tested under method (b).

HISTORY

- 1. New section filed 6–6–57; effective thirtieth day thereafter (Register 57, No. 9).
- 2. Amendment of subsection (b)(1) filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1397.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1408.9. Avocados, Marking Requirements.

In addition to the basic marking requirements of Section 1359, every nonconsumer container of avocados shall be clearly and conspicuously marked with the following information:

- (a) All containers of the following varieties shall be marked with the variety: Fuerte, Hass, Zutano, Bacon, MacArthur, Rincon, Jalna, Pinkerton, or Reed. None of the before–named varieties shall be intermixed or mixed with an unnamed variety.
 - (b) The count when packed.

NOTE: Authority cited: Sections 407, 42682 and 44979, Food and Agricultural Code. Reference: Sections 42941 and 44971, Food and Agricultural Code.

HISTORY

- 1. New subsection (d) filed 1–11–74; effective thirtieth day thereafter (Register 74, No. 2). For prior history, see Register 73, No. 38.
- 2. Renumbering from Section 1397.15 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4–30–75; designated effective 6–1–75 (Register 75, No. 18).
- 4. Amendment filed 7–3–75; effective thirtieth day thereafter (Register 75, No. 27).
- 5. Amendment filed 9–11–84; effective thirtieth day thereafter (Register 84, No. 37).

§ 1408.10. Avocados, Marking Requirements for Irregular Containers.

If avocados are placed loose in containers other than standard containers for avocados, such containers shall be plainly and conspicuously marked in letters at least 1/2 inch in height with the words "irregular container." In addition, such containers shall vary more than 10% of the cubic volume of all standard avocado containers.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Renumbering from Section 1397.13 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 9-15-87; operative 10-15-87 (Register 87, No. 39).

§ 1408.11. Avocados, Consumer–Type Package.

If avocados are packed or placed loose in any consumer—type container which does not exceed 60 percent of the size of the smallest standard container for avocados, such container need not comply with standard container size.

HISTORY

- 1. Renumbering from Section 1397.14 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 4–30–75; designated effective 6–1–75 (Register 75, No. 18).

§ 1408.12. Avocados, Containers Without Certification Stamp.

All containers of avocados not bearing the prescribed official certification stamp shall be rejected and returned to the packer for compliance. NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 5–24–73 as an emergency; effective upon filing (Register 73, No. 21).
- 2. Certificate of Compliance filed 9-20-73 (Register 73, No. 38)
- 3. Renumbering from Section 1398 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1408.13. Avocados, Packing, Sizing, and Standard Container Requirements.

(a) Avocados packed in rows and layers shall be fairly tightly packed in standard containers number 9D or 9E. Container 9F shall be volume filled only. In addition, containers 9D, 9E, 9F and all other containers shall conform to the following:

		_			
COLUMN A		COLU	MNB	COLUN	1N C
Count/Size	Count/Size	Weig	ht (Ozs.)	<u>Weight</u>	(Ozs.)
	Container			-

9	18	22	24	18 3/4	28
8	16	24	28	22	30
7 or less	15 or less	No weig	ht requireme	ent	

When containers, including packed containers marked as required by Section 1408.9(b), are marked with one of the count/size designations specified in Column A, not more than twenty percent, by count, of the fruit in the containers within any lot may be below or above the weight range specified in Column B, provided that no fruit may be below or above the weight range specified in Column C.

When the containers are marked with a count/size that is between two of the designations in Column A, individual fruit in the containers shall conform to the weight range specified for the next lesser count/size.

- (b) Compliance with the above requirements for avocados that have been sized and are to be conditioned in a manner that hastens the ripening process prior to further preparation for market shall be determined as follows:
- (i) Three samples of avocados, each sample being equivalent to the number of fruit that would normally be placed in container 9E, shall be sized. Each size shall be sampled separately.
- (ii) If the fruit in the samples complies with the above fruit size requirements, the avocados from which the samples were taken shall be considered in compliance with this section.
- (iii) If fruit fails to meet the above fruit size requirements, the avocados shall be rejected. The rejected avocados shall be resized and resubmitted for resampling under supervision of an enforcing officer.
- (c) For the purpose of this section, "lot" means one group of containers of the same variety, count/size, and grade or brand. A lot shall not exceed 50 containers or, when unitized, the amount present on a pallet. The size requirements established by this section shall apply only at the point of packing.

NOTE: Authority cited: Sections 407, 42682 and 44977, Food and Agricultural Code. Reference: Sections 42941 and 44973, Food and Agricultural Code.

HISTORY

- 1. New sections 1397.8 through 1397.14 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment filed 3–26–71; effective thirtieth day thereafter (Register 71, No. 13).
- 3. Renumbering from section 1397.8 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Amendment filed 7–13–84; effective thirtieth day thereafter (Register 84, No 28).
- 5. Amendment filed 9-1-87; operative 10-1-87 (Register 87, No. 36).

- 6. Amendment of first paragraph, table and NOTE filed 9–16–92; operative 9–16–92 (Register 92, No. 38).
- 7. Amendment filed 4-25-2000; operative 5-25-2000 (Register 2000, No. 17).

§ 1408.14. Avocados, Weight Requirements for Packed Containers.

(a) Except as provided in subsection (b) below, the net weight of containers 9D, 9E, and 9F shall be not less than the weight established in the chart below:

			COUNT		
		41 or	42 or	83 or	84 or
		Less	More	Less	More
	Container		<u>NET WEIC</u>	GHT (lbs.)	
	9D				
a.	Volume Fill by Count	12 1/2	11		_
b.	Volume Fill by Weight	12 1/2	12 1/2	_	
c.	Tray Pack or Rows/				
	Layers	12 1/2	11	_	_
	9E				
a.	Volume Fill by Count		_	25	22
b.	Volume Fill by Weight		_	25	25
c.	Tray Pack or Rows/				
	Layers	_	_	25	22
	9F				
	Volume Fill by Count			25	22
b.	Volume Fill by Weight	_	_	25	22

The container weights established by this section shall apply only at the point of packing.

- (b) Compliance with the above requirements for avocados that have been graded and sized and are to be conditioned in a manner that hastens the ripening process prior to further preparation for market shall be determined as follows:
- (i) 10 samples of avocados, each sample being equivalent to the number of fruit that would normally be placed in container 9E, shall be weighed. Each count shall be sampled separately.
- (ii) If the average weight of the samples complies with the above net weight requirement for container 9E, the avocados from which the samples were obtained shall be considered in compliance with this section.
- (iii) If the average weight of the samples is not in compliance with the above net weight requirement for container 9E, the avocados from which the samples were obtained shall be rejected. The rejected avocados shall be resized and resubmitted for resampling under supervision of an enforcing officer.

NOTE: Authority cited: Sections 407, 42682 and 44977, Food and Agricultural Code. Reference: Sections 42941 and 44973, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1397.9 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 9-30-81 as an emergency; effective upon filing. Certificate
 of Compliance included (Register 81, No. 41).
- 3. Amendment filed 10–1–82; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 82, No. 40).
- 4. Amendment filed 9–1–87; operative 10–1–87 (Register 87, No. 36).
- 5. Amendment filed 4–25–2000; operative 5–25–2000 (Register 2000, No. 17).

§ 1408.15. Weight Requirement for Loose Avocados in 9D or 9E Containers.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1397.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 9–30–81 as an emergency; effective upon filing. Certificate of Compliance included (Register 81, No. 41).
- Repealer filed 10–1–82; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 82, No. 40).

§ 1408.16. Avocados, Net Weight Tolerance.

In order to allow for reasonable variations inherent in different-shaped fruit and incidental to proper sizing, lots sampled shall not vary more than 2 percent from the weight requirement prescribed in Section 1408.14.

For the purpose of this Section, "lot" means one group of containers of the same variety, same count size, if packed, and same grade or brand.

Page 144

A lot shall not exceed 50 containers or, when unitized, the amount present on a pallet.

NOTE: Authority cited: Sections 14, 407, 42682 and 44977, Food and Agricultural Code. Reference: Sections 42941 and 44971, Food and Agricultural Code.

HISTORY

- 2. Amendment filed 9–30–81 as an emergency; effective upon filing. Certificate of Compliance included (Register 81, No. 41).
- 3. Amendment filed 10–1–82; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 82, No. 40).
- 4. Amendment filed 11-7-88; operative 11-7-88 (Register 88, No. 46).

§ 1408.17. Avocados, Sampling Procedure for Weight Requirement.

In lots of 10 or less containers of avocados, the net weight of each container shall be determined by the average net weight of the lot. In lots which are composed of 11 containers or more, 10 containers selected at random shall comprise a sample for determining the average net weight of each container in the lot represented by the sample.

Only one variety and one count size in standard container 9D, 9E, or 9F shall be included in determining the average net weight of a lot inspected.

NOTE: Authority cited Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Renumbering from Section 1397.12 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

- Amendment filed 10–1–82; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 82, No. 40).
- 4. Amendment filed 9-1-87; operative 10-1-87 (Register 87, No. 36).

§ 1408.18. Avocados, Reinspection.

Any lot of rejected avocados may be reinspected, provided:

- (a) The lot has been reconditioned. "Reconditioned" shall mean that in the case of quality defects, the containers have been opened and the defective avocados have been sorted out and held for examination and supervision of disposal by the enforcing officer.
- (b) Not more than one reinspection shall be permitted for any rejected lot, and the owner or person in possession of the avocados shall complete the disposition within 36 hours from the date and time a written order is issued. Such time shall not include weekends or holidays on which the packer does not pack avocados.

§ 1408.18.1. Avocados, Time for Complying with Written Order.

NOTE: Authority cited: Sections 14, 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 9–30–81 as an emergency; effective upon filing. Certificate of Compliance included (Register 81, No. 41).
- 2. Repealer filed 9-15-87; operative 10-15-87 (Register 87, No. 39).

§ 1408.19. Avocados, Fee Payment.

Each packer of avocados shall pay to the Director of Food and Agriculture each month an inspection and certification fee based on the number of containers certified.

HISTORY

- 1. New section filed 5–24–73 as an emergency; effective upon filing (Register 73, No. 21).
- 2. Certificate of Compliance filed 9-20-73 (Register 73, No. 38).
- 3. Renumbering from Section 1398.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1408.20. Normal Inspection Hours.

Reference: Section 42941, Food and Agricultural Code.

The Director shall establish a work schedule of normal days and hours that inspection and certification is available to all avocado packers.

NOTE: Authority cited: Sections 407, 42681, 44976, Food and Agricultural Code.

HISTORY

1. New section filed 2–19–76; effective thirtieth day thereafter (Register 76, No. 8).

§ 1408.21. Voluntary Request for Inspection.

An avocado packer may request the Director or his representative to furnish inspection or certification service on days or hours other than normal inspection days and hours. The avocado packer shall pay a fee to the Director in accordance with the current schedule of overtime inspection fees, in addition to the standard fee, to reimburse the Department for this supplemental service.

NOTE: Authority cited: Sections 407, 42681, 44976, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 2–19–76; effective thirtieth day thereafter (Register 76, No. 8).

§ 1408.22. Avocados, Fruit Drop Caused by Extreme Winds.

(a) When abnormal fruit drop is caused by extreme winds, the Department shall set a period of time not to exceed five days for maturity testing of windfall avocados, starting from the end of the extreme winds. During this period, maturity testing shall be permitted on windfall fruit which is not more than two sizes below the smallest size released for harvest for the respective varieties at the time of the beginning of the extreme winds. Where no size release has been made for a variety, testing shall be permitted on avocados weighing not less than 6.25 ounces. Windfall avocados which are more than two sizes smaller than the smallest released size, or those smaller than 6.25 ounces, or those tested and found to be immature shall be rejected and disposed of under supervision of an enforcing officer. Reconditioning and retesting of windfall fruit shall not be permitted.

Determination of periods which shall qualify as "extreme winds," as well as the factors which permit identification of "windfall fruit," shall be at the discretion of the Department.

- (b) Notwithstanding subsection (a), upon written application, the Department may:
- (1) perform maturity testing at the expense of the grower of fruit which is smaller than the standards set forth in subsection (a); and
- (2) release for marketing fruit proven by such testing to be mature under the standards established in this article.

NOTE: Authority cited: Sections 14, 407, 42684, and 44977, Food and Agricultural Code. Reference: Sections 42941 and 44973, Food and Agricultural Code.

- 1. New section filed 9–11–84; effective thirtieth day thereafter (Register 84, No. 37).
- 2. Amendment filed 11-7-88; operative 11-7-88 (Register 88, No. 46).
- Amendment of section and Note filed 9-16-92; operative 9-16-92 (Register 92, No. 38).
- 4. Amendment filed 9-29-93; operative 10-29-93 (Register 93, No. 40).
- 5. Amendment of newly designated subsection (a) and new subsections (b)–(c) filed 12–6–96 as an emergency; operative 12–6–96 (Register 96, No. 49). A Certificate of Compliance must be transmitted to OAL by 4–5–97 or emergency language will be repealed by operation of law on the following day.

- Reinstatement of section as it existed prior to 12–6–98 emergency amendment by operation of Government Code section 11346.1(f) (Register 98, No. 5).
- 7. Amendment of subsection (a) and new subsections (b)–(c) filed 1–26–98; operative 1–26–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 5).
- Amendment filed 10–16–98; operative 10–16–98 pursuant to Government Code section 11343.4(d) (Register 98, No. 42).

§ 1408.23. Avocados, Field Pack Operation.

Avocado producers and handlers may engage in field packing operations, subject to the following conditions:

- (a) The handler shall notify the director at least 24 hours in advance of the time and the location where field packing is to take place.
- (b) If the inspection and certification fee established pursuant to Food and Agricultural Code Section 44975 is insufficient to cover the cost of such inspection and certification, the director may require, in lieu of the standard inspection and certification fee, that the packer pay for inspection services at any hourly rate and for mileage expenses to and from the place of packing. A schedule of such fees and charges shall be made available upon request.
- (c) During the maturity season for any variety, field-packed avocados shall not be transported from the point of packing without first obtaining an inspection by an enforcing officer, unless the field packer maintains a central staging area where all field-packed fruit is transported and stored prior to marketing, which location in the determination of the director is deemed suitable for inspection and certification.
- (d) When the director has released a variety as being mature, the director may specify central locations to which field-packed avocado containers may be transported for inspection. The standard inspection and certification fee shall be in effect at any such inspection station.

Article 12. Bell Peppers

§ 1410. Bell Peppers, Decay and Insect Damage Defined.

Bell Peppers shall be considered as damaged when:

- (a) Decay affects any portion of the pepper, except the stem.
- (b) Insect injury affects any portion of the pepper, except the hard core. However, the presence of the insect in the pepper shall be considered cause for rejection.

- 3. Repealer filed 10–1–92; operative 10–1–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 40).

§ 1412.3. Berries, Standard Containers.

NOTE: Authority: Sections 14, 407, and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New sections 1401, 1402, 1403 filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from section 1401 filed I-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4–24–85; effective upon filing pursuant to Government Code section 11346.2(d) (Register 85, No. 17).
- 4. Amendment of section filed 8-16-91; operative 9-16-91 (Register 91, No. 50).
- Repealer filed 10–1–92; operative 10–1–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 40).

Article 14. Broccoli

§ 1414. Broccoli, Standards.

Italian sprouting broccoli shall be free from the following defects:

- (a) Mold, decay, and worm or other insect injury.
- (b) Serious damage which is due to overmaturity or other causes. Note: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1414.1. Broccoli, Damage Defined.

- (a) Damage is serious due to overmaturity if more than three of the flower buds on one stalk are opened to the extent that the normal flower color is readily visible.
- (b) Damage due to other causes is serious when any cause wastes 10 percent, or more, by volume, of any one stalk.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1414.2. Broccoli, Tolerances.

Not more than 10 percent, by count, of a representative sample of broccoli may be below the requirements prescribed by this article. Not more than one–half of this tolerance shall be allowed for any one cause.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1414.3. Broccoli, Markings on Containers.

HISTORY

- 1. Renumbering from Section 1402 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

Article 15. Brussels Sprouts

§ 1416. Brussels Sprouts, Standards.

Brussels sprouts shall be free from the following defects:

- (a) Mold, decay, burst heads, insect larvae, and damage due to other causes.
- (b) Serious damage which is due to insects. Damage is serious when 50 percent, by volume, of the individual sprout is affected by insect injury or by the presence of insects.
- (c) Damage due to other causes is serious when any cause wastes 10 percent, or more, by volume, of any one sprout.

- Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1416.3. Brussels Sprouts, Markings on Containers.

HISTORY

- 1. Renumbering from Section 1403 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

Article 16. Cabbage

§ 1418. Cabbage, Exceptions.

- (a) Cabbage which is sold to the Armed Forces of the United States and labeled in accordance with U.S. Military requirements need not comply with standard container requirements or marking requirements.
- (b) Cabbage to be used for shredding, chopping or sectioning for salad products need not comply with Section 1418.5 as to containers.
- (c) Red Cabbage need not comply with Section 1418.3 as to quality or 1418.5 as to containers

NOTE: Authority cited for Article 16: Sections 42 and 43, Chapter 1404, Statutes of 1974 and Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1403.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1418.1. Cabbage Standards.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-16-82; effective thirtieth day thereafter (Register 82, No. 38).

§ 1418.2. Cabbage Requirements.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-16-82; effective thirtieth day thereafter (Register 82, No. 38).

§ 1418.3. Cabbage, Quality Requirements.

All cabbage shall conform to the United States Commercial grade or better.

HISTORY

- New sections (1403.1 through 1403.4) filed 10-5-72; effective thirtieth day thereafter (Register 72, No. 41).
- 2. Renumbering from Section 1403.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1418.4. Cabbage, Container Markings.

HISTORY

- Renumbering from Section 1403.3 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4–30–75; designated effective 6–1–75 (Register 75, No. 18).

§ 1418.5. Cabbage, Standard Containers.

All cabbage shall be in standard container number 64.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Renumbering from Section 1403.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

- 2. Amendment filed 3-3-78; effective thirtieth day thereafter (Register 78, No. 9).
- 3. Amendment filed 11–25–80; effective thirtieth day thereafter (Register 80, No. 48).

Article 17. Cantaloupes

§ 1420. Cantaloupes, Exemption, Section 1420.10, California Administrative Code.

In order for cantaloupes which are sold "directly to consumers" to qualify for the exemption provided in Section 1420.10 of the California Administrative Code, the location of the retail stand, operated by a producer, shall be considered as "near the point of production" only when said retail stand is located nearest to the point of production where consumers are available.

NOTE: Authority cited: Section 85, Chap. 1470, Stats. 1970, and Sections 407 and 42681, Food and Agricultural Code. Additional authority cited for Article 17: Sections 42 and 43, Chapter 1404, Statutes of 1974 and Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2). For prior history, see Register 59, No. 12.
- 2. Amendment and renumbering from Section 1404.1 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1420.1. Cantaloupes, Mature.

"Mature" in the case of a cantaloupe means that the cantaloupe complies with all of the following requirements:

- (a) The appearance of the outside indicates maturity.
- (b) The arils which surround the seed during the development of maturity have been absorbed.
- (c) The juice of the edible portion contains not less than 8 percent soluble solids as determined by the standard hand refractometer.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1420.2. Cantaloupes, Soluble Solids Determined.

The soluble solids content of the edible portion of cantaloupes shall be determined by extracting the juice from two plugs of the flesh, one from each of opposite sides of the melons, and taken at approximately one—half of the distance between the stem and blossom ends. The plugs shall be approximately one—half of an inch in diameter. The portion of the plug three—eighths of an inch from the outside edge of the rind shall not be included as the edible portion of the plug of flesh.

NOTE: Authority cited: Sections 407, 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Editorial correction of punctuation (Register 79, No. 22).

§ 1420.3. Cantaloupes, Standards.

Cantaloupes shall be mature but not overripe, not poorly netted, and free from any of the following defects:

- (a) Mold, decay, and insect injury which has penetrated or damaged the edible portion of the cantaloupe.
- (b) Serious damage which is due to bruises, sunburn, growth cracks, cuts, sponginess, flabbiness, wilting, or other causes. Damage to any one cantaloupe is not serious unless it affects the edible portion of the individual cantaloupe.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1420.4. Cantaloupes, Defects Defined.

(a) "Poorly netted" as used in Section 1420.3, California Administrative Code means the cantaloupe is rejectable if more than 20 percent of the surface area has an absence of netting, also, if more than one—third of the surface area has very flat netting (actual netting shows, but is flat, as compared to absence of netting) the cantaloupe is also rejectable.

- (b) "Flabby and spongy" as used in Section 1420.3, California Administrative Code means there must be damage to the flesh from this cause before the cantaloupe is considered rejectable.
 - (c) "Bruising."

The normal amount of bruising caused by packing does not cause the cantaloupe to lose its fresh taste, it is not slimy, and should not be rejected unless there is substantial damage to the edible portion.

(d) "Sunburn."

This defect occurs as a greening or possibly a black spot on the surface and may be obscured by the netting itself. In the edible portion there will be a watery appearance, however, if that streak of watery appearance is as wide as one–fourth the depth of the edible portion or shows some sort of breakdown, it is considered rejectable.

(e) "Internal Decline."

This defect shows at the inside edge of the flesh, next to the seed cavity, sometimes on the surface at this point, and sometimes in the flesh; if an area of one square inch, either on the surface or in the flesh, shows this water soaked appearance from internal decline, the cantaloupe shall be rejected.

(f) "Mold in Stem Scar."

If the mold wipes out clean with the finger, the cantaloupe shall not be rejected, however, if the flesh immediately under the mold spot is slimy or decayed, the cantaloupe shall be rejected.

(g) "Maturity."

Cantaloupes imported from other states shall be required to test 8 percent soluble solids and have the other indications of maturity required in Section 1420.1, California Administrative Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10)
- 2. Amendment of subsections (a) and (b) filed 1–4–71, as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment filed 4–23–71; effective thirtieth day thereafter (Register 71, No. 17).
- 4. Amendment and renumbering from Section 1404 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1420.5. Cantaloupes, Tolerances.

Not more than 10 percent, by count, of the cantaloupes in any one container of bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance shall be allowed for any one cause.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1420.6. Cantaloupes, Markings on Containers.

HISTORY

- 1. Renumbering from Section 1404.11 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1420.7. Cantaloupes, Standard Containers and Packs.

The standard containers and pack for cantaloupes, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported, or sold in any container, are as prescribed in Section 1420.10 and 1420.13.

NOTE: Authority cited: Sections 407, 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1404.4 through 1404.11 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from Section 1404.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 6-1-79; effective thirtieth day thereafter (Register 79, No. 22).

§ 1420.8. Cantaloupes, Standard Pack and Counts.

NOTE: Authority cited: Sections 407, 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Repealer filed 6–1–79; effective thirtieth day thereafter (Register 79, No. 22). For prior history, see Register 75, No. 4.

§ 1420.9. Cantaloupes, Closed Container.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1404.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of section and new Note filed 10–9–2002; operative 11–8–2002 (Register 2002, No. 41).

§ 1420.10. Cantaloupes, Standard Containers and Pack Requirements.

All cantaloupes shall be packed in regular compact arrangement in standard container numbers 39, 41, 42, 43, 44, 44A, 44C, 44D, 44E, 44H, 44I, 44J, 44K, 44N, 44P, 44O, and 44R.

This Section does not apply to: cantaloupes which are in a retail establishment in possession of a retailer for the purpose of a resale directly to consumers.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–1–79; effective thirtieth day thereafter (Register 79, No. 22). For prior history, see Register 77, No. 25.
- Amendment of section and Note filed 5-8-95; operative 5-8-95 pursuant to Government Code section 11343.4(d) (Register 95, No. 19).
- 3. Amendment of first paragraph and amendment of Note filed 10–9–2002; operative 11–8–2002 (Register 2002, No. 41).
- 4. Amendment of first paragraph filed 4–28–2006; operative 5–28–2006 (Register 2006, No. 17).

§ 1420.11. Cantaloupe, Consumer Definition.

As used in this group, "consumer" means a person that buys cantaloupes for use as food and not for resale.

HISTORY

1. Renumbering from Section 1404.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1420.12. Cantaloupes, Packing Exceptions.

NOTE: Authority cited: Sections 407, 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Repealer filed 6–1–79; effective thirtieth day thereafter (Register 79, No. 22). For prior history, see Register 78, No. 39; 78, No. 22).

§ 1420.13. Cantaloupes, Virtually Uniform in Size and Count.

Cantaloupes which are packed shall be virtually uniform in size and there shall be approximately the same numerical count of uniformly sized cantaloupes in each layer throughout the container.

HISTORY

1. Renumbering from Section 1404.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1422.15. Carrots, Tolerances.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Editorial correction adding NOTE filed 6-28-83 (Register 83, No. 27)
- Repealer filed 10–15–92; operative 10–15–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 42).

§ 1422.16. Carrots, Marking Requirements.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1405.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For prior history, see Register 74, No. 16.
- 2. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).
- Amendment of subsection (a) filed 11-8-78; effective thirtieth day thereafter (Register 78, No. 45).
- 4. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).
- Repealer filed 10–15–92; operative 10–15–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 42).

§ 1422.17. Carrots, Standard Containers.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 6–9–71; effective thirtieth day thereafter (Register 71, No. 24).
- 2. Renumbering from section 1405.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4–1–77; effective thirtieth day thereafter (Register 77, No. 14).
- 4. Amendment filed 3-3-78; effective thirtieth day thereafter (Register 78, No. 9).
- 5. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).
- Amendment filed 9–28–83; designated effective 9–28–83 pursuant to Government Code section 11346.2(d) (Register 83, No. 40).
- 7. Amendment of text and NOTE and new subsections (a)–(c) filed 9–9–92; operative 10–9–92 (Register 92, No. 37).
- Repealer filed 10–15–92; operative 10–15–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 42).

§ 1422.18. Carrots, General Provisions for Standard Containers and Packs.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1405.3 through 1405.7 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- Renumbering from Section 1405.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 6-28-83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1422.19. Carrots, Packing Requirements.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Amendment filed 3-3-78; effective thirtieth day thereafter (Register 78, No. 9).
 For prior history, see Register 77, No. 14.
- 2. Repealer filed 6-28-83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1422.20. Carrots, Varietal Types.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1405.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Editorial correction adding Note filed 6-28-83 (Register 83, No. 27).
- Repealer filed 10–15–92; operative 10–15–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 42).

Article 19. Cauliflower

§ 1424. Cauliflower, Standards.

Cauliflower shall be free from any form of the defects:

- (a) Rot and worm or other insect injury which has penetrated or damaged the curd.
- (b) Serious damage due to freezing, sunburn, or other causes. Serious damage is defined as causing waste of 10 percent or more of the edible portion of the individual cauliflower.

NOTE: : Authority cited: Sections 14, 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Amendment of subsection (b) filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.1. Cauliflower, Aphis Damage.

Section 1424 (a) states "insect injury which has penetrated or damaged the curd." The presence of insects on the cauliflower curd is not serious, unless aphis honeydew soaked into the curd is difficult to wash out in the normal preparation for use.

NOTE: Authority cited: Sections 14, 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No.10)
- 2. Renumbering from section 1406 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.2. Cauliflower, Tolerances.

Not more than 5 percent, by count, of the heads in any lot of containers or bulk lot may be below the requirements prescribed by this article, but no container or bulk lot of less than 10 heads shall have more than 20 percent, by count, of heads below these requirements.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- Amendment filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.3. Cauliflower, Container Marketing Requirements.

Containers of wrapped cauliflower, except individually wrapped heads or consumer packages, shall be clearly and conspicuously marked on one outside end or side with the exact number of heads or curds in the container

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1406.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- 3. Amendment filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.4. Cauliflower, Container Requirements.

(a) All packed cauliflower which is not wrapped shall be in containers 46D, 46E, or 46F. Other size containers may be used provided each container is clearly and conspicuously marked on the top or on one outside end or side with the words "irregular container."

(b) Notwithstanding section 1424.9, individually wrapped heads of cauliflower may also be shipped in other size containers if the containers are marked as specified above. The annual shipments shall not exceed 20% of the shipper's total cauliflower shipments in the preceding year. If there were no shipments of cauliflower made during the previous year, the total amount of cauliflower shipped during the current year shall be estimated and used in place of the prior year's total.

NOTE: Authority cited: Sections 14, 407, and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–25–78; effective thirtieth day thereafter (Register 78, No. 4). For prior history, see Register 76, No. 24.
- 2. Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- 3. Amendment filed 10-6-87; operative 11-5-87 (Register 87, No. 42).
- Amendment filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).
- Amendment of subsection (b) filed 9-6-91; operative 10-7-91 (Register 91, No. 51).

§ 1424.5. Cauliflower, Standard Containers.

The standard containers for cauliflower are containers 46D, 46E, and 46E

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–25–78; effective thirtieth day thereafter (Register 78, No. 4). For prior history, see Register 76, No. 24.
- 2. Amendment filed 10-6-87; operative 11-5-87 (Register 87, No. 42).
- 3. Amendment filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.6. Cauliflower, Standard Containers and Packs.

NOTE: Authority cited: Sections 14, 407 and 42862, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New sections 1406.1 through 1406.9 filed 1-4-71 as an emergency; effective upon filing Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from section 1406.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.7. Cauliflower, Curd Measurement.

Curds shall be measured across the center face of the curd at the widest dimension, not including wrapper leaves.

NOTE: Authority cited: Sections 14, 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1406.5 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- New NOTE filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.8. Cauliflower, Properly Trimmed.

Cauliflower packed in any container shall be properly trimmed.

As used in this section, "properly trimmed" means the number of jacked leaves is limited to those necessary to protect the head of the cauliflower.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1406.9 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment and new NOTE filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.9. Cauliflower, Wrapping and Packing Requirements.

(a) Except as provided in subsection (b), heads or curds of cauliflower when wrapped shall be individually wrapped and fairly tightly packed in containers 46D, 46E, or 46F and contain one of the standard pack and counts of the designated size and diameter:

Sta	n	d	a	re	1	Dι	ıc	k	: 6	a	n	d	c	:0	u	n	t													(Cu	ır	d	si:	z.e	i	n i	nc	he	25

12																																	5	- 1	/4	. 2	ind	d c	v	er
16																				 															4	:	ıno	d (V	èг
20																				 																	u	nd	er	4

(b) Curds too large to pack as a 12 count in containers 46E or 46F and specified for wrapped and packed cauliflower may be wrapped and packed with a lesser count.

Container 46D shall only be packed with a 9 count or less measuring 6 1/2 inches or more in diameter.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–25–78; effective thirtieth day thereafter (Register 78, No. 4). For prior history, see Register 77, No. 24.
- 2. Amendment filed 10-6-87; operative 11-5-87 (Register 87, No. 42).
- Amendment filed 4–25–90; operative 4–25–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.10. Cauliflower, Sizing Tolerances, 16 Heads or Less.

One container, in any lot of containers of cauliflower packed with 16 heads or less in each container, may not have more than three heads smaller than the minimum diameter specified in section 1424.9. The remaining containers in the lot may not have more than two heads smaller than the minimum diameter specified in section 1424.9.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from section 1406.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment and new NOTE filed 4-25-90; operative 4-25-90 pursuant to Government Code section 11346.2(d) (Register 90, No. 21).

§ 1424.11. Cauliflower, Sizing, Tolerance, 20 Heads.

One container, in any lot of containers of cauliflower packed with 20 heads in each container, may not have more than three heads larger than the maximum diameter specified in section 1424.9. The remaining containers in the lot may not have more than two heads larger than the maximum diameter specified in section 1424.9.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from section 1406.8 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment and new NOTE filed 4–25–90; operative pursuant to Government Code section 11346.2 (d) (Register 90, No. 21).

Article 20. Celery

§ 1426. Celery, Standards.

Celery shall be free from:

- (a) Pink rot and decay.
- (b) Serious damage due to blackheart, insects, seed stems, and pithy condition from any cause.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

2. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27)

§ 1426.1. Celery, Serious Damage.

Serious damage means injury which is due to any of the following: (a) Blackheart, which is decayed or wet, and which affects one or more

- (a) Blackheart, which is decayed or wet, and which affects one or more branches composing the heart of the stalk.
- (b) Insects, if more than four branches are each damaged by more than an aggregate area of one square inch. Mere presence of insects is not serious damage.
- (c) Seed stem, the length of which is more than four times the diameter of the stalk measured at a point two inches above the point of the attachment of the outer branches to the root.
- (d) Pithiness, a distinct open texture with air spaces in the central portion of more than four branches, will be considered serious damage if this condition affects more than two-thirds of the distance between the base of the petiole and the point where the leaf branches are attached. This two-thirds distance need not be contiguous. Distinct open texture means openings which total more than one-fourth the distance across the surface of a transverse cut in the celery branch.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.2. Celery, Stalk.

"Stalks" means the individual celery plant.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day after (Register 75, No. 4).
- Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.3. Celery, Pithy Condition.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.4. Celery, Defects Defined.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment of subsection (b) filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1407 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 6-28-83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.5. Celery, Tolerances.

Except as otherwise provided in Section 1426.6, not more than 10 percent, by count, of the stalks of celery in any one container or bulk lot may be below the requirements prescribed by this article. Not more than one—half of this tolerance shall be allowed for any one cause.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.6. Celery, Additional Tolerance.

An additional tolerance of 10 percent by count of the celery in any one container or bulk lot shall be permitted for stalks of celery which are damaged by a pithy condition.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83. No. 27).

§ 1426.7. Celery, Seed Stems.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- 3. Repealer filed 6-28-83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.8. Celery, Consumer Definition.

"Consumer" means a person that buys celery for use as food and not for resale.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.5, see present Section 1407.5 (Register 73, No. 46).
- 2. Renumbering from Section 1407.13 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No 27).

§ 1426.9. Celery, Consumer Packages Definition.

"Consumer package" means any closed container or package which will hold not more than 15 pounds net when full, including packages of celery hearts, and which is intended for sale to the consumer in its unbroken form.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.7, see present Section 1407.5 (Register 73, No. 46).
- 2. Renumbering from Section 1407.14 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27)

§ 1426.10. Celery, Marking Requirements.

In addition to the basic marking requirements, as required by Section 1359, every nonconsumer-type container of celery shall be clearly and conspicuously marked with the number of stalks in the container. The count may be expressed numerically, or in terms of dozens or one-half dozens.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.12, see present Section 1407.5 (Register 73, No. 46).
- 2. Renumbering from Section 1407.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).
- 4. Amendment of subsection (a) filed 11-8-78; effective thirtieth day thereafter (Register 78, No. 45).
- Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.11. Celery, Count and Dozen Size Markings.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.13, see present Section 1407.5 (Register 73, No. 46).
- 2. Renumbering from Section 1407.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 6-28-83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.12. Celery, Count Tolerance.

HISTORY

1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.14, see present Section 1407.5 (Register 73, No. 46).

- 2. Renumbering from Section 1407.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

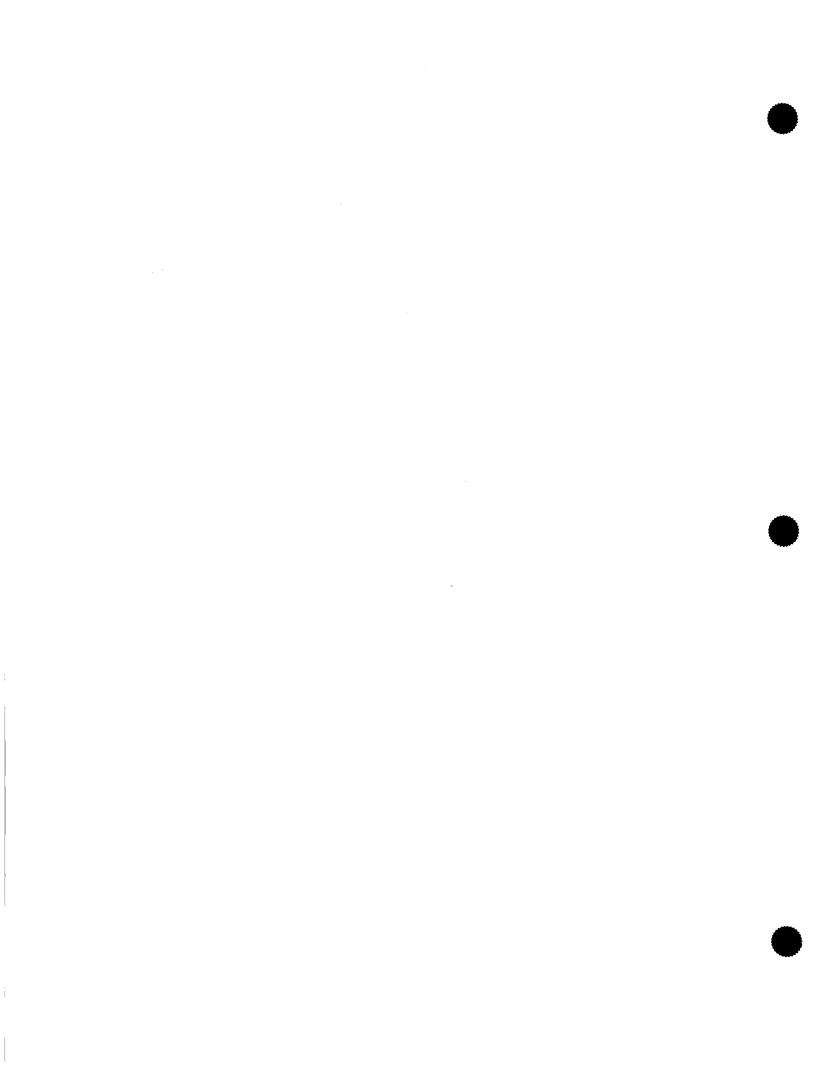

§ 1426.13. Celery, Hearts Removed.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.15, see present Section 1407.5 (Register 73, No. 46).
- 2. Renumbering from Section 1407.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

[The next page is 153.]

- 3. Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- 4. Repealer filed 6-28-83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.14. Celery, General Provisions for Standard Containers and Packs.

NOTE: Authority cited: Section 85, Chap. 1470, Stats. 1970, and Sections 407 and 42681, Food and Agricultural Code.

HISTORY

- 1. New Sections 1407.2 through 1407.15 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Repealer of Section 1407.2 and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46).
- 3. Amendment and renumbering from Section 1407.5 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 3-3-78; effective thirtieth day thereafter (Register 78, No. 9).

§ 1426.15. Celery, Standard Containers.

All celery, except when in consumer packages, shall be placed in containers 45E, 45J, 45K, 45L, and 45R. All consumer packages of celery shall be placed in master containers 45G, 45H, and 45I. Containers 45F, 45M and 45S may be used either as master containers for consumer packages or as flat pack containers. All containers for celery shall be closed or lidded, provided that this requirement shall not apply to container 45S. NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–3–78; effective thirtieth day thereafter (Register 78, No. 9). For prior history, see Register 75, No. 40.
- 2. Amendment filed 5–15–81; effective thirtieth day thereafter (Register 81, No. 20).
- 3. Amendment filed 4–19–85; effective thirtieth day thereafter (Register 85, No. 16).
- 4. Amendment filed 11-26-2001; operative 12-26-2001 (Register 2001, No. 48).

§ 1426.16. Celery, Definition of "Closed" or "Lidded."

"Closed" or "lidded," as applied to containers of celery, means:

- (a) In the case of any fiberboard container, that the opening is completely covered, except for necessary ventilation openings, or gaps, with material of similar quality and strength to the adjoining portion of the container.
- (b) In the case of any wooden, wirebound, or other container, that 40 percent or more of the opening is covered with material that is similar to that being used in the construction of the sides and bottom of such container, which is securely attached to the top.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.4, see present Section 1407.5 (Register 73, No. 46).
- 2. Renumbering from Section 1407.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 6–28–83; effective thirtieth day thereafter (Register 83, No. 27).

§ 1426.17. Celery, Standard Container Exceptions.

The container requirements of this group do not apply to any of the following:

- (a) Celery which is in a retail establishment in the possession of a retailer for the purpose of resale directly to consumers, or celery which is sold by a producer that is regularly engaged in the production of celery directly to consumers on the premises where it is produced or at a retail stand which is operated by such producer near the point of production, which in no case shall be outside of the county in which the celery was produced.
- (b) Celery which is prepared or packed for shipment to another packing plant which is located in this state for the purpose of further grading and packing into consumer packages, subject to the provisions of Sections 42881, 42882, 42883, 42884, 42885 and 42886 of the Food and Agricultural Code which relate to the control of such shipments.

(c) Celery which is being transported out of the state for prepackaging if a permit has first been obtained from an enforcing officer.

An enforcing officer may issue a permit if he determines that the celery complies with the requirements of this chapter, except as to containers, and is to be delivered pursuant to a bona fide contract of sale direct to a purchaser for further grading and packing into consumer packages.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 11–16–73; effective thirtieth day thereafter (Register 73, No. 46). For history of former Section 1407.6, see present Section 1407.5 (Register 73, No. 46).
- 2. Renumbering from Section 1407.15 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Editorial correction adding NOTE filed 6-28-83 (Register 83, No. 27).

§ 1426.18. Celery Container, Slight Bulge.

Slight bulge means that when celery is placed in container number 45L, the maximum bulge of the lid, when tightly nailed, stapled or glued in place, does not exceed one inch when measured from the top of the headpiece of the container to the high point of the outside top of the lid bulge, which is normally at the center of the lid.

§ 1428.1. Cherries, Permit.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.2. Cherries, Compliance.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.3. Cherries, Mature, Red or Black Variety.

No red or black variety of cherries shall be considered mature unless at the time of picking the entire surface of the cherries has attained at least a solid, light red color.

 $Note: Authority\ cited: Sections\ 407\ and\ 42684, Food\ and\ Agricultural\ Code.\ Reference:\ Section\ 42941,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Editorial correction adding new NOTE filed 5-10-83 (Register 83, No. 20).

§ 1428.4. Cherries, Standards.

Cherries shall be mature but not overripe and free from the following defects:

- (a) Insect injury or bird pecks which have penetrated or damaged the flesh, unsealed skin breaks, mold, brown rot, and decay.
- (b) Growth cracks or cracks or splits over three-eighths inch in length even though well healed. Well healed shoulder cracks shall, however, be allowed regardless of length.
- (c) Serious damage due to sunburn, shriveling, sponginess, abnormal softening, or other causes.
- (d) Bruising or internal discoloration shall be considered serious damage due to other causes when discoloration is visible externally affecting an aggregate area of 50 percent or more of the fruit surface.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. New subsection (d) filed 4-10-79; effective thirtieth day thereafter (Register 79, No. 15).
- 3. Amendment of subsection (d) filed 11–25–80; effective thirtieth day thereafter (Register 80, No. 48).
- Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.5. Cherries, Internal Discoloration.

NOTE: Authority cited: Sections 407, 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Repealer filed 4–10–79; effective thirtieth day thereafter (Register 79, No. 15). For former history, see Registers 75, No. 4 and 70, No. 12.

§ 1428.6. Cherries, Tolerance.

Not more than 10 percent, by count, of the cherries in any one container or bulk lot, may be below the requirements which are prescribed by this article. Not more than one—half of this tolerance shall be allowed for any one cause. In addition, 5 percent of the cherries in any one container or bulk lot may be slightly below the maturity requirements which are prescribed by this article. In no case, however, may such cherries show any green areas, except cherries of the Bing variety which test not less than 16 percent, or cherries of the Tartarian variety, which test not less than 14 percent, soluble solids in a composite sample of the juice from not less than 10 representative cherries as shown by a standard refractometer instrument

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Editorial correction filed 5-10-83 (Register 83, No. 20).

§ 1428.7. Cherries—Extra Tolerance for Immaturity.

The regular tolerance of 10 percent of cherries failing to meet the standards in Section 1428.6 with a limitation of 5 percent for any one of such requirements applies to maturity also. Other defects permitting, 5 percent of the cherries could be immature without restriction.

The section further provides as follows: "In addition, 5 percent of the cherries in any one container or bulk lot may be slightly below the maturity requirements of this section, but in no case may such cherries show any green areas, excepting the Bing variety when testing not less than 16 percent and the Tartarian variety when testing not less than 14 percent soluble solids in a composite sample of the juice from not less than 10 representative cherries as shown by a standard refractometer instrument."

When applying the additional tolerance for cherries which may be slightly below the maturity requirements, in containers where the regular 10 and 5 percent tolerance is used by other defects, an additional 5 percent may be below the solid light red color; providing red and black cherries in this additional tolerance do not show any green areas except that cherries of the Bing and Tartarian varieties may show green areas if such cherries test not less than 16 percent and 14 percent respectively as defined by law.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1410 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Editorial correction adding new NOTE filed 5-10-83 (Register 83, No. 20).

§ 1428.8. Cherries, Markings on Containers.

In addition to the basic marking requirements of Section 1359, every nonconsumer type container of cherries shall be clearly and conspicuously marked with the following information:

- (a) The name of the variety, if known, or if not known, the words "Unknown Variety."
- (b) If two or more varieties are placed in the same container, it shall be marked with the words "Mixed Varieties."

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. Renumbering from Section 1411.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).
- Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.9. Cherries, Mixed Varieties.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1411.8 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.10. Cherries, Packed Row Size.

Every container of row-packed cherries shall be marked with the number of rows of cherries which are packed laterally across the end of the container, directly followed by the word "row" or "rows" or the letter "R" in like size letters. No row size marking is, however, permitted for containers of less than 14-row size and smaller in the Tartarian variety of cherries and less than 13-row size and smaller in the Bing variety of cherries

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 2–28–74; effective thirtieth day thereafter (Register 74, No. 9).
- 2. Renumbering from Section 1411.9 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Editorial correction adding new NOTE filed 5-10-83 (Register 83, No. 20).

§ 1428.11. Cherries Loose in a Container Marked with Row Size.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment of subsection (c) and repealer of subsection (d) filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment filed 2–28–74; effective thirtieth day thereafter (Register 74, No. 9).
- 4. Renumbering from Section 1408 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Repealer filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.12. Cherries, Loose; Marking and Size Requirements.

Every nonconsumer container of loose cherries shall be clearly and conspicuously marked with one of the following:

- (a) The row size, as determined by the "standard cherry row size" approved by the department, followed by the term "row size." No row size marking is permitted for containers of less than 14–row size and smaller in the Tartarian variety cherries and less than 13–row size and smaller in the Bing variety of cherries.
- (b) The "minimum diameter" of the cherries in the container expressed in inches or fractions of an inch followed by the term "inch minimum diameter," "inches minimum diameter," or a proper abbreviation or variation of such designation. No such minimum diameter marking shall be permitted on containers of Tartarian variety cherries which are less than 46/64 inch minimum diameter and Bing variety cherries which are less than 48/64 inch minimum diameter.
- (c) Containers of cherries packed by the face and fill method shall not be required to be marked with a size designation, provided that:
- (1) When the containers are marked with a size designation, the cherries in both the face and the fill shall comply with the size marked on the container.
- (2) When the containers are not marked with a size designation, all of the cherries in the fill may be one full size smaller than cherries in the face. Not more than 10%, by count, of the cherries in the fill may be two full sizes smaller than the cherries in the face.
- (3) The minimum size restriction specified above for the Tartarian and Bing varieties shall apply to the face and fill method of pack.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Amendment filed 2–28–74; effective thirtieth day thereafter (Register 74, No. 9).
- Renumbering from Section 1411.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 3–21–75; effective thirtieth day thereafter (Register 75, No. 12).
- Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).
- 6. New subsections (c)–(c)(3) filed 5–16–2002; operative 6–15–2002 (Register 2002, No. 20).

§ 1428.13. Cherries, Loose; Row Size or Minimum Diameter.

A container of loose cherries marked with a row size designation or a minimum diameter shall not have more than 10 percent of the cherries in such container smaller than the size specified.

The row size number is that number of cherries of uniform size whose aggregate width will equal 10 1/2 inches.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 2–28–74; effective thirtieth day thereafter (Register 74, No. 9).
- Renumbering from Section 1411.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 3–21–75; effective thirtieth day thereafter (Register 75, No. 12).
- 4. Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.14. Cherries, Diameter.

"Diameter" means the greatest dimension measured at a right angle to a line from the stem to the blossom end of the cherry.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 2–28–74; effective thirtieth day thereafter (Register 74, No. 9).
- Renumbering from Section 1411.5 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Editorial correction adding new NOTE filed 5-10-83 (Register 83, No. 20).

§ 1428.15. Cherries, Application of Size Tolerances.

Individual containers may have up to one and one-half times the tolerance specified, provided that the averages for the entire lot are within the tolerances specified for size.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–13–73; effective thirtieth day thereafter (Register 73, No. 15).
- 2.Amendment filed 2–28–74; effective thirtieth day thereafter (Register 74, No. 9)
- 3. Renumbering from Section 1411.11 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.16. Cherries, Sample to Determine Size and Quality.

The official sample to determine size and quality shall be 50 cherries taken at random from each of the containers selected by the methods outlined under Section 1370.8. Each container sample of 50 cherries shall be checked separately.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. New section filed 2-28-74; effective thirtieth day thereafter (Register 74, No. 9)
- 2. Amendment and renumbering from Section 1411.12 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

- 3. Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).
- 4. Amendment filed 5-16-2002; operative 6-15-2002 (Register 2002, No. 20).

§ 1428.17. Cherries, Standard Container Requirements.

Cherries shall be in standard container numbers 4, 4A, 12A, 12C, 12D, or 12E.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1411.1 through 1411.10 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment filed 4–13–73; effective thirtieth day thereafter (Register 73, No. 15).
- 3. Renumbering from Section 1411.1 filed 1–21–75; effective thirtieth day thereafter (Register 75 No. 4).
- 4. Editorial correction of NOTE filed 5-10-83 (Register 83, No. 20).
- Amendment filed 5-5-86; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 86, No. 19).
- Amendment of section and Note filed 7–17–2000; operative 8–16–2000 (Register 2000, No. 29).
- 7. Amendment filed 1-6-2003; operative 2-5-2003 (Register 2003, No. 2).

§ 1428.18. Cherries, Standard Container Nos. 12A and 12C.

Container number 12A shall be standard for cherries only when packed by the "face and fill" method.

Container number 12C shall be standard for cherries only when one outside end of the container is clearly and conspicuously marked with the net weight which may not exceed 18 pounds.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Amendment filed 2–28–74; effective thirtieth day thereafter (Register 74, No. 9).
- 2. Renumbering from Section 1411.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.19. Cherries, Tolerance for Doubles.

Cherries shall be free from doubles except as follows:

- (a) A tolerance of 10 percent, by count, shall be allowed for doubles with both halves well developed, uniform in size, and mature.
- (b) A tolerance of 2 1/2 percent, by count, shall be allowed for doubles which have one portion that is not well developed.
- (c) Any amount of doubles shall be allowed if the container in which they are placed or packed is clearly and conspicuously marked with the words "Exceeds tolerance for doubles."

NOTE: Authority cited: Sections 407 and 2684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1411.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment of subsection (b) filed 11-8-78; effective thirtieth day thereafter (Register 78, No. 45).
- 3. Amendment filed 5–10–83; designated effective 5–10–83 pursuant to Government Code Section 11346.2(d) (Register 83, No. 20).

§ 1428.20. Cherries, Deceptive Pack (Doubles).

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1409 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 5-10-83; designated effective 5-10-83 pursuant to Government Code Section 11346.2(d)(Register 83, No. 20).

Article 22. Citrus

§ 1430. Citrus, Permit for By-Products Processing.

An enforcement officer may issue a written permit for transporting to a neighboring citrus fruit growing state citrus which fails to comply with the quality standards of this article. Such citrus shall be used only for processing, preserving, or manufacturing purposes. The permit may be issued upon compliance with the following requirements:

- (a) The enforcement officer has verification from a like official at destination that such citrus will be used only for by–product purposes.
- (b) The citrus is loose in bins that will hold 500 pounds or more, or in bulk loads
- (c) The permit is issued for and attached to each load or lot of citrus which is transported.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Sections 42941, Food and Agricultural Code.

HISTORY

- 1. Repealer and new section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4). For history of former section, see Register 74, No. 29.
- Repealer of former Section 1430 and renumbering and amendment of former Section 1430.2 to Section 1430 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 72, No. 41, and 71, No. 2.

§ 1430.1. Citrus, Permit for Transport to Repackaging Plant.

- (a) An enforcement officer shall issue a numbered written permit for transport of citrus to a repackaging plant, which shall be valid for one year from the date of issuance, unless revoked or suspended.
- (b) When a lot or shipment is accompanied by a permit issued pursuant to this section, the packing requirements contained in this article do not apply to transporting citrus in compliance with the following conditions:
- (1) The fruit is being transported intrastate in containers which hold more than 500 pounds.
- (2) A manifest or other shipping document which is clearly and conspicuously marked with the permit number accompanies each load transported.
- (3) The name of the repacking plant, the person operating such plant, and the address for which the shipment is destined are clearly marked on the manifest or other shipping document in a manner sufficiently explicit to allow immediate location of such packer and person.
- (c) As used in this section, "repackaging plant" means any location that has commercial equipment which is normally used for packaging citrus fruits in consumer-size packages.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former Section 1430.1 and renumbering and amendment of former Section 1430.7 to Section 1430.1 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.2. Citrus, Permits, Proof of Compliance.

A permittee under Section 1430 or Section 1430.1 shall, upon request of any enforcement officer, furnish such evidence as may reasonably be required as proof that the citrus fruits have been disposed of in accordance with the provisions of this article and the terms of the permit.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural

Code. Reference: Section 42941, Food and Agricultural Code.

- 1. New section filed 10-4-72; effective thirtieth day thereafter (Register 72, No. 41). For history of former section, see Register 71, No. 2.
- 2. Amendment and renumbering from Section 1413 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of former Section 1430.2 to Section 1430, and renumbering and amendment of former Section 1430.11 to Section 1430.2 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 74, No. 29.

§ 1430.3. Citrus, Permit Refusal, Suspension, or Revocation.

Any enforcement officer may refuse to issue, or may revoke or suspend any permit issued under the provisions of Section 1430 or Section 1430.1 if the permittee or applicant has previously violated any of the provisions of this article or the terms of any permit previously issued, or has failed to furnish the evidence which is required under Section 1430.2. NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former Section 1430.3 and renumbering of former Section 1430.12 to Section 1430.3 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.4. Citrus, Permit Appeal.

Any person may appeal to the director, within 10 days of receipt of an order of the enforcement officer refusing to issue, suspend, or revoke a permit issued pursuant to Section 1430 or Section 1430.1. Any such or—

[The next page is 157.]

der shall be in writing. The applicant or permittee shall not operate without a permit pending the disposition of the application or petition.

The proceedings for such hearing shall be conducted in accordance with Chapter 5 (commencing with Section 11500), Part 1, Division 3, Title 2 of the Government Code. However, the provisions of Section 11505 and 11506 shall not apply and the statement of issues or accusation, as the case may be, shall be delivered or mailed to the parties as provided in Section 11509.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Renumbering and amendment of former Section 1430.4 to Section 1430.8, and renumbering and amendment of former Section 1430.14 to Section 1430.4 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.5. Citrus, Maturity, Juice Extraction.

This section states the methods of juice extraction and procedures to be used in the soluble solids to acid ratio test for maturity testing.

- (a) Navel oranges. A citrus press as outlined in (c), below, shall be the only method of extracting juice to determine the soluble solids to acid ratio for Navel oranges. It shall be equipped and be capable of operating in a manner consistent with the provisions of this article. Each Navel orange packinghouse shall provide a citrus press on the premises and it shall be made available to the enforcement officer.
- (b) All citrus, other than Navel oranges. Juice extraction for measuring the soluble solids to acid ratio for maturity testing shall be determined by either the hand or electric method or the citrus press as outlined in (c), below.
- (c) Application. When the juice is extracted using a citrus press, the press shall meet the following criteria:
- (1) The press shall have an air or hydraulic line test valve which permits measurement of the air or hydraulic pressure delivered to the press. The valve shall be installed between the lubricator, if present, and the press.
- (2) The press shall be capable and calibrated to deliver and maintain 38 psi on the fruit and maintain that pressure for 30 seconds. The air or hydraulic line pressure necessary to maintain the 38 psi shall be determined by the director and shall be imprinted by die stamp on the body of each press. The press shall be mounted with a pressure gauge that will accurately measure the pressure being applied to the fruit. The press shall not increase the moisture content nor add any impurities to the fruit juice extracted. All surface areas that come in contact with the juice shall be of a material, or be plated with a material, that will not affect, or be affected by, the citrus juice being tested.
- (3) Procedure—citrus press. Place no more than one layer of fruit, both halves cut, face down, in the drawer at one time. Apply the air or hydraulic line pressure stamped on the press, on the fruit for a minimum of 30 seconds.
- (d) When the juice is extracted using a hand or electric juice extractor, the following apparatus and procedures shall be used:
- (1) The hand or electric juice extractor shall be any type approved by the director.
- (2) Cut each fruit in half at right angles to a straight line drawn between the stem and distal ends.
- (3) Each portion of each fruit in the sample shall be reamed to the extent that all free juice is extracted without contaminating the juice with the rind or other substances.

NOTE: Authority cited: Sections 14, 407, 42681, and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.5 and renumbering and amendment of former Section 1430.120.1 to Section 1430.5 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 77, No. 13.
- 3. Amendment filed 10-24-88; operative 10-24-88 (Register 88, No. 45).

§ 1430.6. Citrus, Maturity, Determining the Soluble Solids to Acid Ratio.

- (a) Application. Citrus soluble solids to acid ratio tests for maturity shall be performed in accordance with this section.
 - (b) Apparatus and Solutions Required.
- (1) A Brix hydrometer with graduations in tenths of a degree, standardized at 17.5 degrees C., and with a centigrade thermometer and correction attachment.
- (2) A cylinder tube, without a lip, suitable for floating the hydrometer without touching the sides or bottom.
 - (3) A 25 cubic centimeter pycnometer.
- (4) A 50 cubic centimeter burette with graduations in tenths of a cubic centimeter
- (5) A receptacle of sufficient size to retain all of the extracted juice. It shall be of a material, or be plated with a material, that will not affect, or be affected by, the citrus juice being tested.
 - (6) A 250-550 cubic centimeter Erlenmeyer titrating flask.
 - (7) A wire strainer for straining juice. (17–30 mesh per lineal inch.)
- (8) A standard solution of sodium hydroxide (NaOH), 1 cubic centimeter of which is equivalent to 0.01 gram (10 mgs.) of anhydrous citric acid (0.1562 normal).
 - (9) A solution of phenolphthalein in alcohol for use as indicator.
 - (c) Soluble Solids Content.
 - (1) Fill the tube with the properly extracted juice.
- (2) Float the hydrometer in the tube until the temperature reaches equilibrium (minimum of two minutes). Read the Brix scale, remove the hydrometer from the tube and immediately read the temperature correction, and record the corrected Brix reading to the nearest tenth (.1) degree.
 - (d) Acid Content.
- (1) Add exactly 25 cubic centimeters of the extracted juice into the Erlenmeyer flask with a 25 cubic centimeter pycnometer. After filling the pycnometer, replace the cap. With finger over the opening, rinse the exterior of the pycnometer. Pour the juice into the flask.
- (2) Using the pycnometer, add approximately 100 cubic centimeters of distilled water to the juice. Pour the first 25 cubic centimeters of water through the stem of the pycnometer to remove any juice that may be trapped.

Neutral tap water may be used in lieu of distilled water. Tap water may be checked to determine whether it is neutral by adding 20 drops of phenolphthalein solution to 100 cubic centimeters of the water. If this combination remains colorless and then turns pink by the addition of one drop of the standard solution of sodium hydroxide, the tap water is neutral and can be used instead of distilled water.

- (3) Add approximately 20 drops of indicator solution.
- (4) Titrate by the addition of the NaOH until the first definite indication of color (pink) is obtained.
- (e) Soluble Solids to Acid Ratio. The soluble solids to acid ratio shall be determined by use of the Citrus Maturity Ratio Tables compiled by the Department of Food and Agriculture.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–25–77; effective thirtieth day thereafter (Register 77, No. 13). For prior history, see Register 76, No. 19.
- Repealer of former Section 1430.6 and renumbering and amendment of former Section 1430.120 to Section 1430.6 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 75, No. 4.

§ 1430.7. Citrus, Defects.

Except as otherwise provided, all citrus fruit shall be free from the following defects:

- (a) Decay.
- (b) Mold or rot.
- (c) Insects or insect injury affecting the edible portion.
- (d) Unhealed skin breaks.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1423.31 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment for former Section 1430.7 to Section 1430.1, and new Section 1430.7 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.8. Citrus, Mix or Blend.

No person shall mix or blend citrus fruits which do not conform to the requirements of this article with other citrus fruits which conform to such requirements for the purpose of selling, marketing, or transporting the fruit which does not conform to the requirements of this article.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1423.32 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.8 and renumbering and amendment of former Section 1430.4 to Section 1430.8 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.9. Citrus, Official Sample to Determine Defects.

The representative sample to determine the percentage of defects, including freezing and drying, shall consist of not less than 100 fruit. If the lot consists of less than 500 fruit, the sample shall be 10 percent of the lot.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1423.33 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer and new section filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.9.1. Volume Cut Method, Defined.

- (a) Divide the fruit into three segments by making two transverse cuts, one-third the distance from the stem and blossom ends.
 - (b) Bisect the central segment by a parallel transverse cut.
- (c) Determine the percent of damage to the pulp found on each of the four surfaces of the central segment.
- (d) Total the percentages and divide by four to determine the total percentage of damage.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.10. Citrus, Uniform Size Requirement.

Citrus packed or placed loose in nonconsumer container numbers 58, 59, 63, 65, 66, or 67 shall be uniform in size.

- (a) None of the fruit in any container of oranges, lemons, grapefruit, minneolas, or Royal Mandarins may be more than 15 percent larger or smaller than the average diameter of the fruit in the container. This requirement shall apply to Royal Mandarins and minneolas only when the container is marked with the count and minimum diameter of the fruit.
- (b) None of the fruit in any container of tangerines or mandarins may vary more than one-half inch in diameter between fruits when the container is marked with a count description. This requirement shall apply to Royal Mandarins and minneolas only when the container is marked with the size designation of the fruit.
- (c) The diameter shall be taken at the widest portion of a cross section. NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from section 1423.34 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former section 1430.10 and renumbering and amendment of former section 1430.136 to section 1430.10 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 74, No. 36; 73, No. 25; and 73, No. 8.

- Amendment of section and Note filed 2-1-94; operative 2-1-94 (Register 94, No. 5).
- 4. Amendment of first paragraph and amendment of NOTE filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.11. Citrus, Official Sample to Determine Average Diameter and Size.

Compliance with the provisions of Sections 1430.26, 1430.32, 1430.45, and 1430.51, may be determined by a representative sample which shall consist of not less than 10 percent, by count, of the fruit in a container.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Renumbering from Section 1423.35 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Renumbering and amendment of former Section 1430.11 to Section 1430.2, and renumbering and amendment of former Section 1430.133 to Section 1430.11 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 55, No. 10.

§ 1430.12. Citrus, Packing Requirements for Standard Containers No. 58, 59, 61, 63, 65, 66, or 67.

Oranges, grapefruit, lemons, tangerines, and mandarins which are in standard container numbers 58, 59, 63, 65, 66, or 67 shall comply with all of the following requirements:

- (a) Be packed so that they will not readily move in the container.
- (b) The container shall not be overfilled. Overfill shall be determined by measuring the combined height of the individually stacked or palletized containers, exclusive of the top container or layer of containers. The total measurement shall be the average of two corner measurements and shall not exceed the combined inside depth of each container measured on one corner plus a variance of 1 3/4 inches per container which includes allowances for construction of top and bottom flaps, container manufacturing errors, and overfill.

Individual pallets of containers and individually stacked containers equivalent to the standard 42–container pallet shall be accepted or rejected on the basis of these requirements. Fruit in containers that fail these requirements shall be resized or placed in consumer containers or container 61.

- (c) The count of fruit in each container shall not be less than the count marked on the container, but may exceed the count by not more than 8 percent.
- (d) Tangerines or mandarins marked with the size designation need not comply with (c) above.
 - (e) All citrus may be placed loose in bin number 61.
- (f) The provisions of (a) and (b) above shall not apply to containers 65, 66 and 67.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1423.36 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of former section 1430.12 to section 1430.3, and renumbering and amendment of former section 1430.121 to section 1430.12 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 74, No. 36; 73, No. 25; and 73, No. 8.
- 3. Amendment of subsection (b) filed 6–6–88; operative 7–8–88 (Register 88, No. 25).
- 4. Amendment of subsection (d) filed 2–1–94; operative 2–1–94 (Register 94, No. 5).
- 5. Amendment of section heading and first paragraph, new subsection (f) and amendment of Note filed 10-24-2002; operative 10-24-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.13. Citrus, Marking Requirements.

In addition to the basic marking requirements of Section 1359, every nonconsumer container, except master containers, shall be clearly and conspicuously marked with the following information:

- (a) Size or Count.
- (1) Oranges, grapefruit, and lemons shall show the count and average diameter. Royal Mandarins shall show one of the counts and correspond-

ing average diameter established in Section 1430.45 or one of the size designations established in Section 1430.51(a).

Such citrus need only be marked with the count of the fruit in the container when imported from another state.

- (2) Tangerines and mandarins shall show the size designation or count description, unless imported from another state. Minneolas shall show one of the size designations or one of the counts and corresponding average diameters established in Section 1430.51.
 - (b) Variety Designation.
- (1) Oranges, grapefruit, tangerines, or mandarins shall show the name of the variety, if known, or the words "Unknown Variety."
- (2) For all varieties of navel oranges, the varietal designation shall be "Navel."
 - (3) For all varieties of valencia oranges, "Valencia."
- (4) For all varieties of white marsh grapefruit, "Marsh White" or "Golden."
- (5) For all varieties of pink marsh grapefruit, "Marsh Ruby" or "Marsh Red."
- (6) For all varieties of Oroblanco, the varietal designation shall be "Oroblanco" or "Sweetie," provided that only one such designation shall be marked on a container. For all varieties of Melogold, the varietal designation shall be "Melogold". For the purpose of this article, the common name or identity of Oroblancos and Melogolds, and similar type hybrids resulting from a cross between pummelo and grapefruit shall be "grapefruit hybrid".

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1423.37 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former section 1430.13 and renumbering and amendment of former section 1430.128 to section 1430.13 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 77, No. 4; 76, No. 28; and 75, No. 18.
- 3. Amendment of subsections (a)(1)–(2) and NOTE filed 2–1–94; operative 2–1–94 (Register 94, No. 5).
- New subsection (b)(5) filed 12–12–96; operative 1–11–97 (Register 96, No. 50).
- 5. Editorial correction (Register 97, No. 1).

§ 1430.14. Oranges, Lemons, and Royal Mandarins, Standard Containers.

Except as otherwise provided in Section 1380.17, Section 1430 or Section 1430.15, oranges, lemons, or Royal Mandarins shall be packed in standard container number 58, 65, or 66. Royal Mandarins may also be packed in container 63. Lemons may also be packed in container 67. Containers 58 and 63 shall be closed.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1423.38 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of former section 1430.14 to section 1430.4, and renumbering and amendment of former section 1430.131 to section 1430.14 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 84, No. 48; and 74, No. 36.
- 3. Change without regulatory effect (Register 86, No. 33).
- Amendment of section and Note filed 2-1-94; operative 2-1-94 (Register 94, No. 5).
- Amendment of section heading, section and NoTE filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.15. Citrus, Packing Exemptions.

Sections 1430.14, 1430.27, 1430.28, and 1430.50, relating to standard containers, do not apply to any of the following:

(a) Citrus for charitable purposes, unemployment relief, or for use by the United States Government or its agencies for relief distribution.

- (b) Tangerines or mandarins, except Royal Mandarins, which are in closed containers for sale to the consumer in unbroken form, and the net contents do not exceed 12 pounds.
- (c) Oranges, grapefruit, lemons, or Royal Mandarins in closed containers for sale to the consumer in unbroken form, and the net contents do not exceed 25 pounds.
- (d) Citrus in containers that are transported directly from this state to the State of Baja California, Republic of Mexico.
- (e) Citrus which are in a retail establishment for sale directly to consumers.
- (f) Citrus which is being transported pursuant to permit for repackaging or by–products processing as provided by Sections 1430 and 1430.1. NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1423.39 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former section 1430.15 and renumbering and amendment of former section 1430.122 to section 1430.15 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 80, No. 11; 79, No. 15; 79, No. 2; and 74, No. 36.
- 3. Amendment of subsections (b), (c) and NOTE filed 2–1–94; operative 2–1–94 (Register 94, No. 5).

§ 1430.16. Reinspection of Citrus Held Under a Noncompliance Notice.

- (a) When citrus is held under a noncompliance notice and a reinspection is requested, all costs incurred shall be paid by the person requesting the reinspection. The money, in the amount equal to the estimated cost, shall be deposited with the director or his representative. The owner or his representative shall provide the following information to the director's representative:
 - (1) Name and address of person requesting the reinspection.
 - (2) The noncompliance notice number and the defects.
 - (3) Place where the citrus was rejected.
 - (4) Place where citrus is being held.
 - (5) Reason for requesting the reinspection.
- (b) The director shall grant or refuse this request on the basis of the evidence presented.
 - (c) When a reinspection is granted:
- (1) For maturity: the inspection shall be made within 12 hours after the request has been received.
- (2) For all other defects: the inspection shall be made within 24 hours after the request has been received.
- (3) If practical, the inspector that made the original inspection and issued the noncompliance notice shall be present for the reinspection.
- (4) A State Fruit and Vegetable Quality Control–Standardization Inspector shall be present.
 - (5) The owner or his representative shall be present.
- (6) All parts of the lot shall be readily available to the inspector who shall take a double sample for inspection.
 - (7) Acceptance or rejection will be based upon this sample.
 - (d) Reasons for not granting a reinspection:
- (1) The defect causing the noncompliance exceeds the applicable tolerance by 1 1/2 times.
- (2) There is an indication that substitution or change in the original lot has been made.
- (3) A lapse of time has occurred which changed the condition of the lot.
- (4) The cash deposit has not been received.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. Renumbering from Section 1423.40 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.16 and renumbering and amendment of former Section 1430.141 to Section 1430.16 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 72, No. 41.

§ 1430.17. Grapefruit, Desert Areas.

As used in this article, "desert areas" mean Imperial County, the portions of Riverside and San Diego Counties which are located east of a line extending north and south through White Water, and that portion of San Bernardino County which is located east of the 115 meridian.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. New NOTE filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.18. Grapefruit, Citrus Districts.

The area south and east from San Gorgonio Pass to the north end of the Salton Sea and known as Coachella Valley is the Coachella Valley Citrus District. The area comprising Imperial County is the Imperial Citrus District

Grapefruit produced in any citrus district may be labeled with the name of the citrus district in which produced. No person shall label any grapefruit with the name of any citrus district unless the grapefruit was produced in such citrus district.

NOTE: Authority cited: Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.18 and renumbering and amendment of former Section 1430.19 to Section 1430.18 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.19. Grapefruit, Mature.

Grapefruit shall be mature. Grapefruit, except grapefruit which are produced in the desert areas or in other states under climatic conditions similar to those prevailing in the desert areas, are not mature unless they meet both of the following requirements:

- (a) At the time of picking, and at all times thereafter, the juice contains soluble solids equal to or in excess of five and one—half parts to every part of acid which is contained in the juice. The acidity of the juice shall be calculated as citric acid without water of crystallization.
- (b) Ninety percent or more of the grapefruit, by count, at the time of picking and at all times thereafter have attained, on at least two—thirds of the fruit surface, at least a minimum characteristic yellow or grapefruit color, as indicated by Color No. 0.9 GY, 6.40/5.7, "Munsell Color."

 NOTE: Authority girld: Sections 407 and 42684. Food and Agricultural Code, Ref-

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Renumbering and amendment of former Section 1430.19 to Section 1430.18, and renumbering and amendment of Section 1430.22 to Section 1430.19 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.20. Grapefruit, Maturity, Desert Areas.

Grapefruit which are produced in the desert areas are not mature unless they meet the following requirements:

The differences in climatic conditions that prevail in the desert areas result in the grapefruit grown in those areas having, at maturity, a higher percentage of soluble solids to acid than the mature grapefruit which are grown in other areas of the state. Grapefruit which are produced in the desert areas are considered mature if at the time of picking, and at all times thereafter, the juice contains soluble solids equal to or in excess of six parts to every part of acid which is contained in the juice. The acidity of the juice shall be calculated as citric acid and without water of crystallization.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.20 and renumbering and amendment of former Section 1430.23 to Section 1430.20 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.21. Grapefruit, Maturity for Grapefruit Produced Out of State.

Grapefruit that are produced outside of this state under climatic conditions which are similar to those prevailing in the desert areas and offered for sale in this state shall meet the same maturity standard as that which is prescribed for grapefruit which are produced in the desert areas.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.21 and renumbering and amendment of former Section 1430.24 to Section 1430.21 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.22. Grapefruit, Maturity Sample Size.

The ratio of soluble solids to acid in the juice shall be determined by the analysis of a random sample consisting of not less than 18 fruits from each size.

When grapefruit is segregated by size as provided in Section 1430.26, each size shall be considered as a separate lot.

When grapefruit is not segregated by size the fruits of any one size shall be considered as a separate lot.

If the soluble solids to acid ratio test of the first sample selected fails to meet the maturity standard, but is not more than 0.4 below the required ratio, two more samples shall be analyzed. An enforcing officer may select and analyze more than three samples, but the average of the results of all of the tests taken shall determine whether that lot meets the maturity requirement.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No.
- 2. Renumbering and amendment of former Section 1430.22 to Section 1430.19, and renumbering and amendment of former Section 1430.43 to Section 1430.22 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 71, No. 2; 55, No. 10; and Register 3.

§ 1430.23. Grapefruit, Serious Damage.

Grapefruit shall be free from serious damage, except as provided in Section 1430.25, due to:

- (a) Freezing or drying, if 20 percent or more of the pulp or edible portion shows evidence of a drying or mushy condition.
- (b) Bruising, if 20 percent or more of the pulp or edible portion is affected.
- (c) Dirt, smudge stain, sooty mold, rot residues, or other foreign material, if an aggregate area of 25 percent or more of the natural fruit surface color is affected. Staining other than smudge stain shall not be considered a defect.
 - (d) Scars, including those that are caused by insects, if they are:
- (1) deep, rough, or dark and aggregate more than 1 inch in diameter or 5 percent of the fruit surface;
- (2) fairly light in color, with slight roughness or depth and aggregate more than 15 percent of the fruit surface;
- (3) light colored and fairly smooth with no depth and aggregate more than 25 percent of the fruit surface.
- (e) Scale, when concentrated as a ring or blotch one inch or more in diameter, or which is more than thinly scattered over the fruit surface.
- (f) Greenish or brownish rind oil spots, if they cover an aggregate area of 10 percent or more of the fruit surface.
- (g) Spotting or pitting, if sunken and covering an aggregate area of 10 percent or more of the fruit surface.
 - (h) Roughness, if 90 percent or more of the fruit surface is affected.
 - (i) Aging, if one-third or more of the fruit surface is dried or hardened.
 - (j) Softness, if the fruit is flabby.
- (k) Sunburn, which causes pronounced flattening, drying, or dark discoloration affecting more than one-third of the fruit surface.
- (l) Sheepnose, if the stem end protrusion extends 1 inch or more beyond the normal contour of the fruit.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Renumbering and amendment of former Section 1430.23 to Section 1430.20, and renumbering and amendment of former Section 1430.27 to Section 1430.23 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.24. Grapefruit, Drying Defined.

- (a) With reference to a particular cut surface, drying means:
- (1) The cut surface is whitish, or shows a dry to drying condition; or
- (2) There exists a granular or glazed appearance and the juice on such cut surface does not run freely and the juice sacs remain intact and separate easily with little or no juice in or around them; or
- (3) The individual juice sac walls can be plainly seen and there is little or no juice present.
 - (b) The following do not constitute drying:
- (1) A granular or glazed appearance but the juice exudes onto the cut surface promptly after cutting and removal of the juice sacs, each of which contains considerable juice, results in the free flow of juice; or
- (2) A spot of milkiness found in the center of a segment which is faint and very juicy; or
- (3) The individual juice sac walls can be plainly seen but the juice sacs contain abundant juice.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Renumbering and amendment of former Section 1430.24 to Section 1430.21, and renumbering and amendment of former Section 1430.44 to Section 1430.24 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 55, No. 10.

§ 1430.25. Grapefruit, Tolerances.

- (a) The grapefruit in any container or bulk lot meet the requirements of Section 1430.7 and Section 1430.23 if not over 10 percent, by count, of the individual grapefruit in such container or bulk lot are below such standards, provided not over 5 percent, by count, of the grapefruit are below any one of such standards.
- (b) An additional tolerance of 15 percent, by count, shall be permitted for grapefruit below the requirements of subdivision (d)(3) of Section 1430.23.
- (c) The grapefruit in any one container or bulk lot meet the requirements of Section 1430.23(a) if not more than 15 percent, by count, of the individual grapefruit in such container or bulk lot are seriously damaged by freezing or drying. Five percent of this tolerance shall be allowed for very serious freezing or drying damage. Damage by freezing or drying is very serious if 40 percent or more of the pulp or edible portion of the grapefruit shows evidence of drying or a mushy condition. Evidence of damage shall be determined by a volume cut of each individual grapefruit, as defined in Section 1430.9.1.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.25 and renumbering and amendment of former Section 1430.45 to Section 1430.25 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.26. Grapefruit, Count and Average Diameter.

The count of grapefruit which are packed in standard container number 59 or 65 and the number which is marked on the container as required in Section 1430.13 shall be one of the numbers tabulated in Column A, below, and the average minimum diameter which is marked on the containers shall be the corresponding measurement tabulated in Column B, below.

The average diameter in inches of the grapefruit in the container, as determined by inspection of a representative sample, shall be not less than the corresponding measurement tabulated in Column B for such fruit.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.26 and renumbering and amendment of former Section 1430.48 to Section 1430.26 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).
- Amendment of first paragraph filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.27. Grapefruit, Standard Container.

Except as otherwise provided in Section 1430, Section 1430.15, Section 1430.28, or Section 1380.17, grapefruit shall be packed in closed container number 59, or in container 65.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of former Section 1430.27 to Section 1430.23, and renumbering and amendment of former Section 1430.49 to Section 1430.27 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).
- 3. Amendment filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.28. Grapefruit, Master Container.

NOTE: Authority: Sections 14, 407, and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former section 1430.28 and renumbering and amendment of former section 1430.50 to section 1430.28 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).
- Repealer of section and amendment of Note filed 8–16–91; operative 9–16–91 (Register 91, No. 50).

§ 1430.29. Lemons, Maturity.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former section 1430.29 and renumbering and amendment of former section 1430.53 to section 1430.29 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).
- 3. Repealer filed 10-13-93; operative 11-12-93 (Register 93, No. 42).

§ 1430.30. Lemons, Serious Damage.

Lemons shall be free from serious damage, except as provided in Section 1430.31, due to:

- (a) Freezing, drying, or sunburn, if 20 percent or more of the pulp or edible portion shows evidence of drying or a mushy condition.
 - (b) Internal decline, if the core shows gumming for its entire length.
- (c) Dirt, sooty mold, rot residues, or other foreign material, if an aggregate area of 10 percent or more of the natural fruit surface color is affected.
- (d) Smudge stain or staining other than membranous stain causing pronounced discoloration affecting more than one-third of the fruit surface.

- (e) Scars, including those which are caused by insects, if they are deep, rough, or dark and aggregate 25 percent or more of the fruit surface.
- (f) Scale, if each of three circular areas one inch in diameter has 15 or more scales.
- (g) Greenish or brownish rind oil spots, if they cover an aggregate of 25 percent or more of the fruit surface.
- (h) Spotting or pitting, other than petechia, including black pit, septoria, anthracnose, and cold storage injury covering an aggregate area more than 1/2 inch in diameter.
- (i) Petechia, if the spots or pits cover an aggregate area of 10 percent or more of the fruit surface.
- (j) Deformities, except from bud mite damage, if one-third or more of the fruit surface is malformed, ridgy, or lumpy.
- (k) Bud mite damage, if the stylar end shows a definite division, is open, or 20 percent or more of the fruit surface is malformed.
- (1) Aging, if 25 percent or more of the fruit surface is dried or hard-
- (m) Red blotch, if covering an aggregate area of 10 percent or more of the fruit surface.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.30 and renumbering and amendment of former Section 1430.57 to Section 1430.30 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.31. Lemons, Tolerances.

- (a) Not more than 5 percent, by count, of the lemons in any container or bulk lot may fail to meet the requirements of Section 1430.30(a) and (b) because of damage by internal decline, sunburn, or drying for any cause except freezing.
- (b) Not more than 10 percent, by count, of the lemons in any container or bulk lot may fail to meet the requirements of Section 1430.30(a) because of damage by freezing. Five percent shall be allowed for very serious freezing damage. Damage by freezing is very serious if 40 percent or more of the pulp or edible portion of the lemon shows evidence of a mushy condition.
- (c) Not more than 5 percent, by count, of the lemons in any container or bulk lot may fail to meet the requirements of any of the standards of Section 1430.7 and subsections (c) through (m) of Section 1430.30.
- (d) The total allowable tolerance in any container or bulk lot for the defects covered by this section shall not exceed 15 percent.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Ámendment filed 7–6–76; effective thirtieth day thereafter (Register 76, No. 28).
- Repealer of former Section 1430.31 and renumbering and amendment of Section 1430.74 to Section 1430.31 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.32. Lemons, Count and Average Diameter.

The count of lemons which are packed in standard container number 58, 65, 66, or 67 and the number which is marked on the container as required in Section 1430.13 shall be one of the numbers tabulated in Column A, below, and the average minimum diameter which is marked on the containers shall be the corresponding measurement tabulated in Column B, below.

The average diameter in inches of the lemons in the container, as determined by inspection of a representative sample, shall not be less than the corresponding measurement tabulated in Column B for such fruit.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Repealer of former Section 1430.32 and renumbering and amendment of former Section 1430.75 to Section 1430.32 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).
- 3. Amendment of first paragraph filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.33. Limes, Serious Damage.

Limes shall be mature and free from serious damage, except as provided in Section 1430.34, due to freezing or drying. Such damage is serious if 20 percent or more of the pulp shows staining, drying, desiccation, or a mushy condition. Evidence of freezing or drying damage shall be determined by as many cuts of each individual lime as are necessary.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.33 and renumbering and amendment of former Section 1430.77 to Section 1430.33 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.34. Limes, Tolerances.

- (a) Not more than 10 percent, by count, of the limes in any container or bulk lot may fail to meet the requirements of Section 1430.7. Not more than 5 percent shall be allowed for any one cause.
- (b) Not more than 15 percent, by count, of the limes in any container or bulk lot may fail to meet the requirements of Section 1430.33(a) because of damage by freezing or drying. Five percent of this tolerance shall be allowed for very serious freezing or drying damage. Damage by freezing or drying is very serious if 40 percent or more of the pulp shows evidence of drying, desiccation, or a mushy condition.
- (c) The total allowable tolerance in any container or bulk lot for a combination of defects covered by this section shall not exceed 20 percent, by count.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.34 and amendment and renumbering of former Section 1430.80 to Section 1430.34 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.35. Oranges, Color Determination and Ratio.

Oranges may be picked when 90 percent or more, by count, of the oranges in any lot have attained before picking, on at least one-fourth of the fruit surface, at least a minimum characteristic orange color, as indicated by color No. 7.5 Y6/6 Munsell color designated as "orange color (a)"; however, said oranges shall not be packed or offered for sale unless the lot tests a ratio of eight parts soluble solids to one part acid.

In addition to Section 1375.21, "before picking" means that the decision at time of picking as to whether a lot of oranges meets orange color

(a) shall be conclusive. If a lot fails to meet color (a), the fruit may be reconditioned one time within 24 hours.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.35 and renumbering and amendment of former Section 1430.81 to Section 1430.35 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 71, No. 2; and 57, No. 9.
- 3. Amendment filed 10–6–2003; operative 10–6–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 41).

§ 1430.36. Oranges, Maturity.

Oranges shall be mature. Oranges, except bloods, tangerines, and mandarins, shall not be considered mature unless they comply with one of the following requirements:

- (a) Notwithstanding the provisions of subsection (b), if any sample of oranges tested has a soluble solids to acid ratio test of less than 7 to 1, the lot from which such sample of oranges was taken shall be rejected.
- (b) The juice contains soluble solids which are equal to or in excess of eight parts to every part of acid which is contained in the juice (the acidity of the juice to be calculated as citric acid without water of crystallization), and 90 percent or more of the oranges in any lot, by count, before picking have attained orange color (a) on at least one—fourth of the fruit surface. NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.36 and renumbering and amendment of former Section 1430.87 to Section 1430.36 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 77, No. 13).
- Amendment of subsection (a) and repealer of subsection (c) filed 10–6–2003; operative 10–6–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 41).

§ 1430.37. Oranges, Acceleration of Color.

No oranges may be accelerated in color unless the juice contains soluble solids equal to, or in excess of, eight parts to every part of acid contained in the juice (the acidity of the juice to be calculated as citric acid without water of crystallization).

Prior to any preparation in the packing operation, oranges testing from a 7 to 1 to an 8 to 1 ratio are not required to meet the soluble solids to acid ratio test of 8 to 1. However, the placement of a lot of oranges which fails to meet the 8 to 1 ratio test in a sweat room shall be cause for rejection.

Any lot of oranges testing from a 7 to 1 to an 8 to 1 ratio shall be held for no more than one additional test within four days. Such a lot shall not be permitted to enter into or undergo a sweating process. Following the four-day period, a lot failing to meet the 8 to 1 ratio shall be rejected. Any lot rejected pursuant to this section shall be disposed of as provided in paragraphs (b), (c), or (d) of Section 1390.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.37 and renumbering and amendment of former Section 1430.84 to Section 1430.37 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 77, No. 13.
- Amendment of last paragraph filed 9–28–2000 as an emergency; operative 9–28–2000 (Register 2000, No. 39). A Certificate of Compliance must be transmitted to OAL by 1–26–2001 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 9-28-2000 order transmitted to OAL 12-13-2000 and filed 1-22-2001 (Register 2001, No. 4).

§ 1430.38. Oranges, Maturity and Sample Size.

The ratio of soluble solids to acid in the juice shall be determined by the analysis of a random sample from each lot of oranges consisting of not less than 30 fruit. When oranges are segregated by size as provided in Section 1430.45, each such size shall be considered as a separate lot. When oranges are not segregated by size the fruits of any one size shall be considered as a separate lot.

If the soluble solids to acid ratio test of the first sample selected fails to meet either the 8 to 1 or the 7 to 1 ratio, but is not more than 0.4 below either ratio, one more sample shall be analyzed. An enforcement officer may select and analyze more than two samples, but the average of the results of all of the tests taken shall determine whether that lot meets the maturity requirement. Any lot failing to meet the 7 to 1 ratio shall be rejected and disposed of in accordance with the provisions of Section 1390. Note: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former Section 1430.38 and renumbering and amendment of former Section 1430.82 to Section 1430.38 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 71, No. 2; 55, No. 10; and Register 3.
- 3. Amendment filed 9–28–2000 as an emergency; operative 9–28–2000 (Register 2000, No. 39). A Certificate of Compliance must be transmitted to OAL by 1–26–2001 or emergency language will be repealed by operation of law on the following day.
- 4. Certificate of Compliance as to 9-28-2000 order transmitted to OAL 12-13-2000 and filed 1-22-2001 (Register 2001, No. 4).

§ 1430.39. Oranges, Serious Damage.

Oranges shall be free from serious damage, except as provided in Section 1430.44, due to:

- (a) Freezing damage on the segment walls. Segment wall damage includes a water soaked appearance, evidence of previous water–soaking, or the presence of crystals or crystalline deposit on two surface membranes of each of two or more segments, on the entire length but not necessarily the entire area of the membranes. The test section shall be not less than 1 inch or more than 1 1/2 inches in thickness, and shall be obtained from the central portion of the orange by cutting off a portion of each end.
- (b) Freezing, if 20 percent or more of the pulp or edible portion as shown on a transverse cut through the center shows evidence of staining, drying, desiccation, or a mushy condition.
- (c) Drying by causes other than freezing, if 20 percent or more of the pulp or edible portion as determined by a volume cut (as defined in Section 1430.9.1) shows evidence of staining, drying, desiccation, or a mushy condition.

NOTE: Authority cited: Sections 14, 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former section 1430.39 and renumbering and amendment of former section 1430.89 to section 1430.39 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).
- 3. Amendment of subsection (c) and NOTE filed 9-9-92; operative 10-9-92 (Register 92, No. 37).

§ 1430.40. Oranges, Freezing Damage Determination.

In any season in which freezing damage to oranges which are produced in this state has occurred, the extent of damage by freezing to such oranges shall be determined as follows:

- (a) By examination for damage on the segment walls from and after the time when the oranges were first exposed to freezing temperatures to the date, herein designated as date A, when the director, after survey, shall make a determination in writing that the drying process has developed to such extent as to furnish additional evidence of the extent of actual damage to the fruit.
- (b) By examination of the exposed pulp on a transverse cut through the center, from and after the date, herein designated as date B, when the director, after survey, shall make a determination in writing that the drying process has developed to such extent as to permit reasonably accurate determination of the full extent of freezing damage by such examination, without regard to damage on the segment walls.
- (c) Either by examination for damage on the segment walls or by examination of the exposed pulp on a transverse cut through the center, or by both such examinations, during the period from date A to date B. In no event shall the interval from date A to date B exceed three weeks.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former Section 1430.40 and renumbering of former Section 1430.92 to Section 1430.40 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.41. Oranges, Determination of Damage by Freezing, Imported Fruit.

The extent of damage by freezing of oranges which were produced outside of this state that are offered for distribution and sale in this state shall be determined by the same methods and procedures as required for oranges produced in this state, unless it is not practicable to obtain sufficient accurate information upon which to establish dates A and B as required by this article for such oranges. In such case the extent of damage by freezing in any lot of such oranges shall be determined as follows:

- (a) By examination of the exposed pulp on a transverse cut through the center, if examination of a representative sample of the oranges in the lot shows that the drying process has developed to such an extent as to permit reasonably accurate determination of the full extent of freezing damage.
- (b) In any other case, by damage on the segment walls.

 NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former Section 1430.41 and renumbering and amendment of former Section 1430.93 to Section 1430.41 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.42. Oranges, Examinations During Specified Periods.

The determination by the director of freezing damage to oranges as required by Section 1430.40 shall be based upon an investigation of the condition of the fruit in the areas of the state where freezing damage to oranges has occurred.

Dates A and B, as defined in Section 1430.40 shall be established by the director in writing, after survey, and the period of time established by such dates shall be effective throughout the state unless the determination of the director shows that such action will be contrary to the public interest, in which case such dates shall apply to as large an area as will be practical.

During the period from date A to date B when, according to Section 1430.40, freezing damage in oranges shall be determined (a) by examination for damage on the segment walls, or (b) by examination of the exposed pulp on a transverse cut through the center, or by both such examinations, each individual orange in an official sample, if found to have less damage than "serious damage due to freezing" (Section 1430.39) by one method of examination, shall also be examined for damage by the other method. The total of the seriously damaged fruits found by either method shall be scored separately. The type of damage found to be the most serious shall determine the percentage of seriously damaged fruit in each lot. NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No.
- Repealer of former Section 1430.42 and renumbering and amendment of former Section 1430.98 to Section 1430.42 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 71, No. 23; and 71, No. 2.

§ 1430.43. Oranges, Delayed Evidence of Freezing.

Whenever an enforcement officer has reason to believe that any lot or container of oranges is not free from serious damage due to freezing as defined in Section 1430.39, and such damage cannot be detected by immediate examination, he may take for inspection a representative sample. The packer, owner, or person in possession of such lot shall be notified that the sample has been taken, and the examination shall be made within a reasonable time.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Originally filed as Section 1410 on 4-26-46 (Register 3).
- 2. Renumbered from Section 1410, filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 3. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 4. Amendment and renumbering from Section 1420 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Renumbering and amendment of former Section 1430.43 to Section 1430.22, and renumbering and amendment of former Section 1430.96 to Section 1430.43 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 71, No. 2; and 70, No. 12.

§ 1430.44. Oranges, Tolerances.

- (a) Not more than 10 percent, by count, of the oranges in any container or bulk lot may fail to meet the requirements of Section 1430.7. Not more than 5 percent shall be allowed for any one cause.
- (b) Not more than 15 percent, by count, of the oranges in any container or bulk lot may fail to meet the requirements for damage by freezing of Subsection (a) or (b) of Section 1430.39. Five percent of this tolerance shall be allowed for very serious freezing damage. Damage by freezing is very serious if 40 percent or more of the exposed pulp shows evidence of drying, desiccation, or a mushy condition on a transverse cut through the center.
- (c) Not more than 10 percent, by count, of the oranges in any container or bulk lot may fail to meet the requirements for drying of Subsection (c) of Section 1430.39.
- (d) The total allowable tolerance in any container or bulk lot for a combination of defects covered by this section shall not exceed 20 percent, by count.

NOTE: Authority cited: Sections 14, 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from section 1414.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of former section 1430.44 to section 1430.24, and renumbering and amendment of section 1430.95 to section 1430.44 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).
- 4. Amendment of subsection (b) and NOTE, new subsection (c) and subsection relettering filed 9–9–92; operative 10–9–92 (Register 92, No. 37).

§ 1430.44.5. Oranges, Crop Acreage and Statistical Reporting Assessment.

An assessment shall be collected to fund a statewide Navel orange crop and Valencia orange crop estimating service and statewide acreage survey.

- (a) The assessment shall be paid by producers of Navel and Valencia oranges that are grown in California and prepared for fresh market in the Counties of Fresno, Kern, Madera, Orange, Riverside, San Bernardino, Santa Clara, Tulare, and Ventura.
- (b) The assessment shall be 2 mills (\$0.002) per carton shipped by any handler located in the counties listed in subsection (a).
 - (c) The first handler shall collect the assessment from the producer.
- (d) The first handler shall submit all assessments collected at the end of each month during the marketing season.

(e) The assessments shall be submitted to the department for deposit in a separate account for the orange crop estimating service and crop acreage survey program.

NOTE: Authority cited: Section 407, Food and Agricultural Code. Reference: Sections 48002 and 48002.5, Food and Agricultural Code.

HISTORY

- 1. New section filed 10–26–99 as an emergency; operative 11–1–99 (Register 99, No. 44). A Certificate of Compliance must be transmitted to OAL by 2–29–2000 or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 10–26–99 order transmitted to OAL 2–28–2000 and filed 4–3–2000 (Register 2000, No. 14).

§ 1430.45. Oranges and Royal Mandarins, Count and Average Diameter.

The count and minimum average diameter of fruit which are marked on containers 58, 65 and 66 as required by Section 1430.13 shall be one of the counts and corresponding minimum measurements established in the chart below for the respective commodities and containers.

The average diameter shall be determined by inspection of a representative sample.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of former section 1430.45 to section 1430.25, and renumbering and amendment of former section 1430.99 to section 1430.45 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 84, No. 42; and 74, No. 36.
- 3. Change without regulatory effect (Register 86, No. 33).
- 4. Amendment of NOTE filed 2-1-94; operative 2-1-94 (Register 94, No. 5).
- Amendment of section and Note filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.46. Tangerines or Mandarins, Defined.

As used in this article, "tangerines or mandarins" means all varieties and hybrids of the mandarin group (Citrus reticulata) and all varieties of tangelos.

The varietal designation of Temple Orange Mandarin fruit grown in this state shall be "Royal Mandarin" for labeling purposes.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- Amendment and renumbering filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Repealer of former Section 1430.46 and renumbering and amendment of former Section 1430.100 to Section 1430.46 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.47. Tangerines or Mandarins, Maturity and Color Requirements.

(a) Tangerines or mandarins shall contain soluble solids at least equal to 6 1/2 parts to every part of acid contained in the juice. The acidity of

the juice is to be calculated as citric acid without water of crystallization. No tolerance shall be allowed.

- (b) Ninety percent, by count, of the fruits in any container or bulk lot shall show a yellow, orange, or red color on 75 percent or more of the fruit surface.
 - (c) The maturity sample shall consist of not less than 18 fruit.
- (d) If the soluable solids to acid ratio test of the first sample selected fails to meet the maturity standard, but is not more than 0.4 below the required ratio, two more samples shall be analyzed. An enforcement officer may select and analyze more than three samples, but the average of the results of all of the tests taken shall determine whether that lot meets the maturity requirement.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- Amendment and renumbering from Section 1416.1 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer of former Section 1430.47 and renumbering and amendment of former Section 1430.108 to Section 1430.47 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.48. Tangerines or Mandarins, Serious Damage.

Tangerines or mandarins shall be free from serious damage, except as provided in Section 1430.49, due to freezing or drying. Such damage is serious if 20 percent or more of the pulp or edible portion of the fruit shows evidence of drying, desiccation, or a mushy condition. Evidence of freezing or drying damage shall be determined by a volume cut of each individual fruit, as defined in Section 1430.9.1.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1423.12 filed 1-21-75; effective thirtieth day thereafter (Register 75 No. 4).
- 2. Renumbering and amendment of former Section 1430.48 to Section 1430.26, and renumbering and amendment of former Section 1430.104 to Section 1430.48 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.49. Tangerines or Mandarins, Tolerances.

- (a) Not more than 5 percent, by count, of the tangerines or mandarins in any container or bulk lot may fail to meet the requirements of Section 1430.7.
- (b) Not more than 10 percent, by count, of the tangerines or mandarins in any container or bulk lot may fail to meet the requirements of Section 1430.48 because of freezing or drying.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1423.22 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Renumbering and amendment of former Section 1430.49 to Section 1430.27, and renumbering and amendment of former Section 1430.107 to Section 1430.49 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.50. Tangerines and Mandarins Standard Containers.

Except as otherwise provided in Section 1380.17, Section 1430, or 1430.15, tangerines or mandarins shall be packed in closed standard container number 63, or in containers 65 or 66. Minneolas and orlandos may also be packed in container 58.

- 1. Renumbering from section 1423.23 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of former section 1430.50 to section 1430.28, and renumbering and amendment of former section 1430.112 to section 1430.50 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 4, No. 36.
- Amendment of section and Note filed 2-1-94; operative 2-1-94 (Register 94, No. 5).
- Amendment filed 11–8–94 as an emergency; operative 11–8–94 (Register 94, No. 45). A Certificate of Compliance must be transmitted to OAL by 3–8–95

- or emergency language will be repealed by operation of law on the following day.
- Certificate of Compliance as to 11–8–94 order transmitted to OAL 12–22–94 and filed 1–31–95 (Register 95, No. 5).
- Amendment of section heading, section and Note filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.51. Tangerines and Mandarins, Size, Count, and Tolerances.

Standard container number 63, 65 or 66 packed with tangerines or mandarins shall be marked with either the size designation or count description as follows:

(a) Size Designation. The diameter in inches of tangerines or mandarins which are in containers that are marked with one of the size designations tabulated in Column A below shall be between the measurements tabulated in corresponding lines of Column B and Column C. The diameter in inches of not more than 10 percent, by count, of the fruit in the container may, however, measure less than the corresponding measurement in Column B. Not more than 10 percent, by count, of the fruit in the container may measure more than the corresponding measurement in Column C.

Tangerines and Mandarins

	Column B	Column C
Column A	(in inches)	(in inches)
Super colossal	3.25	4.00
Colossal	3.00	3.25
Mammoth	2.75	3.00
Jumbo	2.50	2.75
Large	2.25	2.50
Medium	2.00	2.25
Small	1.75	2.00

Container 58, 65 and 66 may be marked with one of the above designations when packed with Royal Mandarins.

- (b) Count Description. Tangerines or mandarins, except Royal Mandarins and minneolas, which are in containers that are marked with the numerical count shall be of uniform size. However, a tolerance of 10 percent shall be allowed for fruit not meeting the uniform size requirement.
- (c) Notwithstanding the above requirements, when containers 58, 63, 65, and 66 are packed with minneolas they shall be marked with one of the size designations in subsection (a) or one of the counts and corresponding minimum measurements established in the chart below for the respective containers. The average minimum diameter shall be determined by inspection of a representative sample.

Count	Av. Dia. In Inches

Container 58, 65 or 66	Container 63	Container 58, 63, 65 or 66
36	24	
40	30	4.000
48	36	3.750
56	42	3.500
64	48	3.315
80	54	
100	66	2.875
125	90	2.625
150	120	2.375
180	135	2.125
210	165	1 875

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of former section 1430.51 and renumbering and amendment of former section 1430.109 to section 1430.51 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Registers 74, No. 36; 73, No. 25; and 73, No. 8.
- 3. Amendment of section heading, text and Note filed 2–1–94; operative 2–1–94 (Register 94, No. 5).
- 4. Amendment of section and NoTE filed 10–24–2002; operative 10–24–2002 pursuant to Government Code section 11343.4 (Register 2002, No. 43).

§ 1430.52. Tangerines or Mandarins, Irregular Sizes.

Any container of tangerines or mandarins which fails to meet the size requirements which are prescribed by Section 1430.51 shall be considered as complying with that section if the container is marked with the words "irregular sizes."

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer of section 1430.52 and renumbering and amendment of former section 1430.110 to section 1430.52 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45). For prior history, see Register 74, No. 36.
- 3. Amendment of section heading, text and NOTE filed 2–1–94; operative 2–1–94 (Register 94, No. 5).

§ 1430.53. Tangerines or Mandarins, Container Size Markings.

Not more than one of the size designations or count descriptions which are prescribed by Section 1430.51 or Section 1430.52 shall appear on any container of tangerines or mandarins.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1430.96. Citrus, Evidence of Freezing Damage in Oranges.

HISTORY

- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2). For prior history, see Register 70, No. 12.
- 2. Amendment and renumbering from Section 1412 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1430.96 to Section 1430.43 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.97. Citrus, Inspection After Holding; Frozen Oranges.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2). For prior history, see Register 70, No. 12.
- 2. Amendment and renumbering from Section 1412.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.98. Citrus, Examinations of Oranges During Specified Periods.

HISTORY

- 1. Amendment filed 6–4–71; effective thirtieth day thereafter (Register 71, No. 23). For prior history, see Register 71, No. 2.
- 2. Amendment and renumbering from Section 1412.2 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1430.98 to Section 1430.42 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.99. Oranges, and Royal Mandarins, Count and Average Diameter.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–4–74; effective thirtieth day thereafter (Register 74, No. 36)
- 2. Amendment and renumbering from Section 1423.14 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 11-28-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 42).
- 4. Renumbering and amendment of Section 1430.99 to Section 1430.45 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.100. Tangerines or Mandarins.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75,No. 4).
- 2. Renumbering and amendment of Section 1430.100 to Section 1430.46 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.101. Tangerines or Mandarins, Requirements.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.102. Tangerines or Mandarins, Standards Prescribed.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.103. Tangerines or Mandarins, Well Colored.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

Page 168 (4-1-90)

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.104. Tangerines or Mandarins, Serious Damage.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1430.104 to Section 1430.48 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.105. Tangerines or Mandarins, Decay.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.106. Tangerines or Mandarins, Tolerance for Freezing or Drying.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.107. Tangerines or Mandarins, Tolerance Decay.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of Section 1430.107 to Section 1430.49 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.108. Tangerines or Mandarins, Maturity.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Renumbering and amendment of Section 1430.108 to Section 1430.47 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.109. Tangerines (Except Royal Mandarins), Size or Count, and Tolerances.

HISTORY

- 1. Amendment filed 2–21–73 as an emergency; effective upon filing (Register 73, No. 8).
- 2. Certificate of Compliance filed 6-20-73 (Register 73, No. 25).
- 3. Amendment of subsection (a) filed 9-4-74; effective thirtieth day thereafter (Register 74, No. 36).
- 4. Amendment and renumbering from Section 1423.16 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Renumbering and amendment of Section 1430.109 to Section 1430.51 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.110. Tangerines, Irregular Sizes.

HISTORY

- 1. Amendment filed 9–4–74; effective thirtieth day thereafter (Register 74, No. 36).
- 2. Amendment and renumbering from Section 1423.17 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1430.110 to Section 1430.52 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.111. Tangerines, Container Size Markings.

HISTORY

- 1. A mendment filed 2–21–73 as an emergency; effective upon filing (Register 73, No. 8).
- 2. Certificate of Compliance filed 6-20-73 (Register 73, No. 25).
- 3. Amendment filed 9-4-74; effective thirtieth day thereafter (Register 74, No. 36)
- 4. Amendment and renumbering from Section 1423.18 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

5. Renumbering and amendment of Section 1430.111 to Section 1430.53 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.112. Tangerines (Except Royal Mandarins), Packing Requirement.

HISTORY

- 1. Amendment filed 9–4–74; effective thirtieth day thereafter (Register 74, No. 36).
- 2. Amendment and renumbering from Section 1423.25 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1430.112 to Section 1430.50 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.113. Citrus Sample, Freezing or Drying Damage.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.114. Citrus Application of Tolerances Other Than Freezing, Drying or Maturity.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.115. Citrus, Determination of Drying in Citrus from Causes Other Than Freezing.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment and renumbering from Section 1414 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.116. Citrus, Tolerances Allowed for Defects in Oranges and Limes.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1415 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.117. Citrus, Selections of Samples of Oranges and Grapefruit Within a Size. Maturity.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

History

- 1. Originally filed as Section 1412 on 4–26–46 (Register 3).
- 2. Renumbered from Section 1412, filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 3. Renumbering from Section 1420.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.118. Citrus, Total Lot Sample for Oranges and Grapefruit. Maturity.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Originally filed as Section 1413 on 4-26-46 (Register 3).
- Renumbered from Section 1413, filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 3. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).

Page 169 (4-1-90)

- 4. Amendment and renumbering from Section 1420.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.119. Citrus, Sample from Individual Containers. Maturity.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Originally filed as Section 1414 on 4-26-46 (Register 3).
- Renumbered from Section 1414, filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- Renumbering from Section 1420.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.120. Citrus, Maturity, Determining the Soluble Solids to Acid Ratio.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 3–25–77; effective thirtieth day thereafter (Register 77, No. 13). For prior history, see Register 75, No. 4.
- 2. Renumbering and amendment of Section 1430.120 to Section 1430.6 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.120.1. Citrus, Maturity, Juice Extraction.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-25-77; effective thirtieth day thereafter (Register 77, No. 13).
- 2. Renumbering and amendment of Section 1430.120.1 to Section 1430.5 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.121. Citrus, Packing Requirements for Standard Containers No. 58, 59 or 63.

HISTORY

- 1. Amendment filed 2–21–73 as an emergency; effective upon filing (Register 73, No. 8).
- 2. Certificate of Compliance filed 6-20-73 (Register 73, No. 25).
- 3. Amendment filed 9–4–74; effective thirtieth day thereafter (Register 74, No. 36).
- 4. Amendment and renumbering from Section 1423.15 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Renumbering and amendment of Section 1430.121 to Section 1430.12 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.122. Citrus, Packing Exemptions.

NOTE: Authority: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9-4-74; effective thirtieth day thereafter (Register 74, No. 36).
- 2. Amendment and renumbering from Section 1423.20 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment of subsection (d) filed 1–11–79 as an emergency; effective upon filing (Register 79, No. 2).
- 4. Certificate of Compliance filed 4-9-79 (Register 79, No. 15).
- Amendment of subsection (d) filed 3-14-80; effective thirtieth day thereafter (Register 80, No. 11).
- Renumbering and amendment of Section 1430.122 to Section 1430.15 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.123. Citrus, Packing Exemptions.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Amendment and renumbering from Section 1423.21 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.124. Citrus, Container Exemption for Imported

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1423.26 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.125. Citrus, Consumer Packages in Master Containers, Section 1430.129.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code.
HISTORY

- 1. New section filed 3-5-58; effective thirtieth day thereafter (Register 58, No. 4).
 - Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
 - 3. Amendment and renumbering from Section 1423 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
 - 4. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1430.126. Citrus, Closed Containers Numbers 58 and 59.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–20–59; effective thirtieth day thereafter (Register 59, No. 12).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1423.5 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.127. Citrus, Closed Container.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1423.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.128. Citrus, Marking Requirements.

HISTORY

- 1. Amendment of subsection (b) filed 7–6–76; effective thirtieth day thereafter (Register 76, No. 28). For prior history, see Register 75, No. 18.
- 2. Amendment filed 10–26–77; designated effective 1–1–78 (Register 77, No. 44).
- 3. Renumbering and amendment of Section 1430.128 to Section 1430.13 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.129. Citrus, Consumer–Size Packages and Repackaging Plant.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment of subsection (b) filed 9-4-74; effective thirtieth day thereafter (Register 74, No. 36).
- 2. Amendment and renumbering from Section 1423.29 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.130. Citrus, Consumer.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1423.19 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.131. Oranges, Lemons, and Royal Mandarins, Packing Requirement.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment filed 9–4–74; effective thirtieth day thereafter (Register 74, No. 36)

Page 170 (4-1-90)

- 2. Amendment and renumbering from Section 1423.24 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 11–28–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 48).
- 4. Renumbering and amendment of Section 1430.131 to Section 1430.14 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.132. Citrus, Uniform in Size Sampling Procedure.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1423.27 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.133. Citrus, Official Sample to Determine Average Diameter of Citrus Fruits.

HISTORY

- 1. Originally published as Section 1398 on 7-25-45 (Title 3).
- 2. Renumbered from Section 1398 and amendment filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 3. Renumbering from Section 1422 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Renumbering and amendment of former Section 1430.133 to Section 1430.11 filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.134. Citrus, Packed Citrus Count and Average Diameter.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1422.1 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.135. Citrus, Diameter.

 $Note: Authority\ cited:\ Sections\ 407\ and\ 42681, Food\ and\ Agricultural\ Code.\ Reference:\ Section\ 42941,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. Amendment filed 9–4–74; effective thirtieth day thereafter (Register 74, No. 36).
- 2. Amendment and renumbering from Section 1423.8 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.136. Citrus, Uniform Size.

HISTORY

- 1. New subsection (b) filed 2–21–73 as an emergency; effective upon filing (Register 73, No. 8).
- 2. Certificate of Compliance filed 6-20-73 (Register 73, No. 25).
- 3. Amendment filed 9–4–74; effective thirtieth day thereafter (Register 74, No. 36).
- 4. Amendment and renumbering from Section 1423.9 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 5. Renumbering and amendment of Section 1430.136 to Section 1430.10 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.137. Citrus, Packed.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1423.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.138. Citrus, Sampling for Count and Size Requirements.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment and renumbering from Section 1423.11 filed 1–21–75; effective thirtieth day thereafter (Register 74, No. 4).

2. Repealer filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.139. Citrus, Definitions.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1423.6 through 1423.40 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from Section 1423.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 9–27–85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.140. Citrus, Field Picking Box.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 3–16–56; effective thirtieth day thereafter (Register 56, No. 5).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1422.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Repealer filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

§ 1430.141. Reinspection of Citrus Held Under a Non-Compliance Notice.

HISTORY

- 2. Renumbering from Section 1413.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Renumbering and amendment of Section 1430.141 to Section 1430.16 filed 9-27-85; effective thirtieth day thereafter (Register 85, No. 45).

Article 23. Green Corn

§ 1432. Green Corn, Defects.

Ears of green corn shall be free from serious damage caused by smut, mold, decay, fermentation, insects, freezing, mechanical damage, or other causes. Except as provided by Section 1432.4, damage is serious when it affects kernels beyond 25 percent of the length of the cob, measuring from the tip.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- 2. Amendment filed 3-8-79; effective thirtieth day thereafter (Register 79, No. 10)
- 3. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1432.1. Green Corn, Mature.

The entire surface of at least one—half of the length of the cob, measured between two cross—sectional lines, shall have kernels that are plump, milky, well developed, and not shriveled due to overmaturity. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

History

1. Renumbering and amendment of former Section 1432.1 to Section 1432.2 and new Section 1432.1 filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1432.2. Green Corn, Freezing Damage Defined.

The kernels appear glassy or transparent or have started to shrivel. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).

- 3. Amendment and renumbering from Section 1435 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Amendment filed 6–13–75; effective thirtieth day thereafter (Register 75 No. 24).
- Amendment filed 3–8–79; effective thirtieth day thereafter (Register 79, No. 10).
- Renumbering of former Section 1432.2 to Section 1432.3 and renumbering and amendment of former Section 1432.1 to Section 1432.2 filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1432.3. Green Corn, Tolerances.

Not more than 10 percent, by count, of the ears in any one lot of containers or bulk lot may be below the requirements which are prescribed by this article, but no container shall have more than 20 percent, by count, of ears which are below such requirements.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Repealer and new section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Renumbering and amendment of former Section 1432.3 to Section 1432.4 and renumbering of former Section 1432.2 to Section 1432.3 filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1432.4. Green Corn, Mechanical Damage.

An ear of green corn shall be considered in compliance with the standards for mechanical damage if it meets either one, but not both, of the following conditions:

- (a) Not more than ten kernels beyond a distance of one inch from the base of the cob have been damaged; or
- (b) Not more than ten kernels beyond 25 percent of the length of the cob measured from the tip have been damaged.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 3-8-79; effective thirtieth day thereafter (Register 79, No. 10).
- 2. Renumbering and amendment of former Section 1432.3 to Section 1432.4 filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

Article 24.5. Garlic

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New article 24.5 (Sections 1435 and 1435.1) filed 4–12–84; effective thirtieth day thereafter (Register 84, No. 15).
- Repealer of article 24.5 (sections 1435 and 1435.1) filed 8-24-84 as an emergency; effective upon filing (Register 84, No. 36). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 12-22-84.
- 3. Reinstatement of Article 24.5 (Sections 1435 and 1435.1) as it existed prior to emergency repealer filed 8–24–84 by operation of Government Code Section 11346.1(f) (Register 85, No. 38).
- 4. Repealer of Article 24.5 (Sections 1435 and 1435.1) filed 9–19–85; effective thirtieth day thereafter (Register 85, No. 38).

Article 25. Table Grapes and Raisins

§ 1436. Table Grapes, Requirements for Out-of-State Processing.

In addition to the requirements of Section 1390.14, table grapes which are being transported out of state for commercial processing, preserving, or manufacturing shall:

- (a) Comply with the juice grape quality requirements of article 25.5;
- (b) Be in containers with a net weight of at least 350 pounds and that are clearly and conspicuously labeled with the following:
 - (1) Identity and responsibility; and
 - (2) The words "For Manufacturing Purposes Only."

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 8-6-81; effective thirtieth day thereafter (Register 81, No. 32).
- 3. Amendment of article heading and section filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.1. Table Grapes, Definition.

The term "table grape" means all grapes intended for shipment to market and for fresh consumption.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7-3-75; effective thirtieth day thereafter (Register 75, No. 27).
- 3. Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.2. Grapes, Container Markings Required for By-Products.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- 3. Repealer filed 8-6-81; effective thirtieth day thereafter (Register 81, No. 32).

§ 1436.3. Table Grapes, Sampling and Testing Method.

The maturity of table grapes shall be determined by an examination of the grapes in a representative sample of containers taken at random from any lot of containers of grapes. A "lot" means any group of containers that contain grapes of the same variety and of the same grade or brand, and which is set apart or is separate from any other group or groups.

The following procedure shall be used to determine whether grapes in a lot are in compliance with the maturity standards of this article:

(a) Sampling method. There shall be selected at random from the lot, the number of sample containers specified by the following table:

00 containers less	3
01 to 300	5
601 to 500	6
601 to 700	7

For lots of over 700 containers, one additional sample container shall be selected for each additional 200 containers or fraction thereof.

- (b) From the sample containers selected in accordance with paragraph (a), select the three containers which appear to contain the least mature grapes. From these three containers, select the two that contain grapes which appear to be the least mature of the three. Remove from each of these two containers 20 percent of the grapes, by weight, but not less than two bunches, from a contiguous area of each container which appears to be the least mature. Combine the grapes removed from both containers, crush, and extract the juice for testing. After extraction, agitate, thoroughly mix the juice, and test. If the test result complies with the soluble solids standard specified in this article, no further testing is required.
- (c) If the result of the soluble solids test as specified in (b) above fails to comply with the soluble solids standard specified for the variety, proceed to the second test as follows: thoroughly stir the juice used for the soluble solids test, measure out 10 c.c. of this juice, and titrate to determine the ratio of soluble solids to acid; if this ratio is equal to or higher than the ratio standard of 20 to 1 and the minimum soluble solids standard as specified in this article, no further testing is required.
- (d) If the results of either the soluble solids test provided in (b) above, or the ratio test provided in (c) above, fail to equal the standard specified for the variety of grape being tested, proceed to the third test as follows: remove the least mature appearing grapes from the third sample container by the same procedure prescribed in (b) above, extract the juice of the grapes selected from this third container, thoroughly mix the juice, and proceed with the soluble solids test, determine the mathematical average soluble solids percentage of the first test, (b) above, and this third test (d); this percentage shall be deemed the soluble solids percentage for the lot; if the result of this test complies with the soluble solids standard specified in this article, no further testing is required.
- (e) If the results of the soluble solids test provided in (d) above fail to equal the standard specified in this article for the variety being tested, proceed to the fourth test as follows: thoroughly stir the juice used for the soluble solids test provided in (b) (the 2-box test) and (d) above (the 3-box test); remove 10 c.c. of juice from each test, combine and thoroughly mix these two quantities of juice, and remove 10 c.c. of this combined juice and titrate; if the result of this test complies with the ratio standard of 20 to 1, and the minimum soluble solids as specified in this article, no further testing is required.
- (f) A second official sample may be taken and tested for maturity after the immature grapes from the containers in the lot failing the previous test have been removed.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. New section filed 5–14–68 as an emergency; effective upon filing. Certificate of Compliance included (Register 68, No. 19). For history of former section, see Register 67, No. 48.
- 2. Amendment filed 5–23–69 as an emergency; effective upon filing. Certificate of Compliance included (Register 69, No. 21).
- 3. Amendment and renumbering from Section 1426 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.4. Grapes, Additional Samples.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6–6–57; effective thirtieth day thereafter (Register 57, No. 9).
- 2. Amendment and renumbering from Section 1426–A filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 7–18–83, effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.5. Table Grapes, Method of Testing.

- (a) All grapes in the sample shall be completely crushed without unnecessary crushing of the stems. The juice shall be poured through a sieve or metal screen strainer that will permit the juice to escape rapidly and at the same time not permit, under pressure. any pulp or solids to go through. In no case shall the screen or sieve be less than 8 mesh per lineal inch.
- (b) When making a soluble solids test, a temperature compensated hand refractometer shall be used, the juice shall be thoroughly mixed and a small sample of the juice shall be placed upon the prism and read immediately to avoid evaporation. When the hand refractometer is used as a dipping instrument, the juice shall be thoroughly mixed and the refractometer shall be immersed to a depth that will ensure complete coverage of the prism for a period of 2 to 3 minutes for temperature equilibrium prior to reading.
- (c) Prior to each grape season, hand refractometers shall be checked for optical accuracy by using a standard solution. If the instrument is not accurate, it shall not be used in any official testing procedure.
- (d) When a test has been completed, the juice shall be drained or dried from all equipment before the juice from a subsequent test is used. The refractometer shall be washed and dried after each use.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 5–14–68 as an emergency; effective upon filing. Certificate of Compliance included (Register 68, No. 19). For history of former section, see Register 67, No. 48.
- 2. Amendment filed 5–23–69 as an emergency; effective upon filing. Certificate of Compliance included (Register 69, No. 21).
- 3. Renumbering from Section 1426.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 4. Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.6. Table Grapes, Equipment and Instruments.

- (a) The hand refractometer shall be temperature compensated, read directly in Brix percentage scale with divisions not more than 0.2 degrees, have a sharp demarcation line (shadow), be without interference by color or an indistinct line, and be sealed with acid proof material on the face where the juice is placed.
- (b) Any equipment used shall be made of materials that will not affect, or be affected by, the grape stems or grape juice being tested.

NOTE: Authority cited: Sections 14, 407, 42681, and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 4–28–67; effective thirtieth day thereafter (Register 67, No. 17).
- Amendment filed 5-23-69 as an emergency; effective upon filing. Certificate
 of Compliance included (Register 69, No. 21).
- 3. Renumbering from section 1426.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code section 11346.2(d) (Register 83, No. 30).
- 5. Amendment of subsection (a) and NOTE filed 12–3–91; operative 1–2–92 (Register 92, No. 9).

§ 1436.7. Table Grapes, Titration to Determine Soluble Solids to Acid Ratio.

(a) In order to compute the ratio of soluble solids to acid, the equipment necessary is as follows:

- (1) 10 c.c. pipettes
- (2) 250 c.c. Erlenmeyer flasks
- (3) 100 c.c. graduated cylinder
- (4) Bottle for indicator—1 oz. capacity

The additional necessary supplies are phenolphthalein indicator solution and sodium hydroxide standardized so that 1 c.c. is equivalent to 0.01 gram tartaric acid.

- (b) Procedure for making the soluble solids to acid ratio test:
- (1) The soluble solids content of the juice of the grapes in the sample is determined in accordance with present practice.
- (2) 10 c.c. of the clear juice should be pipetted into the Erlenmeyer
- (3) Add up to approximately 100 c.c. of distilled water to the juice in the flask
 - (4) Add three to four drops of the indicator solution.
- (5) Titrate by the addition of the sodium hydroxide (1 c.c. equivalent to 0.01 gram tartaric acid) until the end point is obtained as evidenced by the first definite color (pink) change.
 - (6) Calculate the ratio according to the following:

Sodium hydroxide used = acid content

10

<u>Soluble solids percentage</u> = ratio acid content

An example is given as follows:

1. 16.0 soluble solids percentage

2. 8.0 c.c. of NaOH used

3. 8.0 = 0.80 (acid content)

4. $\underline{16.0} = 20$ (ratio) 0.80

§ 1436.11. Grapes, Black Varieties.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2 (d) (Register 83, No. 30).

§ 1436.12. Table Grapes, Maturity Standards.

- (a) Except as otherwise provided in subsections (b) and (c) below, all varieties of table grapes shall be considered mature if the variety tests not less than 16 1/2 percent soluble solids in juice, or the juice contains soluble solids equal to or in excess of 20 parts to every part of acid contained in the juice (the acidity of the juice to be calculated as tartaric acid without water of crystallization).
- (b) The following varieties of table grapes shall be considered mature if the variety tests not less than that percent of soluble solids specified below:

10 11.		
Percent of Soluble Solids		ariety
17 1/2	All white varieties of M north and west of San C	Iuscat and White Malaga grown Gorgonio Pass.
17	Thompson Seedless gro Pass.	own north and west of San Gorgonio
15 1/2	Pass; Berenda Red, Car	south and east of San Gorgonio dinal, Imperial Cardinal, Richards north and west of San Gorgonio
	Blackrose	Isabella Regia
	Bleu Grau	Khalili
	Burger	Perlette
	California Concord	Persian 23
	Concord	Pierce Isabella
	Dattier de Beyrouth	Oueen
	Delight	Red Malaga
	Dizmar	Ribier
	Drodelabi	Servian Blue
	Emperor	Sugraone
	Fresno Beauty	Sugrathirteen
14 1/2	and Robin grown south	Imperial Cardinal, Richards Black and east of San Gorgonio Pass; and
	Ladyfinger	Olivette Blanche
	Khandahar	Rish Baba

(c) The Thompson Seedless variety shall be considered mature if the juice contains not less than 15 percent soluble solids, and the Perlette and Sugraone varieties shall be considered mature if the juice contains not less than 14 percent soluble solids, provided the juice so tested for the three varieties shall also contain soluble solids equal to or in excess of 20 parts to every part acid contained in the juice.

- Amendment filed 5-11-78; effective thirtieth day thereafter (Register 78, No. 19).
- 3. Amendment filed 8-6-81; effective thirtieth day thereafter (Register 81, No. 32).
- Répealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.15. Grapes, Group A Standards.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.16. Grapes, Not in Group A.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.17. Table Grapes, No Tolerances for Maturity Standards.

The maturity standards which are provided by this article are minimum standards, and no tolerance shall be applied to any test which is made for the purpose of determining whether any variety of table grapes complies with the maturity standards of this article.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.18. Table Grapes, Standards.

Table grapes shall consist of bunches of grapes which are mature and free from serious damage due to:

- (a) mildew or insect injury which has penetrated or damaged the flesh of the berry;
 - (b) mold, decay, or severe freezing injury;
 - (c) raisined, sunburned, or dried berries; and
 - (d) waterberry or redberry.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.19. Table Grapes, Serious Damage Defined.

Damage to any one bunch is serious when more than 5 percent, by count, of the berries on any one bunch are affected by one or more of the defects.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.20. Table Grapes, Tolerances.

Not more than 10 percent, by weight, of the bunches of grapes in any container or bulk lot may fail to meet the requirements of Section 1436.18.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No.
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.21. Juice Grapes, Defects.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.22. Juice Grapes, Tolerances.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.23. Grapes, Failure to Meet Juice Grape Standards.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Répealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.24. Table Grapes, Defect Definitions.

The following definitions apply to this article:

- (a) Raisined Berries. Grapes resembling raisins which do not contain sufficient juice to drop from the berry when pressured between the thumb and forefinger.
- (b) Waterberry. A physiological disorder which is characterized by a watery, soft, or flabby condition of the berry. Affected berries are low in sugar content, have tender skins, and are very easily crushed.
- (c) Redberry. Closely resembles waterberry and is generally found in black varieties. In addition to the characteristics of waterberry, grapes show a red or brownish-red color.
- (d) Sunburned or Dried. Grapes which show drying of all or part of individual berries.
- (e) Severe Freezing Injury. When damage from freezing has affected the pulp of the berries.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.25. Grapes, Raisined Berries.

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.28. Grapes, Sunburned or Dried Berries.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.29. Grapes, Waterberry.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No.
- Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.30. Table Grapes, Marking Requirements.

- (a) In addition to the marking requirements of Section 1359, every nonconsumer container of grapes shall be clearly and conspicuously marked with the following information:
- (1) The name of the variety of grapes, if known, or the words "Unknown Variety."
 - (2) The term "table grapes."
- (3) If two or more varieties are placed in the same container, the words "Mixed Varieties." A mixture of white grapes may be marked "Mixed White Varieties." A mixture of black grapes may be marked "Mixed Black Varieties."
- (4) The net weight statement of 21 pounds. If the grapes are packed in areas located east of a line extending north and south through White Water and that area located east of the 115 meridian, including the Coachella Valley, the containers shall be marked "20 pounds." These weight markings are not required on standard container number 28, or containers with bunches of grapes which are completely wrapped.

The above markings shall be on the containers of grapes when removed from the premises where grown or first packed. However, if the containers are to be stored on the premises of the producer, the containers need not be marked until removal from storage for transportation. In no case shall unmarked containers of grapes be sold or transported to the marketplace.

(b) Closed consumer bags, clear plastic containers closed with a detachable or attached lid, and other types of closed consumer containers shall be marked with identity, responsibility, and net quantity. Closed means that a deliberate attempt has been made to close the container opening (top and/or bottom) in any way, including, but not limited to, tying, or otherwise closed with a pressure—sensitive seal, zip lock, or other closing device. Merely twisting or rolling over of the opening of a bag shall not be considered closed. This definition shall apply only to the portion(s) of the bag with closure capability and shall not apply to ventilation holes.

Not more than 10%, by count, of the subcontainers, as described above, in a representative sample of any lot of master containers may be closed without the required markings.

The requirements of this subsection shall not apply to:

(i) Table grapes imported into California from other states and foreign countries.

(ii) Closed consumer-type containers that have been closed by the retailer and intended to be sold in compliance with Title 4 marking requirements.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from section 1432.9 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 4–30–75; designated effective 6–1–75 (Register 75, No. 18).
- Amendment filed 7–18–83; effective upon filing pursuant to Government Code section 11346.2(d) (Register 83, No. 30).
- Amendment of subsection (d) filed 5–5–86; effective upon filing pursuant to Government Code section 11346.2(d) (Register 86, No. 19).
- Amendment of subsection (a) filed 7-15-94 as an emergency; operative 7-15-94 (Register 94, No. 28). A Certificate of Compliance must be transmitted to OAL by 11-14-94 or emergency language will be repealed by operation of law on the following day.
- Reinstatement of section as it existed prior to emergency amendment filed 2-2-95 by operation of Government Code section 11346.1(f) (Register 95, No. 5).

- 7. Amendment of subsection (d) filed 1–17–96; operative 1–17–96 pursuant to Government Code section 11343.4(d) (Register 96, No. 3).
- 8. Amendment of section and Note filed 5–4–2001 as an emergency; operative 5–4–2001 (Register 2001, No. 18). A Certificate of Compliance must be transmitted to OAL by 9–4–2001 or emergency language will be repealed by operation of law on the following day.
- 9. Reinstatement of section as it existed prior to 5-4-2001 emergency action by operation of Government Code section 11346.1(f) (Register 2001, No. 48).
- 10. Amendment of section and Note filed 11-28-2001; operative 12-28-2001 (Register 2001, No. 48).

§ 1436.31. Table Grapes, Mislabeling.

- (a) Grapes shall not be mislabeled as to variety. In particular, the following variety designations are prohibited:
- (1) The Malvoisie variety shall not be labeled as a Barbara or Barberone variety, but may be labeled a Cinsaut variety.
 - (2) "Palomino Champagne."

[The next page is 177.]

- (b) The term "Chianti" refers to a type or characteristic of wine and shall not be used in connection with the labeling of any variety of grape.
- (c) The term "seedless" shall not be marked on containers of table grapes unless it is used in conjunction with the varietal designation. NOTE: Authority cited: Sections 407 and 42682. Food and Agricultural Code. Ref-

erence: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1428 filed 1-21-75; effective thirtieth day thereaf-
- ter (Register 75, No. 4).
 2. Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.32. Grapes, Labeling.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-1-64; effective thirtieth day thereafter (Register 64, No.
- 12). For history of former section, see Register 59, No. 12.

 2. Amendment filed 1–4–71 as an emergency: effective upon filing. Certificate of Compliance included (Register 71, No. 2).

 3. Amendment and renumbering from Section 1429 filed 1–21–75; effective thir-
- tieth day thereafter (Register 75, No. 4).
 4. Repealer filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.33. Seeded Raisins, Variety Markings on Containers.

Every box, package, or carton of seeded raisins, which indicates that it contains raisins, shall be clearly and conspicuously marked with the variety of grape from which the raisins were produced.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- 2. Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.34. Raisins, Violation Penalties.

HISTORY

- 1. New section filed 1-21-75; effective thirtieth day thereafter (Register 75, No.
- 2. Repealer filed 7-18-83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.35. Grapes, Standard Container Nos. 38J, 38K, 38Q

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 4291, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7–17–78 as an emergency; effective upon filing (Register 78,
- No. 29). For prior history, see Register 77, No. 31.

 2. Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).
- 3. Certificate of Compliance as to order of 7-17-78 filed 11-9-78 (Register 78, No. 45).
- 4. Repealer filed 7-18-83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).

§ 1436.36. Grapes, Standard Container No. 38Q.

HISTORY

- 1. Renumbering from Section 1432.7 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 3-18-76; effective thirtieth day thereafter (Register 76, No. 12).

§ 1436.37. Table Grapes, Closed Container Requirements.

All varieties of table grapes shall be in standard containers that have the top opening of the container covered as specified below.

- (a) 40 percent or more of the opening is covered with a material that is part of the construction of the container or is attached to the container opening.
- (b) Notwithstanding subdivision (a), container 38M shall also be considered covered when 90 percent or more of the opening of the container is covered with a wrap, curtain, or pad that is held in place by the weight of the grapes in the container. A liner that is placed inside the container and closed by sealing shall be considered as covering the opening.

(c) Openings in the closing material that facilitate cooling or that are necessary for attaching the material to the container shall be considered as complying with subdivisions (a) and (b).

Containers of table grapes need not meet this requirement when in a retail store and open for display to persons who purchase grapes for their own consumption.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment and renumbering from Section 1432.8 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).
- 3. Amendment filed 1–6–2003; operative 2–5–2003 (Register 2003, No. 2).

§ 1436.38. Table Grapes, Standard Containers.

- (a) All table grapes shall be placed in containers 28, 38J, 38K, 38L, 38M, 38Q, 38R, 38S, 38T, 38U or 38V.
- (b) Containers 38J, 38K, 38L, 38M, 38Q, 38R, 38S, 38T, 38U, and 38V shall be considered standard when they are packed with pads, inner liners, or any other device as long as the inside volume of the container is not reduced by more than 10 percent. The vacant spaces, if any, which result from the use of such devices, shall be readily visible.
- (c) Container 28 shall be considered standard only if it contains grapes which are packed in sawdust, cork, or similar packing material in sufficient amount to completely surround and cover the grapes, and it is used without cleats.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 7-25-77; effective thirtieth day thereafter (Register 77, No. 31). For prior history, see Register 75, No. 4.
- 2. Amendment filed 7-17-78 as an emergency; effective upon filing (Register 78, No. 29).
- 3. Certificate of Compliance filed 11-9-78 (Register 78, No. 45).
- 4. Amendment filed 7-18-83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30).
- 5. Amendment filed 3-9-84; effective thirtieth day thereafter (Register 84, No.

§ 1436.42. Table Grapes, Girdled.

The term "girdled" or any designation which implies that table grapes have come from vines or members thereof which have been girdled shall no appear on any container of grapes unless it is a correct and true statement.

Girdled or girdling means the removal of a ring of bark from around the entire periphery of the trunk or member of the vine during the early development of the grapes.

- 3. Repealer filed 7–17–78 as an emergency; effective upon filing (Register 78, No. 29).
- 4. Certificate of Compliance filed 11-9-78 (Register 78, No. 45).

Article 25.5. Juice Grapes

§ 1437. Juice Grapes, Requirements for Out-of-State Processing.

In addition to the requirements of Section 1390.14, juice grapes which are being transported out of state for commercial processing, preserving, or manufacturing shall:

- (a) Comply with the quality requirements of this article;
- (b) Be in containers with a net weight of at least 350 pounds; and
- (c) Be in containers that are clearly and conspicuously labeled with the following:
 - (1) Identity and responsibility.
 - (2) The words "For Manufacturing Purposes Only."

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New Article 25.5 (Sections 1437, 1437.1–1437.12) filed 7–18–83; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 83, No. 30)

§ 1437.1. Juice Grapes, Definition.

The term "juice grape" means all grapes shipped to market and intended for the purpose of extracting juice.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.2. Juice Grapes, Sampling and Testing Method.

The maturity of juice grapes shall be determined by testing the juice from a composite sample of grapes selected as prescribed by this section.

The following procedure shall be used to determine whether juice grapes are in compliance with the maturity standards of this article:

(a) Sampling method. There shall be selected at random from the lot the number of sample containers specified in the following table:

Lot Size	Sample Size
100 containers or less	3
101 to 300	5
301 to 500	6
501 to 700	7

For lots of over 700 containers, an additional sample container shall be selected for each additional 200 containers or fraction thereof.

- (b) Select at random not less than 10 percent of the grapes, by weight, from each of the containers. Combine the samples and make one composite test from the total juice extracted.
- (c) A second official sample may be taken and tested for maturity after the immature grapes from the containers failing the previous test have been removed.

(d) Titration shall not be used to test the maturity of juice grapes. NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.3. Juice Grapes, Method of Testing.

- (a) All grapes in the sample shall be completely crushed without unnecessary crushing of the stems. The juice shall be poured through a sieve or metal screen strainer that will permit the juice to escape rapidly and at the same time not permit, under pressure, any pulp or solids to go through. In no case shall the screen or sieve be less than eight mesh per lineal inch.
- (b) When making a soluble solids test, a temperature compensated hand refractometer shall be used, the juice shall be thoroughly mixed, and a small sample of the juice shall be placed upon the prism and read immediately to avoid evaporation. When the hand refractometer is used as a dipping instrument, the juice shall be thoroughly mixed and the refractometer shall be immersed to a depth that will ensure complete coverage of the prism for a period of two to three minutes for temperature equilibrium prior to reading.
- (c) Prior to each grape season, hand refractometers shall be checked for optical accuracy by using a standard solution. If the instrument is not accurate, it shall not be used in any official testing procedure.
- (d) When a test has been completed, the juice shall be drained or dried from all equipment before the juice from a subsequent test is used. The refractometer shall be washed and dried after each use.

NOTE: Authority cited: Sections 407, 42681 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.4. Juice Grapes, Equipment and Instruments.

- (a) The hand refractometer shall be temperature compensated, read directly in Brix percentage scale with divisions not more than 0.2 degrees, have a sharp demarcation line (shadow), be without interference by color or an indistinct line, and be sealed with acid proof material on the face where the juice is placed.
- (b) Any equipment used shall be made of materials that will not affect, or be affected by, the grape stems or grape juice being tested.

NOTE: Authority cited: Sections 14, 407, 42681, and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment of subsection (a) and NOTE filed 12–3–91; operative 1–2–92 (Register 92, No. 9).

§ 1437.5. Juice Grapes, Maturity Standards.

All varieties of juice grapes shall be considered mature if the variety tests not less than 19 percent soluble solids in juice, except the White Malaga, Thompson Seedless, Alicante, and Palomino varieties which shall test not less than 18 percent soluble solids in juice.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.6. Juice Grapes, No Tolerances for Maturity Standards.

The maturity standards which are provided by this article are minimum standards, and no tolerance shall be applied to any test which is made for the purpose of determining whether any variety of juice grape complies with the maturity standards of this article.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.7. Juice Grapes, Standards.

Juice grapes shall be mature and free from mold, decay, waterberry, redberry, or severe freezing injury.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.8. Juice Grapes, Tolerances.

Not more than 15 percent, by weight, of the berries in any container or bulk lot may fail to meet the requirements of Section 1437.7.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.9. Juice Grapes, Defect Definitions.

The following definitions apply to this article:

- (a) Waterberry. A physiological disorder which is characterized by a watery, soft, or flabby condition of the berry. Affected berries are low in sugar content, have tender skins, and are very easily crushed.
- (b) Redberry. Closely resembles waterberry and is generally found in black varieties. In addition to the characteristics of waterberry, grapes show a red or brownish-red color.
- (c) Severe Freezing Injury. When damage from freezing has affected the pulp of the berry.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

[The next page is 179.]

§ 1437.10. Juice Grapes, Marking Requirements.

- (a) In addition to the marking requirements of section 1359, every nonconsumer container shall be clearly and conspicuously marked with the following information:
 - (1) The term "juice grapes."
- (2) The name of the variety of grapes, if known, or the words "Unknown Variety." If two or more varieties are placed in the same container, the term "Mixed Varieties" shall be used. A mixture of white grapes may be marked "Mixed White Varieties." A mixture of black grapes may be marked "Mixed Black Varieties."
- (A) The varietal designation of the Zinfandel shall be printed or embossed in clear and conspicuous letters on the container label and in ³/4 inch letters on each side panel of the container. Such designation shall be included as part of the label and side panels at the time of manufacture.
- (B) All other varietal labels shall be printed or embossed on each container.
 - (C) Stick-on labels are prohibited for varietal markings.
- (3) A new weight statement of 36 or 42 pounds. Containers exported to countries other than Canada need not comply with this requirement, provided they are marked with:
- (A) The statement "Only For Export Shipment To" followed by the country of destination.
- (B) All of the required markings in the recognized language of the country of destination.
- (b) When any lot of containers of grapes is found to be mislabeled as the Zinfandel variety, or when any lot of containers of the Zinfandel variety is found in noncompliance with subsection (a)(2)(A), above, the grapes shall be removed and placed in properly marked containers or disposed as authorized. For the purpose of this article, a variety other than Zinfandel shall be considered mislabeled when found in containers marked Zinfandel, even though Zinfandel has been obliterated and the proper variety placed on the container.

NOTE: Authority cited: Sections 14, 407, and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–5–86; effective upon filing pursuant to Government Code section 11346.2(d) (Register 86, No. 36).
- 2. Repealer of subsection (d)(2), and renumbering of subsections (d)(3) and (d)(4) to subsections (d)(2) and (d)(3) filed 4–16–87; operative 4–20–87 (Register 87, No. 16).
- 3. Amendment filed 8–7–90; operative 8–7–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 39).

§ 1437.11. Juice Grapes, Mislabeling.

- (a) Juice grapes shall not be mislabeled as to variety. In particular, the following variety designations are prohibited:
 - (1) "Palomino Champagne."
- (2) The Malvoisie variety shall not be labeled as a Barbara or Barberone variety, but may be labeled as a Cinsaut variety.
- (b) The term "Chianti" refers to a type or characteristic of wine and shall not be used in connection with the labeling of any variety of juice grape.
- (c) The term "seedless" shall not be marked on containers of juice grapes unless it is used in conjunction with the varietal designation. NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

§ 1437.12. Juice Grapes, Standard Containers.

- (a) All juice grapes shall be placed in standard containers 38K, 38Q, 38R, or 38RPC.
- (b) These containers shall be considered standard when they are packed with pads, inner liners, or any other device as long as the inside volume of the container is not reduced by more than 10 percent. Vacant spaces resulting from the use of such devices shall be readily visible. NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Amendment filed 8–7–90; operative 8–7–90 pursuant to Government Code section 11346.2(d) (Register 90, No. 39).

2. Amendment of subsection (a) filed 11–1–2007; operative 12–1–2007 (Register 2007, No. 44).

Article 27. Lettuce

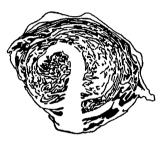

§ 1438. Head Lettuce Defects.

Head lettuce, including partially or completely cored heads, shall not be leafy without head formation, shall be fairly well trimmed, and shall be free from any of the following defects:

- (a) Insect injury, slime, decay, or rot which affects leaves within the
- (b) Seed stems which have been determined to be present by internal examination and which exceed the length permitted in the following official illustration established by the Director.

LETTUCE SEEDSTEM

Maximum length permitted under Section 1438(b)

(c) Serious damage which is caused by broken midribs, bursting, tip burn, or freezing. Damage which is caused by freezing or tip burn is not serious unless it affects any portion of the head inside of the six outer head leaves.

NOTE: Authority cited: Sections 14, 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 4–17–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 16).
- 3. Amendment of subsection (b) filed 10–14–87; operative 11–13–87 (Register 87, No. 42).

§ 1438.1. Head Lettuce, Freezing.

Section 1438 provides in part: "damage caused by freezing... is not serious unless it affects any portion of the head inside of the six outer head leaves."

In determining when the heads inside of the six outer head leaves are affected, "blistering" of the epidermis of the leaf does not in itself constitute sufficiently serious damage to be considered serious under this definition. However, if the tissues in the leaf under this epidermis are brittle or soft or pithy or discolored to any extent, due to freezing injury, the leaf has been affected.

It should be noted here that one of the indications of such damage in the tissues which is serious will cause the leaf, when peeled off the head, to break into small particles.

HISTORY

- 1. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from Section 1436.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.2. Head Lettuce, Fairly Well Trimmed.

Section 1438 requires head lettuce to be "fairly well trimmed." "Fairly well trimmed" means that the butt is trimmed off close to the point of attachment of the outer leaves and that the wrapper leaves do not exceed six in number. "Wrapper leaves" means all leaves which do not closely enfold the compact portion of the head.

HISTORY

- 1. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2). For prior history, see Register 67, No. 43.
- 2. Amendment and renumbering from Section 1436.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.3. Head Lettuce, Broken Midribs and Bursting.

Section 1438 provides that head lettuce shall be free from serious damage caused by "broken midribs" and "bursting."

Damage to heads of lettuce due to "broken midribs" shall be considered serious when the midribs of more than four of the outer head leaves, which closely enfold the compact portion of the head, are broken in two; i.e., broken and severed all the way across the midrib. Damage to heads of lettuce due to "bursting" shall be considered serious when the head is cracked or split open and any part of the inner portion of the head is exposed.

HISTORY

- 1. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Amendment and renumbering from Section 1436.3 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.4. Lettuce, Tipburn.

Tipburn shall be considered serious damage if the affected portion on one or more leaves exceeds, in the aggregate, an area of one inch by one-half inch, and the color of the tipburn is light buff or darker, but does not include areas showing tan to brown specks with normal lettuce color between such specks.

HISTORY

- 1. New Sections 1436 and 1436.1 filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment filed 5-1-61; effective thirtieth day thereafter (Register 61, No. 9)
- 3. Renumbering from Section 1436 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.5. Head Lettuce, Tolerances.

Not more than 15 percent, by count, of the heads of lettuce in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed 5 percent, shall be allowed for decay or slime. Individual containers in any lot may, however, contain not more than 1 1/2 times the tolerance which is specified, if the percentage of defects in the entire lot averages within the tolerance specified, as determined by inspection of a representative sample.

HISTORY

New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.6. Lettuce, Marking Requirements.

In addition to the basic marking requirements of Identity, Responsibility, and Net Quantity as required by Section 1359, every nonconsumertype container of packed lettuce shall be marked, in letters and numbers not less than those prescribed in Table 1 of Section 1363, with the exact number of heads contained therein.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Renumbering from Section 1437.10 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).
- 3. Amendment filed 11–8–78; effective thirtieth day thereafter (Register 78, No. 45).

§ 1438.7. Head Lettuce, Standard Containers, Requirements and Exemptions.

Any head lettuce which is prepared for transportation or sale shall be packed in closed standard container numbers 45A, 45B, 45C, or 45F except the following:

- (a) Head lettuce which is in a retail establishment in the possession of a retailer for the purpose of resale directly to consumers.
- (b) Head lettuce which is sold by a producer that is regularly engaged in the production of lettuce, directly to consumers on the premises where

the lettuce is produced or lettuce at a retail stand which is operated by such producer near the point of production.

- (c) Head lettuce which is prepared for transportation, transported, or sold by a producer or jobber of lettuce in containers which contain less than 18 heads of lettuce for sale to retail stores of not more than one such container per sale.
- (d) Head lettuce which is sold to the armed forces of the United States Government or for export markets other than Canada or Mexico.
 - (e) Head lettuce placed loose in standard container number 45.
- (f) Individual containers which are placed in master containers as defined in Section 1361(c).
- (g) Head lettuce measuring less than fourteen inches in circumference when measured at its widest point.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–20–77; effective thirtieth day thereafter (Register 77, No. 21). For prior history, see Register 75, No. 50.
- Amendment filed 12–31–79 as an emergency; effective upon filing (Register 80, No. 1). A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 4–30–80.
- 3. Certificate of Compliance filed 4-17-80 (Register 80, No. 16).
- Amendment filed 5–8–81; effective thirtieth day thereafter (Register 81, No. 19).
- New subsection (f) filed 4–17–84; effective upon filing pursuant to Government Code section 11346.2(d) (Register 84, No. 16).
- Change without regulatory effect amending first paragraph filed 1–25–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 5).
- 7. New subsection (g) filed 5–23–2008; operative 6–22–2008 (Register 2008, No. 21).

§ 1438.8. Lettuce, General Provisions for Standard Containers and Packs.

The standard containers and packs for lettuce, when being packed or placed in any container, or after packing, or when delivered for shipment, loaded, shipped, being transported or sold in any container, are as prescribed in Sections 1438.7, 1438.16, and 1438.17 of this article.

NOTE: Authority cited: Section 85, Chap. 1470, Stats. 1970, and Sections 407 and 42681, Food and Agricultural Code.

.. History

- 1. New Sections 1437.2 through 1437.8 and 1437.10 filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2)
- 2. Amendment filed 2–2–72; effective thirtieth day thereafter (Register 72, No. 6).
- 3. Amendment and renumbering from Section 1437.2 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.9. Closed or Lidded.

As used in this group, closed or lidded means the following:

- (a) In the case of fiberboard containers, that the opening is completely covered, except for necessary ventilation openings, with material of similar quality and strength to the adjoining portion of the container and as required in Section 1438.12.
- (b) In the case of nailed wooden, wirebound, or other containers, that 40 percent or more of the opening is covered with material which is similar to that used in the construction of the sides of such container, which is securely attached to the top.

HISTORY

1. Amendment and renumbering from Section 1437.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.10. Lettuce, Use of Cleats on Containers.

When the California Administrative Code provides for the use of standard containers, but fails to provide for the use of cleats, a container is not considered standard when cleats underneath the lid are used, which in effect increase the depth of the container.

Reference is made to State Attorney General's opinion No. 10273 dated October 16, 1935: "The object of the legislation prescribing standard sizes of crates is to insure uniformity of capacity, in order to prevent

Page 180

fraud and deception. If a packer should be allowed to increase the size of his crate by 10 percent, this uniformity would no longer exist and the purpose of the law would be frustrated."

HISTORY

- New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Amendment and renumbering from Section 1437 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.11. Consumer, Flaps, and Retail Establishment.

As used in this group:

- (a) Consumer means a person that buys lettuce for use as food, and not for commercial distribution, or for resale.
- (b) Inner and outer flaps means the parts of the container that are attached to the top of the sides and ends which are used to form the cover or lid of the container.
- (c) Retail establishment includes a retailer's warehouse from which the lettuce is distributed by such retailer to his individual retail outlets or stores.

HISTORY

1. Renumbering from Section 1437.4 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.12. Lettuce, Fiberboard Container.

Standard containers for lettuce which are made of fiberboard shall be constructed with inner and outer side flaps which are attached to each end and side. The total width of the two side flaps shall not exceed the inside width of the container and, if closed after packing, shall be closed by folding the inner and outer flaps inward at the manufacturer's score lines which shall be above the inside bottom surface of the container at a point equal to the inside depth of the container. For standard container number 45A, if they are fastened in a closed position, the opening between the outer side flaps shall not average more than two inches for the entire length of the container, allowing a 10 percent tolerance for the containers in any one lot.

HISTORY

1. Renumbering from Section 1437.5 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.13. Lettuce, Two and One-Half Dozen Size.

Section 1438.16 of Title 3, California Code of Regulations, provides that heads of lettuce "of the 2 1/2 dozen size when fairly tightly packed in standard container numbers 45A, 45B, or 45F" may be placed in such containers as a bridge pack, with 12 heads in the lower layer and 12 heads in the upper layer with six heads of the same size between such layers. "Two and one-half dozen size" in the bridge pack described in this section, means heads of lettuce of uniform size which are (1) larger than heads of lettuce that can be packed flat with 15 heads to a layer (3 x 5) in standard container numbers 45A, 45B, or 45F and (2) smaller than heads of lettuce that can be packed with two dozen heads in two layers of 12 heads in each layer (3 x 4) in the same container. When determining the size of heads of lettuce as defined in this section the heads shall be fairly tightly packed but not so tight that the lettuce is damaged or injured in such packing.

NOTE: Authority cited: Sections 407, 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 12–31–79 as an emergency; effective upon filing (Register 80, No. 1). For prior history, see Register 75, No. 4, and 74, No. 25. A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 4–30–80.
- Certificate of Compliance including amendment filed 4–17–80 (Register 80, No. 16).
- Amendment filed 5-8-81; effective thirtieth day thereafter (Register 81, No. 19).
- Change without regulatory effect amending section filed 1–25–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 5).

§ 1438.14. Lettuce, Slight Bulge Definition.

Slight bulge shall mean that when lettuce is placed in container numbers 45B or 45C:

- (1) The gap between the top or bottom side flaps when stapled or glued in a closed position does not exceed one—half inch at any point in addition to the normal gap between the side flaps of an empty container when in a closed position.
- (2) The top and bottom side and end flaps on container number 45B shall be 7 3/4 inches wide as measured from the score line to the edge of the flap when in a closed position.

Standard container number 45C shall be standard for lettuce and may have a slight bulge when the lettuce is first placed or packed in it as provided in this section, except that each side flap shall not exceed 7 1/8 inches.

- (3) When a closing device is used to properly close these containers, it shall only be used as a means to assist in closing the carton and is not to be used to apply pressure to the extent that any excessive bulge would be eliminated.
- (4) The nonbulge lettuce containers numbers 45B and 45C may have a slight bulge, when the lettuce is first placed or packed in them, on each side, each end, the top, and the bottom. Inspections to determine the requirements of the slight bulge, when possible, shall be made at the time the lettuce is in the field. However, in cases where this is not practical or possible, inspections may be made at the cooler, prior to cooling and loading for final shipment.

NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 43607, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2). For prior history, see Register 68, No. 19.
- 2. Amendment and renumbering from Section 1436.5 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.15. Lettuce, Slight Bulge Tolerance.

Not more than 5 percent, by count, of containers numbers 45B or 45C in any lot may exceed the slight bulge.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No.

§ 1438.16. Lettuce, Size Variation and Pack Arrangements.

- (a) Head lettuce, which is packed or placed in layers in any container, shall not vary in size in any one container more than 15 percent of heads which would fairly tightly pack a size, larger or smaller, than the size which is marked. It shall be fairly tightly packed with the same numerical count of regularly arranged heads in each layer. None of the heads shall be placed outside of the regular arrangement of two uniform flat layers in standard container numbers 45A, 45B, 45C, or 45F. If, however, 2 1/2 dozen heads of lettuce of the 2 1/2 dozen size when fairly tightly packed in standard container numbers 45A, 45B, or 45F are packed in such containers, six heads of the same size or dimensions as the heads which are contained in the upper and lower layers may be placed between such layers if the upper and lower layers consist of 12 heads each and the total count in the container is 30 heads.
- (b) Not more than 15 percent, by count, of the individual heads of partially or completely cored lettuce in any master container may measure more than 1 1/2 inches larger in diameter than the smallest head in the container.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

- 1. Amendment filed 12–31–79 as an emergency; effective upon filing (Register 80, No. 1). For prior history, see Registers 77, No. 21, and 75, No. 4. A Certificate of Compliance must be filed within 120 days or emergency language will be repealed on 4–30–80.
- 2. Certificate of Compliance filed 4-17-80 (Register 80, No. 16).
- Amendment filed 5-8-81; effective thirtieth day thereafter (Register 81, No. 19).
- 4. Editorial correction (Register 81, No. 34).

- Amendment filed 4-17-84; effective upon filing pursuant to Government Code section 11346.2(d) (Register 84, No. 16).
- Change without regulatory effect amending subsection (a) filed 1–25–93 pursuant to title 1, section 100, California Code of Regulations (Register 93, No. 5).

§ 1438.17. Lettuce, Packing Requirements As to Count.

In addition to other packing requirements in this group, head lettuce which is packed or placed in layers shall contain either 1 1/2 dozen, two dozen, or 2 1/2 dozen heads of lettuce per standard container.

Partially or completely cored heads of lettuce shall be packed or placed four, six, or eight heads to a container which shall be placed in a master container.

Head lettuce measuring less than fourteen inches in circumference when measured at its widest point is exempt from this section.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 9–21–73; effective thirtieth day thereafter (Register 73, No. 38).
- 2. Renumbering from Section 1437.8 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 4–17–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 16).
- 4. Amendment filed 5-23-2008; operative 6-22-2008 (Register 2008, No. 21).

§ 1438.18. Head Lettuce, General Provisions.

The director may by regulation establish quality standards for head lettuce to be used for chopping and shredding, prior to chopping or shredding, in conjunction with standards for lettuce which has been chopped or shredded and packaged. He may also establish regulations for granting, denial, suspension, and revocation of permits to insure compliance with this article and the regulations promulgated thereunder, including the transportation and sale of the product to be used for chopping or shredding.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.19. Head Lettuce to Be Used Commercially for Salad Products.

NOTE: Authority cited for Sections 1438, 1438.1, 1438.2 and 1438.3: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 48059, Food and Agricultural Code.

HISTORY

- 3. Renumbering from Section 1438 filed 1–21–75; effective thirtieth day thereafter (Register 75, N. 4).
- 4. Repealer filed 12-6-77; effective thirtieth day thereafter (Register 77, No. 50).

§ 1438.20. Sectioning Defined.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1438.45 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Repealer filed 4–17–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 16)

§ 1438.21. Official Sample, Prior to Preparation.

Sampling shall be taken at random and in the amounts as follows:

_	-																						
	<i>tolerand</i> lbs. or leading to the second to	ess .		 																			
	5 tons																						
over	5 tons			 ٠.	٠.	 	• •	 ٠	 ٠.	٠.	٠.	٠	٠.	٠		٠.		•		٠.	•	200	•
Defect less t	tolerand than 500	ces: O lbs.		 																		25 1	bs.
500 1	bs. to 2	000 1	bs.	 		 			 												1	001	bs.
over	2000 It	S		 																	2	200 1	bs.
														1	oli	ıs	10	OC	11	bs.	. f	or ea	ich
														•								0001	

Adequate space and equipment for sampling and inspection for the enforcing officer shall be provided by the owner or person in possession.

HISTORY

- 1. New section filed 12–2–70; effective thirtieth day thereafter (Register 70, No. 49).
- 2. Renumbering from Section 1438.3 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.22. Standards for Commercial Salad Products.

It is unlawful for any person to prepare, pack, place, deliver for shipment, deliver for sale, load, ship, transport, cause to be transported, or sell any salad product in any container or subcontainer unless the salad product and the containers conform to this article.

NOTE: Authority cited for former Sections 1438.40 through 1438.46: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 48059, Food and Agricultural Code.

HISTORY

- 1. New Sections 1438.40, 1438.41, 1438.42, 1438.43, 1438.44, 1438.45, 1438.46 filed 12–2–70; effective thirtieth day thereafter (Register 70, No. 49).
- Renumbering from Section 1438.40 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Editorial correction of Authority cite (Register 95, No. 8).

§ 1438.23. Minimum Requirements for Salad Products.

Salad products shall be clean and free from excessive moisture, insects, insect parts, insect injury, slime, decay, rot, cores, core pieces, and discoloration.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1438.41 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 12–6–77; effective thirtieth day thereafter (Register 77, No. 50).
- Amendment filed 4–17–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 16).

§ 1438.23.1. Salad Products, Reporting Requirements.

 $Note: Authority\ cited: Sections\ 407\ and\ 42795, Food\ and\ Agricultural\ Code.\ Reference:\ Section\ 42941,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. New section filed 6-20-88; operative 7-20-88 (Register 88, No. 26).
- 2. Repealer of section and amendment of NOTE filed 3-13-2001; operative 4-12-2001 (Register 2001, No. 11).

§ 1438.24. Salad Products, Definition of Terms.

- (a) "Salad products" means shredded or chopped head lettuce, leaf-type lettuce or cabbage, either individually packaged or mixed with other vegetables.
- (b) "Shredded" means any salad product cut in shreds of which more than 50 percent, by weight, of the package contents measures less than 1/2 inch in width.
- (c) "Chopped" means any salad product cut in pieces of which more than 50 percent, by weight, of the package contents measures 1/2 inch and larger in width.
- (d) "Processor" means any person engaged in the business of preparing salad products for market, but it does not include a person engaged in:
- (1) manufacturing from salad products to another and different product, and
- (2) operating a restaurant or retail grocery outlet where salad products are prepared and sold to consumers.

NOTE: Authority cited: Sections 14 and 407, Food and Agricultural Code. Reference: Sections 42684, 42795 and 42941, Food and Agricultural Code.

History

- 1. Amendment filed 12-2-70; effective thirtieth day thereafter (Register 70, No. 49).
- 2. Renumbering from Section 1438.1 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 4–17–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 16).
- 4. Amendment of subsection (c), and repealer and new subsection (d) filed 6-20-88; operative 7-20-88 (Register 88, No. 26).

Page 182

or fraction thereof

§ 1438.25. Salad Products, Minimum Requirements.

It is unlawful for any person to prepare vegetables other than lettuce for salad products unless prior to such preparation the quality requirements for that vegetable are met that are contained in the California Administrative Code.

HISTORY

- 1. Amendment filed 12–2–70; effective thirtieth day thereafter (Register 70, No. 49).
- 2. Amendment and renumbering from Section 1438.2 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.25.1. Salad Products, Maintenance of County Inspection Records.

NOTE: Authority cited: Sections 407 and 42795, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-20-88; operative 7-20-88 (Register 88, No. 26).
- 2. Repealer of section and amendment of Note filed 3-13-2001; operative 4-12-2001 (Register 2001, No. 11).

§ 1438.25.2. Salad Products, Maintenance of Processor Inspection Records.

NOTE: Authority cited: Sections 407 and 42795, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-20-88; operative 7-20-88 (Register 88, No. 26).
- 2. Repealer of section and amendment of Note filed 3-13-2001; operative 4-12-2001 (Register 2001, No. 11).

§ 1438.25.3. Salad Products, Inspection Fee.

NOTE: Authority cited: Sections 407 and 42795, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-20-88; operative 7-20-88 (Register 88, No. 26).
- Repealer of section and amendment of NOTE filed 3–13–2001; operative 4–12–2001 (Register 2001, No. 11).

§ 1438.25.4. Salad Products, Minimum Inspection.

NOTE: Authority cited: Sections 407 and 42795, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 6-20-88; operative 7-20-88 (Register 88, No. 26).
- 2. Repealer of section and amendment of Note filed 3-13-2001; operative 4-12-2001 (Register 2001, No. 11).

§ 1438.26. Salad Products, Restricted Produce.

Vegetables which have been prepared for sale in their whole form and found to be in noncompliance of the quality requirements shall not be used for salad products until they are brought into compliance with the quality requirements of Group 4 prior to preparation into salad products. NOTE: Authority cited: Sections 407 and 42681, Food and Agricultural Code. Reference: Section 48059, Food and Agricultural Code.

HISTORY

- New section filed 12–2–70; effective thirtieth day thereafter (Register 70, No. 49).
- 2. Amendment and renumbering from Section 1438.80 filed 1-21-75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.27. Clean Defined.

Clean means free from dirt, sand, or other foreign material which includes additives or preservatives not approved for use in food products.

HISTORY

1. Renumbering from Section 1438.42 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.28. Salad Products, Excessive Moisture Defined and Tolerance.

Excessive moisture means free liquid exceeding 1/2 of 1 c.c. for each pound of finished product within a container, provided, however, the entire lot averages within the specified tolerance for excessive moisture, individual containers may exceed up to double the tolerance and 1/10 of the containers may exceed double the tolerance.

NOTE: Authority cited: Sections 14 and 407, Food and Agricultural Code. Reference: Sections 42684 and 42941, Food and Agricultural Code.

HISTORY

- Renumbering from Section 1438.43 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 6-20-88; operative 7-20-88 (Register 88, No. 26).

§ 1438.29. Salad Products, Tolerance for Defects.

- (a) Compliance or noncompliance with the quality requirements of this article shall be determined in accordance with Table 1, Table 2, and applicable procedures stated in subsection (b), below.
- (b) In applying Table 1 for shredded lettuce and Table 2 for chopped lettuce, the sample containers shall be selected at random as governed by Tables 1 and 2. A lot shall be considered in compliance or noncompliance in accordance with the amount of grams of defects established for each step. When the number of grams of defects in one or more steps is:
- (1) Equal to or less than the number in the "Accept" column, the lot shall be passed.
- (2) Equal to or more than the number in the "Reject" column, the lot shall be rejected.
- (3) More than the numbers in the "Accept" column but less than those in the "Reject" column, the next step shall be completed. The sample product and defects from all steps shall be combined in determining whether to pass or reject a lot.

Table 1. Defect Sampling Plan-Shredded Product

		Cumulative		
	No. of	<i>No</i> .		
Step	Containers	Containers	Accept	Reject
1	2	2	48g	74g
2	2	4	109g	134g
3	2	6	171g	191g
4	2	8	236g	247g
5	2	10	300g	301g

Table 2. Defect Sampling Plan—Chopped Product

		Cumulanve		
	No. of	No.		
Step	Containers	Containers	Accept	Reject
1	2	2	128g	154g
2	2	4	269g	292g
3	2	6	411g	430g
4	2	8	555g	602g
5	2	10	700g	701g

The foregoing sampling plan is based on a 10-pound bag as a sampling unit. If there is any variation from the 10-pound bag as a sample unit (e.g., 1, 5, or 15 pounds), the number of sample containers shall remain constant but the allowable grams shall change proportionally (10%, 50%, 150%) with the size of the container.

NOTE: Authority cited: Sections 14 and 407, Food and Agricultural Code. Reference: Sections 42681, 42684 and 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1438.44 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 4–17–84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 16).
- 3. Editorial correction (Register 84, No. 33).
- 4. Amendment of subsection (b) filed 4-9-85 as an emergency; effective upon filing (Register 85, No. 16). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 8-7-85.
- 5. Amendment of subsection (b) filed 8-1-85; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 85, No. 31).
- 6. Amendment of subsection (b) filed 6-20-86; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 86, No. 25).
- 7. Repealer and new section filed 6–20–88; operative 7–20–88 (Register 88, No. 26).

§ 1438.30. Salad Products, Official Sample to Determine Moisture Content.

Noncompliance of the lot due to excessive moisture content shall be determined by the inspection of three containers in each 100–container lot with one additional container for each additional 100 containers in the total lot provided that not more than one such container is sampled from each master container selected.

NOTE: Authority cited: Sections 14 and 407, Food and Agricultural Code. Reference: Sections 42681, 42684 and 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1438.46 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 6-20-88; operative 7-20-88 (Register 88, No. 26).

§ 1438.31. Disposal Order at Time of Receiving Load of Bulk Lettuce.

HISTORY

1. Amendment filed 9–21–73; effective thirtieth day thereafter (Register 73, No. 38).

- 2. Amendment and renumbering from Section 1438.75 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 12–10–75; effective thirtieth day thereafter (Register 75, No. 50).

§ 1438.42. Standard Containers for Salad Products.

All salad products, before being transported or sold, shall be placed in closed containers which are not tinted or colored unless approved by the Director.

NOTE: Authority cited: Sections 14, 407, 42681 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New sections 1438.50, 1438.51, 1438.52, 1438.53, 1438.54 filed 12-2-70; effective thirtieth day thereafter (Register 70, No. 49).
- Amendment filed 9–21–73; effective thirtieth day thereafter (Register 73, No. 38).
- 3. Renumbering from Section 1438.50 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment of section and NOTE filed 6–20–91; operative 7–22–91 (Register 91, No. 39).

§ 1438.43. Consumer Containers.

NOTE: Authority cited: Sections 14, 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1438.51 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 12-6-77; effective thirtieth day thereafter (Register 77, No. 50).
- 3. Repealer filed 6-20-91; operative 7-22-91 (Register 91, No. 39).

§ 1438.44. Master Containers for Salad Products.

- (a) All standard containers of salad products shall be placed in master containers.
- (b) Closed master containers shall be new. Open master containers may be used provided they are clean.

Consumer containers that are in retail establishment for the purpose of sale directly to consumer need not be in master containers.

HISTORY

- Amendment filed 5-26-71; effective thirtieth day thereafter (Register 71, No. 22).
- Amendment filed 9–21–73; effective thirtieth day thereafter (Register 73, No. 38).
- 3. Renumbering from Section 1438.52 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1438.45. Closed Defined.

Closed means that the container is closed with a lid material of a similar quality to the adjoining portion of the container to the degree that no part of the produce within the container can be removed without opening the container.

History

1. Renumbering from Section 1438.53 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

Article 28. Melons, Other Than Cantaloupes

§ 1442. Melons, Full Slip Defined.

As used in this article, "full slip" means that the fruit has separated from the stem leaving a clean, natural scar, with no portion of the stem remaining attached, and no torn or broken skin on the fruit.

NOTE: Authority cited for Article 28: Sections 42 and 43, Chapter 1404, Statutes of 1974 and Sections 407, 42681 and 42682, Food and Agricultural Code. Reference: Sections 42941, Food and Agricultural Code.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.1. Melons, Standards.

Persian melons, casabas, honeydew and honeyball melons, and watermelons shall be mature but not overripe and shall be free from any of the following defects.

- (a) Mold, decay, and insect injury which has penetrated or damaged the edible portion of the melon.
- (b) Serious damage, due to growth cracks, cuts, bruises, sunburn, softness, or other causes. Damage to any melon which is mentioned in this section is not serious unless it affects the edible portion of the melon.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.2. Melons, Tolerance.

Not more than 10 percent, by count, of the melons in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed one-half of this tolerance, shall be allowed for any one cause.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.3. Melons, Defines Mature.

"Mature," in the case of casabas, honeydew and honeyball melons, and watermelons, means that the appearance from the outside of the melon indicates maturity and that the arils which surround the seeds have been absorbed and also the following:

- (a) In the case of watermelons, that the flesh of the watermelons has not less than 75 percent red color.
- (b) In the case of honeyball and honeydew melons, that the juice of the edible portion contains not less than 10 percent soluble solids as determined by the standard hand refractometer, or that the fruit has been separated from the vine by a full slip which indicates actual maturity. The honeyball melon shall be netted and have pink flesh.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.4. Melons, Soluble Solids Methods.

The soluble solids content of the edible portion of the honeyball and honeydew melons shall be determined by extracting the juice from two plugs of the flesh, one from each of opposite sides of the melons, and taken at approximately one—half the distance between the stem and blossom ends. The plugs shall be approximately one—half of an inch in diameter. That portion of the plug three—eighths of an inch from the outside edge of the rind shall not be included as the edible portion of the plug of flesh.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.5. Honeydew Melons: Soluble Solids; Sampling and Testing Procedure.

- (a) The following procedure shall be used to determine whether honeydew melons in a lot are in compliance with Section 1442.3 with respect to requirements of said section that the juice of the edible portion shall contain not less than 10 percent soluble solids. For the purpose of this section a lot is defined as one group of containers of honeydew melons of the same count size, and the same grade or brand.
- (b) Sampling Method: Selection of Sample Containers. There shall be selected at random from the lot the number of sample containers specified by the following table:

Number of Containers	Sample Containers
in Lot	Required
50 containers or less	
51 to 200	
201 to 400	
401 to 600	

For lots of over 600 containers an additional three sample containers shall be selected for each additional 500 containers or fraction thereof.

(c) Sampling Procedure: Selection of Total Sample of Honeydew Melons to Be Tested. From the sample containers selected in accordance with

paragraph (b), there shall be selected a total sample of honeydew melons for testing in accordance with the following procedure:

- (1) There shall be selected from each sample container the two least mature appearing honeydew melons. These honeydew melons shall comprise the total sample to be tested to determine compliance of the honeydew melons in the lot.
- (d) Testing Method: Determination of the Percent of Soluble Solids. The total sample of honeydew melons selected in accordance with paragraph (c) shall be tested in accordance with the following procedure:
- (1) Remove two plugs from the sides of the honeydew melons according to the procedure specified in Section 1442.4; extract, combine and thoroughly mix the juice obtained, and determine the soluble solids content of this composite juice. If the soluble solids is 10 percent or above, no further testing is required, and the lot shall be deemed to comply with the soluble solids requirement in Section 1442.3.
- (e) Lots of honeydew melons which do not comply with the percentage of soluble solids required by Section 1442.3 as determined by the sampling and testing procedure specified in this section and Section 1442.4 shall be rejected.

HISTORY

- 1. Amendment of subsections (a), (d) and (e) filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2). For prior history, see Register 65, No. 9.
- 2. Amendment and renumbering from Section 1441 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.6. Markings on Containers.

HISTORY

- 1. Renumbering from Section 1441.9 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1442.7. Standard Containers, Melons.

- (a) Except as otherwise provided in this section, all melons shall be packed in standard container numbers 44H, 44I, 44J, 44K, 44L, 44N, or 44O.
- (b) Honeyball Melons. In addition to the containers listed in Subsection (a), honeyball melons may be packed in standard container number 41.
 - (c) Exceptions. This Section does not apply to any of the following:
 - (1) Cantaloupes.
 - (2) Crane melons which are shipped intrastate.
 - (3) Watermelons.
- (4) Melons which are in a retail establishment in possession of a retailer for the purpose of resale directly to consumers.
- (5) Melons which are sold by a producer regularly engaged in the production of melons directly to consumers on the premises where the melons are produced or at a retail stand which is operated by such producer near the point of production. Such retail stand shall not be outside of the county in which the melons were produced.
- (6) Casabas which are shipped intrastate, or when placed loose in container 44M and shipped to the states of Nevada, Oregon, Utah or Washington or British Columbia, Canada. The shipper or person in possession of casabas which are placed in containers 44M and which are intended to be transported or which are being transported out of this state shall, upon request of an enforcing officer, furnish receipts or other evidence as may be reasonably required to show that the conditions of this Section are being met.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- Renumbering from Section 1441.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 8–12–76; effective thirtieth day thereafter (Register 76, No. 33)
- 3. Amendment of subsection (c)(2) filed 8-15-78 as an emergency; designated effective on filing through 9-15-78 (Register 78, No. 33).
- 4. Subsection (c)(2) refiled 9–13–78 as an emergency; designated effective on filing through 10–15–78 (Register 78, No. 39).

- 5. Language of subsection (16) reverted on 10–16–78 to that appearing prior to emergency filing of 8–15–78, by operation of law. Certificate of Non–Compliance filed 10–27–78 as to emergency filing of 9–13–78 (Register 78, No. 43).
- 6. Amendment of subsection (c) filed 7–13–79; effective thirtieth day thereafter (Register 79, No. 28).
- 7. Amendment of subsection (a) and NoTE filed 12–5–96; operative 1–4–97 (Register 96, No. 49).
- 8. Amendment of subsection (a) and amendment of Note filed 10–9–2002; operative 11–8–2002 (Register 2002, No. 41).
- 9. Amendment of subsection (a) filed 6–25–2004; operative 6–25–2004 pursuant to Government Code section 11343.4 (Register 2004, No. 26).

§ 1442.8. Consumer.

As used in this group, consumer means a person that buys melons for use as a food and not for resale.

HISTORY

1. Renumbering from Section 1441.6 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.9. Honeyball Melons, Standard Containers.

HISTORY

- 1. Amendment and renumbering from Section 1441.8 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 8-12-76; effective thirtieth day thereafter (Register 76, No. 33).

§ 1442.10. Melons, Other Than Cantaloupes Closed or Lidded.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New Sections 1441.5 through 1441.9 filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1441.5 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer of section and amendment of NOTE filed 10-9-2002; operative 11-8-2002 (Register 2002, No. 41).

§ 1442.11. Watermelons, Official Sample to Determine Maturity.

Section 1442.3 relating to standards for melons, provides that "mature" in the case of watermelons means that the appearance from the outside indicates maturity; and that the arils which surround the seeds have been absorbed, and that the flesh of the watermelons has not less than 75 percent red color.

In order to provide a uniform method of selecting a sample to determine the maturity of watermelons, one of the two following procedures shall be followed:

- (a) When the outside appearance of watermelons in the lot indicates immaturity, those immature appearing melons shall be cut to determine whether or not the inside indications of immaturity confirm the outside indications, and the maturity of the lot may be determined on that basis. However, in the case of a rejection, enough immature melons must be found to provide sufficient basis to reject the whole load or lot.
- (b) Where the outside appearance of the watermelons does not readily indicate immaturity, the sample of melons from the load or lot shall be taken at random; that is, without respect to appearance or any outside indications of maturity.
- (1) From the load, select at random, five of the melons; cut them and determine their maturity.
- (A) If all of the five melons cut are found to be mature, consider the load or lot to be mature. (In the case of inspection fo the purpose of issuing an "inspection" certificate, and the maturity of the load is being determined by cutting only, then the number cut must be at least 10 melons).
- (B) If one or more of the five melons are found upon cutting to be immature take an additional five melons in the manner described in item (b) above, on all loads or lots up to 10-ton loads. (See item (2) below for loads over 10 tons.)
- (2) When a load or lot of watermelons contains over 10 tons, and the original cutting of five melons (paragraph (b)(1) above) shows one or

Page 186

more immature melons, proceed with selecting additional melons; but the second cutting will be on the basis of one melon for each ton in the load. For example, in a 13–ton lot, the second cut would be on eight additional melons, and the rejectable melons in both the first cut of five and the second cut of eight would be added together to determine the percentage in the total of 13 melons cut.

(3) Any melons selected under method (a) shall not be combined in any way with those cut for method (b).

HISTORY

- Amendment filed 3–16–56; effective thirtieth day thereafter (Register 56, No. 5).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 478 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.12. Watermelons, Overripe.

When the heart has broken loose from the sides of the melon, or it can be lifted out easily by the hand, and in addition, the aril strings are yellow and rubbery, then the melon is considered overripe; in some instances they may also be slimy, but this is not a requirement for rejection.

HISTORY

1. Renumbering from Section 1476 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.13. Watermelons, Rind Rot.

A rejection shall only be based on those melons in which the defect occurs in the edible portion, and particularly not based on outside indications such as bumps, welts, or off-color. To determine that the edible portion is damaged to the extent that the melon is rejectable, cut the melon in any direction, but there must be a distinct brown color or decay in the edible flesh and it must be a realistic amount. If there are outside indications of damage from rind rot, cut the melon through these welts or spots; it may also be necessary to cut the melon lengthwise, or peel the rind off the melon in such a way that it makes the line between the edible flesh and the rind more visible.

HISTORY

1. Renumbering from Section 1477 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.14. Watermelons, Heart Cracks.

Where such a crack does not in any way involve the edibility of a watermelon, it is not to be considered serious; however, such melons, when transported long distances and handled roughly, will break down in the center, and could easily cause the melon to be rejected. If the heart of the melon is split open badly in such a manner as to make that portion of the flesh inedible in the same degree as an overripe condition might appear, it is considered rejectable under the term "other causes." When a melon or the flesh of the melon is referred to as being inedible, we mean that it is damaged and jarred to a condition that is undesirable for the average consumer to eat.

HISTORY

- 1. New Sections 1473 through 1478 filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1473 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.15. Watermelons, Yellow or Tan Colored Spots Within the Edible Flesh.

When one cubic inch or more of the edible flesh of a watermelon is yellow or tan in color, the watermelon so affected is considered as not in compliance with the defect provisions of Section 1442.1.

Compliance with this section of the California Administrative Code shall be determined by the examination of not less than 10 watermelons, selected at random from each load or lot. When the load or lot contains more than 10 tons of watermelons, and the original examinations of the 10 melons show one or more melons seriously damaged by said yellow or tan colored spots, an additional melon for each ton, or fraction thereof, more than the original 10 tons in the load or lot shall be selected and examined. For example: when a load is composed of 12 tons, and the first

10 melons cut contained one or more melons seriously damaged due to this cause, it is required that 2 additional watermelons be selected in the same manner as the first 10 melons, and be cut and the results of these additional cuts be combined with the others to complete the sample for this 12–ton load.

In determining serious damage due to said defects in the edible portion of a single melon, the melon shall be cut in half, from stem to blossom end. If no evidence of yellow or tan colored spots appears on either of the two cut surfaces, the melon shall be deemed to be in compliance without further cutting. If any evidence of yellow or tan colored spots appears on either of the cut surfaces, then each of the two halves shall be cut lengthwise, through the seed cavities, to determine the extent of the damage.

HISTORY

- 1. Amendment filed 7–20–59; effective thirtieth day thereafter (Register 59, No. 12)
- 2. Amendment filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Amendment and renumbering from Section 1474 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1442.16. Watermelons, White Heart.

The characteristic white "V" at the stem is permissible, except if the thin string of white goes beyond the center of the melon, but this white string which extends beyond the center of the melon must be more than three-fourths of an inch in thickness before the melon would be rejected.

HISTORY

1. Renumbering from Section 1475 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

§ 1444.1. Mushrooms, Edible Portion Defined.

 $Note: Authority\ cited: Sections\ 407\ and\ 42684, Food\ and\ Agricultural\ Code.\ Reference:\ Section\ 42941,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. New section filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).
- Repealer filed 10–7–92; operative 10–7–92 pursuant to AB 884, article 6.5, sections 42803 and 42806 (Register 92, No. 41).

Article 30. Nectarines

§ 1446. Nectarines, Standards.

Nectarines shall be mature, but not overripe, and free from the following defects:

- (a) Insect injury which has penetrated or damaged the flesh.
- (b) Split pits which cause an unhealed crack or one or more well healed cracks which, either singly or in the aggregate, are more than 3/8 inch in length.
 - (c) Mold, brown rot, and decay which has affected the edible portion.
- (d) Serious damage due to skin breaks, cuts, growth cracks, bruises, or other causes.

Damage to any nectarine is serious when it causes a waste of 10 percent or more, by volume, of the individual nectarine. NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Editorial amendment filed 5–12–78; effective thirtieth day thereafter (Register 78, No. 19).
- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1446.1. Nectarines, Maturity.

Nectarines shall be considered mature if at the time of picking they comply with one of the following:

- (a) An aggregate area of at least 1 inch in diameter of the surface of the individual fruit has broken from green or dark green to a distinct flecking of light green or a light green which indicates equivalent maturity.
- (b) The shoulders and suture are well developed and filled out. NOTE: Authority cited: Sections 407 and 42684. Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1446.2. Nectarines, Tolerances.

- (a) General Defects. Not more than 10 percent, by count, of the nectarines in any one container or bulk lot may be below the requirements which are prescribed by this article, but not to exceed 5 percent, by count, for any one defect, except split pits.
- (b) Split Pits. An additional tolerance of 10 percent, by count, of the nectarines in any one container or bulk lot may contain nectarines affected with split pits.
- (c) Application. For the purpose of this section, subsection (b) means a total tolerance of 20 percent is allowed for all defects including split pits, but not to exceed 15 percent for split pits alone.

NOTE: Authority cited: Sections 407, 42681, and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 8–31–76; effective thirtieth day thereafter (Register 76, No. 36).

§ 1446.3. Nectarines, Split Pits.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- New section filed 7–7–55; effective thirtieth day thereafter (Register 55, No. 10).
- 2. Renumbering from Section 1443 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Amendment filed 8–31–76; effective thirtieth day thereafter (Register 76, No. 36)
- Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1446.4. Nectarines, Marking Requirements.

In addition to the basic marking requirements of Section 1359, every nonconsumer container of nectarines shall be clearly and conspicuously marked with the following information:

- (a) A numerical size description, followed by the word size, as established in Section 1446.9(c). This requirement shall apply only to volume or loose–filled nonconsumer containers.
- (b) The count description if the nectarines are packed in trays or uniform layers or rows.

- Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1446.6. Nectarines, Variation in Count Tolerance.

HISTORY

- 1. Renumbering from Section 1443.7 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 4-30-75; designated effective 6-1-75 (Register 75, No. 18).

§ 1446.7. Nectarines, Standard Container Requirements.

Nectarines shall be in containers 5, 9B, 10A, 12B, 22B, 22D, 22E, 22G, 22H, 22I, 31, 32, 33, 34, 35, or 36. Container 31 shall only be standard for nectarines which are placed in molded forms.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Amendment filed 5–6–77; effective thirtieth day thereafter (Register 77, No. 19). For prior history, see Register 76, No. 12.
- 2. Amendment filed 6–23–78; effective thirtieth day thereafter (Register 78, No. 25).
- Amendment filed 11–25–80; effective thirtieth day thereafter (Register 80, No. 48).
- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).
- Amendment filed 4–19–85; designated effective 4–20–85 pursuant to Government Code Section 11346.2(d) (Register 85, No. 16).
- Amendment filed 5–5–86; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 86, No. 19).
- 7. Amendment filed 4-16-87; operative 4-20-87 (Register 87, No. 16).
- 8. Amendment filed 5-29-97; operative 6-28-97 (Register 97, No. 22).
- 9. Amendment filed 6-17-98; operative 7-17-98 (Register 98, No. 25).
- 10. Amendment of section and NoTE filed 5-29-2002; operative 5-29-2002 pursuant to Government Code section 11343.4 (Register 2002, No. 22).
- 11. Amendment filed 8–26–2003; operative 8–26–2003 pursuant to Government Code section 11343.4 (Register 2003, No. 35).

§ 1446.8. Nectarines, Molded Forms in Container No. 31.

NOTE: Authority cited: Sections 407 and 42682, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. Renumbering from Section 1443.2 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1446.9. Nectarines, Size Variation and Tolerance, and Size Description Requirements.

- (a) Packed nectarines shall not vary in size between the fruits in any container more than 3/8 inch in diameter when measured through the widest portion of the cross section of the fruit.
- (b) Size variation shall not exceed 5 percent, by count, in any container.
- (c) Nectarines in volume-filled nonconsumer containers marked with one of the size descriptions established below in Column A shall comply with the corresponding requirement in Column B:

	Column B
Column A	Maximum Number of Fruit
Size Description	in a 16 lb Sample
118	112
112	105
108	100
96	90
88	84
84	78
80	75
72	68
70	63
64	57
60	53
56	48
54	45
50	42
48	41
44	36
42	34
40	32
36	29
34	27
32	25
30	23
11 1 440 1	

For sizes smaller than 118 size, the maximum number of nectarines in a 16-pound sample shall be equal to the number of nectarines that would be packed in the corresponding tray-pack size. For example, a 130 tray-pack size would have a maximum of 130 nectarines in a 16-pound sample.

(d) Peento type nectarines in volume-filled nonconsumer containers marked with one of the size descriptions established below in Column A shall comply with the corresponding requirement in Column B:

Column A	Column B Maximum Number of Fruit
Size Description	in a 16 lb Sample
80 .	140
72	128
70	111
64	99
60	93
56	87
54	80
50	77
48	74
44	70
42	68
40	59
36	53
34	50
32	39
30	32

For sizes smaller than 80, no weight/count has been assigned, and are exempt from this Section.

1. New section filed 5–12–78; effective thirtieth day thereafter (Register 78, No. 19).

Article 31. Olives

§ 1448. Olives, Affected by Scale Damage.

Fresh unprocessed olives when offered for sale in wholesale or retail markets are regulated by this section. An individual olive is considered seriously damaged as defined in Section 42950 of the Food and Agricultural Code if scale on the fruit results in definite depressions *and* discoloration of the flesh.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 7-7-55; effective thirtieth day thereafter (Register 55, No. 10).
- Amendment filed 1-4-71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 3. Renumbering from Section 1444 filed 1–21–75; effective thirtieth day thereafter (Register 75 No. 4).
- 4. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 12)

Article 32. Onions

§ 1450. Onions, Standards.

Onions shall be free from the following defects:

- (a) Insect injury which has penetrated or damaged the edible portion of the onion.
 - (b) Mold and decay.
- (c) Serious damage due to sunscald, heat, freezing, sprouting, or other causes. Except as provided by Section 1450.2, damage is serious when it wastes 20 percent, by volume, of the individual onion.

 $Note: Authority\ cited: Sections\ 407\ and\ 42684, Food\ and\ Agricultural\ Code.\ Reference:\ Section\ 42941,\ Food\ and\ Agricultural\ Code.$

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1450.1. Onions, Damage Definition.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Repealer filed 3-22-83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1450.2. Onions, Sprout Damage.

Damage is serious when a sprout is more than one inch in length, measured from the neck of the onion where the sprout emerges to the tip of such sprout, or the onion has become soft or spongy.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 2. Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1450.3. Onions, Tolerances.

Not more than 5 percent, by weight, of the onions in any one container or bulk lot may be below the requirements prescribed by this article.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13).

§ 1450.4. Onions, Markings on Containers.

HISTORY

- 1. New section filed 1–4–71 as an emergency; effective upon filing. Certificate of Compliance included (Register 71, No. 2).
- 2. Renumbering from Section 1445 filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- 3. Repealer filed 4–30–75; designated effective 6–1–75 (Register 75, No. 18).

Article 33. Green Onions and Shallots

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. Repealer of Article 33 (Sections 1452 and 1452.1) filed 3–22–83; effective thirtieth day thereafter (Register 83, No. 13). For prior history, see Register 75, No. 4.

Article 34. Peaches

§ 1454. Peaches, Exceptions.

NOTE: Authority cited: Sections 407, 42682, and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No.
- 2. Amendment filed 5–12–78; effective thirtieth day thereafter (Register 78, No. 19).
- Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.1. Peaches, Permits.

NOTE: Authority cited: Sections 407, 42682 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4)
- Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.2. Peaches, Verification.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).

Repealer filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.3. Peaches, Standards.

Fresh peaches shall be mature, but not overripe, and free from the following defects:

- (a) Insect injury which has penetrated or damaged the flesh.
- (b) Split pits which cause an unhealed crack or one or more healed cracks which, either singly or in the aggregate, are more than 1/2 inch in length.
 - (c) Mold, brown rot, and decay.
- (d) Serious damage due to cuts, skin breaks, growth cracks, bruises, scab, rust, blight, disease, hail, or other causes.

Damage to any peach is serious when it causes a waste of 10 percent or more, by volume, of the individual peach.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.4. Peaches, Maturity.

All varieties of peaches shall be considered mature if, at the time of picking, the shoulders and sutures are well developed and filled. In addition, the flesh of peaches of the Elberta variety shall be a yellowish color and the color in the skin and flesh of varieties of semi-cling and cling peaches shall be that which is characteristic of the variety.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
- Amendment filed 5-4-84; effective upon filing pursuant to Government Code Section 11346.2(d) (Register 84, No. 18).

§ 1454.5. Peaches, Tolerances.

Not more than 10 percent, by count, of the peaches in any container or bulk lot may be below the requirements prescribed by this article. Not more than one-half of this tolerance shall be allowed for any one cause. Individual containers in any lot may contain not more than 1 1/2 times the tolerances specified if the percentage of defects of the entire lot averages within the tolerances.

NOTE: Authority cited: Sections 407 and 42684, Food and Agricultural Code. Reference: Section 42941, Food and Agricultural Code.

HISTORY

- 1. New section filed 1–21–75; effective thirtieth day thereafter (Register 75, No. 4).
